SECTION A: EXECUTIVE SUMMARY

1. WHO ARE WE?

Endumeni is one of the four Local Municipalities located within the District Municipality of Umzinyathi (i.e Nquthu, Msinga and uMvoti local municipality) within the valleys of the Biggarsberg Mountain Range with the two main towns of Dundee and Glencoe located at the base of the Indumeni Mountain.

Endumeni is located on the northern edge of the Umzinyathi District Municipality, and Umzinyathi District Municipality is located in the northern portion of KwaZulu-Natal and is bordered by the Amajuba District Municipality to the North, the Uthukela District Municipality to the South West, the Msinga Municipality to the South and Nquthu Local Municipality to the East. The municipality comprises seven wards.

1.1 OVERVIEW OF THE LOCAL MUNICIPALITIES

From the Context Map depicted above it confirms that Endumeni municipal area is one of four local municipalities which are part of Umzinyathi District Municipality. The local municipalities comprising the District includes: Endumeni Local Municipality (KZ 241); Nquthu Local Municipality (KZ 242); Msinga Local Municipality (KZ 244) & uMvoti Local Municipality (KZ 245).

Table 1 : Overview of the Local Municipalities

Municipal Logo	Municipal Name	Municipal Characteristics
	Endumeni	This municipality is unique, its population is predominantly urbanised or based on commercial farms and unlike the other local municipalities, there is no tribal authority land. The main town is the Commercial centre, which is Dundee; it has most diversified economy, commercial cattle farming and dairy production and is the centre of the Battlefields tourist region.
	Nquthu	This municipality is typically rural and largely tribal authority where the population is largely previously disadvantaged and relatively dispersed and where services are scarce and often at rudimentary levels. The main town is Nquthu and subsistence agriculture is the main activity in the area.
	Msinga	Owing to its rugged terrain Msinga's population is relatively dispersed and where services exist they are concentrated along road infrastructure and water sources such as the Tugela River. The main towns are Pomorey and Tugela Ferry, it's the rural region with subsistence farming.

	Umvoti	This local municipality comprises of urban areas, commercial agricultural areas and tribal authority areas all of which exhibit typical characteristics associated with these settlement types. Service levels in urban areas are high except for informal areas, in commercial agricultural areas they are relatively high as farmers provide their own services and in tribal authority areas they are low to moderate.
---	--------	---

1.2 DEMOGRAPHIC PROFILE

The Endumeni Municipality (KZ 241) comprises the towns of Dundee, Glencoe and Wasbank, together with a number of farms astride MR 33, MR 68 and DR 602. The municipal area consists of 7 wards. Within those wards there are no tribal authorities. The comparative population figures for Endumeni Local Municipality for 2011 and 2016 are depicted in Table 1 below, and indicates that the municipality experienced a strong increase in population growth. This can be attributed to Endumeni Municipality as being one of the major economic centres of the district.

Table 2: Population Size

Municipality	Census 2011			CSS 2016		
	Population	%	Households	N	%	Households
Endumeni	64 862	12.7	16,852	76639	13.8	21134

Source : 1. Statistics SA, Census 2011 and 2016

When such data is projected, by 2021, the population is estimated at 88,416, and by 2026 it is expected to increase to 95,482. Thomas (2002) observes that increasing population has the potential to increase poverty, especially in the absence of sound and responsive economic policies. Such policies include social interventions such as family planning awareness, as well as pro-active government planning for infrastructure development. Global trends seem to link population growth to urbanization. Urban renewal / planning is therefore an area which the Endumeni municipality should focus on for the next few years, in preparation for rising urbanization. The population growth projections are presented below.

Figure 1: Population growth projections

Data Source: Statistics South Africa (2016) with Calculations by The Frontline Group

Consequently, the gradient increase of the Endumeni population is expected to rise from 40 people per square kilometre in 2011, to 59 people per square kilometre in 2026. The current population density in the District is 59 people per square Kilometre, while that of the province and national is 100 and 49 respectively. This is to mean that the current population density in Endumeni is lower than the district, province and nationally. The increase in Endumeni municipality has implications on services delivery, given that with increasing population there is an increasing demand for more basic services. Urban sprawl (characterised by informal settlements and poor living conditions) is a glaring possibility, if there are no strategic and pro-active measures taken to ensure that delivery of basic services does not focus on the current demand only.

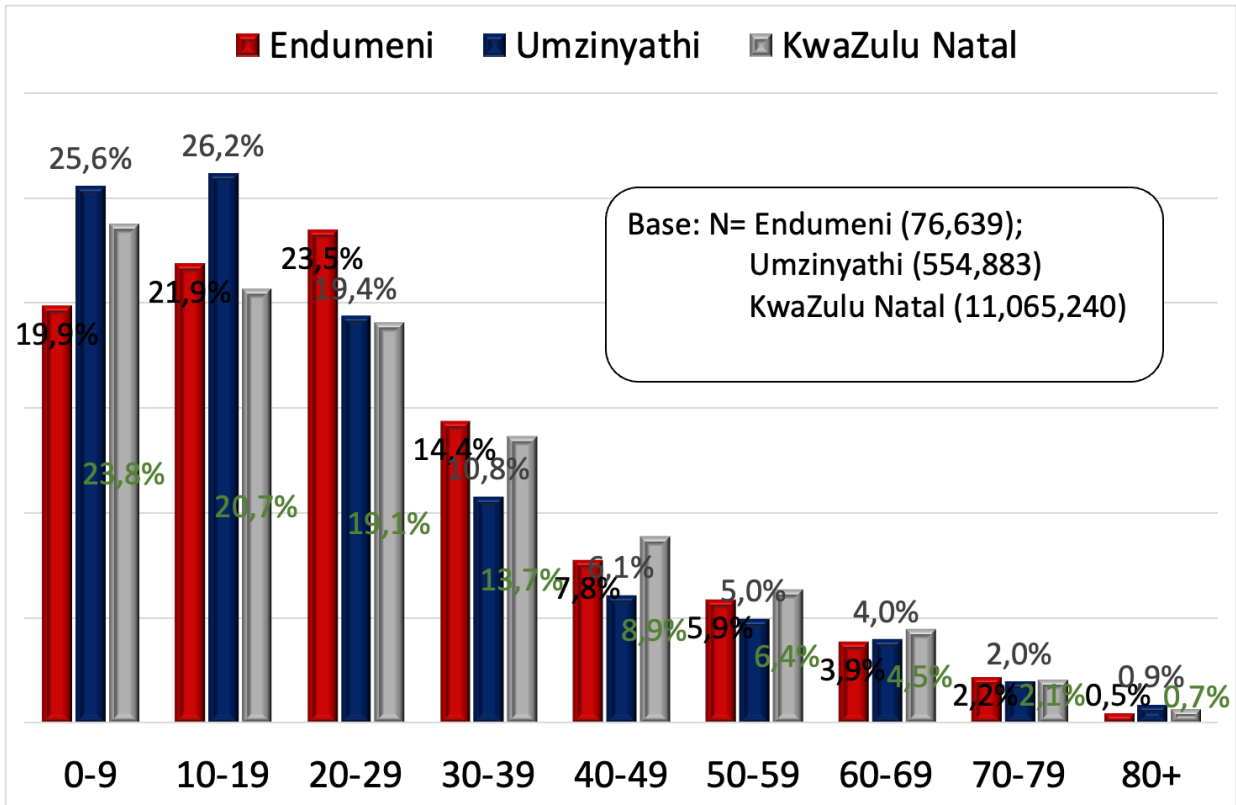

Figure 2: Projections on population density

Source: Statistics South Africa (2016) With Calculations by The Frontline Group

Evidently, in 2016 as the following chart shows, roughly two thirds of Endumeni' s population (65%) is aged under 30 years. The population aged between 20 and 29 (23.5%) is higher than in the district (19.4%) and province (19.1%). When the 30-39 age category is considered, analysis suggests that approximately eight of every ten citizens in Endumeni are under 40 years. A relatively young population requires innovative economic interventions. The dominance of mining and agriculture may pose challenges to job opportunities, if there are no deliberate efforts to find innovative aspects of traditional sectors for integrating young population. A young population also requires responsive government, given the inclination for social unrest among this younger population. It also requires economic and social interventions modelled after the social and economic needs for younger population. Technology innovation, social programmes integrated into schools, sports and re-creation, skills development -all these are critical in responding to the socio-economic demands of a young population.

Figure 3: Population by Age Breakdown

Data Source: Statistics South Africa (2016)

1.3 ECONOMIC PROFILE

1.3.1 CONTEXT

This section which broadly covers the economic profile for the uMzinyathi District, presents the economic indicators. These indicators include annual household income (and then isolating agricultural households), household goods, Gross Value Addition, and annual GDP growth. Household incomes and expenditures are an important measure of livelihood. Household income and expenditure are generally used as a proxy for consumption, and provide a reasonably rational determination of the economic status of households (Falkingham and Namazie; 2001). These indicators used as money metric measures of poverty or affluence. They however tell little of the environment within which such income or expenditure is made and power relations involved in earning or spending. Nevertheless, they remain the best available pointers of economic status.

Other measures of economic performance include Gross value Addition (GVA) and Gross Domestic Product (GDP). GVA is the difference between the value of goods and the cost of materials or supplies that are used in producing them. It is a measure of economic activity which eliminates the duplication inherent in the sales value figure which results from the use of products of some establishments as materials or services by others. Value added is thus defined as the gross receipts of a local economy (in this case Endumeni) minus the cost of goods and services purchased from other economies. Value added includes wages, salaries, interest, depreciation, rent, taxes and profit.

The GDP is the total of all value added created in an economy. The value added means the value of goods and services that have been produced minus the value of the goods and services needed to produce them, the so called intermediate consumption.

1.3.2 ECONOMIC PREDICTION AT INCEPTION STAGES OF COVID 19

SARB governor Lesetja Kganyago said the Covid-19 outbreak would have a major health and social impact, and forecasting domestic economic activity presented unprecedented uncertainty. "With that in mind, the bank expects GDP in 2020 to contract by 6.1 percent, compared to the -0.2 percent expected just three weeks ago. GDP is expected to grow by 2.2 percent in 2021 and by 2.7 percent in 2022."

Kganyago said the supply and demand effects of this extension would reduce growth and deepen it in the short-term, as businesses stay shut for longer and households with income spend less. "This will likely also increase job losses, with further consequences for aggregate demand. The impacts will be particularly severe for small businesses, and individuals with earnings in the informal sector."

The Reserve Bank had registered its concerns and perspective on the Global Impact of Covid 19. The looked at both exogenous and endogenous factors. Undoubtedly, these concerns were shared amongst as business and social partners.

a) Exogenous Effects:

- Trading partners affected directly
- Foreign direct investment was severely undermined and compromised

- Tightening financial markets
- b) Endogenous Effects:
- Decrease in domestic demand
 - Decreased revenue
 - Increased public expenditure to safeguard human health/ social wellbeing

The Covid 19 has seen the economies including our small rural ones experiencing unprecedented “Slowbalisation”. The state of economic shock is what calls for immediate response and intervention as consolidated in this report and other provincial and national reports.

(i) Shutdown/Lockdown Effect

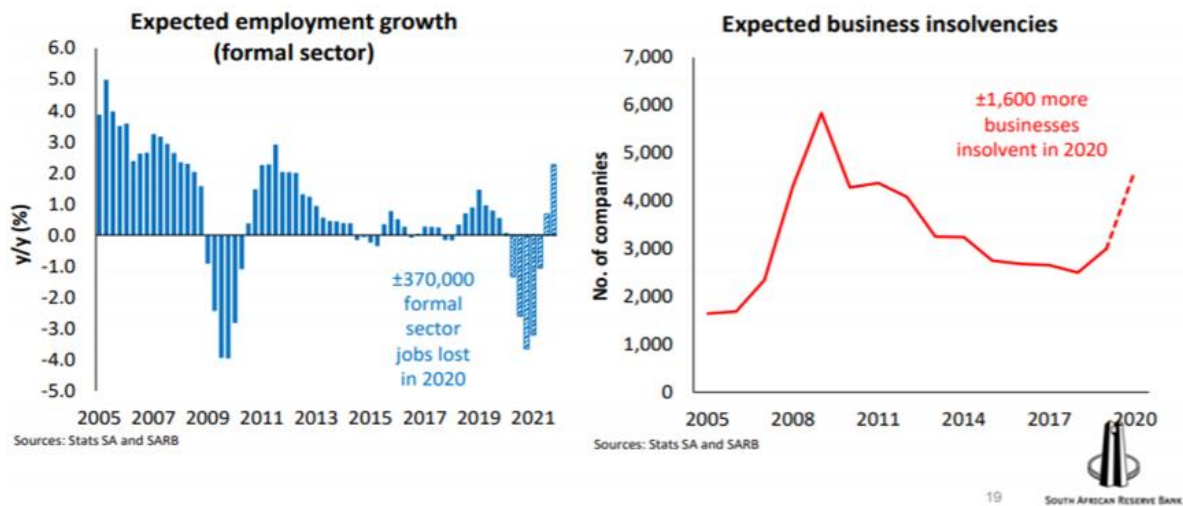

Direct effects of shutdown detract from annual growth

The initial 21 days lockdown was envisaged to carry the potential of slowing down economic growth by 2.6%. Unfortunately it was extended beyond this initial period and leading to an increased and drastic impact on economic front of the country.

(ii) Job Losses Predictions

Partial rebound post-shutdown, but offset by job losses, business failures

The reserve Bank had further predicted serious job losses and substantial business insolvencies as a result of Covid 19. As the country gets back to Level 1, there is clear evidence of such predictions and the recovery plans are purely meant to address these predicted outcomes.

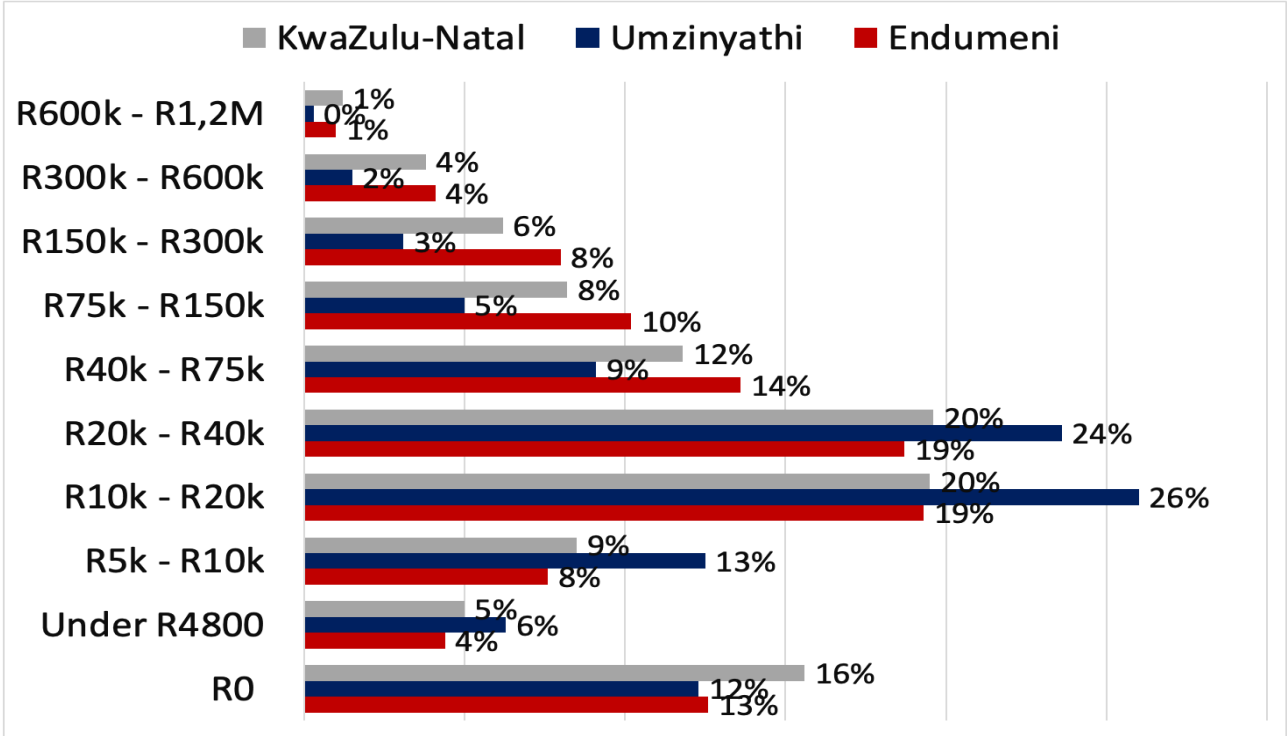

1.3.3 HOUSEHOLDS INCOME

Returning to household incomes, the 2014/15 Living conditions survey concluded that the average household income in South Africa was R138 168 in 2015. During the same period, male headed households earned an average of R165 853 per annum while female-headed households earned almost half as much (R98 911). During the following LCS (2015/16), the highest household expenditure category (32.55%) was on housing, water, electricity, gas and other fuels, with transport following (16.29%) (Statistics South Africa, 2015). The same survey found that 14% of household expenditure goes to miscellaneous goods which include insurance, personal care items and jewellery. Food, beverages and tobacco is the fourth expenditure category at 13.75%.

The 2015 LCS further noted that the average annual household consumption expenditure for black African-headed households had increased to R67 828 in 2015, compared to R55 920 in 2011. This is an average increase of R2382 per year.

The above in view, as illustrated below, the average household in Endumeni municipality earns between R40,000 and R300,000 annually. This is consistent with the national average. It should be noted however that, as expected in an urban municipality, household incomes in Endumeni are higher than in the District and province. That said, the data below shows that the highest concentration of households is around the R20,000 to R75,000 annual income bracket. Economic development interventions should consider improved income generation.

Figure 4: Household Incomes

Data Source: Statistics South Africa (2016)

There are only few agricultural households in Endumeni municipality. Evidently, of the 21,134 households in the municipality (in 2016), only 1654 (which translates to 7.8%) are engaged in agricultural activities. Agricultural Value chain development is a timely intervention given this low number of agricultural households. An interesting dynamic is that of inequality. If we consider that most agricultural households claim not to have any income while an approximately similar number earn between R38000 and R307,000, the inequality gap is wide. This inequality relates to households which engage in subsistence agriculture on one hand, on the other, those which engage in commercial agriculture. Households engaged in subsistence agricultural activities tend to be trapped in low income levels. Historically, these would be black households, with

limited capital for agricultural inputs, limited access to markets and limited access to credit facilities. This inequality requires state intervention -perhaps of a Keynesian type (massive investments to jump start growth).

Figure 5: Agricultural Households

Data Source: Statistics South Africa (2016)

If the annual incomes are translated from households to individuals, as shown below, most of the employed labour force in Endumeni earn between R10,000 and R150,000 annual income (65%). In monthly terms, this would range between R800 and R12500. Considering inflation, the pandemic and economic slowdown, the labour force located within these income brackets are economically vulnerable.

Table 3: Employment Income

	Endumeni	uMzinyathi	KwaZulu-Natal
R0	6,70%	15%	10,70%
Under R4800	3,90%	5,20%	3,70%
R5k - R10k	8,60%	8,90%	6,90%
R10k - R20k	19,10%	23%	18,30%
R20k - R40k	17,70%	14,60%	18,20%
R40k - R75k	15,10%	11,60%	13,50%
R75k - R150k	14,60%	11,50%	12,10%
R150k - R300k	8,80%	5,50%	7,90%

R300k - R600k	2,10%	1,30%	2,80%
R600k - R1.2M	0,40%	0,30%	0,70%
R1.2M - R2.5M	0,20%	0,20%	0,30%
Over R2.5M	0,20%	0,20%	0,20%
Unspecified	2,50%	2,80%	4,90%

Data Source: Statistics South Africa (2016)

1.3.4 HOUSEHOLDS ASSETS

Considering household assets, 94% of all citizens living in Endumeni have access to mobile phones, 84% claim to possess Television set, while about three quarters claim to own a Fridge. These data are consistent with urban settings. Caution should be exercised on access to these assets, given that the orthodox assumptions of ability to pay for them, maintain them and afford the power supply might not apply in South Africa's peri-urban areas as they do in formal settings. There are ongoing conversations around the non-payment of electricity in most townships, for example.

Figure 6: Access to Household Assets

Data Source: Statistics South Africa (2016)

1.3.5 EMPLOYMENT / UNEMPLOYMENT

Turning to employment, consistent with the national economy, the formal sector is the largest employer in Endumeni, employing three quarters of the labor force. Comparatively, this is a higher percentage than in both the District and the province. The informal economy in Endumeni only employs paltry 10.3%, much lower than the District (18.5%) and province (12.6%). This should be an opportunity for the Endumeni municipality to consider SMME support interventions, or business incubation programmes aimed at achieving SMME growth and expansion. Globally, and particularly in the continent, SMMEs provide the highest percentage of employment. South Africa remains an outlier in this context. The trend of increasing numbers of unemployed labor force could be reversed through SMME support.

Table 4: Employment by sector

	Endumeni		uMzinyathi		KwaZulu-Natal	
Do not know	1,60%	242	2%	1,045	2,70%	56,548
In the formal sector	77,10%	11,988	70%	36,377	75,90%	1,583,687
In the informal sector	10,30%	1,601	18,50%	9,594	12,60%	262,032
Private household	11,10%	1,72	9,50%	4,955	8,80%	184,527

Similar to the rest of South Africa, -and particularly urban areas- unemployment rate has increased steadily from 26% in 2015 to 32% in 2020. The impact of the pandemic on employment is yet to be fully realised. However, early indications suggest that Endumeni is likely to reach 38% unemployment by 2026. Rising unemployment creates higher dependency ratios, with the few employed labour force supporting larger /increasing unemployed relatives and friends. This in turn reduces the disposable incomes of the employed labour force, leading to deference of investments. Ultimately this cycle creates layers of economic vulnerability.

Figure 6: Unemployment Rate (Projected)

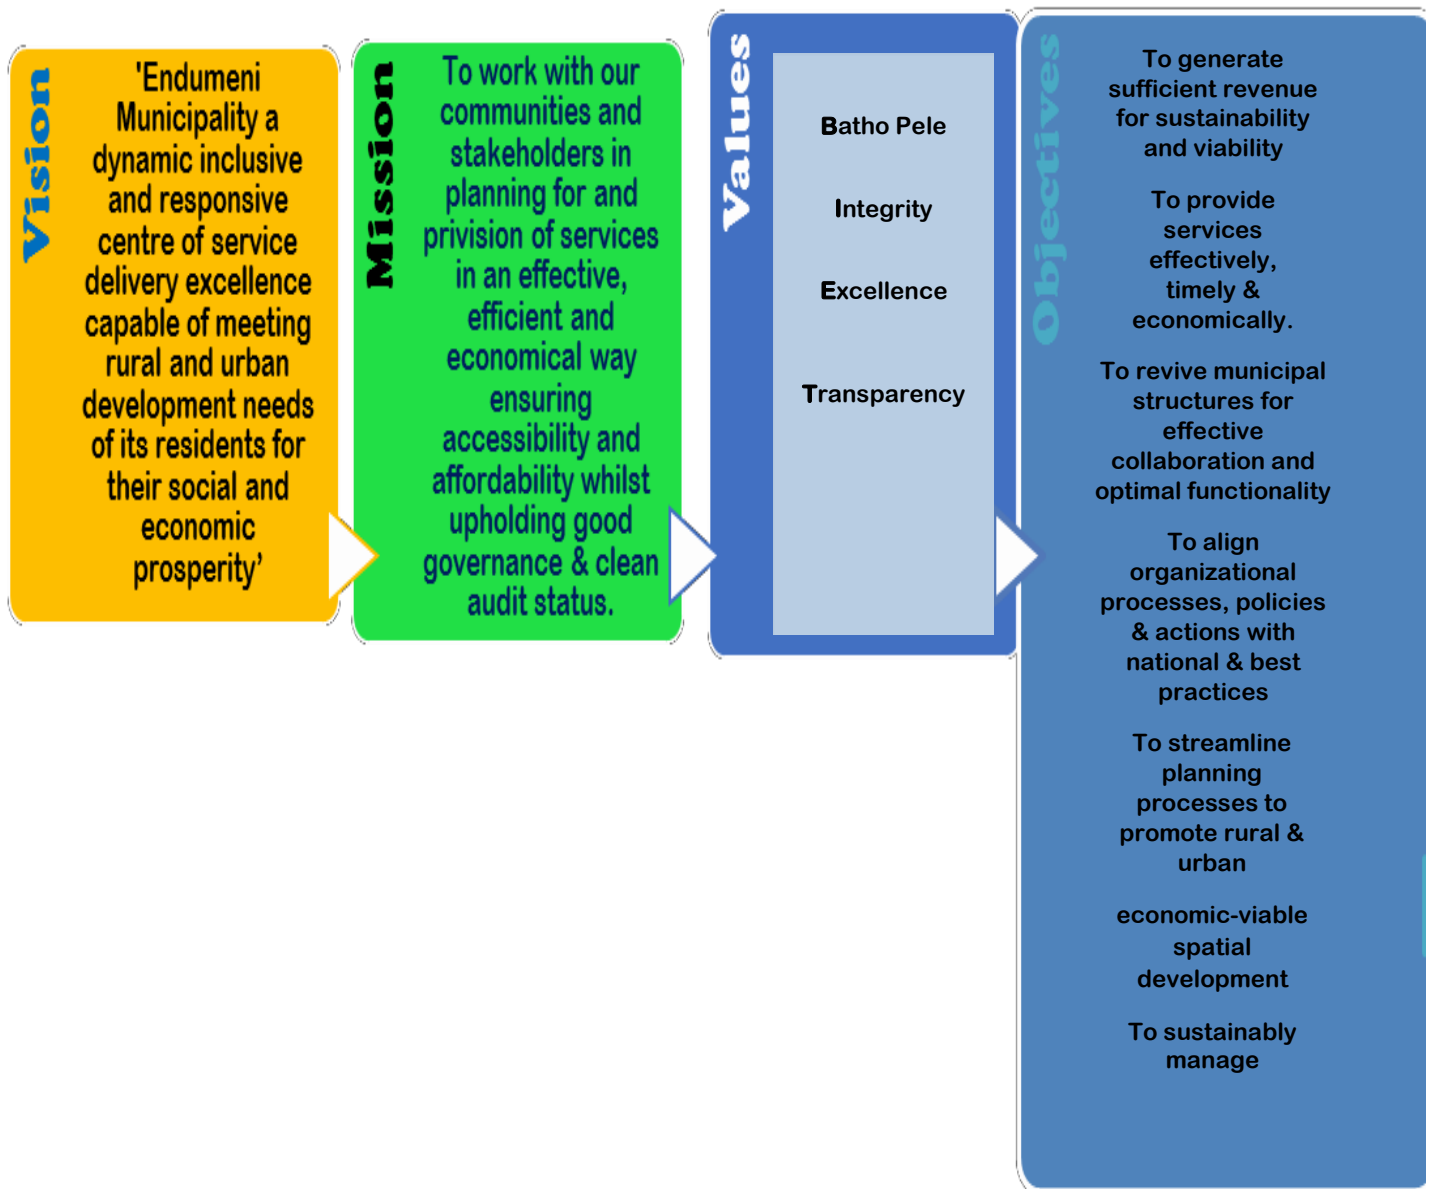

Data Source: Statistics South Africa (2016) With Calculations by The Frontline Group

1.4 LONG-TERM VISION

The newly established municipality following the 2016 Local government Elections has crafted the following long-term vision, mission, values, strategic objectives and strategic priorities for the next five years as provided for below. The new Vision reads as follows:

'ENDUMENI MUNICIPALITY A DYNAMIC INCLUSIVE AND RESPONSIVE CENTRE OF SERVICE DELIVERY EXCELLENCE CAPABLE OF MEETING RURAL AND URBAN DEVELOPMENT NEEDS OF ITS RESIDENTS FOR THEIR SOCIAL AND ECONOMIC PROSPERITY'

The municipality will achieve this vision through the strategic mapping that is aligned with the 6 National KPAs as presented in the following diagram for ease of reference:

		Governance and Traditional Affairs for consideration.		
Phase 2	<p>Gathering of Information and Public Participation</p> <ul style="list-style-type: none"> To collect all relevant information that will inform the assessment of the IDP and its implementation; and To identify the implications and impact for the IDP. 	<ul style="list-style-type: none"> First IDP Rep Forum meeting convened; Draft consolidated data of the situational analysis, programmes and projects; and Consultative Meetings in all seven wards 	September 2020	R 250,000.00

TOTAL COST				R 600,000.00

1.5.1 2021/22 IDP, BUDGET AND PMS PROCESS AND PROGRAMME

The 2021/22 IDP Process and Framework Plan was presented and approved by Council in August 2020, and subsequently submitted to the Department of Co-operative Governance and Traditional Affairs

1.5.2 KEY BROAD CHALLENGES FACING THE MUNICIPALITY

Following a process of a strategic planning session to be held during April 2021, and from the public engagement processes during the compilation of the Draft 2021/22 IDP Review and beyond, a set of challenges per KPA were identified:

1.5.3 IDP IMPROVEMENTS

The municipality has implemented strategic actions aiming at improving delivery are the key performance areas that underpin "a credible IDP". In this context, preliminary assessment process, each national KPA is briefly addressed in turn in this executive summary as called for in the March IDP review process.

The municipality then went a step further by highlighting the "matters" raised by the MEC of Cooperative Government and Traditional Affairs (COGTA) by then identify "action to be taken" as follows.

The Endumeni Municipality is using the back to basics programme to gauge the challenges raised. The back to basics programme aims to:

- ✚ Improve municipal procurement and infrastructure;
- ✚ The need to put people (citizens) first to restore confidence in Local Government The need for the introduction of fraud and corruption measures;

- ✚ The need to promote sound financial management through measures in place to mitigate electricity loss;
- ✚ In the final 2020/21IDP, the municipality will be implementing the Cabinet Legkotla Resolution in terms of Batho Pele
- ✚ Principles: Revision of IDP Framework, incorporating Batho Pele (Section B, 7.1.2)
- ✚ Incorporation of Batho Pele Policy and procedure Manual Service Delivery Charter
- ✚ Service Delivery Implementation Plan
- ✚ Enhance monitoring of Batho Pele principles and monitor their implementation at Local Government level
- ✚ Integrate Batho Pele with the Integrated Development plan and Performance Management System (IDP/PMS) reporting Introducing a new approach to service delivery that puts people at the Centre of planning when delivering services
- ✚ Improving the image of public service (How customers view us)

In the Draft 2021/22 IDP Review has reflected on the status of the following sector plans as they were also highlighted by the MEC in the 2020/21 comments. These Sector plans has been aligned to the 5th generation IDP's. Below are the Sector Plans that have been included in the strategic document:

- ✚ Operations & Maintenance Management Plan Electricity Sector Plan, Integrated Waste Management Plan (IWMP) Pavement Management System (PMS) Consolidated Infrastructure Plan
- ✚ Human Settlement Sector Plan
- ✚ Spatial Development Framework Wall to Wall Land Use Scheme Human Resource Strategy
- ✚ LED strategy

1.6 2020/21 MEC COMMENTS

The Final 2020/21 IDP Review was adopted by Council on the 26 June 2020 and was subsequently submitted to the Department of Co-operative Governance and Traditional Affairs for comments as by Chapter 5, Section 25 of the Municipal Systems Act.

Table 6: The Department of Co-operative Governance and Traditional Affairs has then provided the following comments on the Final 2020/21 IDP Review which have been addressed as part of the Final 2021/22 IDP Review, and the municipality has developed an action plan to address the comments, and are structured as follows:

No.	Key Performance Area	MEC Comments	Response to the MEC Comments	2021/22 Action Plan	Responsible Department
1)	Municipal Transformation and Institutional Development	<p>1. Employment Equity Plan (EEP), Workplace Skills Plan (WSP), Recruitment and Selection Policy and a Human Resources Strategy. To further address the following: develop and implement staff retention strategy; reflect your employment equity targets as per your EEP and also reflect your trainings and quantify your beneficiaries as per your WSP.</p> <p>2. an ICT Policy Framework in your Municipality, I encourage you to also reflect on its implementation.</p>	<p>1. The reviewed Human Capital Strategy is due to be adopted by 30 June 2021 which sets strategic objectives, including staff retention strategy.</p> <p>2. The EE plan due to be adopted by 30 June 2021, sets clear equity targets and, the beneficiaries are listed in our training plan.</p> <p>3. The municipality has set targets in terms of its EE plan which will see it employing more persons</p>	<p>1.The Human Capital Strategy will be implemented in 2021/2022 Financial year.</p> <p>2. The Employment Equity Plan (EEP will be implemented in 2021/2022 financial year.</p>	1. Corporate Services

		<p>3. Municipality has employed one person living with disability. I encourage you to continue with your efforts to employ more people living with disabilities.</p>	<p>within this designated group.</p>		
--	--	--	--------------------------------------	--	--

2)	Local Economic Development	<p>1. The Municipality has not yet revived the LED Forum and is urged to do so urgently, as most of the interventions mentioned need strong partnerships with both Government and the Private Sector.</p> <p>2. Key infrastructure projects need to be spatially referenced as these could be the drivers of investment in the Municipality.</p> <p>3. The Municipality is also urged to make use of the support of the Development Agency.</p> <p>4. The LED Strategy or the Implementation Plan</p>	<p>1. There is an operational LED Forum that sits quarterly.</p> <p>2. The map for our key LED Projects will be developed and incorporated in 2020/21 IDP Review.</p> <p>3. The municipality has signed SLA with uMzinyathi District Development Agency</p>	<p>1. The LED Forum shall sit every quarter.</p> <p>2. All key infrastructure projects will be mapped and incorporated in IDP.</p> <p>3. The municipality will use services offered by uMzinyathi District Development Agency.</p> <p>4. The LED Strategy Implementation Plan shall</p>	Planning and Economic Development
----	----------------------------	---	---	---	-----------------------------------

		needs to be reviewed to include and align with the National LED Framework.	4. The LED Strategy is currently under review with aligned to National LED Framework and incorporated in 2020/21 IDP Review.	always be aligned to National LED Framework.	
3)	Basic Service Delivery and Infrastructure	1. the Municipality is classified as the housing developer in the province and that they have plans in place, in the Housing Sector Plan (HSP), however, I would like to request the Municipality to improve the HSP Implementation Plan by including the budget for the projects to ensure that communities in need have access to housing, as stipulated in the South African Constitution.	1.A feasibility study/ Needs Study needs to be first undertaken prior the draft of an HSP. The department has indicated in the draft budget 21/22 for funding to be available for both documents.	1. The SDF project under advertisement. And the duration of 12 months.	1. Planning Economic Development Services

		<p>2. The Municipality is undertaking solid waste management within its area of jurisdiction and that they have well dealt with the issues of solid waste in the IDP.</p> <p>3. the Municipality has dealt with transportation issues in the IDP, however, the Municipality needs to prioritise the development of Local Integrated Transport Plan (LITP).</p>	<p>2. The municipality notes and agree with the MECs comments.</p> <p>3. The municipality attempted to seek for external funding from various departments. There was one feedback from MISA that they were dedicating their budget to COVID-19 programmes. The municipality is undergoing a on a financial strain to include this project in the budget, we do seek for help from</p>	<p>2. The municipality will strive to ensure that waste collection is continuous and targets are met.</p>	<p>2. Technical Services</p> <p>3. Planning Economic Development Services</p> <p>4. Technical Services</p>

		4. the Municipality is the electricity provider, however there is no indication of how the Municipality undertake the maintenance of electricity infrastructure.	the relevant department DOT. 4. The municipality is in progress in developing the maintenance of electricity infrastructure Plan and will be adopted by 30 June 2021		
4)	Municipal Financial Viability and Management	1. The procurement plan is not attached to reflect on alignment of the procurement plan timeframes with the SDBIP to ensure that the projects are being executed in accordance to the expectation created. 2. The Municipality should ensure that the Operations and Maintenance Plans	1. Procurement Plan will be submitted on the final IDP Review. 2. Endumeni Municipality is in process of developing Electrical maintenance Plan and Civil maintenance Plan.	1.The procurement plan is aligned with the SDBIP. 2.The Electrical Maintenance plan will be submitted to council by 30 June 2021 for approval and Civil Maintenance Plan will be developed in 2021/22 financial Year.	3.Budget and Treasury Office

		are attached and ensure that the Operations and Maintenance Plans are supported by a budget. The Operations and Maintenance Plans should accommodate a realistic budget towards repairs and maintenance, if not near the norm of 8% of PPE value.			
5)	Good Governance and Public Participation	<ol style="list-style-type: none"> 1. Your Municipality is commended on the coverage and reporting on the Good Governance KPA. 2. all Municipalities are expected to implement the Batho Pele Principles. Your Municipality has not developed the Batho Pele Policy and Procedure Manual and 			1. Corporate Services

		<p>the Service Delivery Improvement Plan (SDIP) (including the identification of 3 services to be improved) as recommended in the IDP Framework Guideline. The Municipality is therefore advised to finalise the Draft Batho Pele Policy and to develop the SDIP to ensure compliance with the Batho Pele requirements.</p> <p>3. With regards to IGR, please indicate in your discussions if strategic pronouncements from National and Provincial structures are discussed and progress monitored</p>			
--	--	---	--	--	--

		<p>at the IGR structures. Further, also please indicate if the reports from the IGR structures are tabled to Council.</p> <p>4. Fast-track the development, adoption and implementation of the Community Participation Plan, as it promotes public participation.</p> <p>5. You are encouraged to provide updated status information on the Audit Committee as the 2016 functionality is outdated. Please indicate if the risk register includes fraud risk.</p>			
--	--	--	--	--	--

		6. Recommended that you enhance the Good Governance SWOT analysis by also including Opportunities and Threats.			
6)	Cross Cutting Intervention	1. Municipality has compiled with Section 26(e) of the MSA and Sections 12 (1) and Sections 20 of the Spatial Planning and Land Use Management Act (SPLUMA), (Act No 16 of 2013) which requires your Municipality to develop the Spatial Development Framework (SDF) and ensure that is included as an annexure to your IDP. The SDF is required to be in compliance with Section 2(4) of the Local	1. The municipality has received confirmation from the Department Agriculture Land Reform and Rural Development for the Endumeni SDF 5 year cycle.	1. The SDF project under advertisement. And the duration of 12 months. 2. The municipality is going through a financial strain. The Precint Plan will not be funded internally however the municipality has made alternative means to find funding from another sector department and the Umzinyathi Local Economic Agency.	1. Planning and Economic Development

		<p>Government Planning and Performance Management Regulations, 2001 (Reg. 796 of 2001) and the provisions of Section 21 of the SPLUMA, 2013 (Act 16 of 2013).</p> <p>2. The IDP and SDF do include the current population, however it lacks to provide population projections over a 5 year period. As per SPLUMA requirements the documents are to include the population growth estimates over a 5 year period and needs to be spatially represented.</p>			
--	--	---	--	--	--

		<p>3. the IDP identifies current housing projects and outlines the various challenges aligned to these projects, however there is a lack of future human settlement projects provided.</p> <p>4. The IDP and SDF include the existing infrastructure and service provisions in the district, however it does not provide future projections based on needs for the next 5 years.</p> <p>5. The vision in the IDP does not include a timeframe (indicating that it is a long term vision), further the IDP vision reflected in the SDF which the spatial vision shows alignment</p>			
--	--	--	--	--	--

		<p>too, is not the same as in the IDP. The Municipality is to ensure the alignment of the documents and the vision.</p> <p>6. the strategic mapping section of the IDP be aligned to the SDF. The IDP lacks on providing spatial guidance on development and outlining the desired spatial growth of the Municipality.</p>			
	Other key observations:				
7)	Strategic thrust of the 6 KPAs and the Service Delivery and	1. The situational analyses conducted did not conclude with the identification of key challenges. The key	1. The Endumeni municipality has made amendments on Section D (Goals, Objectives and	2. The amending of Section D was adopted by council on the 29 January 2021 for 2020/2021 IDP Review.	3. Planning and Economic Development

	Budget Implementation Plan	<p>challenges are not well defined or clearly explained. It is strongly recommended that the Municipality adhere to the format as contained in the IDP. The Municipality has not clearly articulated the difference between Objectives and Strategies in Section D of the IDP. The Goals, Objectives and Strategies have also not been unpacked as per the 6 KZN KPAs. The Municipality is encouraged to follow the IDP Framework Guideline and National Treasury's Framework on Managing Programme</p>	Strategy) and E2 (Implementation Plan).

1.7 ENDUMENI PERFORMANCE MANAGEMENT SYSTEMS (PMS)

Performance Management is a strategic approach to management, which equips leaders, managers, employees and stakeholders at different levels with a set of tools and techniques to regularly plan, continuously monitor, periodically measure and review performance of the organization in terms of indicators and targets for efficiency, effectiveness and impact. Chapter 6: of the Municipal Systems Act (No. 32 of 2000) requires municipalities to:

- ✚ Develop a performance management system;
- ✚ Set targets, monitor and review performance based on indicators linked to their IDP;
- ✚ Publish an annual report on performance for the organization, staff, the public and other spheres of government; Incorporate and report on a set of general indicators prescribed nationally by the minister responsible for local government; Have their annual performance report audited by the Auditor-General; and
- ✚ Involve the community in setting indicators and targets and reviewing municipal performance. In addition, the 2001: Municipal Planning and Performance Regulations states that:
 - ✚ Performance Management System must entail a Framework that describes and represent how the municipality's cycle and process of performance management, including measurement, review, reporting and improvement, will be conducted;
 - ✚ Performance Management System must inter alia comply with the requirements of the Systems Act, relates to the municipality's employee performance management processes and be linked to the municipality's IDP. Endumeni Local Municipality is in the process of reviewing its 2020/21 Organizational Performance System as required in terms of Chapter 6 of the Municipal Systems Act, 32 of 2000. The documents which are being developed as part of the process are as follows and consideration is currently being given to the conversion to an electronic system:
 - ✚ Implementation Plan
 - ✚ Organizational and Departmental Score Cards PMS Framework
 - ✚ Individual Performance plans Individual Performance Agreements

The Organizational and Departmental scorecards contain strategies in line with SALGA guidelines and are further compliant with the Provincial Growth and Development Strategy. It has been recommended that the Performance Plans that have been developed for Section 57 Managers be made applicable and be cascaded to all employees. However, to date

Endumeni Municipality Performance Management System has been refined to include a system of individual staff appraisals as contemplated per section 67 of the Municipal Systems Act.

The municipality is in the process of cascading PMS to all other levels of the organization. Given the fact that the performance of a municipality is integrally linked to that of staff, it is therefore important to link organizational performance to individual performance and to manage both at the same time, but separately. In this way all employees are working towards a common goal. It is however the responsibility of the employer, to create an environment, which the employees can deliver the objectives and the targets set for them in their performance plans and job descriptions. The SDBIP gives effect to IDP and budget. The budget gives effect to the strategic priorities. The SDBIP therefore serves as a "contract" between the administration, council and community expressing the goals and objectives set by the council as quantifiable outcomes that can be implemented by the administration over the next twelve months. This provides the basis for measuring performance in service delivery against end-of- year targets and implementing the budget. The SDBIP measures the operational plan, whilst the PMS measures performance at a strategic level. The SDBIP and the PMS provides the vital link between the mayor, council (executive) and the administration, and facilitates the process for holding management accountable for its performance.

1.8 INDIVIDUAL PERFORMANCE AGREEMENTS

These Performance Agreements define the municipality's performance expectations of all employees.

1.8.1 WORK PLANS

This is Integral part of the Performance Agreement and informed by institutional outputs and targets as captured in the municipality's IDP and SDBIP.

1.8.2 PERFORMANCE REVIEWS

To be conducted on a quarterly basis and will culminate into an annual performance appraisal.

1.8.3 PERFORMANCE EVALUATION SYSTEM

Employees will be assessed on the extent to which objectives under each KPA have been achieved A score of 1 to 5 should be allocated to each KPA (depending on extent to which the objectives have been achieved).

1.8.4 PERFORMANCE BONUS

Performance bonuses will be paid in recognition of employee outstanding performance in terms of their respective performance reward and incentive policies. Such bonuses will only be paid to employees that completed an assessment period of 12 months.

1.8.5 CHALLENGES IN IMPLEMENTING PERFORMANCE MANAGEMENT

The performance management challenge in organizations has many dimensions in today's environment and creating focused initiatives to overcome these challenges is not a silver bullet approach.

In many cases remuneration schemes are driving the performance system, which creates a number of long term consequences in organizational behaviour and culture.

In other cases, senior management are so focused on scorecard management to hold people accountable that the creation of the scorecard is not aligned with key performance areas, but rather a number of deliverable projects and tasks.

Bring in the Gaps identified by AG and Internal Auditors

In the 2021/2022 financial year the municipality will intensify its efforts towards cascading PMS beyond Section 54 and Managers as it was the case in the current financial year, but to include all other levels throughout the organization.

1.9 FIVE YEAR ACTION PLAN

Basic to five-year action programme are the projects which have been reviewed and are shown in Section E. The process of reviewing, revising and updating the 2020/21 IDP Projects Table was coordinated internally by the Municipality. A series of meetings were convened both individually and collectively with the various line-function Departments within the Municipality, as well as with the key Sector Departments, and ward committees in order to identify projects that accord with the Municipality's Vision. This resulted in the compilation of a comprehensive schedule of proposed projects as shown in Section F. The inputs from the Consultative Sessions conducted during the month of November 2020 have also been incorporated as far as possible in this regard.

1.10 MEASURING & MONITORING PROGRESS

PMS cannot be implemented or transplanted directly from another municipality or copied from a textbook or taken from the shelf. Each municipality is unique due to the ever-changing environment in which they operate. Therefore, when developing and implementing a PMS, it is essential that this intervention is properly understood and tested, before implementation, in order to facilitate effective performance. No PMS operates in isolation as it is a systems wide intervention which ensures control in the ultimate achievement of vision/mission, strategic objectives and goals. It is therefore important that the municipality takes ownership and "grows" into its own PMS. It is important to note that a PMS is dynamic and will change and develop over time to reflect the unique features and institutional dynamics of the municipality. The municipal environment is no exception to this phenomenon and this policy framework lends itself to improvement and positive changes with even more focused alignment to its objectives and performance levels.

With regard to the measuring and monitoring progress in implementation of the IDP and Budget, Endumeni Local Municipality has once again engaged in the process of reviewing and compiling the Service Delivery Budget & Implementation Plan for 2021/22 which will serve as a monitoring tool to assist the Mayor, the municipal manager, senior managers; staff; strategic partners and the community at large in evaluating the performance of the Municipality. As far as possible the 2021/22 SDIBIP attempted to translate the 2021/22 IDP and Budget in specific actionable objectives; strategies and key performance indicators. This will generally allow for a situation where early detection of poor performance, and measures to mitigate poor performance can easily be established.

Although generally the focus for service delivery performance is associated with the Key Performance Area of Basic Services & infrastructures which involves the delivery of prioritized capital physical projects at ward and community level, however the benefit of the implementation of the PMS system through the SDIBIP is to ensure that the performance of the Endumeni Local Municipality in its totality is monitored, by equally monitoring and evaluating all six legislated Key Performance Areas of a Municipality including the following:

-  Cross-Cutting Interventions
-  Basic Service Delivery & Infrastructure
-  Good Governance and Public Participation

-  Municipal Transformation and Institutional
-  Development Local Economic Development (LED)
-  Financial Viability and Management

1.10.1 MUNICIPAL GOALS, OBJECTIVES & CHALLENGES

Municipal goal is to ensure that all community members within Endumeni have access to basic services. This can be achieved by ensuring that the Key Performance Areas are implemented effectively and efficiently. The following table highlights the municipal priority objectives aligned to the KZN KPAs and demonstrate how they will be measured:

Table 7: MUNICIPAL GOALS, OBJECTIVES & CHALLENGES

SECTION B: PLANNING & DEVELOPMENT PRINCIPLES

1 INTRODUCTION & BACKGROUND

The Integrated Development Planning (IDP) is a process through which municipalities prepare a strategic development plan, for a five-year period. The Integrated Development Plan (IDP) is a product of the integrated development planning process. The IDP is a principal strategic planning instrument which guides and informs all planning, budgeting, management and decision-making in a municipality. All municipalities (i.e. Metros, District Municipalities and Local Municipalities) have to undertake an integrated development planning process to produce integrated development plans (IDPs), as the IDP is a legislative requirement and its legal status supersedes all other plans that guide development at local government level.

1.1 LEGISLATIVE FRAMEWORK

Constitution of the Republic of South Africa, Act 108 of 1996

Section 152, 153 and 195 of the Constitution compels municipalities to perform specific duties and in a certain way including:

Provide a democratic and accountable government for local communities

Ensure a provision of services to communities in a sustainable manner Promote social and economic development

Promote a safe and healthy environment

To encourage the involvement of communities and community organizations in the matters of local government

Municipal Systems Act (No. 32 of 2000)

According to Chapter 5, Section 32 of the Municipal Systems Act of 2000, all municipalities (i.e. Metros, District Municipalities and Local Municipalities) are required to undertake an integrated development planning process to produce Integrated Development Plans (IDPs). A credible IDP is a single, inclusive strategic plan for the municipality that:

✚ is based on up to date and accurate statistics and empirical data that can inform strategic decision making;

- ✚ integrates, co-ordinates and facilitates service delivery, local economic development and wise land use management within the municipal area of jurisdiction;
- ✚ forms the general basis on which annual budgets are developed;
- ✚ aligns the resources and capacity of the municipality with the implementation of the plan; and
- ✚ assists a municipality in fulfilling its constitutional mandate as developmental local government; and facilitates the processes sustainability through vigorous public participation.

Chapter 5, Section 34 of the Municipal Systems Act (No 32 of 2000), requires municipalities to review their IDP's on annual basis to address amongst others but not limited to:

Comments from the MEC for Co-operative Governance need to be considered as part of the IDP preparation process; Consider new Council priorities; New policies (e.g National Development Plan, Provincial Growth and Development Strategy, Growth Path Municipal Structures Act (No. 117 of 1998)

The Municipal Structures Act No 117 of 1998 makes provision for the powers and functions between the districts and local municipalities. It mandates district wide functions to the district municipalities and critical day to day functions to the local municipalities.

Municipal Finance Management Act (MFMA), (No.56 of 2003)

The annual Budget and the IDP have to be linked to one another and that has been formalized through the promulgation of the Municipal Finance Management Act (2004).Chapter 4 and Section 21 (1) of the Municipal Finance Management Act indicates that at least 10 months before the start of the budget year, table in the municipal Council a time schedule outlining key deadlines for:

- ✚ The preparation, tabling and approval of the annual Budget; The annual review of:
- ✚ The integrated development plan in terms of Section 34 of the Municipal Systems Act, and The Budget related policies
- ✚ The tabling and adoption of any amendments to the integrated development plan and budget related policies,
- ✚ The consultative processes forming part of the processes referred to in subparagraphs (a), (b) and (c).

✚ The Disaster Management Act No 53 of 2002

The Disaster Management Act No 53 of 2002, Section 25 requires that each municipality must, within the applicable municipal disaster management framework:

- ✚ Prepare a disaster management plan for its area according to the circumstances prevailing in the area;
- ✚ Co-ordinate and align the implementation of its plan with those of other organs of state and institutional role-players; regularly review and update its plan: and through appropriate mechanisms, processes and procedures established in terms of Chapter 4 of the Local Government: Municipal Systems Act, 2000 (Act No. 32 of 2000), consult the local community on the preparation or amendment of its plan.
- ✚ A disaster management plan for a municipal area must-
- ✚ Form an integral part of the municipality's integrated development plan;
- ✚ Anticipate the types of disaster that are likely to occur in the municipal area and their possible effects; place emphasis on measures that reduce the vulnerability of disaster-prone areas,
- ✚ Seek to develop a system of incentives that will promote disaster management in the municipality; identify the areas, communities or households at risk;
- ✚ Take into account indigenous knowledge relating to disaster management; promote disaster management research;
- ✚ Identify and address weaknesses in capacity to deal with possible disasters;
- ✚ Provide for appropriate prevention and mitigation strategies;
- ✚ Contain contingency plans and emergency procedures in the event of a disaster,
- ✚ A district municipality and the local municipalities within the area of the district municipality must prepare their disaster management plans after consulting each other.
- ✚ A municipality must submit a copy of its disaster management plan, and of any amendment to the plan, to the National Centre, the disaster management centre of the relevant province, and, if it is a district municipality or a local municipality, to every municipal disaster management centre within the area of the district municipality concerned.

- ✚ Local Government: Municipal Planning & Performance Management Regulations, 2001. In 2001, the Municipal Planning and Performance Management Regulations were issued to further provide guidelines and clarity on the issues of IDP and PMS.
- ✚ The Municipal Planning and Performance Management Regulations provide details on the requirements of the IDP and Performance Management System.
- ✚ Summarily, it is important to indicate this draft 2021/22 IDP has to a greater extent been accordingly compiled and adopted in accordance with the provisions of the above described legislative frameworks and we are very much confident that the final IDP is not just legally compliant but more importantly presents itself as a credible plan that will continue to guide and direct the development agenda of Endumeni Local Municipality up to the year 2022 and beyond.

1.2 ALIGNMENT WITH PROVINCIAL AND NATIONAL POLICIES

1.1.1 MEDIUM TERM STRATEGIC FRAMEWORK (MTSF)

The 2014-2022 MTSF focuses on the following priorities:

- ✚ Radical Economic transformation, rapid economic growth and job creation; Rural Development, land and agrarian reform and food security;
- ✚ Ensuring access to adequate human settlements and quality basic services Improving the quality of education & training;
- ✚ Ensuring quality health care and social security for all citizens; Fighting corruption and crime; and
- ✚ Contributing to a better Africa and a better world Social Cohesion and nation building.

1.1.2 THE NATIONAL 14 OUTCOMES

Outcome 1: Improved quality of basic education

Outcome 2: A long and healthy life for all South Africans

Outcome 3: All people in South Africa are protected and feel free

Outcome 4: Decent employment through inclusive economic growth

Outcome 5: A skilled and capable workforce to support inclusive growth

Outcome 6: An efficient, competitive and responsive economic infrastructure network.

Outcome 7: Vibrant, equitable and sustainable rural communities with food security for all

Outcome 8: Sustainable Human Settlements for and improved quality of household life

Outcome 9: A responsive, accountable, effective and efficient Local Government

Outcome 10: Environmental Assets and natural resources that are well protected and continually enhanced

Outcome 11: A better South Africa, a better safer Africa and world

Outcome 12: A development orientated public service and inclusive citizenship

Outcome 13: An inclusive and responsive social protection system

Outcome 14: Nation building and Social cohesion

1.3 SPATIAL PLANNING AND LAND USE MANAGEMENT ACT NO. 16 OF 2013 (SPLUMA)

1.1.3 DEVELOPMENT PRINCIPLES

The Sustainable Development Goals (SDGs)

“The concept of a developmental state – which applies both to the country and the province is rooted in the Millennium Development Goals (MDGs) adopted by the United Nations. Indeed both the national and provincial government's development strategies and interventions should be viewed in the context of, and measured against, these international development goals which apply to all countries across the globe. The MDGs which need to be achieved by 2015 are:

-  Eradication of extreme poverty and hunger
-  Halve the proportion of people with less than R6.00 per day
-  Reduce by half the proportion of people who suffer from
-  hunger Achievement of universal primary education
-  Ensure that all boys and girls complete a full course of primary schooling Promotion of gender equality and empowerment of women
-  Eliminate gender disparity in primary and secondary education preferably by 2005, and at all levels by 2015

- ✚ Reduction in child mortality
- ✚ Reduce by two thirds the mortality rate among children under five Improvement of maternal health
- ✚ Reduce by three quarters the maternal mortality ratio Combating HIV/AIDS, malaria and other disease
- ✚ Halt and begin to reverse the spread of HIV/AIDS
- ✚ Halt and begin to reverse the incidence of malaria and other major diseases Ensuring environmental sustainability
- ✚ Integrate the principles of sustainable development into country policies and programmes; reverse loss of environmental resources Reduce by half the proportion of people without sustainable access to safe drinking water
- ✚ Achieve significant improvement in lives of at least 100 million slum dwellers, by 2020
- ✚ Developing a global partnership for development
- ✚ Develop further an open trading and financial system that is rule-based, predictable and non-discriminatory, includes a commitment to good governance, development and poverty reduction— Nationally and Internationally
- ✚ In cooperation with the developing countries, develop decent and productive work for youth
- ✚ In cooperation with pharmaceutical companies, provide access to affordable essential drugs in developing countries
- ✚ In cooperation with the private sector, make available the benefits of new technologies specific information and communication technologies

1.4 THE NATIONAL DEVELOPMENT PLAN: VISION 2030

The National Development Plan has been prepared by the National Planning Commission, which was appointed by the President and it is not a government department. The purpose of the National Planning Commission serves to advice government on issues impacting long term development. The National Development Plan has a vision and targets to be achieved from now till 2030.

The National Development Plan is a step in the process of charting new path for the country. By 2030, the plan seeks to eliminate poverty and reduce in quality and create employment and it

serves to change the life chances of millions of the people. The National Development Plan mainly seeks to address the following main challenges:

- ✚ Too few people work;
- ✚ The standard of education for most black learners is of poor quality; Infrastructure is of poor quality and under maintained;
- ✚ South Africa remains a divided society;
- ✚ Corruption is wide spread; and
- ✚ Public services are uneven and often of poor quality.

The 2030 targets which are aimed to be achieved by the National Development Plan are as follows:

- ✚ Economy and employment
- ✚ Reducing unemployment rate by 20% in 2011 to 14% by 2020, and 6% by 2030;
- ✚ creation of 11 million jobs by 2030;
- ✚ Economic Infrastructure
- ✚ People with access to electricity should rise from 70% in 2010, to 95% by 2030;
- ✚ Transition to a low carbon economy
- ✚ Reducing of green gas emissions by 2025; Inclusive rural economy
- ✚ An additional of 643 000 direct jobs and 326 000 indirect jobs in agriculture, agro – processing and related sectors by 2030; Education, training and innovation
- ✚ 80% of the schools and learners to achieve 50% and above in literacy, mathematics and science in grades 3, 6 and 9.
- ✚ Improve education and training graduation rate to 75% by 2030;
- ✚ Health care for all
- ✚ Under 20 age group should largely be an HIV free generation Social protection
- ✚ Number of public works jobs should rise from the present level to about 1 million in 2015, and then to about 2 million by 2030;
- ✚ Building safer communities
- ✚ In 2030; people living in South Africa feel safe and have no fear of crime;
- ✚ Fighting corruption and enhancing accountability a corruption free society and high adherence to ethics and government accountable to its people

- ✚ Transforming society and uniting the country Living society where opportunities are not being determined by race and birth right, seek a united, prosperous and non – racial society

1.1.4 THE REVISED PROVINCIAL GROWTH & DEVELOPMENT STRATEGY

Table: Alignment of the Provincial Growth and Development Strategy to the municipal sectors

The Vision Statement is:

“By 2035 KwaZulu-Natal will be a prosperous Province with a healthy, secure and skilled population, living indignity and harmony, acting as a gateway to Africa and the World.”

The Mission Statement is:

By 2035, the PROVINCE OF KWAZULU-NATAL should have maximized its position as a gateway to South and Southern Africa, as well as its human and natural resources so creating a safe, healthy and sustainable living environment.

Abject poverty, inequality, unemployment and the current disease burden should be history, basic services must have reached all of its people, domestic and foreign investors are attracted by world class infrastructure and a skilled labour force.

The people will have options on where and how they opt to live, work and play, where the principle of putting people first, living together in dignity and harmony, and where leadership, partnership and prosperity in action, has become a normal way of life.

1.1.5 THE REVISED 2016 KZN PGDS CONTINUES TO:

- ✚ Be the primary growth and development strategy for KwaZulu-Natal, but now to 2035;
- ✚ Mobilise and synchronise strategic plans and investment priorities in all spheres of government, state owned entities, business, higher education institutions, labour, civil society and all other social partners, in order to achieve the desired growth and development goals, objectives and outcomes;
- ✚ Spatially contextualize and priorities interventions so as to achieve greater spatial equity;
- ✚ Guide clearly defined institutional arrangements that ensure decisive and effective leadership, robust management, thorough implementation and ongoing inclusive reviews of the growth and development plan; and

- ✚ Provide a firm basis for monitoring, evaluation and reporting, as well as a framework for public accountability.

Table 8: This Revised PGDS puts forward 31 strategic objectives to achieve seven strategic goals, as indicated in the table below.

2016 PGDS STRATEGIC GOALS and OBJECTIVES	
STRATEGIC GOAL No	STRATEGIC OBJECTIVE 2016
1. <i>INCLUSIVE ECONOMIC GROWTH</i>	<p><i>Develop and promote the agricultural potential of KZN</i></p> <p>Enhance sectoral development through trade investment and <i>business retention Enhance spatial economic development</i></p> <p>Improve the efficiency, <i>innovation and variety</i> of government-led job creation programmes</p> <p>Promote SMME and entrepreneurial development</p> <p>Enhance the Knowledge Economy</p>
2. <i>HUMAN RESOURCE DEVELOPMENT</i>	<p>Improve early childhood development, primary and secondary education Support skills development to economic growth</p> <p>Enhance Youth and adult skills development and life-long learning</p>

<p>3. <i>HUMAN AND COMMUNITY DEVELOPMENT</i></p>	<p>Eradicate poverty and improve social welfare services New Wording</p> <p>Enhance health of communities and citizens</p> <p>Safeguard and enhance sustainable livelihoods and food security New Wording Promote sustainable human settlements</p> <p>Enhance safety and security</p> <p>Advance social cohesion and social capital New Wording</p> <p>Promote youth, gender and disability advocacy and the advancement of women</p>
<p>4. <i>INFRASTRUCTURE DEVELOPMENT</i></p>	<p>Development of seaports and airports New Wording</p> <p>Develop road and rail networks Develop ICT infrastructure</p> <p>Ensure availability and sustainable management of water and sanitation for all Ensure access to affordable, reliable, sustainable and modern energy for all Enhance KZN waste management capacity</p>
<p>5. <i>ENVIRONMENTAL SUSTAINABILITY</i></p>	<p>Enhance resilience of ecosystem services</p> <p>New Wording Expand the application of green technologies Adapt and respond climate change</p>

6. GOVERNANCE AND POLICY	Strengthen policy, strategy coordination and IGR Build government capacity Eradicate fraud and corruption Promote participative, facilitative and accountable governance
7. SPATIAL EQUITY	Enhance the resilience of new and existing cities, towns and rural nodes, ensuring equitable access to resources, social and economic opportunities Ensure integrated land management use across the Province, ensuring equitable access to goods and services, attracting social and financial investment

1.1.6 UMZINYATHI DISTRICT MUNICIPALITY – DISTRICT DEVELOPMENT MODEL

The model is to be perfected, improved and adapted in the process of implementation in each Province & District area guided by the overall objectives of improving and achieving co-ordinated and integrated planning, budgeting and implementation between the 3 spheres and sectors in the district space.

The implementation of the DDM requires: -

- ✚ Establishment of the District structures and management frameworks which are integrated with the existing OSS framework
- ✚ Developing ONE PLAN in each District space through a 3 phased process:
 - ✓ A district Profile Assessment report
 - ✓ A short term ONE PLAN (18months – 2yrs horizon)
 - ✓ A longer term ONE PLAN (25-year plan)

Ensure that we bring to life the aspirations of The People Shall Govern & Bring government closer to the people. Developmental change is shaped and owned at district level in partnership with communities, citizens and social partners.

The profile will serve as a basis for discussion and engagements on the baseline and priorities for developing a ONE PLAN for the Districts, by the newly established District Hubs. It is a Status Quo Analysis and a Short-Term Action Plan identifying immediate service delivery actions, and catalytic activities aimed at unlocking developmental projects (Stabilisation Phase).

The profile will:

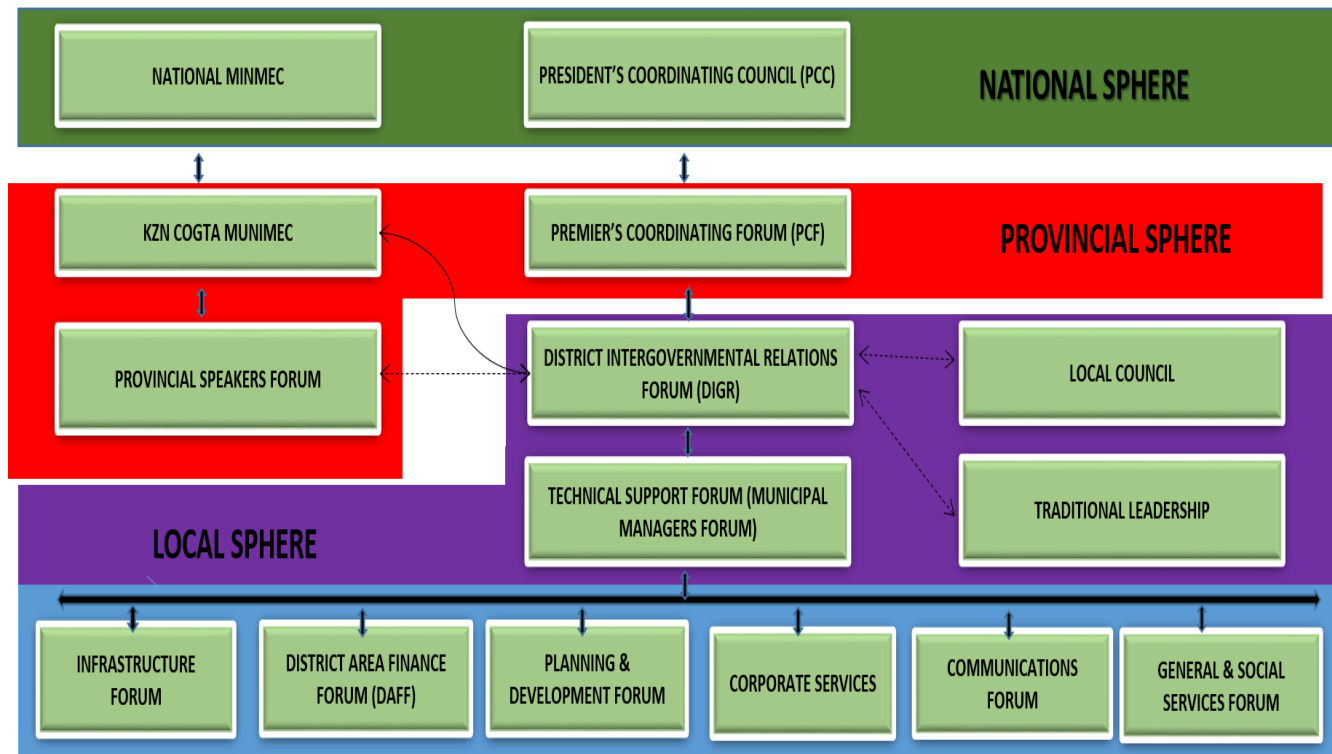

- ✚ provide the District Hub members with a brief overview of the District demographics, and development profile.
- ✚ provide a high level assessment of the key strategies and priorities for improvement and transformation in the following: - economic positioning, spatial restructuring, infrastructure engineering, housing and services provisioning, and governance and management.
- ✚ identify and collate all current sector and sphere commitments (projects and investments) in the District area for the next 18 months.
- ✚ Identify catalytic projects.
- ✚ Identify key gaps and areas of misalignment between SDF, IDP and DGDP and gaps between sector plans with the DGDP, SDF and IDP.

1.1.7 DISTRICT DEVELOPMENT MODEL (DDM) OBJECTIVES

To achieve coherent governance: -

- ✚ a coordinated District & Metro level approach to business by all 3 spheres- “we are going to do away with this fragmented approach to development.”
- ✚ 44 Districts and 8 Metros will be the high impact zones for the country.
- ✚ Redirect and confirm Co-operative governance & Integrated collaborative planning and implementation undertaken at a District and Metro level by all 3 spheres.
- ✚ Institutionalized Long term co planning in ONE PLAN per District & Metro towards Sustainable Development and Spatial Transformation & Equity.
- ✚ Integrated Services
- ✚ Strengthened M&E
- ✚ M/DDM is a practical Intergovernmental Relations (IGR) mechanism for all three spheres of government & SOE's to work jointly and to plan and act in unison
- ✚ Ensure that we bring to life the aspirations of The People Shall Govern & Bring government closer to the people. Developmental change is shaped and owned at district level in partnership with communities, citizens and social partners

CURRENT IGR STRUCTURE

1.5 THE STATE OF THE NATION ADDRESS – 2021 (SONA)

President Cyril Ramaphosa has presented the State of the Nation Address (SoNA) to a joint sitting of the two Houses of Parliament (National Assembly and National Council of Provinces) 11 February 2021 at 19H00. President Cyril Ramaphosa's first State of the Nation Address (SoNA) to the joint sitting of the two houses of Parliament since his appointment in the office in 2019.

Fighting Covid 19 Pandemic

Almost a year since the Covid-19, the government and the South Africans must do everything in their means to contain and overcome the pandemic. The president stated that vaccination must be taken to save lives and reduce infections.

Economic recovery

President has said the budget has been reprioritised and many programmes have been postponed. He also stated that over the past year the country has experienced a decline in growth and significant increase in unemployment. The unemployment rate is 30,8%.

"The Social and Economic Relief Package that was introduced in April 2020 is the largest intervention of its kind. It has identified measures worth a total of 500 billion and 10% of our GDP

to provide cash directly to the poorest households, provide wage to support workers and to various form of relief to struggling businesses'' said President Ramaphosa.'

The government has prioritised for interventions in the Economic Reconstruction and Recovery Plan:

1. Massive rollout of infrastructure throughout the country

We have now developed an infrastructure investment project pipeline worth R340 billion in network industries such as energy, water, transport, and telecommunications.

2. Massive increase in local production

The second priority intervention of the recovery plan is to support a massive increase in local production and to make South African exports globally competitive.

This will encourage greater investment by the private sector in productive activity.

3. An employment stimulus to create jobs and support livelihoods

The largest numbers of jobs will be created by the private sector in several industries as the economy recovers. However, the public sector has a responsibility to stimulate job creation; both through its policies and through direct job creation opportunities.

4. Rapid expansion of our energy generation capacity

Necessary regulations have been amended and the requirements clarified for municipalities to buy power from independent power producers. Systems are being put in place to support qualifying municipalities. Government will soon be initiating the procurement of an additional 11 800 MW of power from renewable energy, natural gas, battery storage and coal in line with the Integrated Resource Plan 2019. Despite this work, Eskom estimates that, without additional capacity, there will be an electricity supply shortfall over the next five years, as old coal-fired power stations reach their end of life.

Ramaphosa stated that during the economic damage caused by COVID-19, South Africa's agricultural sector has performed remarkably well. He further stated that they are pursuing programmes to assist smallholder and emerging farmers with market access to develop skills across the entire agricultural value chain and increase the number of black farmers.

5. District Development Model

The President said that there will be efforts made to strengthen the local government infrastructure and accelerate service delivery through the District Development Model.

The model brings all three spheres of government to focus on key priorities and implementation of critical high impact projects.

The president said that they need to strengthen Criminal Justice System to ensure that perpetrators face justice.

He also mentioned that issues affecting children, including improving school-readiness, ECD planning and funding, protection against preventable diseases, policy reform around child welfare and reducing violence against children need to be given attention.

State of the Province Address (SOPA)

Honorable Premier of the Province of Kwa- Zulu Natal has presented the State of the Province Address (SoPA) in front of the Provincial Executive, including the Speaker, Deputy Speaker and the Secretary on 26 February 2021.

Agriculture

- ✚ Agricultural programmes for graduates
- ✚ Establishment of Agri-Hub programmes
- ✚ Environmental sustainability

Transport

- ✚ SANRAL Projects
- ✚ Bridges and having access to facilities
- ✚ Road safety
- ✚ Public transport- safety and stability

Education

- ✚ Access to quality education

Health

- ✚ Covid-19 Fight
- ✚ Vaccine roll-out plan

Social development

- ✚ Building good governance, ethical and development state
- ✚ Fighting crime
- ✚ Combating Gender based Violence

Radical Economic Transformation

- ✚ Operation vula fund
- ✚ Industrialisation
- ✚ Tourism development
- ✚ Establishment of coastal smart cities and realising vision 2030
- ✚ Port infrastructure
- ✚ Building a thriving economy and job creation
- ✚ Internship and learnerships programmes

1.1.8 CHALLENGES WE HAVE HAD TO FACE SINCE FEBRUARY 2016

- ✚ International Geopolitical Uncertainties Persistent
- ✚ Low Levels of Economic Growth Continued Drought

1.1.9 HIGHLIGHTS OF PROGRESS WE HAVE MADE IN THE LAST YEAR

- ✚ Build and inclusive economy that creates decent jobs
- ✚ Transform our rural Areas
- ✚ Ensure decent living conditions and sustainable human settlements
- ✚ Improve and Expand Education and Training Security
- ✚ Fight crime and corruption
- ✚ Build a United nation and promote social cohesion
- ✚ Commitment to accountability in pursuit of Good Governance

1.1.10 THE SEVEN (7) KZN PRIORITIES

The following are the seven (7) KZN Priorities that each municipality as an implementing agent should strive to address / achieve:

- ✚ Job creation;
- ✚ Human Resource Development;
- ✚ Human & Community Development; Strategic Infrastructure;
- ✚ Environment Sustainability;

-  Governance & Policy
-  Spatial equity

1.6 GOVERNMENT POLICIES AND IMPERATIVES AND HOW THE MUNICIPALITY APPLIES AND ADDRESSES THEM

Table 9: The following table demonstrates the Government Policies and Imperatives and how Endumeni Municipality applies / addresses them:

GOVERNMENT POLICY	MUNICIPAL ACTION
Medium Term Strategic Framework (MTSF)	The municipality has housing projects that have been approved by the Department of Human Settlement for implementation in ward 6 & 5. Ensuring access to adequate human settlements and quality basic services.
The 14 National Outcomes	<p>The municipality adopted the 2020/21 IDP planning processes and that has been the guiding tool throughout the review process;</p> <p>Endumeni Municipality has implemented a number of community work programmes including amongst others war rooms in all 7 wards, Youth, HIV/AIDS programmes, etc.;</p> <p>Endumeni ensures that Ward Committees are representative and are fully participate in community consultation processes around the IDP, budget and other strategic service delivery issues;</p> <p>Endumeni ensures that the issues raised by the Auditor General are addressed through an action plan</p>

Millennium Development Goals	The municipality of Endumeni will be benchmarking with the City of Dundee Scotland, with the aim of developing a global partnership for development
National Development Plan	<p>Endumeni LM has developed an LED Regeneration Strategy that has initiated projects and programmes that will promote economic growth and development and respond to the NDP.</p> <p>Infrastructure Plan is geared towards providing economic support infrastructure that will facilitate</p>
PGDP/PGDS	The revised PGDS has 7 strategic goals, there is significant alignment in terms of the strategic objectives identified in section D of the 2021/22 draft IDP
Umzinyathi District Growth & Development Strategy	The municipality is working together with Umzinyathi District Municipality to ensure that there is alignment within the district family of municipalities
SPLUMA	The Municipality is in the process of finalizing the wall to wall scheme that promotes social inclusion, spatial equity, desirable settlement patterns, rural revitalisation, urban regeneration and sustainable development;
State of The Nation Address (SONA)	The Endumeni Municipality has adopted a LED regeneration strategy in line with the 5 th generation IDP. The strategy amongst other issues addresses job creation, boosting economic growth & labour market.

	<p>The municipality has housing projects that have been approved by the Department of Human Settlement for implementation in ward 6 & 5.</p> <p>The municipality in collaboration with Buffalo Coal, Department of Education are in a process of building a school.</p>
<p>State of the Province Address (SOPA)</p>	<p>Crime and corruption, land issues are accounted for in the policies that exist within the governance of Endumeni Through the B2B programme Endumeni Local Municipality plays it role in ensuring the capacity and ability of the state.</p>
<p>Back to Basics Policy</p>	<p>The municipality has appointed a B2B Champion to ensure that the monthly and quarterly reports are submitted to National & Provincial Cogta. The B2B programme has been incorporated to the 2018/19 – 2021/22 IDP an up to date Action plan has been signed & sent to Cogta</p>
<p>The Seven (7) KZN Priorities</p>	<p>Endumeni ensures that all the 7 KZN Priorities are considered in each development. This means that, all projects that are implemented are within the 7 provincial priorities and this is evident with the project lists provided in the IDP.</p>

SECTION C: SITUATIONAL ANALYSIS

1 DEMOGRAPHIC CHARACTERISTICS

1.1 POPULATION SIZE

The Endumeni Municipality (KZ 241) comprises the towns of Dundee, Glencoe and Wasbank, together with a number of farms astride MR 33, MR 68 and DR 602. The municipal area consists of 7 wards. Within those wards there are no tribal authorities. The comparative population figures for Endumeni Local Municipality for 2011 and 2016 are depicted in Table 1 below, and indicates that the municipality experienced a strong increase in population growth. This can be attributed to Endumeni Municipality as being one of the major economic centres of the district.

Table 10: Population Size

Municipality	Census 2011			CSS 2016		
	Population	%	Households	N	%	Households
Endumeni	64 862	12.7	16,852	76639	13.8	21134

Source : 1. Statistics SA, Census 2011 and 2016

When such data is projected, by 2021, the population is estimated at 88,416, and by 2026 it is expected to increase to 95,482. Thomas (2002) observes that increasing population has the potential to increase poverty, especially in the absence of sound and responsive economic policies.

Such policies include social interventions such as family planning awareness, as well as pro-active government planning for infrastructure development. Global trends seem to link population growth to urbanization. Urban renewal / planning is therefore an area which the Endumeni municipality should focus on for the next few years, in preparation for rising urbanization. The population growth projections are presented below.

Figure 7: Population growth projections

Data Source: Statistics South Africa (2016) with Calculations by The Frontline Group

Consequently, the gradient increase of the Endumeni population is expected to rise from 40 people per square kilometre in 2011, to 59 people per square kilometre in 2026. The current population density in the District is 59 people per square kilometre, while that of the province and national is 100 and 49 respectively. This is to mean that the current population density in Endumeni is lower than the district, province and nationally. The increase in Endumeni municipality has implications on services delivery, given that with increasing population there is an increasing demand for more basic services. Urban sprawl (characterised by informal settlements and poor living conditions) is a glaring possibility, if there are no strategic and proactive measures taken to ensure that delivery of basic services does not focus on the current demand only.

Figure 8: Projections on population density

Source: Statistics South Africa (2016) With Calculations by The Frontline Group

Evidently, in 2016 as the following chart shows, roughly two thirds of Endumeni' s population (65%) is aged under 30 years. The population aged between 20 and 29 (23.5%) is higher than in the district (19.4%) and province (19.1%). When the 30-39 age category is considered, analysis suggests that approximately eight of every ten citizens in Endumeni are under 40 years. A relatively young population requires innovative economic interventions. The dominance of mining and agriculture may pose challenges to job opportunities, if there are no deliberate efforts to find innovative aspects of traditional sectors for integrating young population. A young population also requires responsive government, given the inclination for social unrest among this younger population. It also requires economic and social interventions modelled after the social and economic needs for younger population. Technology innovation, social programmes integrated into schools, sports and re-creation, skills development -all these are critical in responding to the socio-economic demands of a young population.

Figure 9: Population by Age Breakdown

Data Source: Statistics South Africa (2016)

1.2 EDUCATION AND HIV PROFILE

The role of education in development is no longer in question, given the trajectory of most developed countries. In this regard, Ilhan (2011) notes that there is no society which can develop without investment in human capital. Increased social and economic benefits are associated with higher educational attainment (Ilhan, 2011).

The Endumeni municipality website reports that the municipality hosts ten primary schools, six high schools and 'various pre-primary schools'-without giving the specific number of these pre-primary schools. There is also a nationally renowned centre for the physically and mentally handicapped – The Pronobis School and Adult Training Centre, as well as the Educational Environmental centre which accommodates learners from across the country. Notwithstanding, the 2019/20 Integrated Development Plan laments the shortage of schools in the municipality, observing that the current educational institutions do not meet the population demand.

When educational attainment data for the Endumeni population is compared with the district and the province, the presence of several educational institutions does seem to pay off. This

conclusion is arrived at based on the relatively small percentage (4%) who have no formal education in Endumeni, compared to 21% in the district and 9% in the province. Evidently, the municipality records higher percentage of learners who have attained matric, than in the district and the province. The same applies to undergraduate and postgraduate achievement.

Figure 10: Highest Educational Achievement

Data Source: Statistics South Africa (2016)

Turning to HIV prevalence, South Africa posts the highest number of HIV positive citizens in the world (7.7million-which translates to 20.4% of the population. South Africa is a signatory to the 2016 United Nations political declaration of HIV/AIDS, aimed at achieving 90% of HIV positive patients aware of their status, 90% of those aware should be undergoing treatment, and 90% of those under treatment should demonstrate suppression. This target is known as the 90-90-90 principle. According to the South African Aids Council (SANAC), South Africa has made significant progress towards the 90-90-90 targets. In this light, by 2018, the country had attained the first 90 target, 68% on the second target and 88% on the third target (SANAC, 2018)

Even then, the number of HIV positive citizens living in Endumeni seems to have increased from 11,236 in 2015 to 13,227 in 2021. This number is projected to increase to 14,555 by 2025. This report however cautions that the threat of the pandemic should not so much be measured in terms of those infected, but in terms of progress towards the 90-90-90 target. As shown below, the number of HIV deaths seem to have decreased from 220 per year in 2015, to 191 in 2021. Projections suggest that the decrease will remain steady to 170 in 2026. This decline is consistent with the national efforts to achieve the 90-90-90 targets. The Endumeni municipality could create its own database of the 90-90-90 targets, and work towards achieving such target.

Figure 11: HIV Prevalence and Mortality

1.3 HOUSEHOLD TYPES

Turning to household types, it is important to note that decent housing matters in terms of improved access to health and the ability to participate in the labour market. Decent housing plays a critical role in savings, and investment, in addition to enabling positive social consequences such as identity and self-esteem (Harris and Arku, 2006). These benefits allow better living standards.

In 2016, there were 21 134 households in Endumeni local municipality. This is approximately one fifth of the total number of households in uMzinyathi district. The growth of households is expected to rise steadily to 29,700 in 2026. Interventions in social housing are an important consideration, to avoid urban sprawl. The growth of households is illustrated below.

Figure 12: Projections of Household Growth

Data Source: Statistics South Africa (2016) With Calculations by The Frontline Group

The type of dwelling does link with poverty or social mobility. In particular, overcrowded housing is synonymous with poor living conditions (making this phenomenon an indicator of poverty (See Leventhal and Newman 2010 and Lund et al. 2010)). Poor access to basic services by and large, depends on the type of a household. Thus said, as illustrated below, most household types are houses (65.5%) followed by traditional dwellings (15.3%) and flats (6.4%). 6.2% of all households in Endumeni are informal dwellings (shacks), which is more than 1.5 times the rate of informal dwellings in uMzinyathi (3.49%)

In terms of ownership, 42.7% of households in Endumeni are owned and fully paid off. This percentage is much lower than the district (54.9%) and the province (61.9%). It is worth noting that Endumeni has a reasonable percentage of social housing compared to the district and the province.

Figure 13: Types of Dwellings

Globally and in South Africa, household headship is an important indicator of the overall characteristics of a given household. According to Rosenhouse, household heads are summed to occupy an hierarchical relationships, they are regularly present in the household they make major decisions in the household and, they provide economic support to the rest of the household members (Rosenhouse 1989:4). On this basis, women headed households are often more vulnerable than those headed by their male counterparts. Numerous studies suggest that employed women tend to earn lesser than men, they often have less time to engage in productive market labour -due to care work-, they are discriminated against in access to opportunities (Buvinic and Gupta, 1997). Buvinic and Gupta (1997) further attribute the vulnerability of female headed households to teen pregnancy, as well as political conflicts. Furthermore, the means test approach to social welfare access requires women to leave their care work in order to access social grants. This is an either-or choice in most cases. All these factors enable poverty in female headed households.

The above in perspective, there are more male headed households in Endumeni (56%) than the opposite. The case is different in uMzinyathi, where 59% of the households are female headed. Endumeni's percentage of lower female headed households than male headed, is consistent with trends in urban areas. Rural areas tend towards a higher number of female headed areas. It is noteworthy, however, that the percentage of female headed households in Endumeni is slightly higher than the national average.

Figure 14: Household Heads

Data Source: Statistics South Africa (2016)

1.4 SERVICE DELIVERY PROFILE

Shortly after 1994, the South African government adopted a developmental local government, guided by Chapter 7 of the Constitution of the Republic of South Africa Act 108 of 1996. This turn was aimed at reversing breaking the structures of the apartheid system, part of which discriminated against delivery of basic services to the black population. The commitment (and promise) to deliver on basic services, however, takes place in a highly charged social and political space, with citizens demanding faster momentum, and as noted earlier, changing demographic profiles which require pro-active strategy by the state. The local government sphere is the closest to citizens, and therefore at the frontline of service delivery demand -and related conflicts.

Statistics South Africa (2016) reports that two decades on, significant strides have been made. The 2016 Community Survey (2016) reported that nationally, 89,8% of households had access to piped water, 63,4% used flush toilets connected to either the public sewerage or to a local septic system, 63,9% of households receive refuse removal services, and finally, that 87,6% of households had access to electricity. The survey however cautioned that these figures are more dynamic on provincial and district levels, and, they differ, sometimes significantly between urban and rural settings.

1.5 ACCESS TO WATER

Turning to Endumeni, the Buffalo River and Wasbank River serve the Endumeni municipality well. The main tributaries of Buffalo River are Njiwati, Sterkstroom or Impathi, the Pondenshalana, Nyende, Eerstelling, Basangoma and Blood Rivers. Wasbank River's main tributaries are Mkomazana, KwaMatchokuza, Busana, Klipspruit, Biggarsgatspruit and Blinkwater Streams. Groundwater resources, perennial rivers and streams and stored water in farm dams are the main sources for stock watering purposes, while river flow and stored water in larger dams are the main sources for irrigation, although high-yielding production boreholes may also be important sources of irrigation water in certain areas.

Regarding perennial river flow the Endumeni area is reasonably well-watered with most of the streams. There are also smaller perennial streams on the Dundee plateau. Portable water is supplied via 5 storage dams and a pipeline from the Buffalo River, which is also reticulated by the local authority. There is a water borne sewerage reticulation system, of which the majority of erven is served by this system. The average dry weather flow is 5 mega litres with the plant having been upgraded to a capacity of 12 mega litres to support development initiatives. It is important to note that the biggest threat in the area is the potential pollution of freshwater sources (surface and groundwater) through decanting of mines (Dysfunctional and active).

Accordingly, at 95% access to piped water (denoted as service provider), seems higher than national average (89.8%), the province (77%) and the district (53%). It is safe to conclude that access to water in Endumeni is impressively high for industrial and residential purposes.

Figure 15: Access to Water

Data Source: Statistics South Africa (2016)

1.6 ELECTRICITY

Electricity is supplied via the national Eskom grid and reticulated by the local authority. In this arrangement, as shown below, 80% of the population has access to pre-paid metres in the house. Or conventional (Eskom) metres. This percentage is roughly the same as the national average of 81.6% who have access to electricity. Notably, the high number of pre-paid metres is tribute to the municipality, for ease of revenue collection compared to the non-payment challenges linked to the conventional metre. The progress in pre-paid metre delivery should be fast tracked for more revenue benefits, but also easier management of electricity. Also, as illustrated below, 9% of the population claim not to have access to electricity compared to 22% in the district and 11% in the province.

Figure 16: Access to Electricity

Data Source: Statistics South Africa (2016)

1.7 ACCESS TO SANITATION

Sanitation in South Africa is guided by three legislations namely: (a) white Paper on Water Supply and Sanitation (1994); (b) the White Paper on a National Water Policy of South Africa (1997), and (c) the White Paper on Basic Household Sanitation (2001). The white paper on basic household sanitation focuses on rural communities, and was therefore supplemented with national sanitation policy of 2012 to cover urban sanitation delivery. The White Paper on basic household sanitation advances that provision of sanitation services should be demand based and community based (DWAF 2001). In addition, the Strategic Framework for Water Services (2003) seeks to achieve easy accessibility of sanitation services. The 2012 national sanitation policy sought to achieve 93% toilet access by 2019.

Evidently, by 2016, Endumeni had achieved 90% target on flush toilet and chemical toilet. This is a three times the percentage in the District and more than double the provincial percentage with access to proper toilets.

Figure 17: Access to Sanitation (Toilets and Refuse Removal)

Data Source: Statistics South Africa (2016)

1.8 ECONOMIC PROFILE

1.8.1 CONTEXT

This section which broadly covers the economic profile for the uMzinyathi District, presents the economic indicators. These indicators include annual household income (and then isolating agricultural households), household goods, Gross Value Addition, and annual GDP growth. Household incomes and expenditures are an important measure of livelihood. Household income and expenditure are generally used as a proxy for consumption, and provide a reasonably rational determination of the economic status of households (Falkingham and Namazie; 2001). These indicators used as money metric measures of poverty or affluence. They however tell little of the environment within which such income or expenditure is made and power relations involved in earning or spending. Nevertheless, they remain the best available pointers of economic status.

Other measures of economic performance include Gross value Addition (GVA) and Gross Domestic Product (GDP). GVA the difference between the value of goods and the cost of materials or supplies that are used in producing them. It is a measure of economic activity which eliminates the duplication inherent in the sales value figure which results from the use of products of some establishments as materials or services by others. Value added is thus defined as the gross receipts of a local economy (in this case Endumeni) minus the cost of goods and services purchased from other economies. Value added includes wages, salaries, interest, depreciation, rent, taxes and profit.

The GDP is the total of all value added created in an economy. The value added means the value of goods and services that have been produced minus the value of the goods and services needed to produce them, the so called intermediate consumption.

1.9 ECONOMIC PREDICTION AT INCEPTION STAGES OF COVID 19

SARB governor Lesetja Kganyago said the Covid-19 outbreak would have a major health and social impact, and forecasting domestic economic activity presented unprecedented uncertainty. "With that in mind, the bank expects GDP in 2020 to contract by 6.1 percent, compared to the -0.2 percent expected just three weeks ago. GDP is expected to grow by 2.2 percent in 2021 and by 2.7 percent in 2022."

Kganyago said the supply and demand effects of this extension would reduce growth and deepen it in the short-term, as businesses stay shut for longer and households with income spend less. "This will likely also increase job losses, with further consequences for aggregate demand. The impacts will be particularly severe for small businesses, and individuals with earnings in the informal sector."

The Reserve Bank had registered its concerns and perspective on the Global Impact of Covid 19. The looked at both exogenous and endogenous factors. Undoubtedly, these concerns were shared amongst as business and social partners.

a) Exogenous Effects:

- Trading partners affected directly
- Foreign direct investment was severely undermined and compromised
- Tightening financial markets

b) Endogenous Effects:

- Decrease in domestic demand
- Decreased revenue
- Increased public expenditure to safeguard human health/ social wellbeing

The Covid 19 has seen the economies including our small rural ones experiencing unprecedented "Slowbalisation". The state of economic shock is what calls for immediate

response and intervention as consolidated in this report and other provincial and national reports.

(i) Shutdown/Lockdown Effect

Direct effects of shutdown detract from annual growth

The initial 21 days lockdown was envisaged to carry the potential of slowing down economic growth by 2.6%. Unfortunately it was extended beyond this initial period and leading to an increased and drastic impact on economic front of the country.

(ii) Job Losses Predictions

Partial rebound post-shutdown, but offset by job losses, business failures

The reserve Bank had further predicted serious job losses and substantial business insolvencies as a result of Covid 19. As the country gets back to Level 1, there is clear evidence of such predictions and the recovery plans are purely meant to address these predicted outcomes.

1.10 HOUSEHOLDS INCOME

Returning to household incomes, the 2014/15 Living conditions survey concluded that the average household income in South Africa was R138 168 in 2015. During the same period, male headed households earned an average of R165 853 per annum while female-headed households earned almost half as much (R98 911). During the following LCS (2015/16), the highest household expenditure category (32.55%) was on housing, water, electricity, gas and other fuels, with transport following (16.29%) (Statistics South Africa, 2015). The same survey found that 14% of household expenditure goes to miscellaneous goods which include insurance, personal care items and jewellery. Food, beverages and tobacco is the fourth expenditure category at 13.75%.

The 2015 LCS further noted that the average annual household consumption expenditure for black African-headed households had increased to R67 828 in 2015, compared to R55 920 in 2011. This is an average increase of R2382 per year.

The above in view, as illustrated below, the average household in Endumeni municipality earns between R40,000 and R300,000 annually. This is consistent with the national average. It should be noted however that, as expected in an urban municipality, household incomes in Endumeni are higher than in the District and province. That said, the data below shows that the highest concentration of households is around the R20,000 to R75,000 annual income bracket. Economic development interventions should consider improved income generation.

Figure 18: Household Incomes

Data Source: Statistics South Africa (2016)

There are only few agricultural households in Endumeni municipality. Evidently, of the 21,134 households in the municipality (in 2016), only 1654 (which translates to 7.8%) are engaged in agricultural activities. Agricultural Value chain development is a timely intervention given this low number of agricultural households. An interesting dynamic is that of inequality. If we consider that most agricultural households claim not to have any income while an approximately similar number earn between R38000 and R307,000, the inequality gap is wide. This inequality relates to households which engage in subsistence agriculture on one hand, on the other, those which engage in commercial agriculture. Households engaged in subsistence agricultural activities tend to be trapped in low income levels. Historically, these would be black households, with limited capital for agricultural inputs, limited access to markets and limited access to credit facilities. This inequality requires state intervention -perhaps of a Keynesian type (massive investments to jump start growth).

Figure 19: Agricultural Households

Data Source: Statistics South Africa (2016)

If the annual incomes are translated from households to individuals, as shown below, most of the employed labour force in Endumeni earn between R10,000 and R150,000 annual income (65%). In monthly terms, this would range between R800 and R12500. Considering inflation, the pandemic and economic slowdown, the labour force located within these income brackets are economically vulnerable.

Table 11: Employment Income

	Endumeni	uMzinyathi	KwaZulu-Natal
R0	6,70%	15%	10,70%
Under R4800	3,90%	5,20%	3,70%
R5k - R10k	8,60%	8,90%	6,90%
R10k - R20k	19,10%	23%	18,30%
R20k - R40k	17,70%	14,60%	18,20%
R40k - R75k	15,10%	11,60%	13,50%
R75k - R150k	14,60%	11,50%	12,10%
R150k - R300k	8,80%	5,50%	7,90%
R300k - R600k	2,10%	1,30%	2,80%
R600k - R1.2M	0,40%	0,30%	0,70%
R1.2M - R2.5M	0,20%	0,20%	0,30%
Over R2.5M	0,20%	0,20%	0,20%

Unspecified	2,50%	2,80%	4,90%
-------------	-------	-------	-------

Data Source: Statistics South Africa (2016)

1.11 HOUSEHOLDS ASSETS

Considering household assets, 94% of all citizens living in Endumeni have access to mobile phones, 84% claim to possess Television set, while about three quarters claim to own a Fridge. These data are consistent with urban settings. Caution should be exercised on access to these assets, given that the orthodox assumptions of ability to pay for them, maintain them and afford the power supply might not apply in South Africa's peri-urban areas as they do in formal settings. There are ongoing conversations around the non-payment of electricity in most townships, for example.

Figure 20: Access to Household Assets

Data Source: Statistics South Africa (2016)

1.12 EMPLOYMENT / UNEMPLOYMENT

Turning to employment, consistent with the national economy, the formal sector is the largest employer in Endumeni, employing three quarters of the labor force. Comparatively, this is a higher percentage than in both the District and the province. The informal economy in Endumeni only employs paltry 10.3%, much lower than the District (18.5%) and province (12.6%). This should be an opportunity for the Endumeni municipality to consider SMME support interventions, or business incubation programmes aimed at achieving SMME growth and expansion. Globally, and particularly in the continent, SMMEs provide the highest percentage

of employment. South Africa remains an outlier in this context. The trend of increasing numbers of unemployed labor force could be reversed through SMME support.

Table 12: Employment by sector

	Endumeni		uMzinyathi		KwaZulu-Natal	
Do not know	1,60%	242	2%	1,045	2,70%	56,548
In the formal sector	77,10%	11,988	70%	36,377	75,90%	1,583,687
In the informal sector	10,30%	1,601	18,50%	9,594	12,60%	262,032
Private household	11,10%	1,72	9,50%	4,955	8,80%	184,527

Similar to the rest of South Africa, -and particularly urban areas- unemployment rate has increased steadily from 26% in 2015 to 32% in 2020. The impact of the pandemic on employment is yet to be fully realised. However, early indications suggest that Endumeni is likely to reach 38% unemployment by 2026. Rising unemployment creates higher dependency ratios, with the few employed labour force supporting larger /increasing unemployed relatives and friends. This in turn reduces the disposable incomes of the employed labour force, leading to deference of investments. Ultimately this cycle creates layers of economic vulnerability.

Figure 21: Unemployment Rate (Projected)

Data Source: Statistics South Africa (2016) With Calculations by The Frontline Group

1.13 MEANS OF INTERNET ACCESS

The impact of internet connectivity on development has been widely documented. The World Bank (2009) estimates that a 10% increase in broadband and 10% increase in internet connectivity correlates positively with GDP growth of about 1.38% and 1.12% respectively.

Another study by Ericsson, 2013 concludes that doubling broadband speed has the potential to increase GDP growth with 0.3%. It is important however to consider both the number of individuals connected along with the accessibility of the internet. Close to three quarters of South Africans have access to the internet, although less than half are able to access from home.

Figure 22: Means of Internet Access

Data Source: Statistics South Africa (2016)

1.14 GROSS VALUE ADDITION

Gross Value Addition has been rising annually, from R11 billion in 2015 to R13 billion in 2021. Projections suggest that by 2025 GVA will potentially rise to R14.5 billion.

Figure 23: Gross Value Addition

Data Source: Quantec (2019)

1.15 LOCATION QUOTIENT

Finally, other measures employed in economic analysis include location quotient and Tress Index. Location quotient (LQ) is a way of quantifying how concentrated a particular industry, cluster, occupation, or demographic group is in a region (in this case Endumeni) as compared to the national economy. It reveals what makes a particular region unique in comparison to the national average. In more exact terms, location quotient is a ratio that compares a region to a larger reference region according to some characteristic or asset. Location quotient is calculated by finding the proportion of the entire economy that a particular industry employ. The average employment for that industry nationally is then divided by the average total employment in the region (in this case Endumeni) for a given year.

In the above light, as illustrated below, Endumeni seems most competitive in the primary sector (agriculture and mining), suggesting that the municipality should focus on improving the performance of this sector. The tertiary sector (services) also provides an opportunity to improve the competitiveness of the municipal economy. As already suggested, value chain approach is recommended as an effective strategy to identify gaps within these sectors, and to find responsive interventions for rapid growth and development of the competitive sectors.

Figure 24: Location Quotient

Data Source: Quantec (2019)

1.16 TOURISM SECTOR

The services that hinder the potential growth of the tourism sector within the municipality that if were made available tourism would thrive. Nineteen of the ENDUMENI accommodation industry are closing and up for sale resulting in the loss of jobs and loss of income in the area. There are also no foreign tourists coming to visit, given that 60-70% of the tourist come from overseas. The biggest issue is going to be the lack of accommodation in the area. Apart from the covid-19 challenges some of which are the massive pot holes in the roads. The lacking of road signage and no tour guidance. Obtaining trading licences at ENDUMENI remains a challenge. Ageing infrastructure (such as water, sewer, electricity) and security amongst from the covid are one of the challenges for tourism industry. Reviving tourism: capturing the youth by introducing adventure tourism activities such as bungee jumping. Tourism relief fund was only aimed at BEE

establishment as a result a lot of business didn't meet that criteria. Requesting to the Endumeni to attend to issues of policies and by-laws.

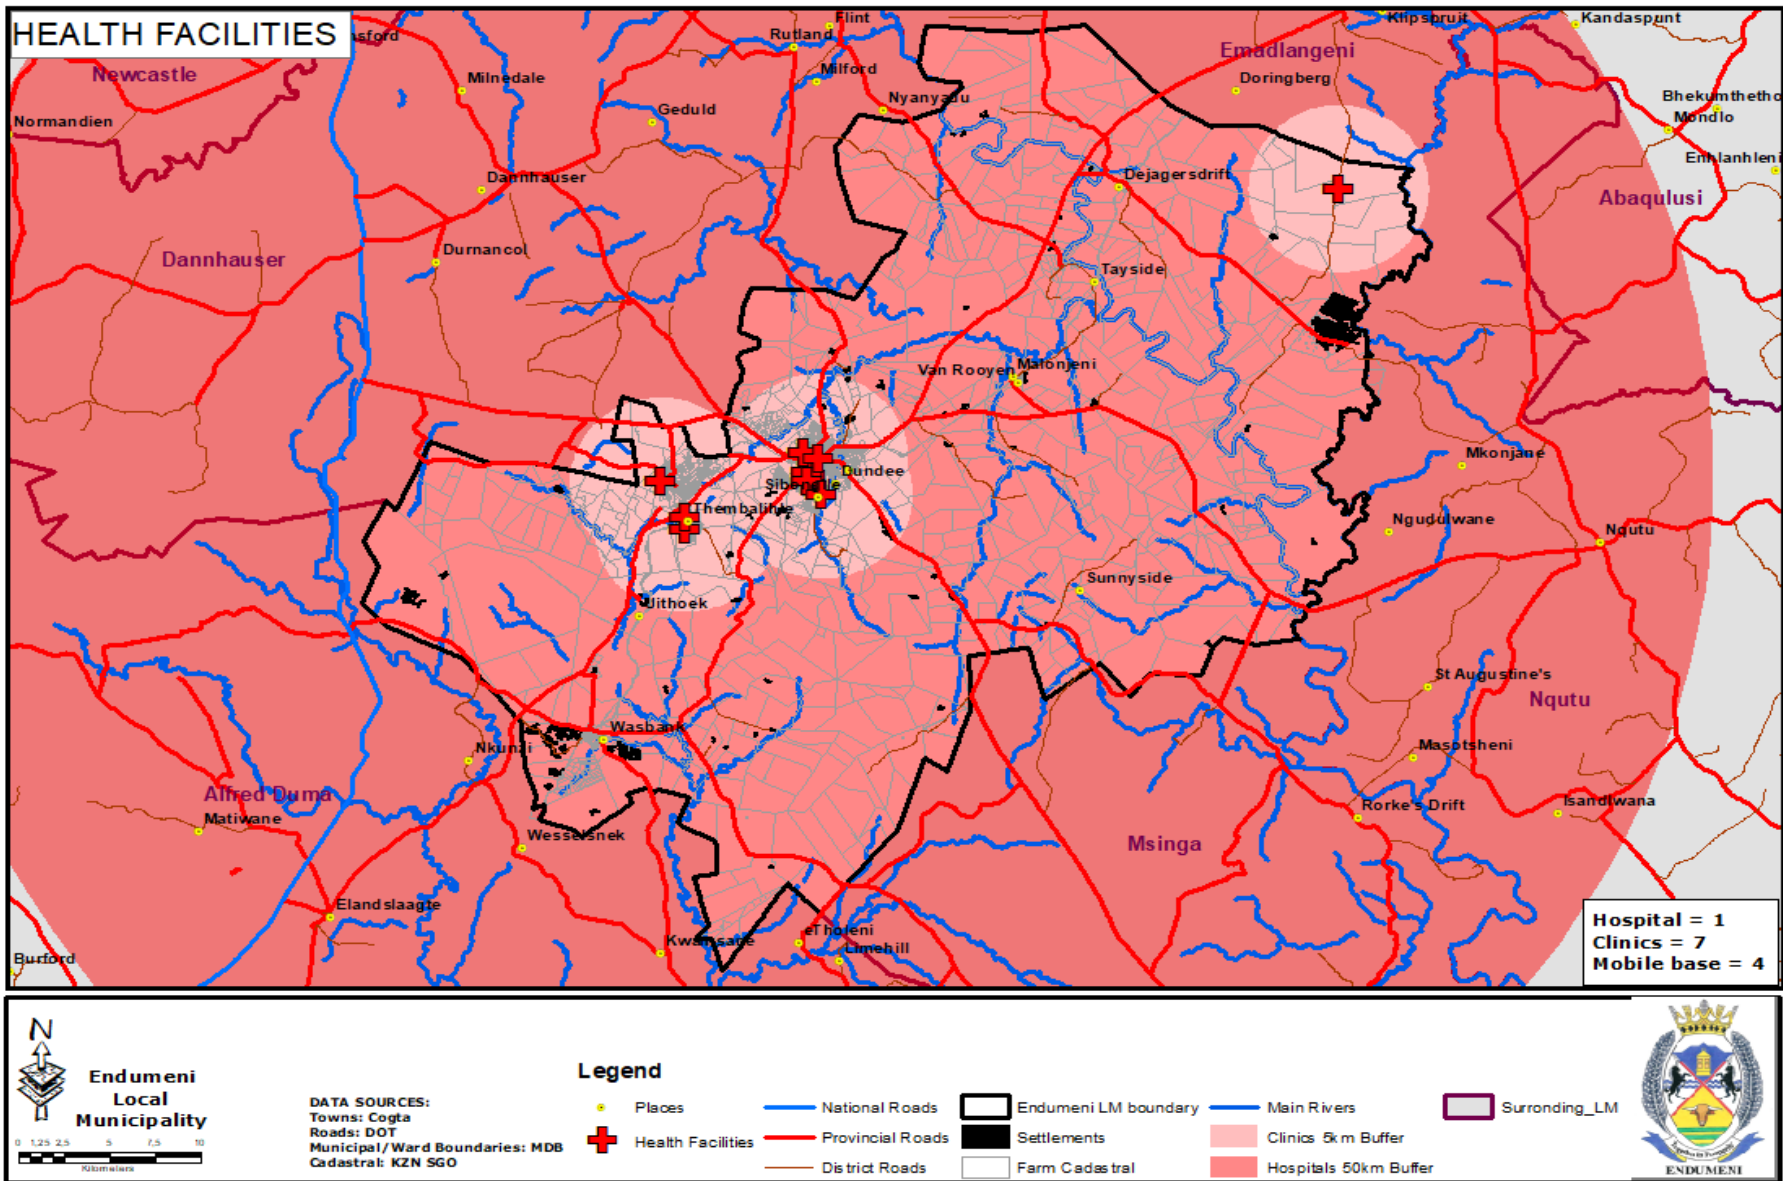

1.17 HEALTH

Optimum walking distances are between 1 to 2.5 km and with a maximum walking distance of 5km. The municipality obviously does not conform to this standard. Facilities are clustered within the urban core of Dundee and Glencoe and facilities are required in the rural and rural satellite nodes, particularly in the north-west of the Municipality. Endumeni is serviced by only one hospital, which is insufficient, notwithstanding the CSIR standards. Should the clinics be geared to handle and stabilize serious medical cases, which they can refer to the hospital, this should not be a problem, on condition that the clinic is accessible via road infrastructure, and that the hospital has the capacity to carry a pre-determined number of people from the Community.

Table 13: Health

Sub District	District Office	District Hospital	TB Hospital	CHC	Fixed Clinics	Mobile clinics	EMS Base	Forensic Mortuary	Nursing Colleges	Regional Laundry
Endumeni	1	1	0	0	6	2	3. EMS District Office + 1 EMS Base	1	0	1
Msinga	0	1	0	1	20	3	1	0	1	0
Nquthu	0	1	0	0	15	4	1	0	1	0
Umvoti	0	1	1	0	12	3	1	1	0	0
District	1	4	1	1	53	12	4. District Office + 4 EMS Bases	2	2	1

2. KPA: CROSS CUTTING INTERVENTION ANALYSIS

2.1 REGIONAL CONTEXT

Endumeni is one of four Local Municipalities located within the District Municipality of Umzinyathi within the valleys of the Biggarsberg Mountain Range with the two main towns of Dundee and Glencoe located at the base of the Indumeni Mountain. Endumeni is located on the northern edge of the Endumeni LM and is bordered by the Dannhouser and Emadlangeni Local Municipalities to the North, the Alfred Duma Local Municipality to the South West, the Msinga Local Municipality to the South and Nquthu Local Municipality to the East. Endumeni constitutes 11% of the land cover within Umzinyathi DM.

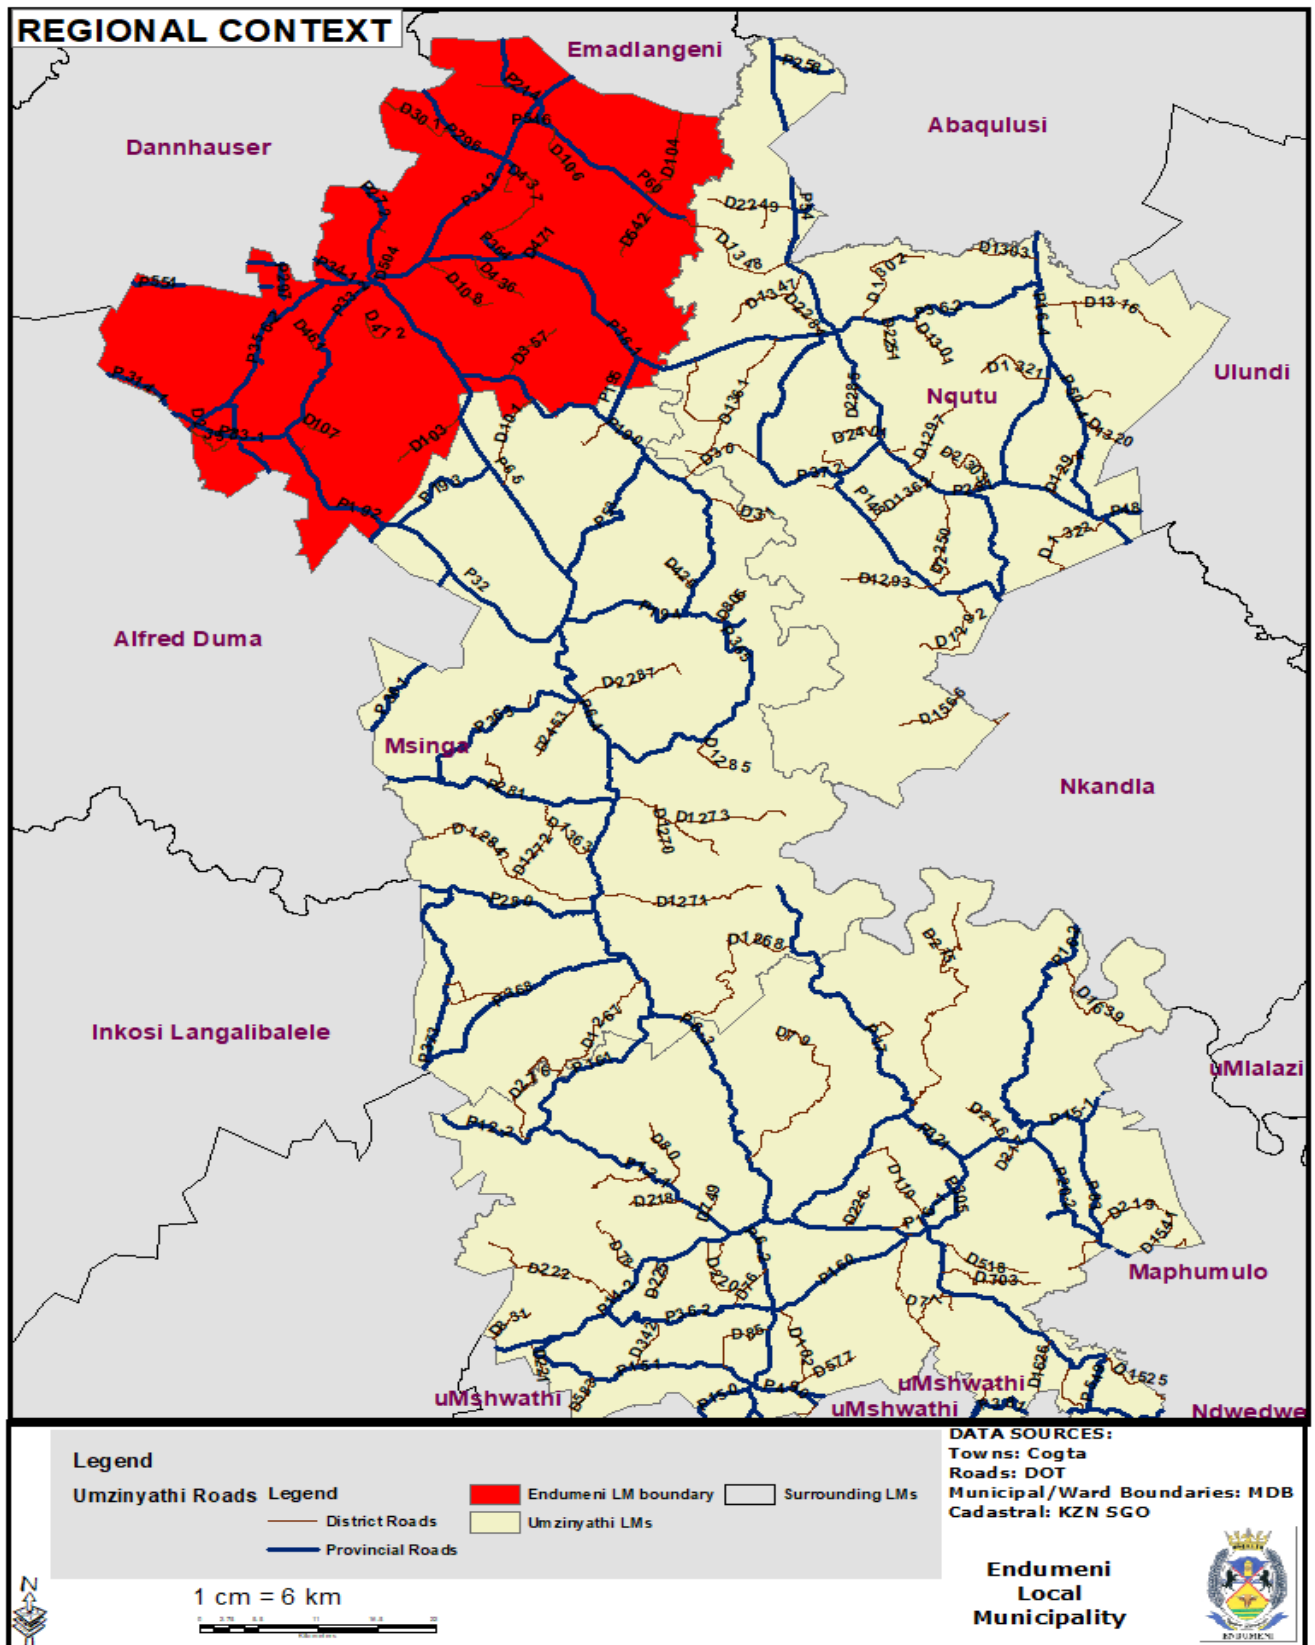

Endumeni is 1,612km² in extent, 55km wide from north-east to south-west on the R33/R602 and 30km on the R33/ R621 south- east to north- west. In the context of national transportation systems, the Endumeni Municipality finds itself “out on a limb” situated away from the national road network. At a regional level, the municipality is located on an important regional route servicing the agricultural regions of northern KwaZulu-Natal and southern Mpumalanga.

Endumeni dominates the district economy as it serves as the key administrative, educational and economic centre for the entire district. Dundee is the centre from which tourism based on the cultural heritage of the Zulu Kingdom and ‘Battlefields’ is emphasized and managed to some extent. Glencoe serves as a secondary centre to Dundee. Together with Amajuba, the area is branded the ‘custodian’ of the Battlefields region which has international and regional significance. There are no Traditional Authorities within Endumeni Local Municipal jurisdiction.

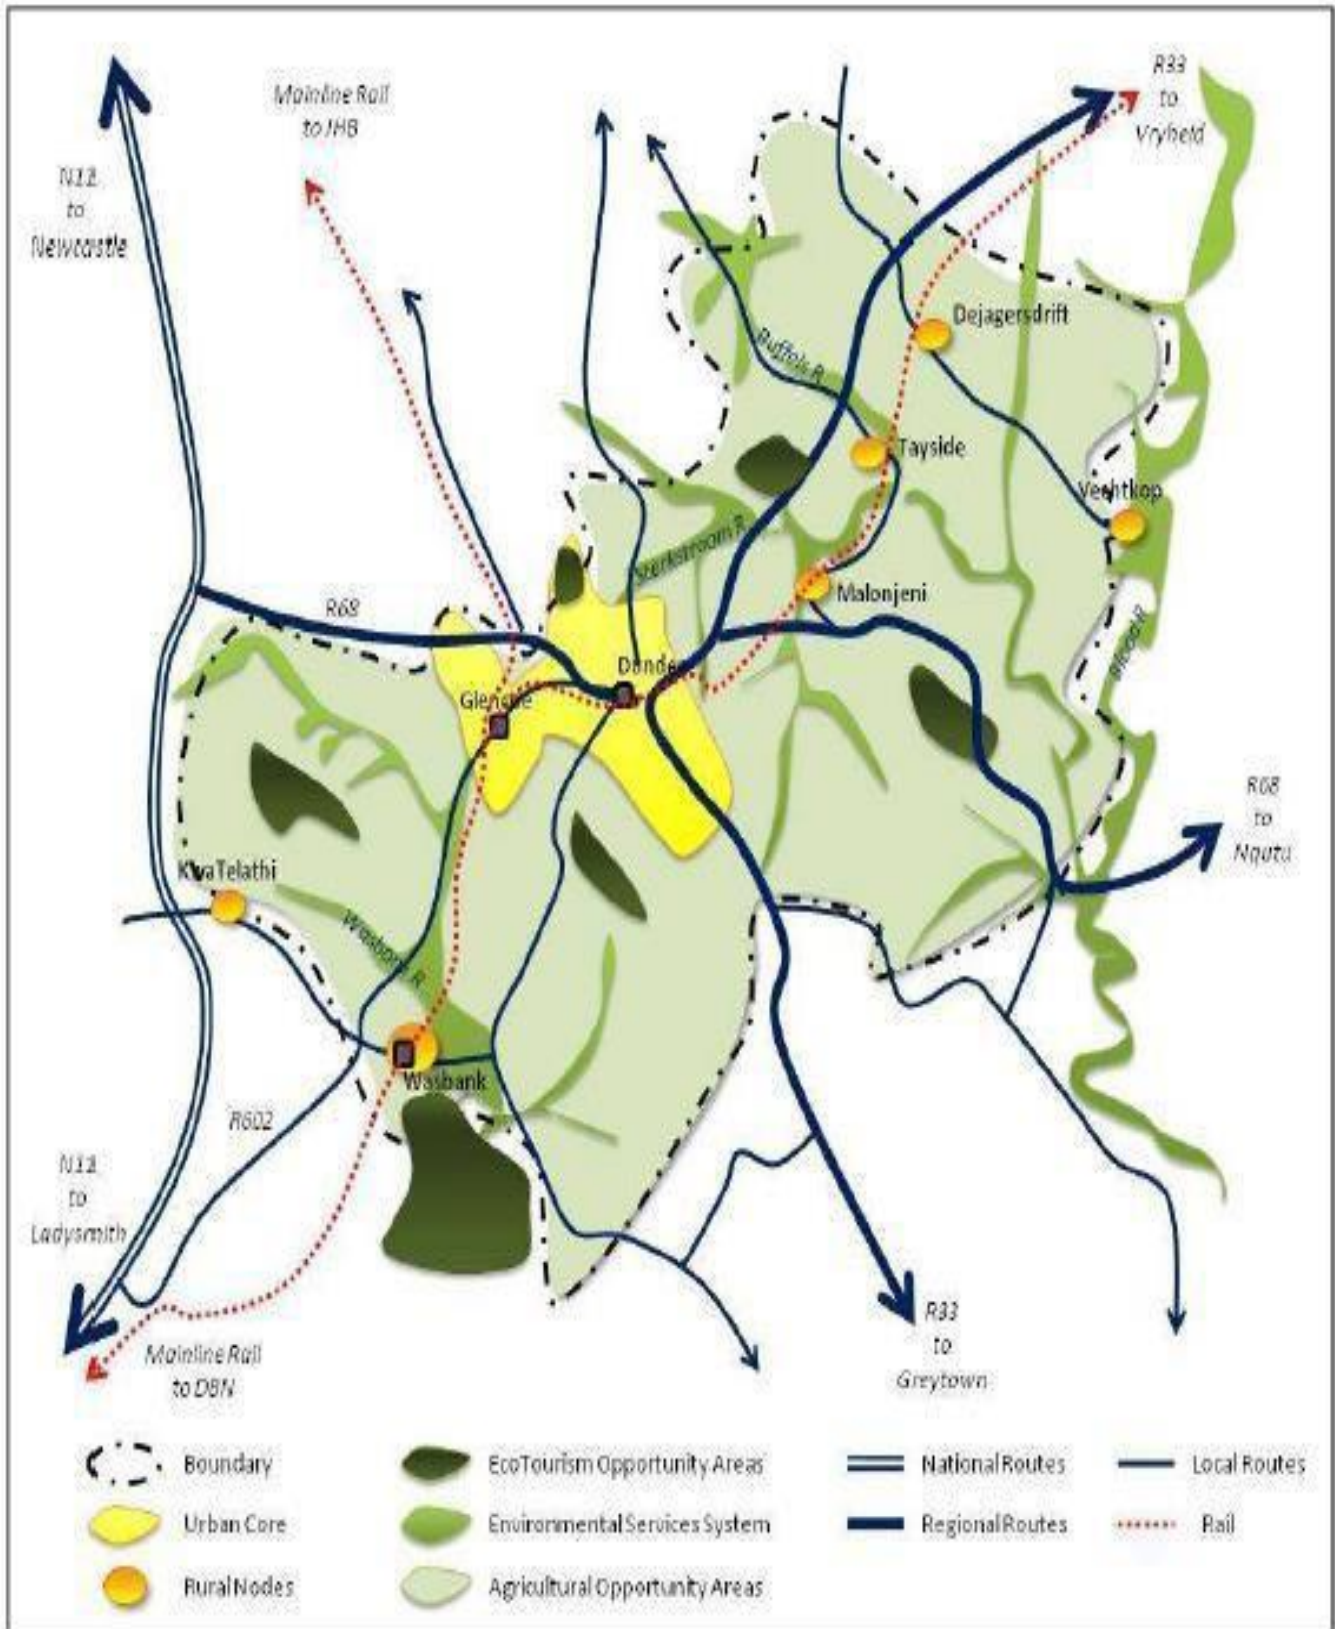

The Endumeni Municipality is unique in that its population is predominantly **urbanized** or based on commercial farms and unlike the other local municipalities in the District there is no tribal authority land. Dundee is the main economic heart of Endumeni and the administrative centre of the region and has a diversified economy ranging from retail and trade, tourism, farming, mining and administrative centre. The municipality is located within a well-developed commercial agricultural region and hence, it functions as an important regional rural service center serving the surrounding agricultural hinterland. The municipality only comprises of seven (07) wards.

The topography, hydrology and resources of the area have influenced and determined, to some extent, the physical structure of Endumeni, the patterns of settlement and of the land use

within the area. The key towns of Dundee and Glencoe are centrally located within the municipal area and a network of roads radiate out from this central core, taking into account also the routes of the railway lines. Outside of this central core, the only other significant settlement node is Wasbank. The remainder of the area is predominantly characterized by commercial farming, and land restitution projects. A limited number of small concentrations of people are scattered across the north-west sections of the municipal area. Residential density in the area averages 6-8du/ha in the towns of Dundee and Glencoe, whilst the densities of the satellite townships associated with each Sibongile and Sithembile average densities of 30-35du/ha. The settlement form of the towns is suburban in nature with a predominant grid-layout street pattern. The highest intensity land use occurs in the CBD. The pattern of settlement is fragmented which impacts on thresholds for commercial development, community facilities and public transport. Dundee is 10km from Glencoe and 16km from Wasbank.

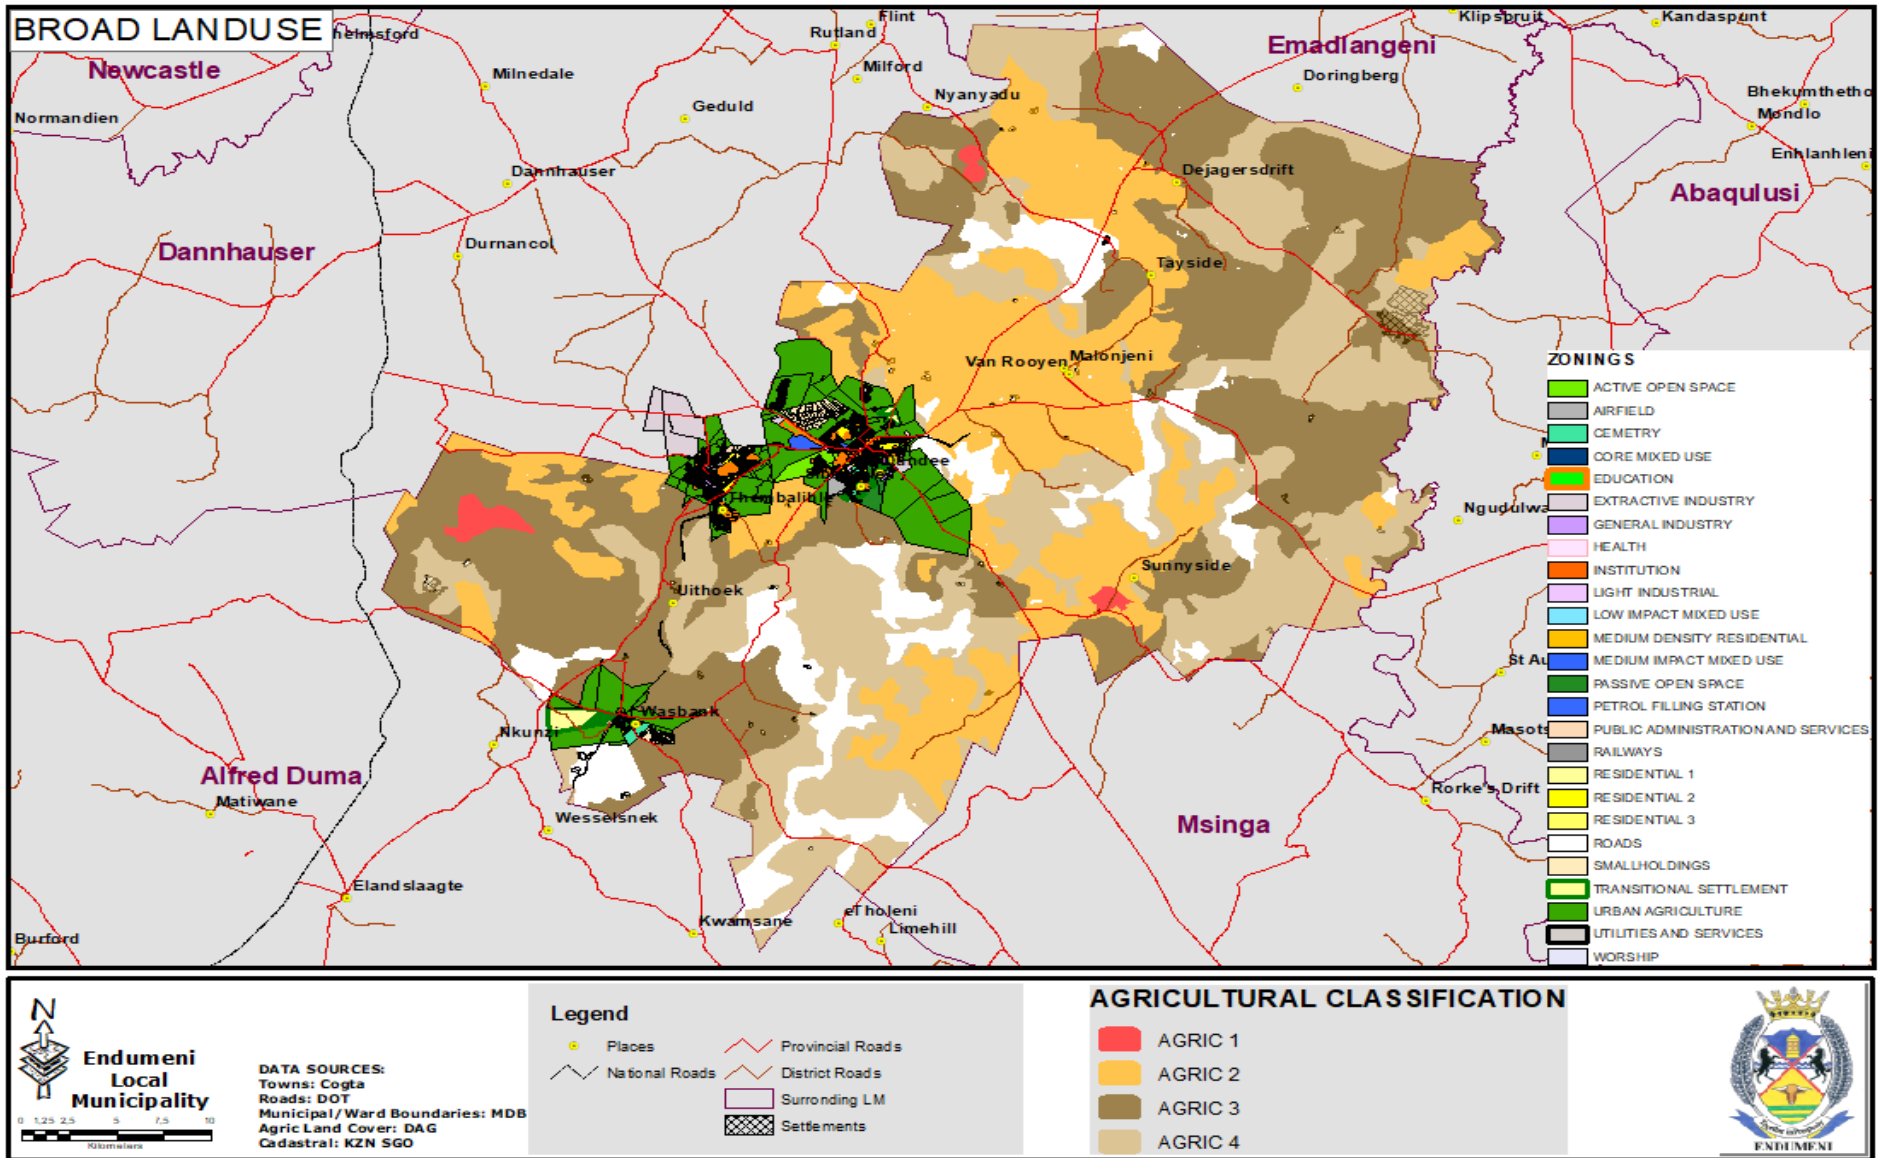

Map 4: Regional Context

Map 5: Conceptual SDF Map

2.2 ENVIRONMENTAL ANALYSIS

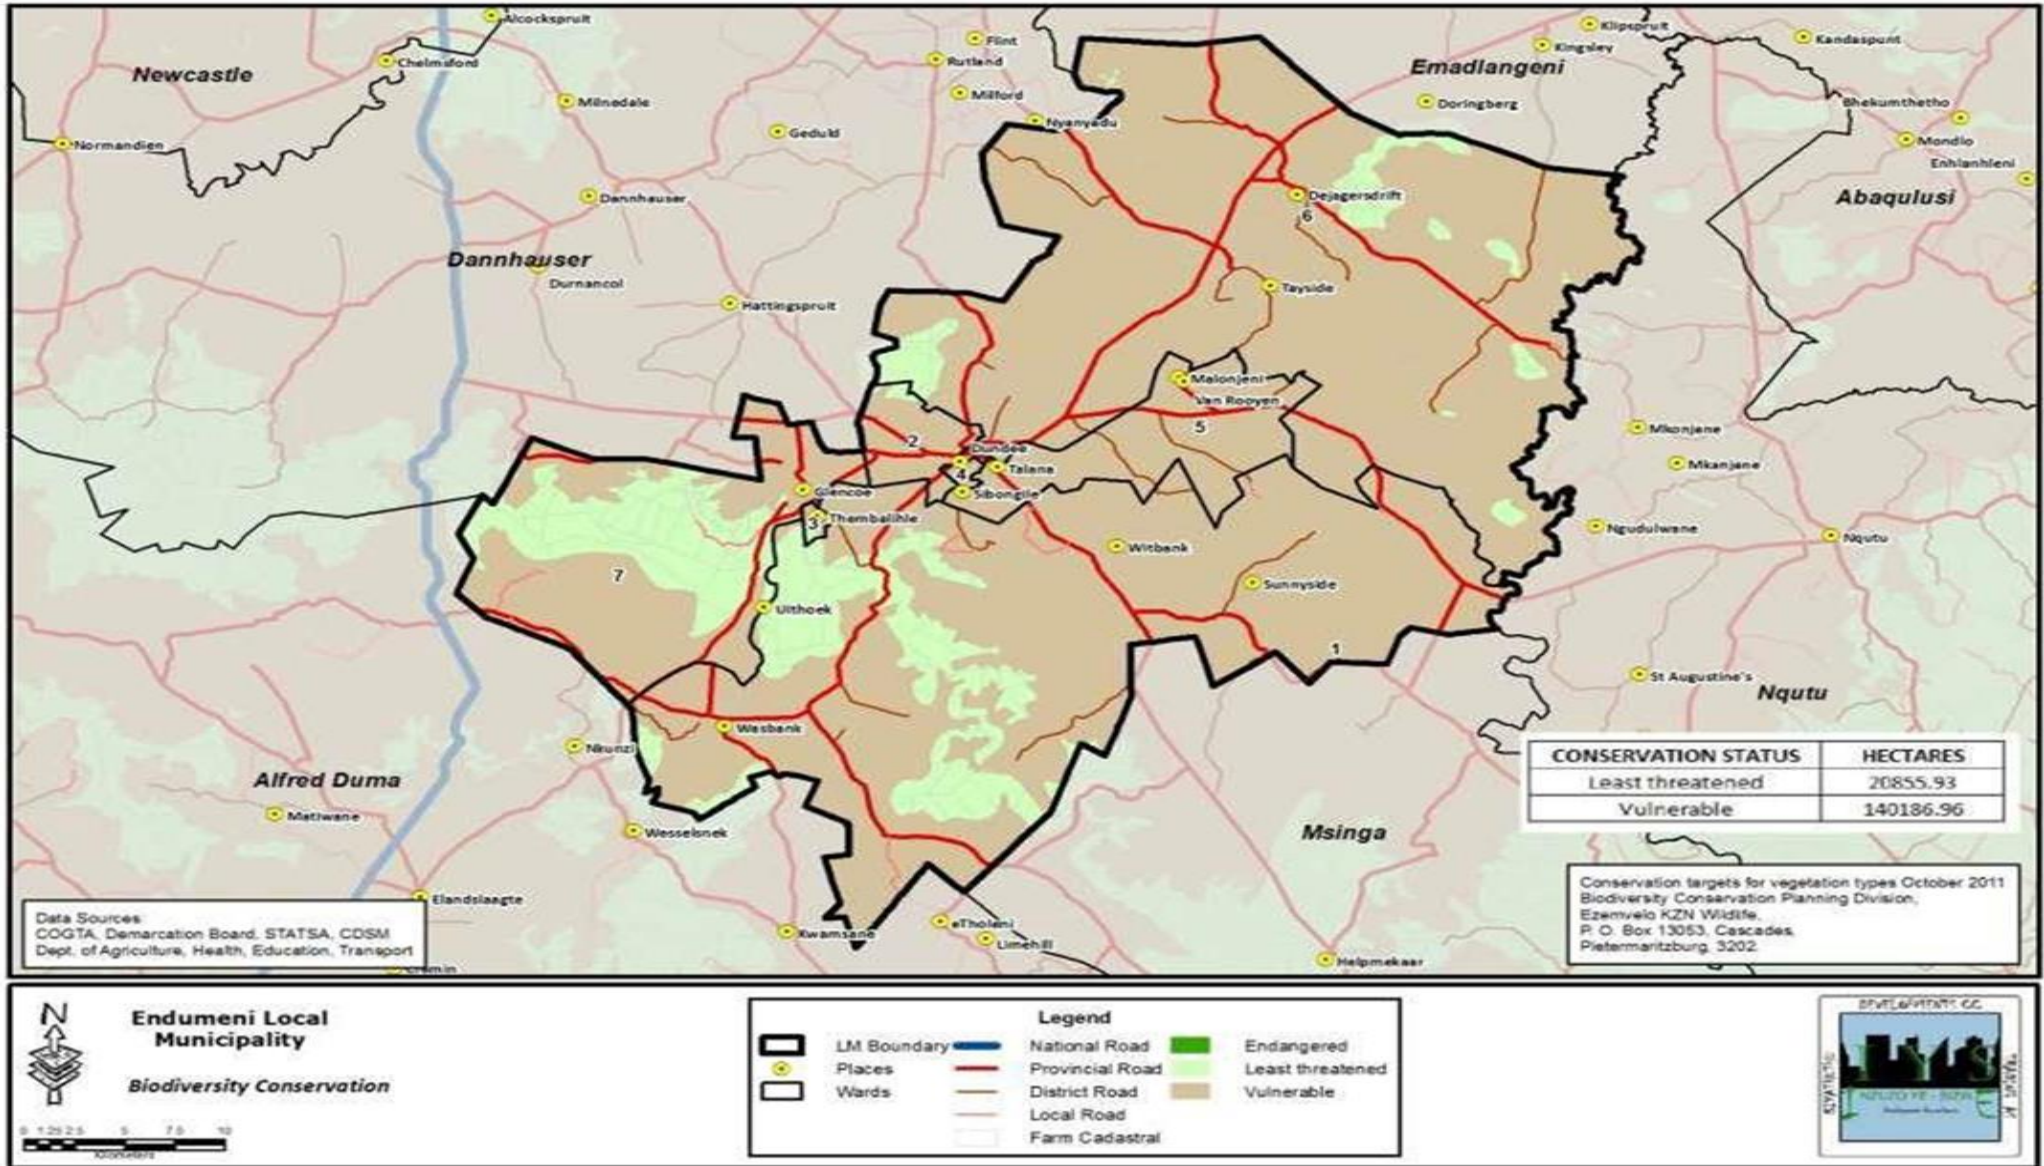

Map 6: Broad Land Use

2.2.1 BIODIVERSITY

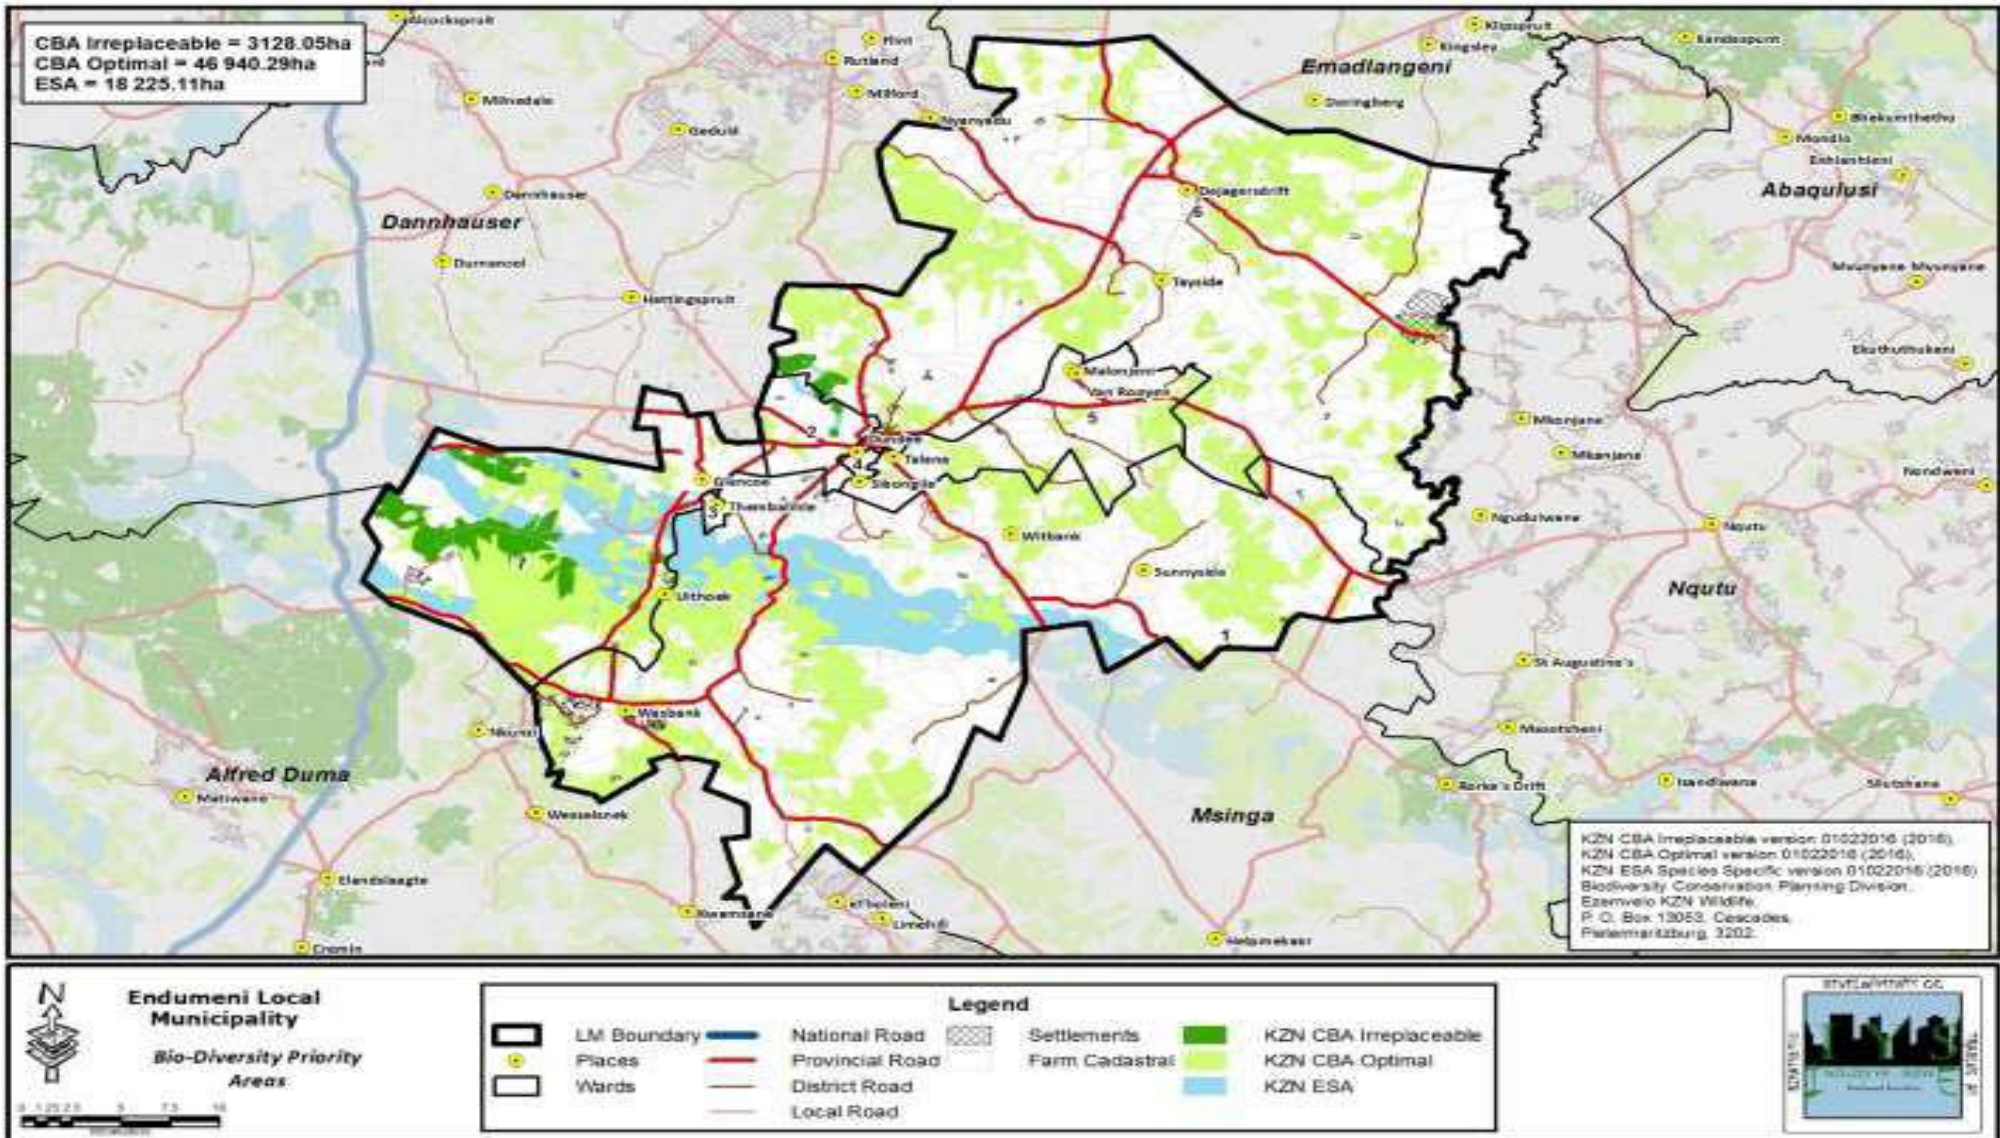

Key biodiversity assets in Endumeni include large natural areas, terrestrial ESA (Ecological support Areas) and terrestrial CBA (Critical Biodiversity Areas). Large natural areas, which covers most of the municipal area, are more likely to remain intact with lower influences of “edge-effects” from adjacent land uses. Intact areas will support ecosystem processes and functionality, which in turn improves biodiversity conservation. Conversely, land use transformation and impacts from anthropogenic influences increase the probability of “edge effects” on important biodiversity areas.

Endumeni Local Municipality has a number of environmental sensitive areas, some of which are not protected. The Municipality does not have any proclaimed protected areas within its jurisdiction, however, there are few areas that are worth conservation which includes Biggarsberg, Dundee Agricultural RS, Ndumeni and Thukela Biosphere. This municipality has extensive area characterised by critical aquatic biodiversity, however according to the Umzinyathi District municipalities environmental profile, Endumeni is dominated by least threatened terrestrial biodiversity. There are no critically endangered (CE) ecosystems within the municipality, majority of the ecosystems fall under the least threatened category.

The healthier and more biodiverse an ecosystem, and the better the maintenance of biodiversity patterns, connectivity and ecosystem processes, the more resilient the biodiversity and ecological support areas will be to climate change impacts.

Map 7: Biodiversity Conservation

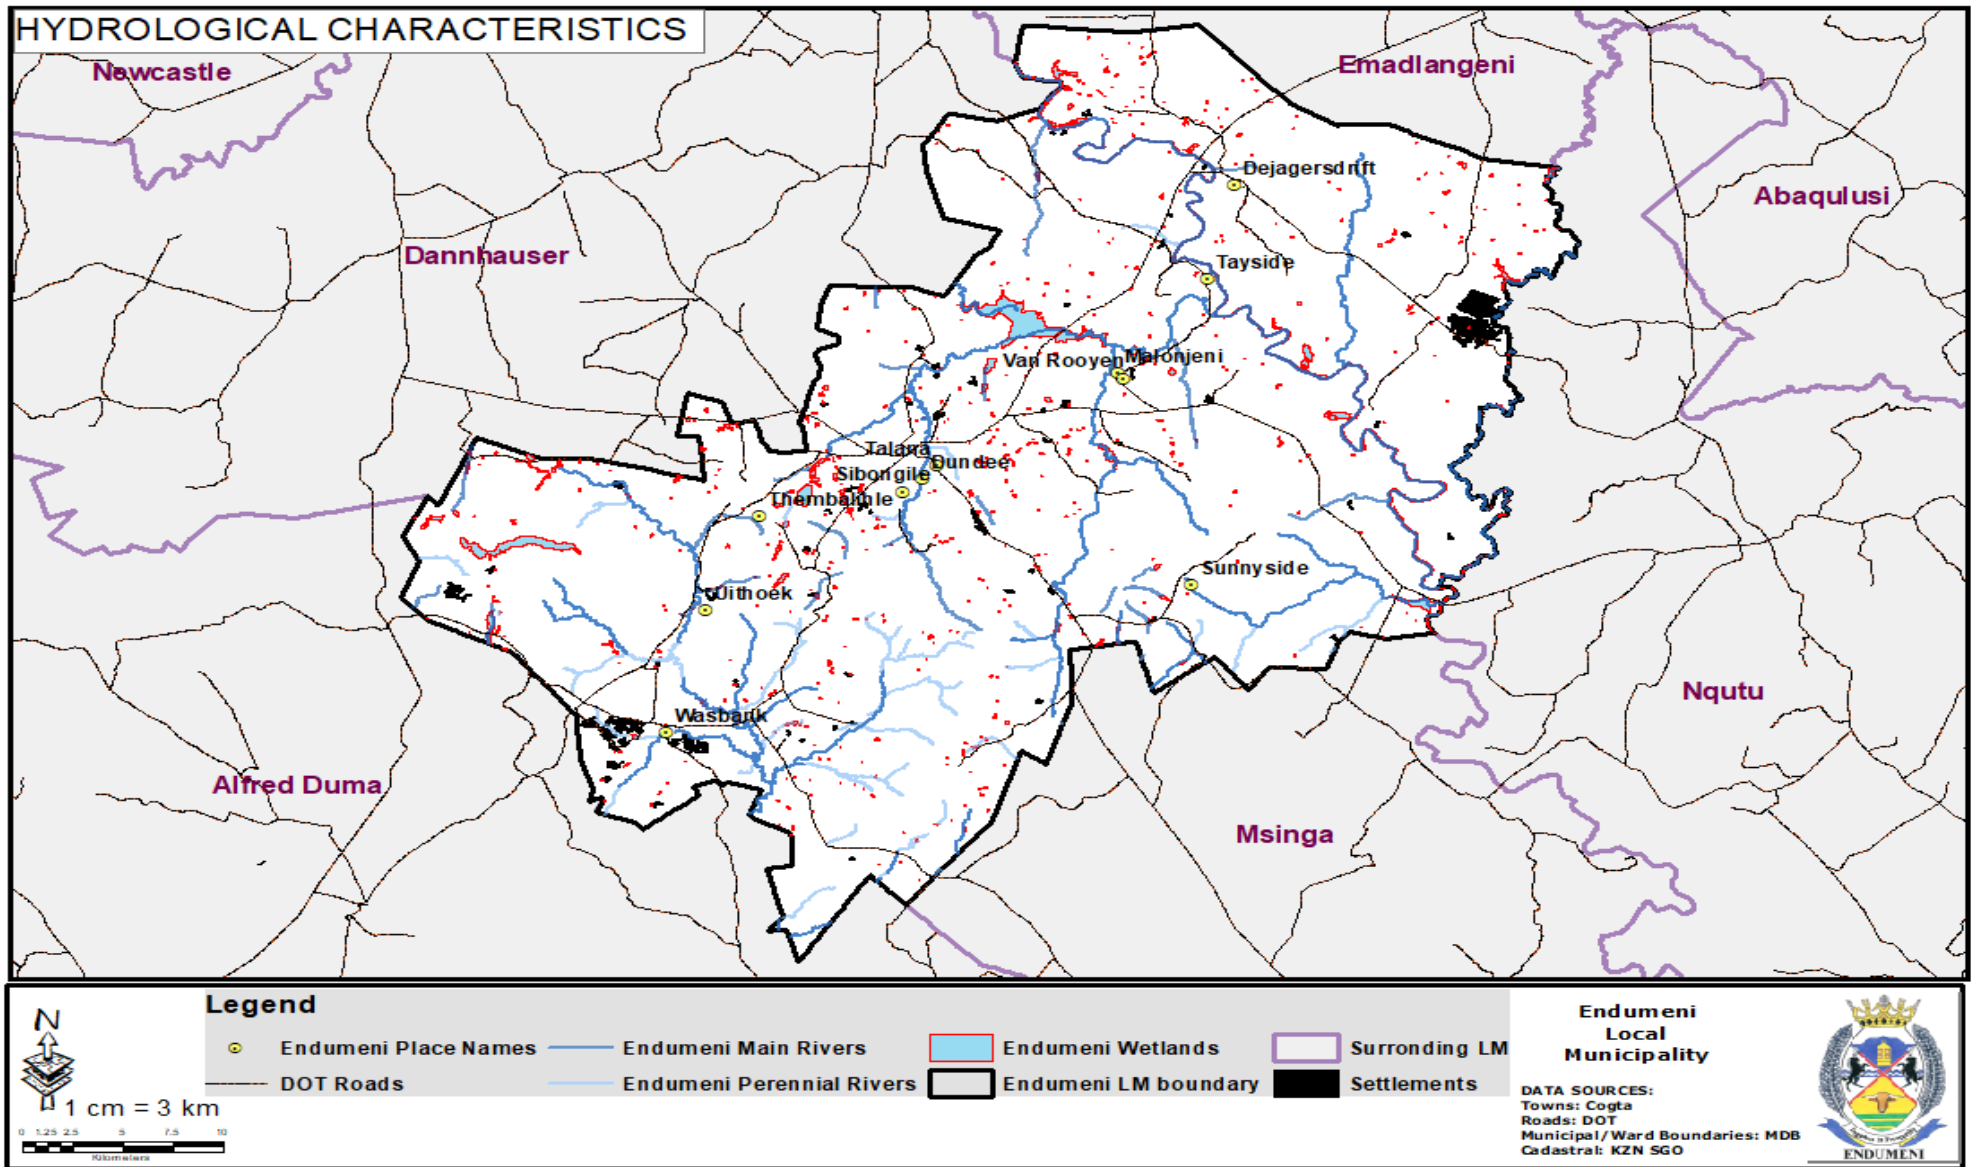

Map 8: Bio-Diversity Priority Area

2.2.2 HYDROLOGY

Endumeni is home to Buffalo River and Wasbank River. The main tributaries of Buffalo River are Njiwati, Sterkstroom or Impathi, the Pondenshalana, Nyende, Eerstelling, Basangoma and Blood Rivers. Wasbank River's main tributaries are Mkomazana, KwaMatchokuza, Busana, Klipspruit, Biggarsgatspruit and Blinkwater Streams. Groundwater resources, perennial rivers and streams and stored water in farm dams are the main sources for stock watering purposes, while river flow and stored water in larger dams are the main sources for irrigation, although high-yielding production boreholes may also be important sources of irrigation water in certain areas. Regarding perennial river flow the Endumeni area is reasonably well-watered with most of the streams. There are also smaller perennial streams on the Dundee plateau.

Freshwater Ecosystem Priority Areas (FEPA) are important water resource and aquatic ecosystems areas that need protection for promoting sustainable water resource use and achieving the freshwater ecosystem goals of the country.

The biggest threat in the area is the potential pollution of freshwater sources (surface and groundwater) through decanting of mines (Dysfunctional and active).

Map 9: Hydrological Characteristics

2.2.3 CLIMATE CHANGE

The municipality has a temperate climate, experiencing warm to hot summers and cold winters. Summers are mostly hot with temperatures exceeding 30 °C. Winters are characterized by frost at the beginning of winter for most of the areas in the municipality.

Endumeni Local municipality is situated within the Umzinyathi District Municipality which falls within the Pongola-Umzimkhulu Hydrological Zone, one of six hydrological zones in South Africa (Department of Environmental Affairs 2013a). These hydrological zones not only reflect water management areas but have been grouped according to common climatic and hydrological characteristics (Department of Environmental Affairs 2013a).

The following four climate change scenarios have been described for the Pongola-Umzimkhulu Hydrological Zone in the Department of Environmental Affairs' Long Term Adaptation Scenarios Reports:

- Warmer Wetter Scenario: Increased rainfall in spring.
- Hotter Wetter Scenario: Strong increase in rainfall in spring.
- Warmer Drier Scenario: Decreased rainfall in spring, a strong decrease in rainfall during summer and autumn.
- Hotter Drier Scenario: Decreased rainfall in spring, a strong decrease in rainfall in summer and autumn

2.2.4 STRATEGIC ENVIRONMENTAL ASSESSMENT

It is critical for the development of a strategic environmental assessment plan to identify environmentally sensitive areas in order to direct and manage intensive development away from such areas. The biggest threat to the environment and biodiversity in the municipality is pollution and destruction of environmentally sensitive areas.

2.2.5 ENVIRONMENTAL AREAS

The biodiversity assets within Endumeni LM include large natural areas, terrestrial ESA (Ecological support Areas and terrestrial CBA (Critical Biodiversity Areas). Large natural areas, which covers the majority of the municipal area, are more likely to remain intact with lower influences of "edge-effects" from adjacent land uses. Intact areas will support ecosystem processes and functionality, which in turn improves biodiversity conservation. Conversely, land use transformation and impacts from anthropogenic influences increase the probability of "edge effects" on important biodiversity areas.

The goal within Endumeni is to protect, enhance and expand the existing environmental assets base within exiting urban and built areas but also to utilise the opportunity to establish a more

robust and integrated open space system within the undeveloped and agricultural areas that will directly meet the needs of the local communities, as well as, respond to wider municipal and regional environmental planning needs with regard to environmental services planning and management. The environmental service areas of Endumeni are ill defined and as a result highly pressurised and fragile. The area contains two primary river systems, the Buffela and Blood Rivers, as well as a number of secondary river systems of the Sterkstroom, Mzinyashana, Wasbank, Nsuze and Sandspruit Rivers. Further sensitive areas have been identified and include the Aden Lloyd Nature Reserve and a number of existing eco-tourism areas including sites of historical or cultural significance such as battlefields, as well as private game farms.

The environmental services areas as reflected on the SDF are derived from the Environmental Plans and Land Capability Assessment undertaken for the Endumeni Municipality. Areas so designated within the municipal area include the major wetlands within the area as well as all rivers. In principal, a 50-metre buffer around major water courses have been designated as environmental services, although it is acknowledged that, in practice, the width of the environmentally sensitive portions of rivers will vary. Although the Alden Lloyd Nature Reserve is a formally protected area, it has not been included under this land use category as it is intended that, whilst it should be managed according to the aforementioned principles, it should also enjoy greater exposure tourism/recreation area and, hence, is accorded an alternative designation.

Endumeni is among a number of municipalities that have had large areas of vegetation transformed because of one kind of land use or another. As is evident in areas within the south/west of Endumeni in the vicinity of Glencoe and Dundee have experienced widespread land transformation. A number of areas within Endumeni have been flagged for potential biodiversity conservation. The irreplaceable KZN CBA areas are found within the north of Dundee and few farmlands on the north of Wasbank.

Early identification and protection of core and amenity open space elements in the various river systems. Protection of conservation areas for eco-tourism opportunities i.e. Aden Lloyd Nature Reserve, Kamelkop, Ilanga Game Ranch, Botha Group Game Ranch etc. Protection and enhancement of areas of cultural and historical significance i.e. Fort Pine, Alana Museum, Maria Ratschitz Mission, Karel Landsman's House etc.

Table 14: SPATIAL ENVIRONMENTAL TRENDS

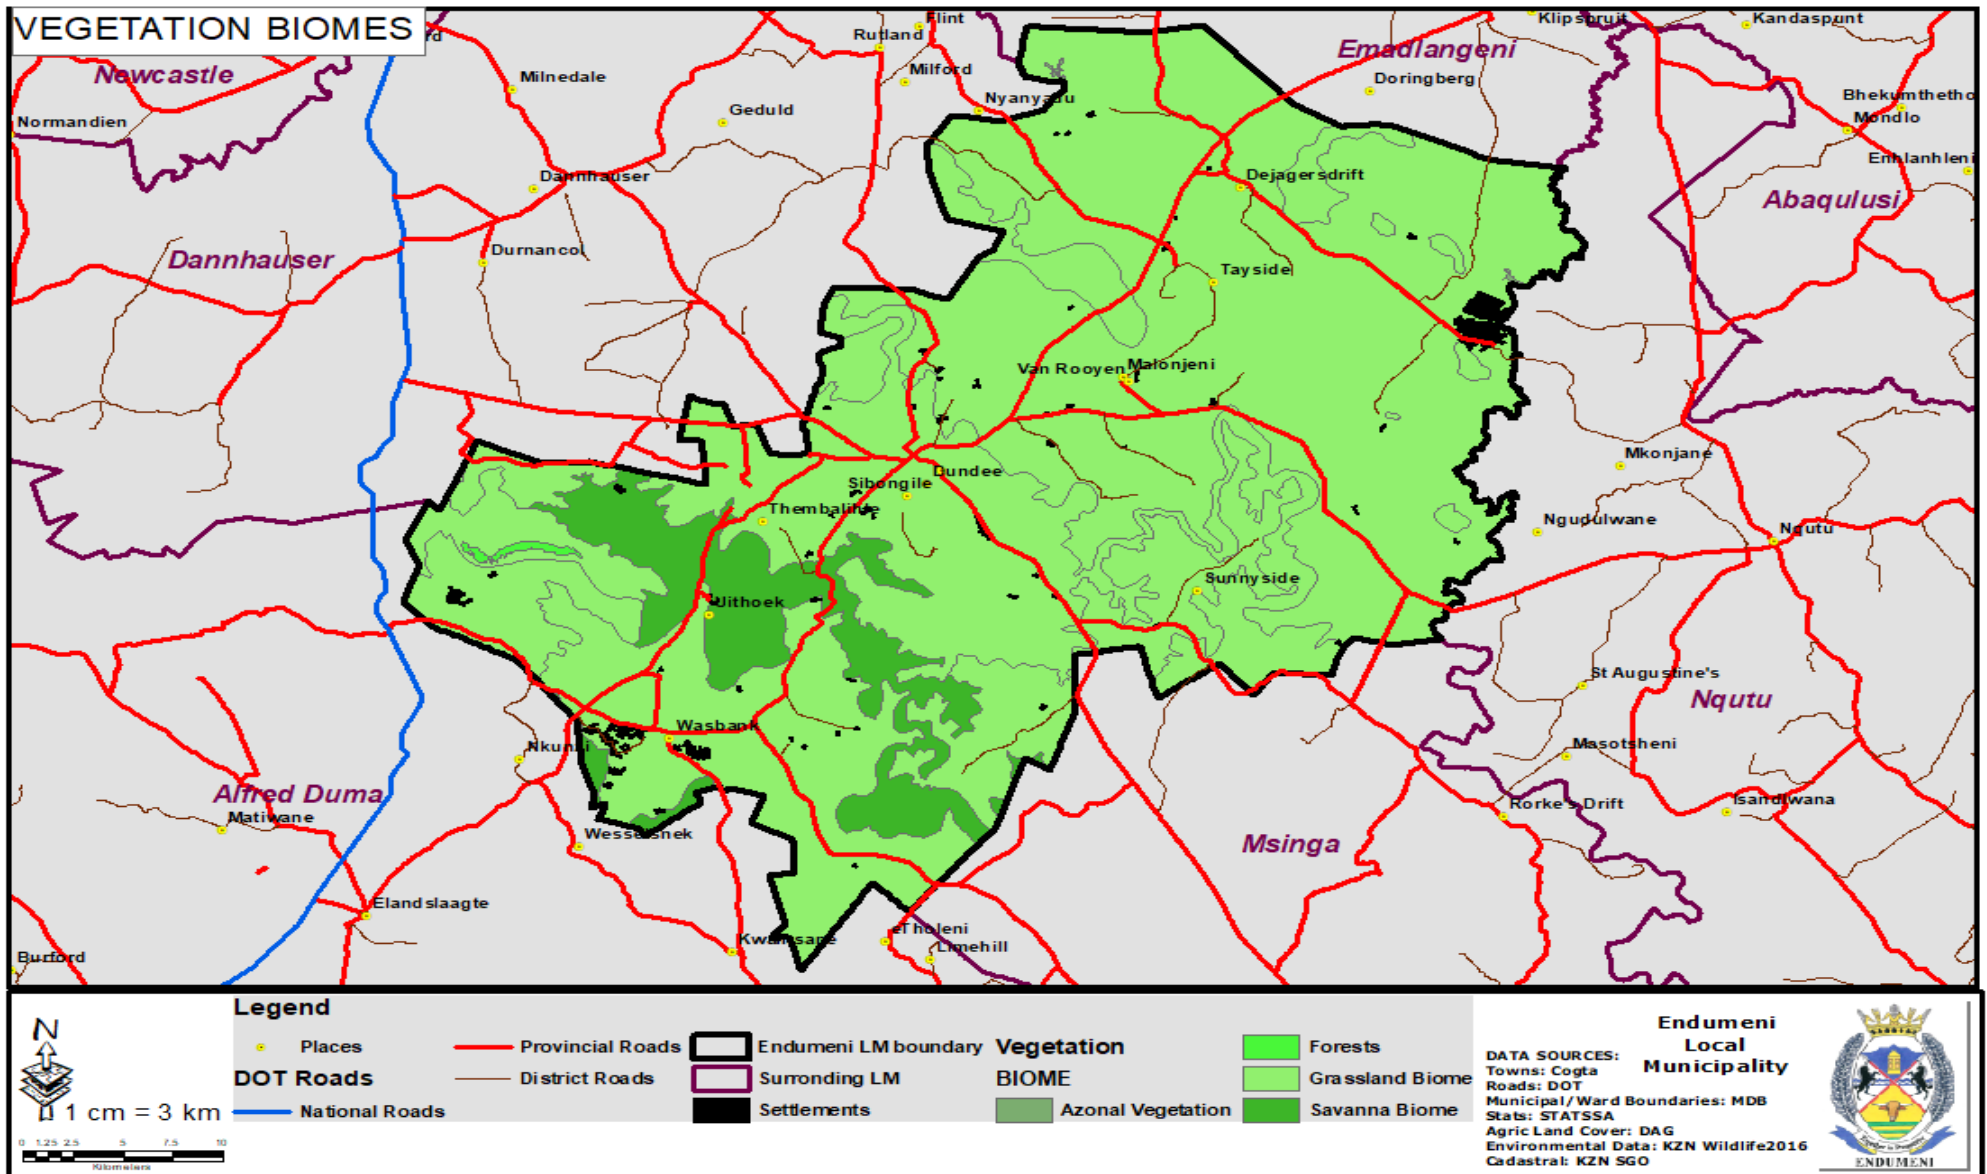

Spatial issues	Spatial strategies
<ul style="list-style-type: none"> • The municipality is located within a well-developed commercial agricultural region and hence, it functions as an important regional rural service center serving the surrounding agricultural hinterland. • Its location away from the national road network limits any potential development benefits that might otherwise accrue to the Municipal area. The implication is that the Municipality needs to look to its own strengths and • comparative and competitive advantages in order to grow its economy, rather than being able to 'piggy-back' on any spin-offs from development arising from the two main development axes of the Province 	<ul style="list-style-type: none"> • Promote a more compact urban form by focusing on and densifying existing urban nodes • Promote a more efficient use of infrastructure, nurture and protect higher potential agricultural land and ensure the appropriate level of protection to environmentally sensitive areas • Promote economic opportunities, including LED and tourism, in appropriate localities and ensure that land use within the municipal area will be able to be managed in a balanced and integrated manner • Promote opportunities for land reform • Accommodate new housing development areas

2.2.6 ENVIRONMENTAL ANALYSIS

RIVERS, HYDROLOGICAL WATER FEATURES AND ECOSYSTEM

Endumeni is home to Buffalo River and Wasbank River. The main tributaries of Buffalo River are Njiwati, Sterkstroom or Impathi, the Pondenshalana, Nyende, Eerstelling, Basangoma and Blood Rivers. Wasbank River's main tributaries are Mkomazana, KwaMatchokuza, Busana, Klipspruit, Biggarsgatspruit and Blinkwater Streams. Groundwater resources, perennial rivers and streams and stored water in farm dams are the main sources for stock watering purposes, while river flow and stored water in larger dams are the main sources for irrigation – although high-yielding production boreholes may also be important sources of irrigation water in certain areas. Regarding perennial river flow the Endumeni area is reasonably well-watered with most of the streams. There are also several smaller perennial streams on the Dundee plateau.

freshwater Ecosystem Priority Areas (FEPA) are important water resource and aquatic ecosystems areas that need protection for promoting sustainable water resource use and achieving the freshwater ecosystem goals of the country. The National Water Act (1998) recognizes that water is a scarce resource and that there is a need for the integrated management of all aspects of water resources. The National FEPA project aims to achieve such integration with the National Environmental Management Biodiversity Act (2004). The implementation of the measures in this Act must be improved in the area, specifically in respect of the protection, conservation, and sustainable use of the water resource assets in the Endumeni. The biggest threat in the area is the potential pollution of freshwater sources (surface and groundwater) through decanting of mines (difunctional and active).

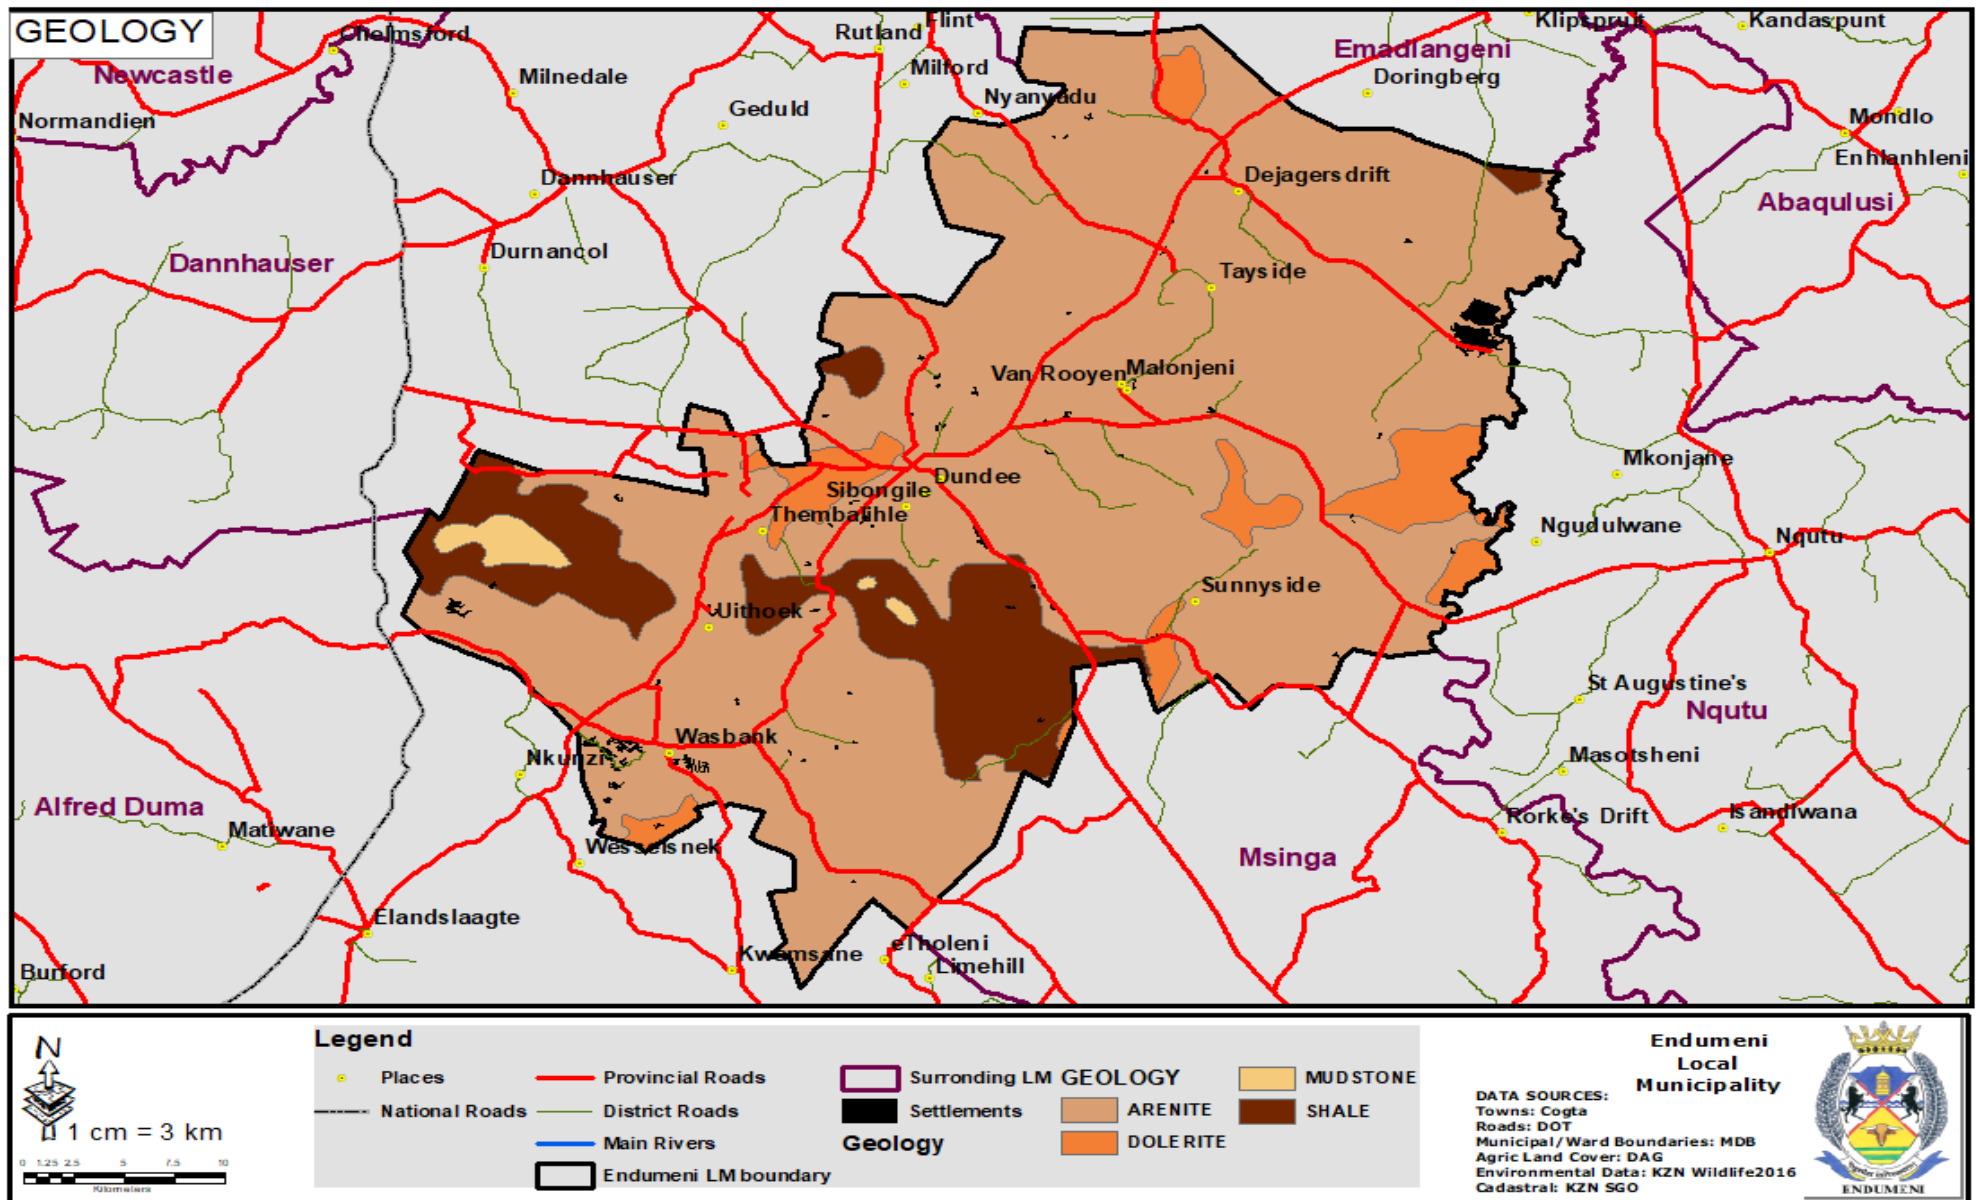

Map 10: Vegetation

2.2.7 GEOLOGY

Endumeni Municipality comprises of a range of soil geology formations which includes Arenite, Shale and Dolerite. The geology of the site includes Arenites.

Arenites is a sedimentary geological formation found in Karoo Basin region of Southern Africa. It is carbon-rich sedimentary deposit; owing to the high vegetation content of the original sediment i.e. some of the areas that have this type of geological formation contain mineral occurrences for coal mining. Shale is a fine-grained, clastic sedimentary rock composed of mud that is a mix of flakes of clay minerals and tiny fragments (silt-sized particles) of other minerals, especially quartz and calcite. The ratio of clay to other minerals is variable. The study area is known for being underlined by the Vryheid formation of the Ecca Group, in geohydrology, the Ecca group is known for its high yielding capacity. Shale is characterized by breaks along thin laminae or parallel layering or bedding less than one centimeter in thickness, called fissility.

Shales are typically composed of variable amounts of clay minerals and quartz grains and the typical colour is gray. Addition of variable amounts of minor constituents alters the colour of the rock. Dolerite is also widely distributed into both groups of sediments. Although the dolerites occur over large areas, there are usually underlain by shale even on what appears to be dolerite ridges. This also implies that these tend to be very narrow and shale is the most predominant parent material. There are poorly drained soils that occur on older alluvial.

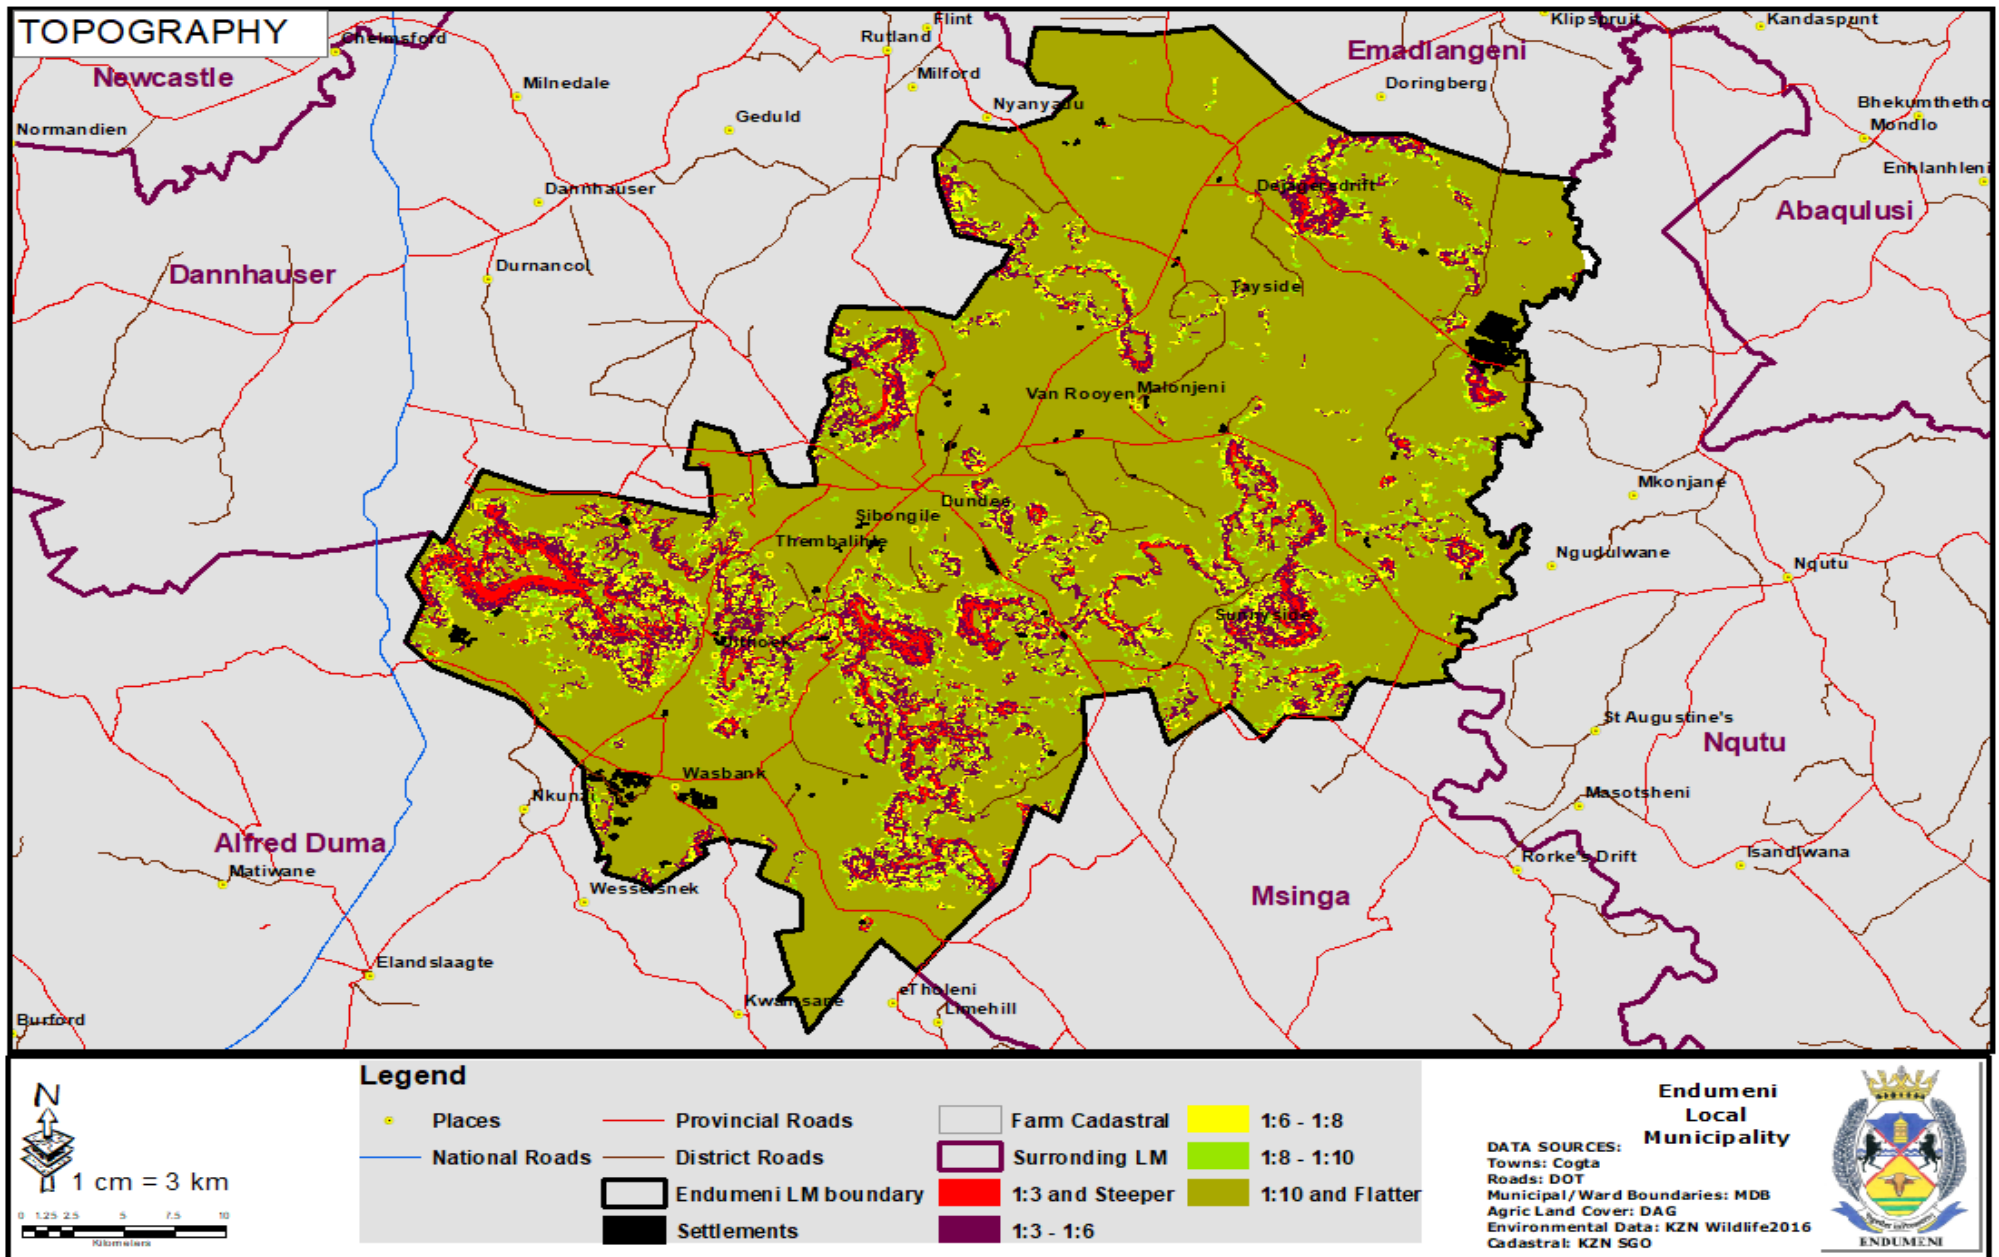

Map 11: Geology

2.2.8 SLOPE ANALYSIS

Endumeni is a generally flat area from a topographical point of view. The broad pattern of slopes in the study area is as follows:

- ☛ On the flanks or side slopes of the Biggarsberg mountains and other isolated mountains and koppies as well as along the escarpments separating the higher plateaux and the lower plains: generally steep slopes in the 20-40% range.
- ☛ Below these steep rugged areas there is usually a strip of footslope colluvium with slopes typically in the 5-10% range.

On both the higher plateaux and the lower plains, but away from the mountains, koppies and scarps: a pattern of wide gently sloping convex ridges with slopes typically in the 0-4% range but with slightly steeper side slopes before the slope pattern changes from convex to concave-sloping watercourses and fringing areas. Most of the urban developed areas within Endumeni Municipality are located within a flat terrain which implies that further expansion of these areas may not be subjected to any hindrances from a topographical point of view.

Map 12: Topography

2.2.9 CONSERVATION AND PROTECTED AREAS

Endumeni Municipality does not have any proclaimed protected areas within its jurisdiction. However, there are few areas that are worth conservation which includes Biggarsberg, Dundee Agricultural RS, Ndumeni and Thukela Biosphere.

2.3 CLIMATE CHANGE

October and (screen) temperatures may fall below 0 degrees C on 14 days in a year. The area lies in the summer season rainfall category, 90% of the mean annual rain falling between September and April. Average annual totals range between 800 and 900mm on the higher ground – the Biggarsberg, decreasing to 725-750mm in the Buffalo River valley and falling to 750mm on the western edge of the Biggarsberg. Likewise, the number of rain days total between 70 and 80 along the ridges of high ground, falling to 60 days or less in the 'rain-shadow' valleys. Most of the rainfall arrives in the form of thunderstorms, intense falls of short duration, often restricted to small areas. Some 35 'thunder days' can be expected each year but only 25% of the thunderstorms produce more than 10mm of rain. Hail occurs between two and three times per year. This is significantly less than areas closer to the Drakensberg where the incidence of hail can rise to 8 days in a year.

Mean annual Temperatures vary between 15 degrees Celsius along the higher ground of the Biggarsberg, rising to nearly 180C along the lower altitude Buffalo River with a standard deviation of about 0,5 degrees C. Extreme maximum temperatures may reach 400C in the valleys around January and minimums can fall as low as -70C in the winter months.

Areas of mitigation Endumeni LM has included the climate change issue in their risk registry as means to of mitigation. Under the human settlement risk registry, the municipality will include solar geysers and jojo tanks to contain water especially during these times with the COVID 19 pandemic, as part of the specifics when developing new housing developments, for both low cost and middle-income housing.

2.4 DEVELOPMENT CORRIDORS

The development corridors within Endumeni have been located with a provincial context and are therefore named accordingly.

2.4.1 PRIMARY CORRIDOR

The primary corridor within the region is the N11 (Ladysmith to Newcastle). Whilst the N11 does not pass through Endumeni it does provide access to the R602 and R68 for access to the area from the west. This is a key industrial and agricultural corridor.

2.4.2 SECONDARY CORRIDOR

The R33 and R621 form the central spine of the secondary provincial priority corridor. The focus of this corridor is agriculture and tourism.

2.4.3 TERTIARY CORRIDORS

These comprise the lower order roads within the municipal area, including the R33 from Dundee to Wasbank and the R68 to Nqutu and the R33 to Vryheid. Although they are lower order roads, they play an important role in enhancing accessibility to a number of the rural settlements within the municipal area.

2.5 ACTIVITY CORRIDOR

Mixed use activity corridors are located within Dundee and Glencoe. These routes offer an opportunity to provide the highest range and intensity of mixed use activities.

2.6 NODES

PRIMARY NODE - DUNDEE

An existing multipurpose business, administrative, social service and intermodal transportation terminal centre that services the surrounding urban and rural communities of Endumeni and its neighbouring municipal areas. Dundee is home to the headquarters of the Umzinyathi District Municipality.

SECONDARY NODE - GLENCOE

This is an existing secondary node that serves the greater Glencoe community with a mix of commercial and social services. The role of the node is to provide essential 'day to day' commercial needs and social and commercial services to immediately adjacent communities. The node should be consolidated with Dundee to form an urban core for Endumeni Local Municipality.

RURAL SERVICES NODE - WASBANK

An existing settlement that serves the southern region of Endumeni, Wasbank should be consolidated and/or enhanced as village centre that provides support to the development of the rural and agricultural hinterlands of Endumeni.

RURAL SERVICES SATELITE NODES

Further Rural Service Satellite Nodes are proposed in areas where there is a significant concentration of rural population:

De Jagersdrift	Malonjeni
Vechtkop	KwaTelaphi
Tayside	

These nodes perform a similar function to the rural services node but the provision of social facilities can be provided in a non-permanent manner. Such facilities should include mobile clinic, school, mobile welfare services, mobile banking services, postal services, and a basic sports facility.

Spatial Challenges within each node:

The following are the challenges that face Dundee node:

- a) Illegible town layout map.
- b) Restricted lay-by close to an intersection.
- c) Undefined pedestrian walkway.
- d) Informal settlements occurring at the extension of Sibongile Township.
- e) Some of the private signage overpowers the town's entrance feature.
- f) Lack of public amenities like street furniture, ablution facilities
- g) Aesthetic quality and character of the town not maintained.
- h) Lack of new residential/housing products such as cluster housing.
- i) A large number of roads are in dire need for upgrading and maintenance.

DUNDEE NODE SPATIAL PLANNING PROPOSAL

The spatial planning proposals are as follows:

- a) Integrated mixed residential development.
- b) Informal Settlement Upgrade around Sibongile Township.
- c) Development of a road to Glencoe into an Urban Linkage Activity Spine in order to unlock land parcels that could be used for interface development.
- d) Delineation of the urban edge in order to promote compact and integrated development.
- e) Upgrade of informal settlements, greening and beautification of the entry of the town, from R33 (Craigsidde).
- f) Implementation of Dundee Regeneration Plan.

GLENCOE SPATIAL CHALLENGES

The following are the challenges that have been identified:

- a) Dilapidated and ageing infrastructure.
- b) Economic stagnation.
- c) Lack of new residential/housing products such as cluster housing.
- d) Housing stock within Glencoe comprises mainly of old and tired buildings.
- e) A large number of roads are in dire need for upgrading and maintenance.

GLENCOE NODE SPATIAL PLANNING PROPOSAL

- a) The spatial planning proposals are as follows:
 - a. Development of a road to Dundee into an Urban Linkage Activity Spine in order to unlock land parcels that could be used for interface development.
 - b. Integrated residential development including Middle Income Housing.
 - c. Land use integration as a means to address the coarse grain-land use pattern.
 - d. Urban renewal programme which may include infrastructure upgrade, redevelopment, and refurbishment of buildings.
 - e. CBD expansion including gateway developments at strategic points.
 - f. Delineation of the urban edge in order to promote compact and integrated development.
 - g. Strengthening spatial linkages with the neighbouring settlements such as Sithembile.

WASBANK SPATIAL CHALLENGES

Spatial issues facing Wasbank could be summarised as follows:

- a. Urban renewal programme which may include infrastructure upgrade, redevelopment and refurbishment of buildings.
- b. CBD expansion including gateway developments at strategic points.
- c. Redefining the role of the town. Need to enhance functional and spatial integration into the surrounding areas.

SPATIAL PLANNING PROPOSAL

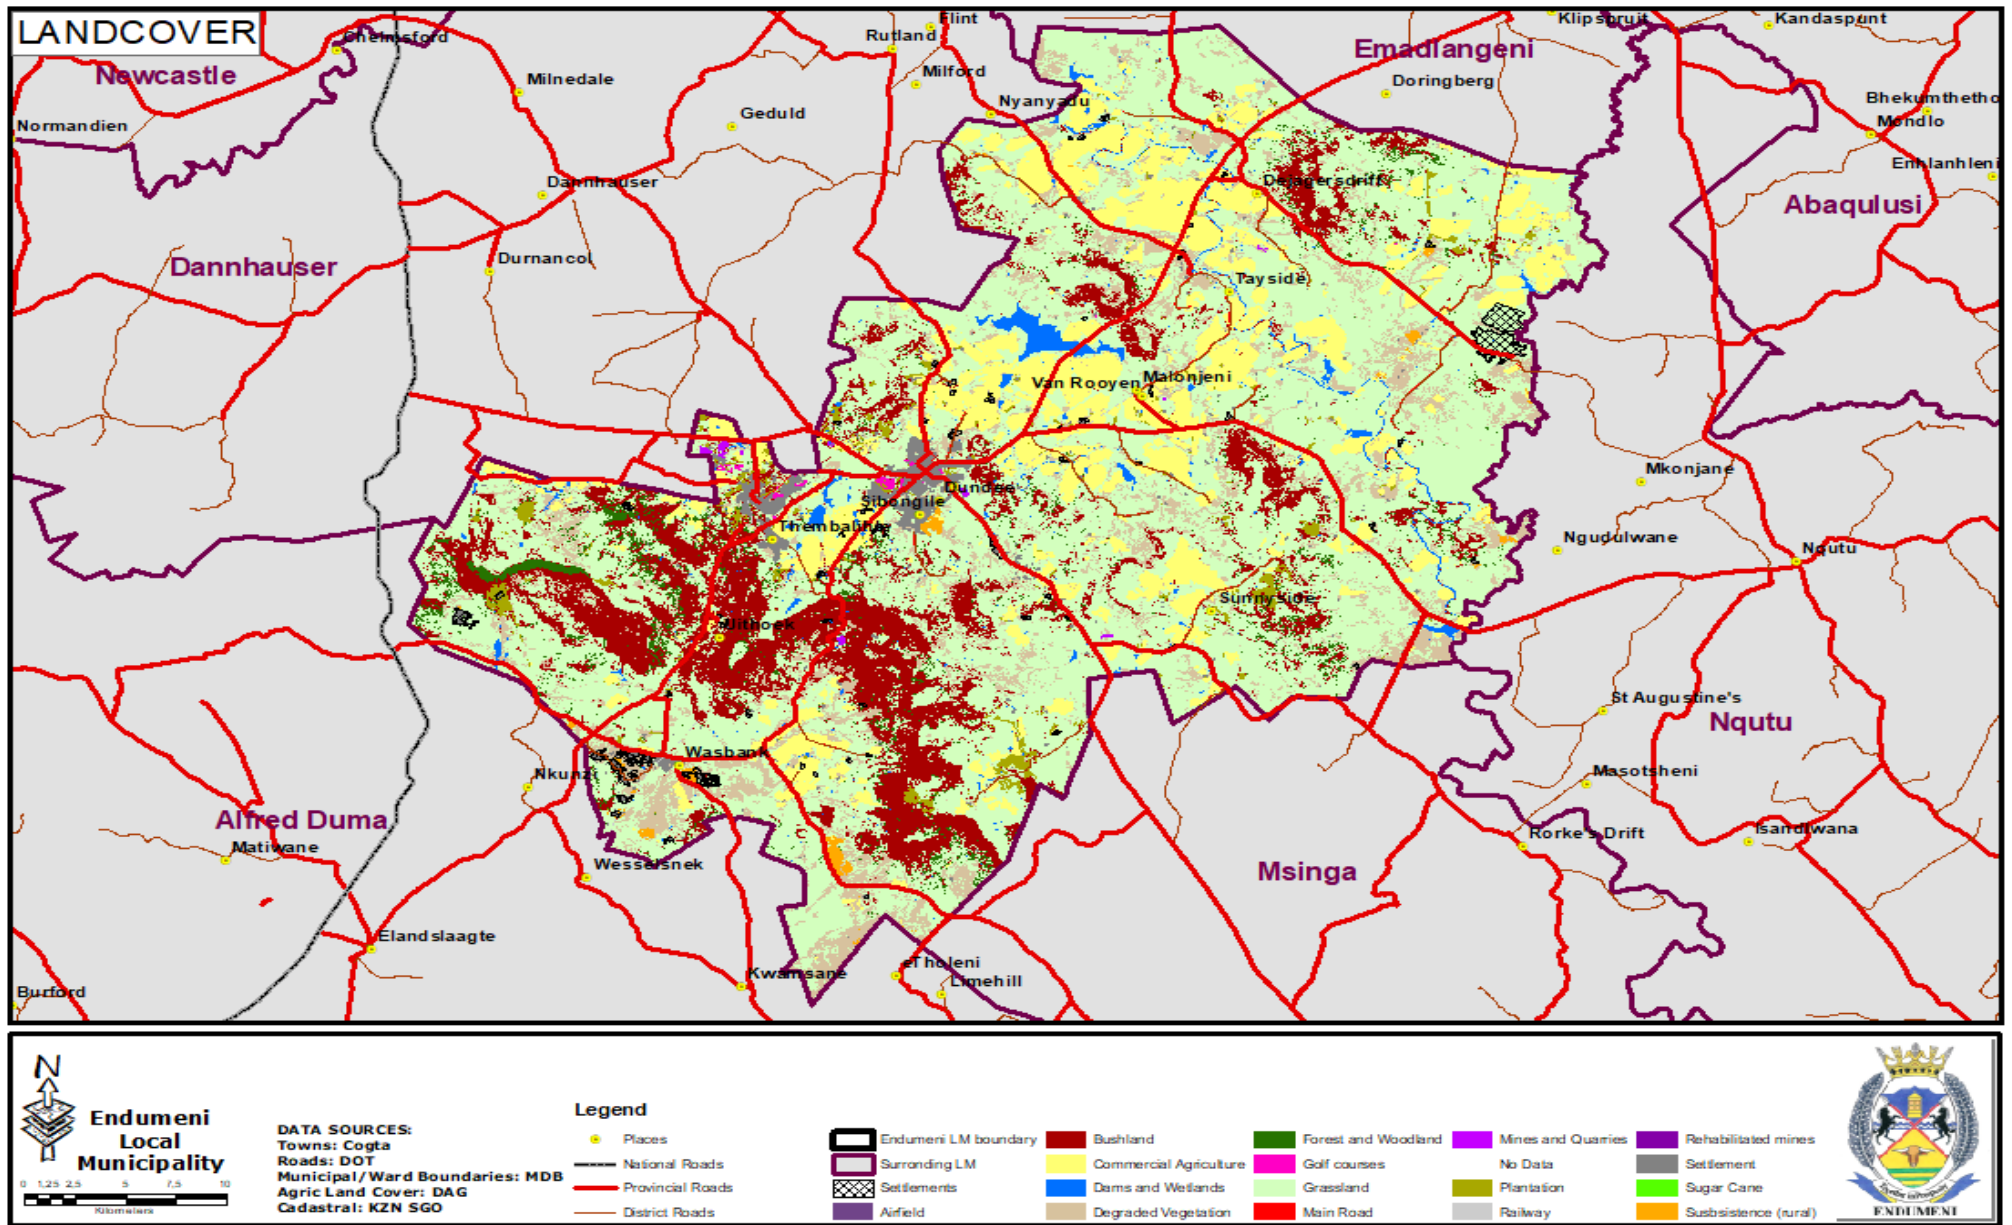

- a) The spatial planning proposals are as follows:
 - b) Undertake and pilot an urban renewal programme targeting infrastructure upgrade, redevelopment, refurbishment of buildings and amenity building.
 - c) Development of Gateway at strategic points.
 - d) Wasbank Economic Assessment.
 - e) Urban Edge re-adjustment.

2.6.1 LAND COVER AND BROAD LAND USE

LAND COVER

The land cover of Endumeni Municipal Area can be categorized as follows:

- ✚ Urban/ Built-up areas – which includes the dense settlements and towns of Dundee, Glencoe and Wasbank.
- ✚ Mountainous areas – which are mostly found on the southern part of Glencoe and few steep/ hilly areas that are spread around different parts of the municipality.
- ✚ Natural Grasslands – which are mostly found within the farmlands.
- ✚ Surface Water (Rivers, Dams and Tributaries) – which includes Buffalo River and its associated tributaries.

Map 14: Land Cover

BROAD LAND USES

Current land use patterns have evolved in response to the spatial structure of Endumeni, settlement patterns, the natural environment and regional access routes and reflects the predominately rural nature of the region within which Endumeni is located. The land use categories are not highly diversified and can be outlined in the below map.

TABLE 15: SPATIAL AND ENVIRONMENTAL SWOT ANALYSIS

SPATIAL ANALYSIS AND ENVIRONMENTAL ANALYSIS	
STRENGTHS	WEAKNESS
SDF in place	Lack of Implementation of the SDF
Existing baseline procedure in place to guide and regulate development	Lack of enforcement of building control and compliance
Availability of farm/ agricultural land, e.g. municipal owned and LRAD land	Less focus on potential development nodes (tertiary nodes)
Town effectively linked in terms of transportation	Lack of a strategic environmental assessment plan
Environmental planning capacity	Lack of implementation of IWMP
GIS Capacity	
IWMP in place	
OPPORTUNITIES	THREATS
Geo-referencing of municipal projects	Lack of new investment into the municipal area
Linkage of the District Infrastructure Plan to SDF	Loss of revenue due to lack of building control and compliance
Job Creation through removal of alien plants and green town	Climate change
Identification and establishment of Truck stop	Degraded environment and soil erosion
Promotion of Public Investments in potential nodes. i.e. Develop strategies, activities should be linked	
Obtaining cleanest/greenest town status	

Job creation through the eradication of alien vegetation	
Development of SEA and climate change response strategy	

2.7 DISASTER MANAGEMENT ANALYSIS

2.7.1 MUNICIPAL DISASTER MANAGEMENT CENTRE

The focal point of all in disaster risk management lies in the disaster management, fire and rescue services Centre. The Centre is required to fulfil crucial or important disaster management, fire and rescue functions namely:

- ✚ Planning;
- ✚ Institutional Capacity;
- ✚ Capacity building;
- ✚ Response and Recovery;
- ✚ Funding

The disaster management, fire and rescue services are strategically placed under the fire station to meet all the requirements as they are first line of responders during disaster and fire incidents. Disaster management, fire and rescue services fall under the office of the Municipal Manager with the intention to report direct to an Accounting Officer.

In terms of the Disaster Management Act (Act No.57 of 2002), Section 43 -50 outlines the establishment and functions of the Centre to ensure an integrated and coordinated approach to Disaster Risk Management within the district.

Endumeni Disaster Management Centre was established in August 2003, is fully functional and it runs 24/7. The Centre is co-shared with uMzinyathi district Municipality as their own disaster management Centre is under construction. The Centre Control Number (034 – 21 222 22).

2.7.2 STATUS OF DM & FIRE SERVICES

Endumeni Local Municipality has successfully appointed the Manager responsible for Disaster Management, Fire and Rescue Services, and Fire Station Officer. Endumeni has further prioritised employing of 10 fully qualified Fire fighters who were volunteers to capacitated Fire and Rescue Servicers sector. With success of employing the previously EPWP Volunteers permanent, Endumeni Fire and rescue operational time will be changed to a 24/7 normal hours shift with

four teams working day and night on normal hours which will reduce excessive working hours, fatigue and unnecessary overtime and standby allowance but further increase rapid effective emergency response. All fire-fighters are trained in the following field: Fire Fighting 1&2, Hazmat, Operations and Awareness education. The Senior Manager in Disaster Management report directly to the Head of Department Community Services. Part of the support from DDMC are the volunteers who have received training in the following:

- ✚ Basic Firefighting
- ✚ Basic First Aid
- ✚ Communication
- ✚ Basic Disaster Management

2.7.3 RESOURCES

Vehicles

Disaster Management and Fire Emergency Services unit has two vehicles. One fire engine, one sake-bakkie and currently in a process of procuring two (2) more bakkie for Motor Vehicle Incidents to ensure effective response.

Offices

Offices are situated at 8 Diaz Road, Dundee. The offices have a training Centre, sleeping quarters, and a smoke room provided for fire training. The uMzinyathi District Municipality is responsible for the coordinating and regulation of fire services within its area of jurisdiction in line with the Local Government Municipal Structures Amendment act 33 of 2000.

2.7.4 STATUS OF MUNICIPAL DISASTER MANAGEMENT POLICY FRAMEWORK

Section 42 of the Disaster Management Act (Act 57 of 2002) states that each metropolitan and each district municipality must set up and implement a framework for disaster management in the municipality aimed at ensuring an integrated and uniform approach to disaster management in its area. The Endumeni Local Municipality currently has no municipal disaster management policy framework, but the municipality applies the national and provincial disaster management policy framework for guidance and direction regarding Municipal disaster management affairs, which is in line with the Nation disaster management policy framework.

2.7.5 STATUS OF DISASTER MANAGEMENT PLAN

The Disaster Risk Management Act (Act No.57 of 2002) makes provision in Section 53 that each municipality must prepare a disaster management plan for its area according to the circumstances prevailing in the area. The local sphere of government is the first line of response and responsibility in the event of a disaster occurring or threatening to occur. In terms of the Disaster Management Act of 2002, the Local Municipality is responsible for the co-ordination and management of the disaster incident until such time that the responsibility escalates to a higher level of Governance. Through disaster risk management planning and effective co-ordination of all line function response agencies is, therefore, key to saving lives and limiting damage to property, infrastructure, and the environment. In 2013, the municipality developed its management plan which was adopted in the same year. The DMA requires that it be reviewed. It is currently being reviewed with the support of the District and Provincial Disaster Management Centre.

2.7.6 MUNICIPAL DISASTER MANAGEMENT INTER-DEPARTMENTAL COMMITTEE

The Endumeni Local Municipality has not established a Municipal Inter – Departmental Committee because middle, senior management representatives of the designated line function departments within the municipality are members of the Endumeni Disaster Management Advisory Forum. This is an internal coordination forum at manager's level where decisions from the Advisory Forum can be implemented and tracked, that forum helps Endumeni Municipality in performing its functions and responsibilities in terms of Disaster Management. for this plan to be implemented successfully it is imperative for the Management Committee to adopt disaster management as a standing agenda point of the meeting. This will ensure that disaster risk management is addressed on a regular and ongoing basis.

2.7.7 DISASTER MANAGEMENT ADVISORY FORUM

Section 51 of the Disaster Management Act (Act 57 of 2002) states that district municipalities may establish a municipal disaster management advisory Forum. According to subsection (1) a forum is a body in which the municipality and other key stakeholders consult one another and co-ordinate their actions on matters relating to disaster management in areas under their authority.

The Disaster Management Advisory Forum of Endumeni Local Municipality was established on 1 March 2011. It is composed of representatives from several relevant organizations who are properly delegated to make decisions on behalf of their organizations. There is commitment

and consistency of membership. The roles and functions of the Endumeni Disaster Management Advisory Forums are listed below:

- ✚ Be the point of coordination for all the role - players;
- ✚ Facilitate cooperation between District, Local and key role - players;
- ✚ Develop the capacity and understanding about disaster management amongst the key role - players;

Develop resource sharing arrangements around financing including the delivery of emergency services and responding to emergencies or disasters and;

Report to key stakeholders including the municipal council, province and national on matters of disaster management. There is also the practitioner's forum in the level of a District Municipality, which is a planning team with the main objective of coordinating the daily operations of disaster management. This team allows the local municipalities to engage with one another and share their experiences, lessons learned and planning exercise. At the same time enable the district to coordinate

The functions and operations on a district level to ensure that there is no duplication of activities and all aspects of disaster management are dealt with by a responsible authority.

The Committee supposed to meet at least four times a year to facilitate the best possible co – ordination within District, Province, and the municipality. The Disaster management advisory forum exists for integrated and co- ordinations amongst Municipalities as Disasters are usually not limited within political boundaries.

But due to Covid-19 pandemic, which has restricted physical meetings and movements to curb the spread, Endumeni has form part of Covid-19 local JOC which has responsibility to respond, manage and plan on mitigations to as part of national Disaster Management strategy after national disaster has been declared.

TABLE 16: DISASTER MANAGEMENT & FIRE SERVICES PROJECTS

NAME OF THE PROJECT	BUDGET	TARGET AREAS	YEAR
Installation of lightning Conductors	R 100 000, 00	Vulnerable households	2021/22
Provide Post-disaster	R 200 000, 00	All affected. households	2021/22

2.7.8 CHALLENGES FOR DM AND FIRE SERVICES AS PER SWOT ANALYSIS

- ✚ Disaster Management, fire and rescue services are acutely aware of the following challenges as per SWOT analysis.
- ✚ Late reporting of incidences during emergency
- ✚ Under-staffed, i.e., during fire season it is difficult to for them to extinguish 3 or more fires at different places.
- ✚ Shortage of location identification tools(tablets) and Emergency Boards installations for rapid response capacity strategy.

- ✚ Shortage of working tools such as Generators, Pumps and new fully equipped and reliable Fire Engine
- ✚ Capacity funding
- ✚ Lack of investment in disaster risk reduction.
- ✚ Lack of an Integrated Risk assessment plan which will be harmonise with IDP to ensure its integration in any development plan as part of mitigation preparedness strategy.
- ✚ Lack of political commitment on disaster risk reduction
- ✚ Shortage of Fire and Rescue Sub-Stations especial on rural areas such as Wasbank and Thelaphi to ensure rapid response.
- ✚ Late reporting of incidences during emergency

2.7.9 DISASTER RISK ASSESSMENT

The Endumeni Municipality risk profile has been developed or in place. It was conducted as ward-based risk assessment in consultation with various community structures. The disaster risk assessment information generated by the uMzinyathi District Municipality was used to produce an indicative risk profile of Endumeni Local Municipality. The risk profile includes maps that fully represent hazards and disaster risk rating maps, vulnerability, and capacity of Endumeni Disaster Risk Management Centre. Endumeni Local Municipality will soon embark on the review and update and development of the Disaster Management Plan. During this exercise Municipality will review most of the disaster risks previously found because they are adapted to change due to the unpredicted climate change, local municipalities together with the uMzinyathi District Disaster Management Centre will ensure that information on hazards, vulnerability and ability is presented in GIS format.

2.7.10 LIST OF PRIORITY HAZARDS

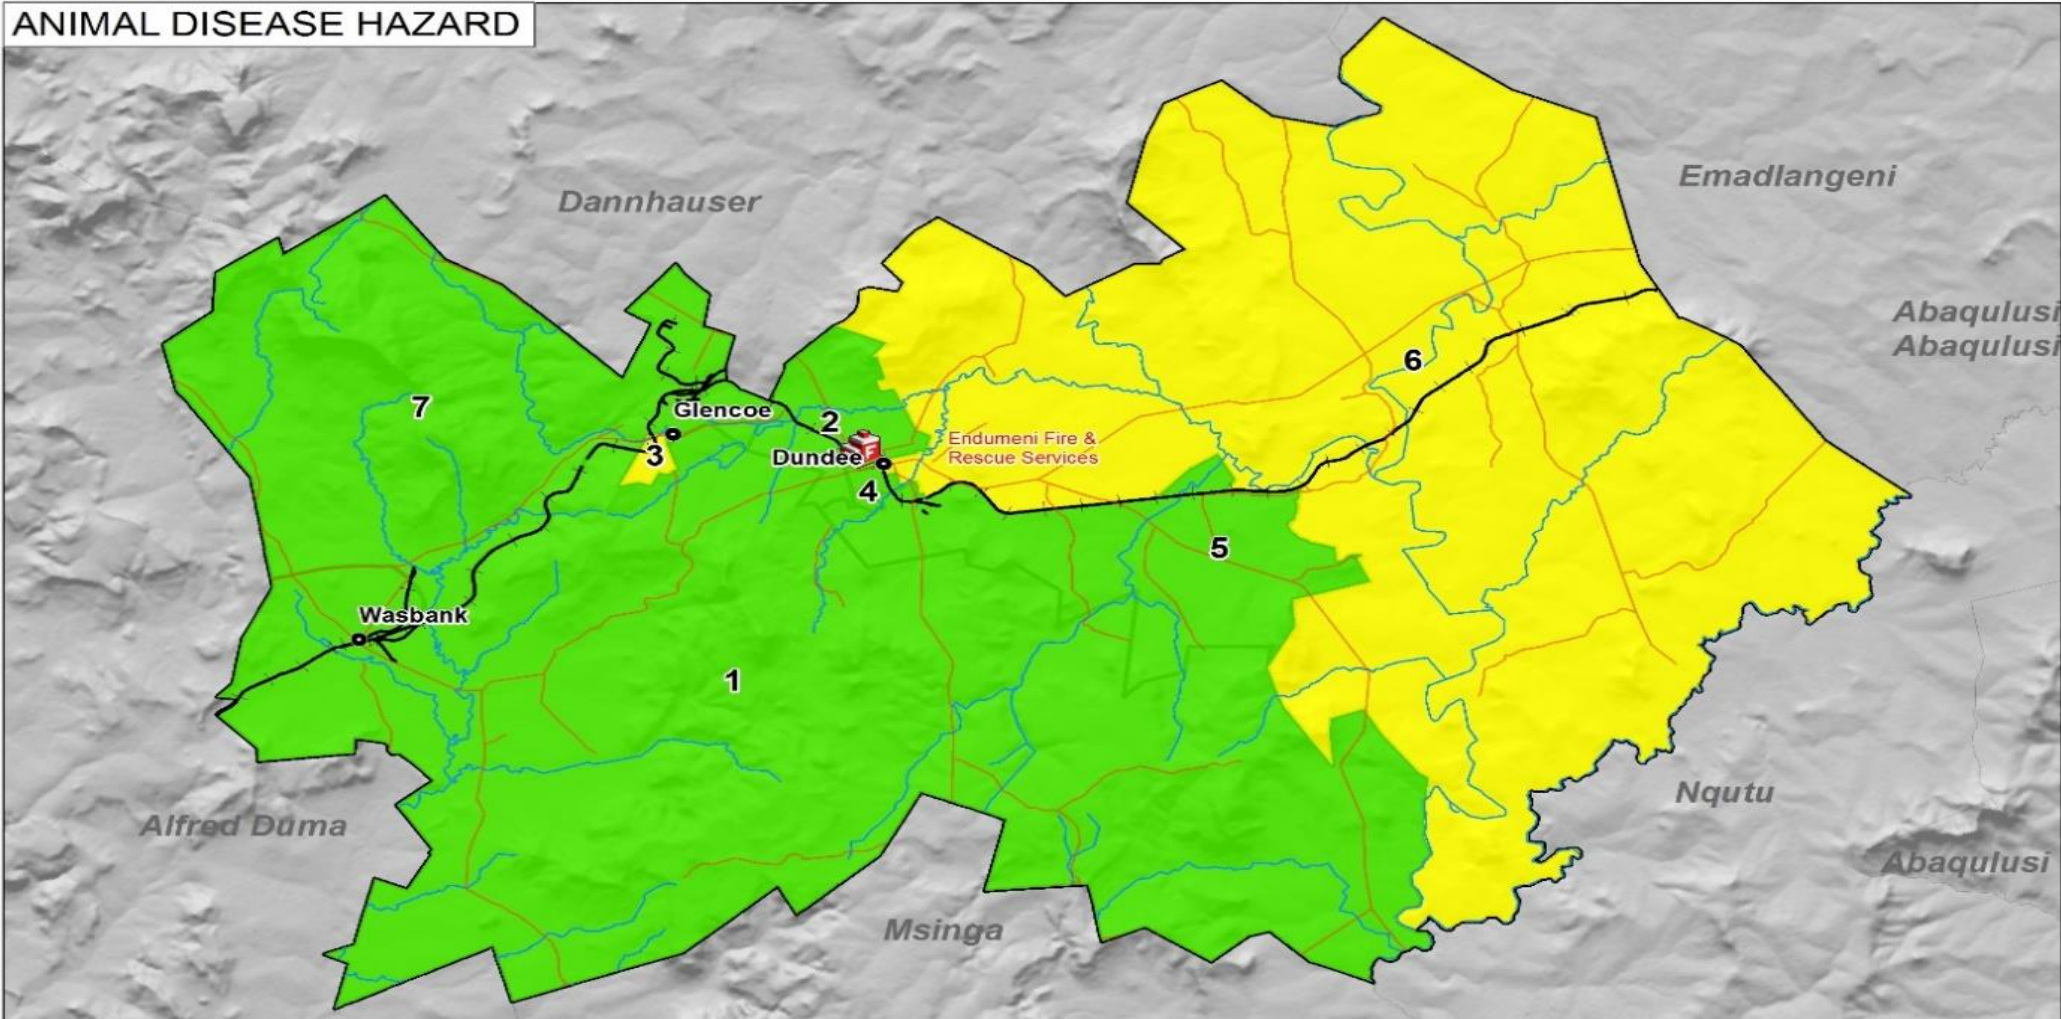

The following disaster risks were identified as priority risks to be addressed by disaster risk reduction as well as preparedness plans. Risk Ratings Category/ Profile are shown below:

Table 18: Risk Profile

Main Category	RISK
Fire Hazards-Veld Fires	0.90
Epidemic Disease/Health-Diseases: Human (covid-19)	0.90
Hydro-meteorological Hazards - Severe Storms (Lightning)	0.90
Hydro-meteorological Hazards - Severe Storms (Heavy Rainfall)	0.86
Hydro-meteorological Hazards - Floods (River)	0.83
Fire Hazards - Veld/Forest Fires	0.77
Hydro-meteorological Hazards - Severe Storms (Wind, Hail)	0.75
Fire Hazards - Formal & Informal Settlements / Urban Area	0.75

Hydro-meteorological Hazards - Severe Storms (Snow)	0.72
Transport Hazards - Road Transportation	0.71
Geological Hazards - Rock-fall	0.71
Hydro-meteorological - Drought	0.70
Pollution - Air Pollution	0.70
Transport Hazards - Air Transportation	0.69
Transport Hazards - Rail Transportation	0.67
Environmental Degradation - Erosion	0.66
Pollution - Water Pollution	0.65
Disease / Health - Disease: Animal	0.61
Hazardous Material - Hazmat: Spill/Release/Fire/Explosion (Storage & Transportation)	0.59
Pollution - Land Pollution	0.57
Environmental Degradation	0.57
Geological Hazards - Earthquake	0.55
Structural Failure - Dam failure	0.52
Infrastructure Failure / Service Delivery Failure - Information Technology	0.52
Major Event Hazards (Cultural, Religious, Political, Recreational, Commercial, Sport)	0.51
Disease / Health - Disease: Plants	0.46
Civil Unrest - Terrorism	0.45
Civil Unrest - Xenophobic Violence	0.44
Hydro-meteorological Hazards - Extreme Temperatures	0.38
Civil Unrest - Refugees / Displaced People	0.37

ANIMAL DISEASE HAZARD

 <p>Endumeni Local Municipality</p>	<p>DATA SOURCES: Towns: Cogta Roads: DOT Municipal/Ward Boundaries: MDB</p> <p>COMPILED BY : GIS OFFICER TEL: 034 212 2222 EMAIL:gis@endumeni.gov.za</p>	 <p>1 cm = 3 km</p> <p>Kilometers</p>	<p>Legend</p> <ul style="list-style-type: none">  towns  Fire And Rescue  Streets  Railway  Rivers  Ward boundary  Surrounding LM's 	<table border="1"> <tr> <td></td> <td>EXTREME HIGH</td> </tr> <tr> <td></td> <td>HIGH</td> </tr> <tr> <td></td> <td>MEDIUM</td> </tr> <tr> <td></td> <td>LOW</td> </tr> <tr> <td></td> <td>EXTREME LOW</td> </tr> </table>		EXTREME HIGH		HIGH		MEDIUM		LOW		EXTREME LOW
	EXTREME HIGH													
	HIGH													
	MEDIUM													
	LOW													
	EXTREME LOW													

Map 15: Animal Disease Hazard

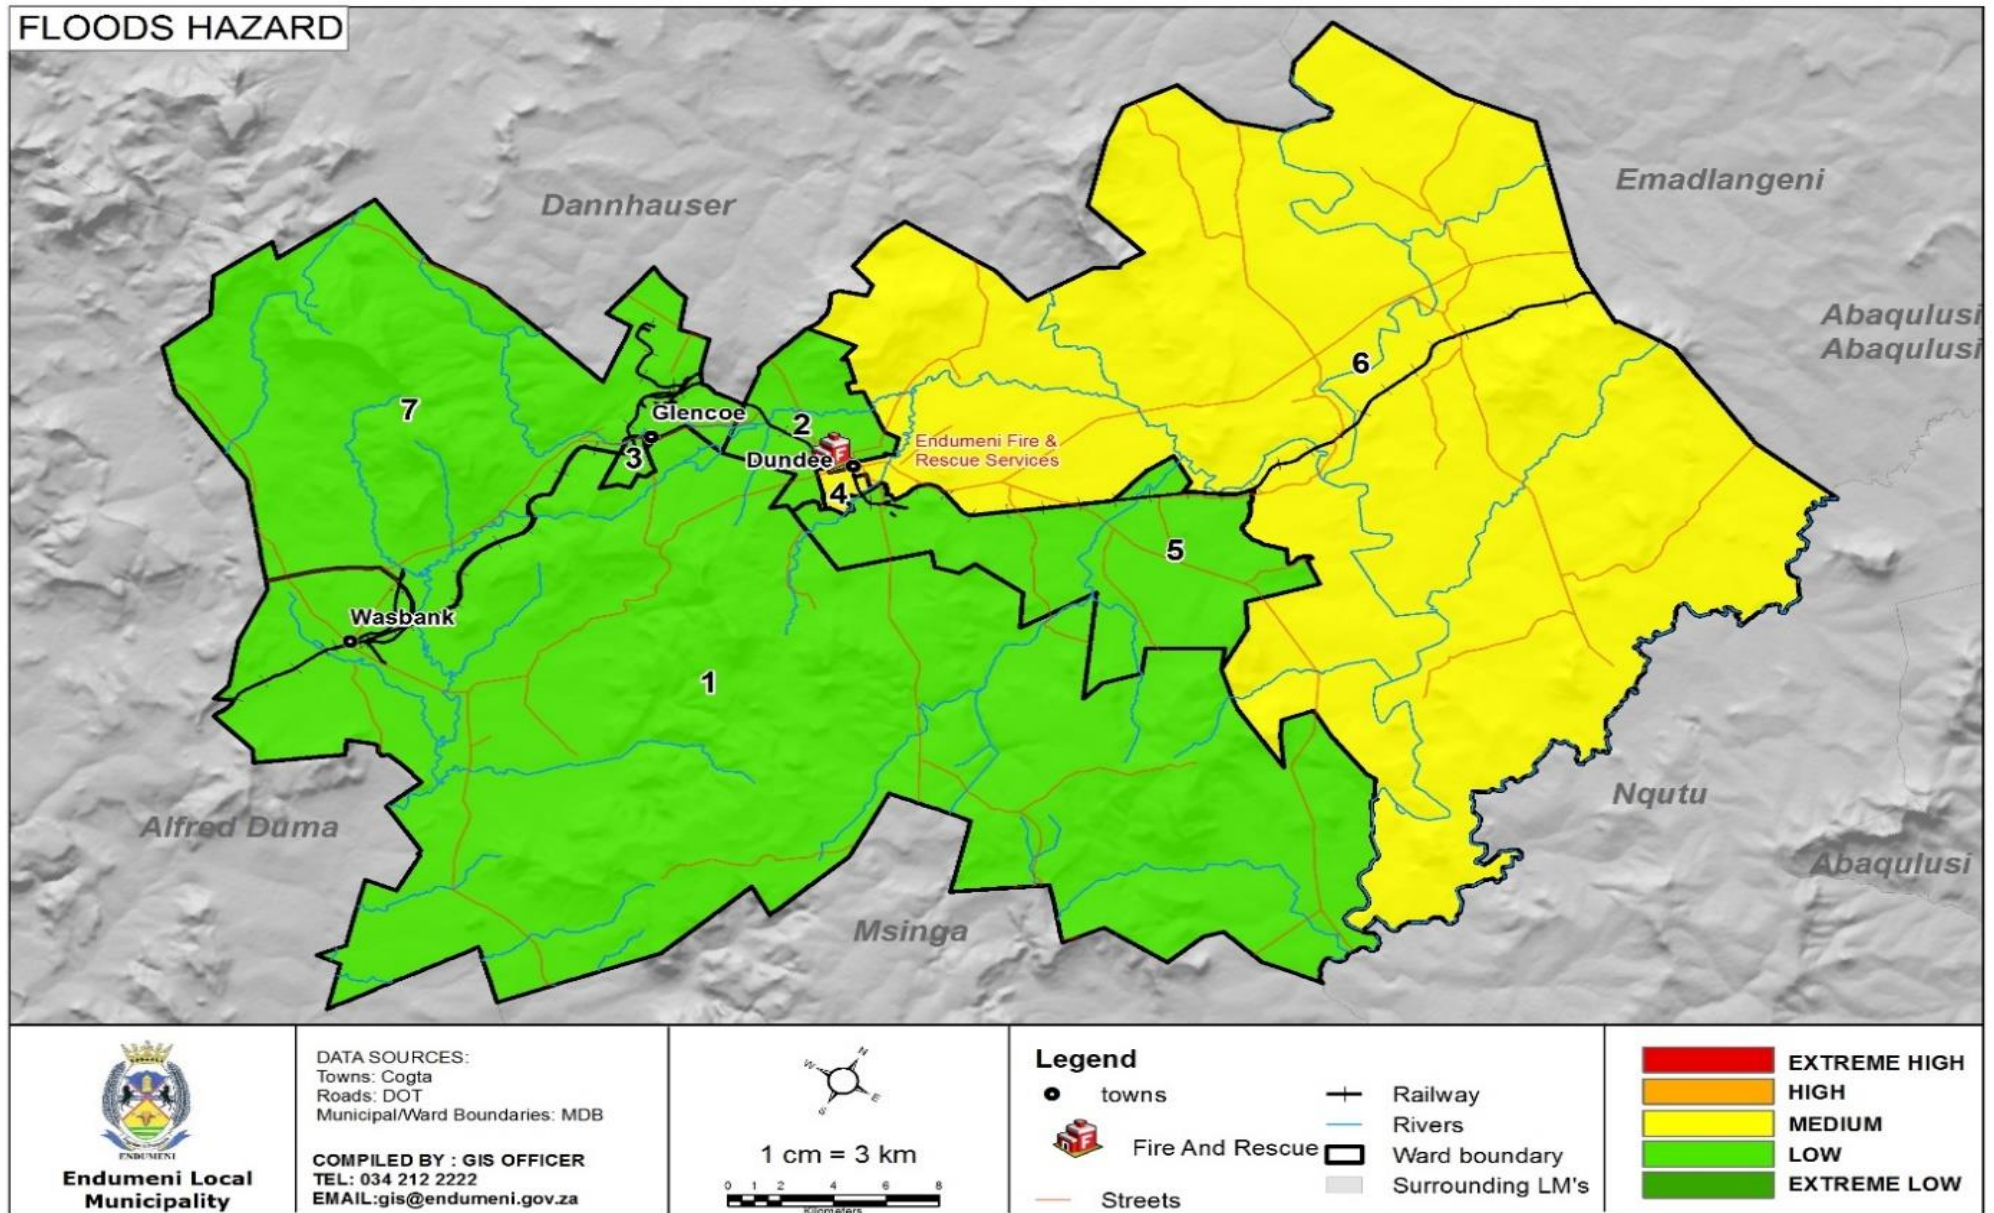

Map Analysis:

Due the nature Ward 6 in this mapping shows that it is a medium state of rating in terms of Animal Disease hazards, this is since this ward is most formulated by farms which farming is the major economic activities.

Mitigating

Endumeni Disaster Management responsibilities is to co-ordinate a uniform approach in between farmers and Department of Agriculture to ensure state of readiness and an effective mitigation plan is in place in cases of animal diseases outbreak.

FLOODS HAZARD

Map 16: Flooding Hazard

Ward Analysis

More cases of floods were reported in ward 6 that made it to be seen as a high flooding zone at Endumeni Local Municipality.

Mitigation Strategy.

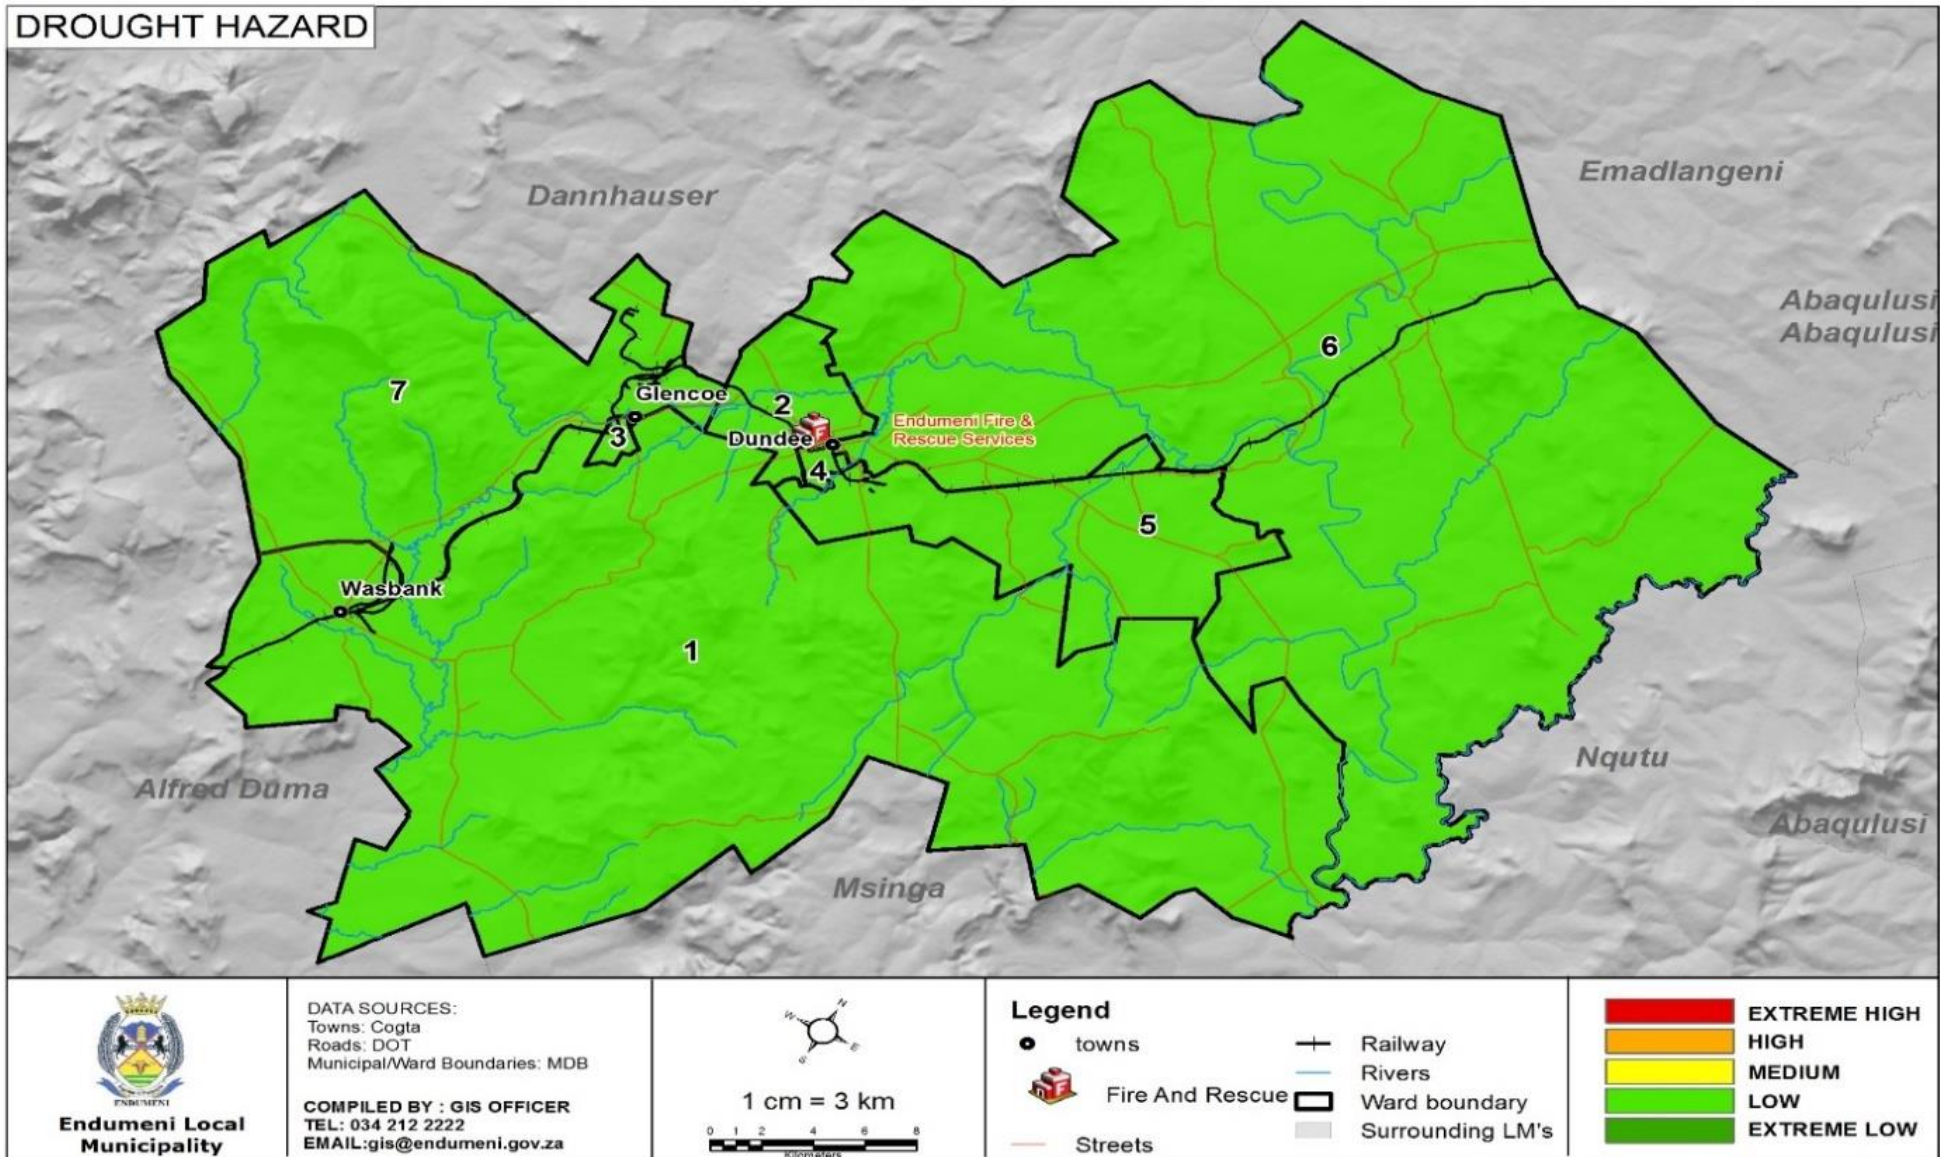

Awareness campaigns are planned to mitigate and further investigate the root cause of the flooding incidents reported within that ward.

Ward Analysis

Ward 2,3 and 5 is identified as a Highers in terms of drowning, this is due to the rivers and Dams within this ward which pose risk of drowning during crossing or swimming.

Mitigation Strategy.

Wards 2,3 and 5 are the wards with a lot of Dams, swimming polls and dangerous crossings which ENdumeni disaster Management has also engaged with SANDF and Department of Public works on their programme of building bridges on all dangerous crossing and continuous compliance inspection on the dams around the area and swimming pools.

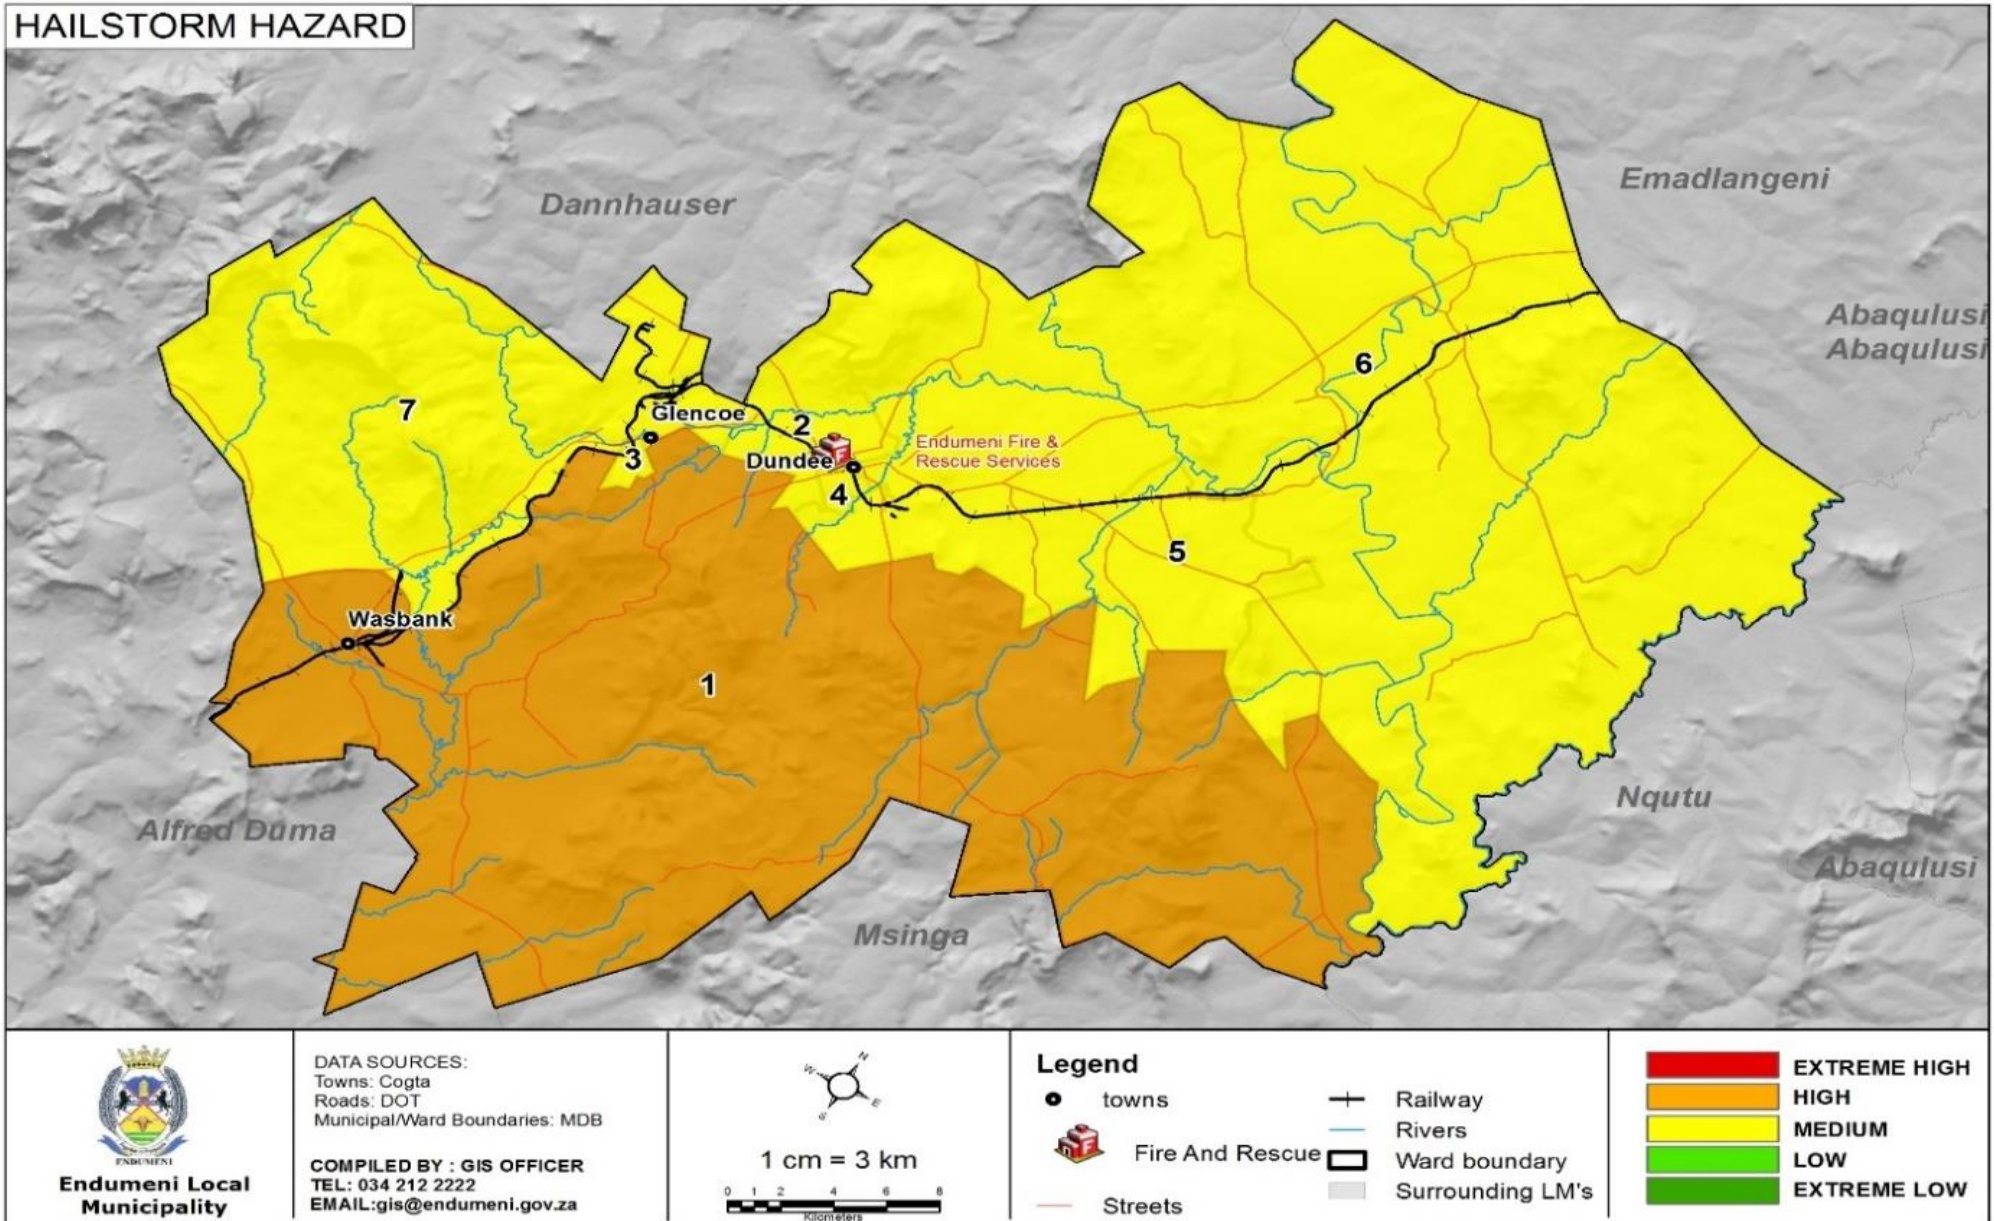

Map 18: Draught Hazard

Map Analysis

With the level of Rain at Endumeni and list surroundings has been seen as a low draught zone as Endumeni Local Municipality does get an opportunity rainy season. although water restriction does occur, but Endumeni Local Municipality has begun an initiative of borehole as stated on its IDP 2021/22 programme to ensure sufficient water is available for all its citizen.

Preventive and Preparedness Strategy

On a 2021/22 IPD programme, Endumeni Local Municipality has budgeted an amount of R2.5 million for drilling of borehole on ward 1,5 and 6 to ensure prevention and preparedness in case of drought.

Map 19: Hailstorm Hazard

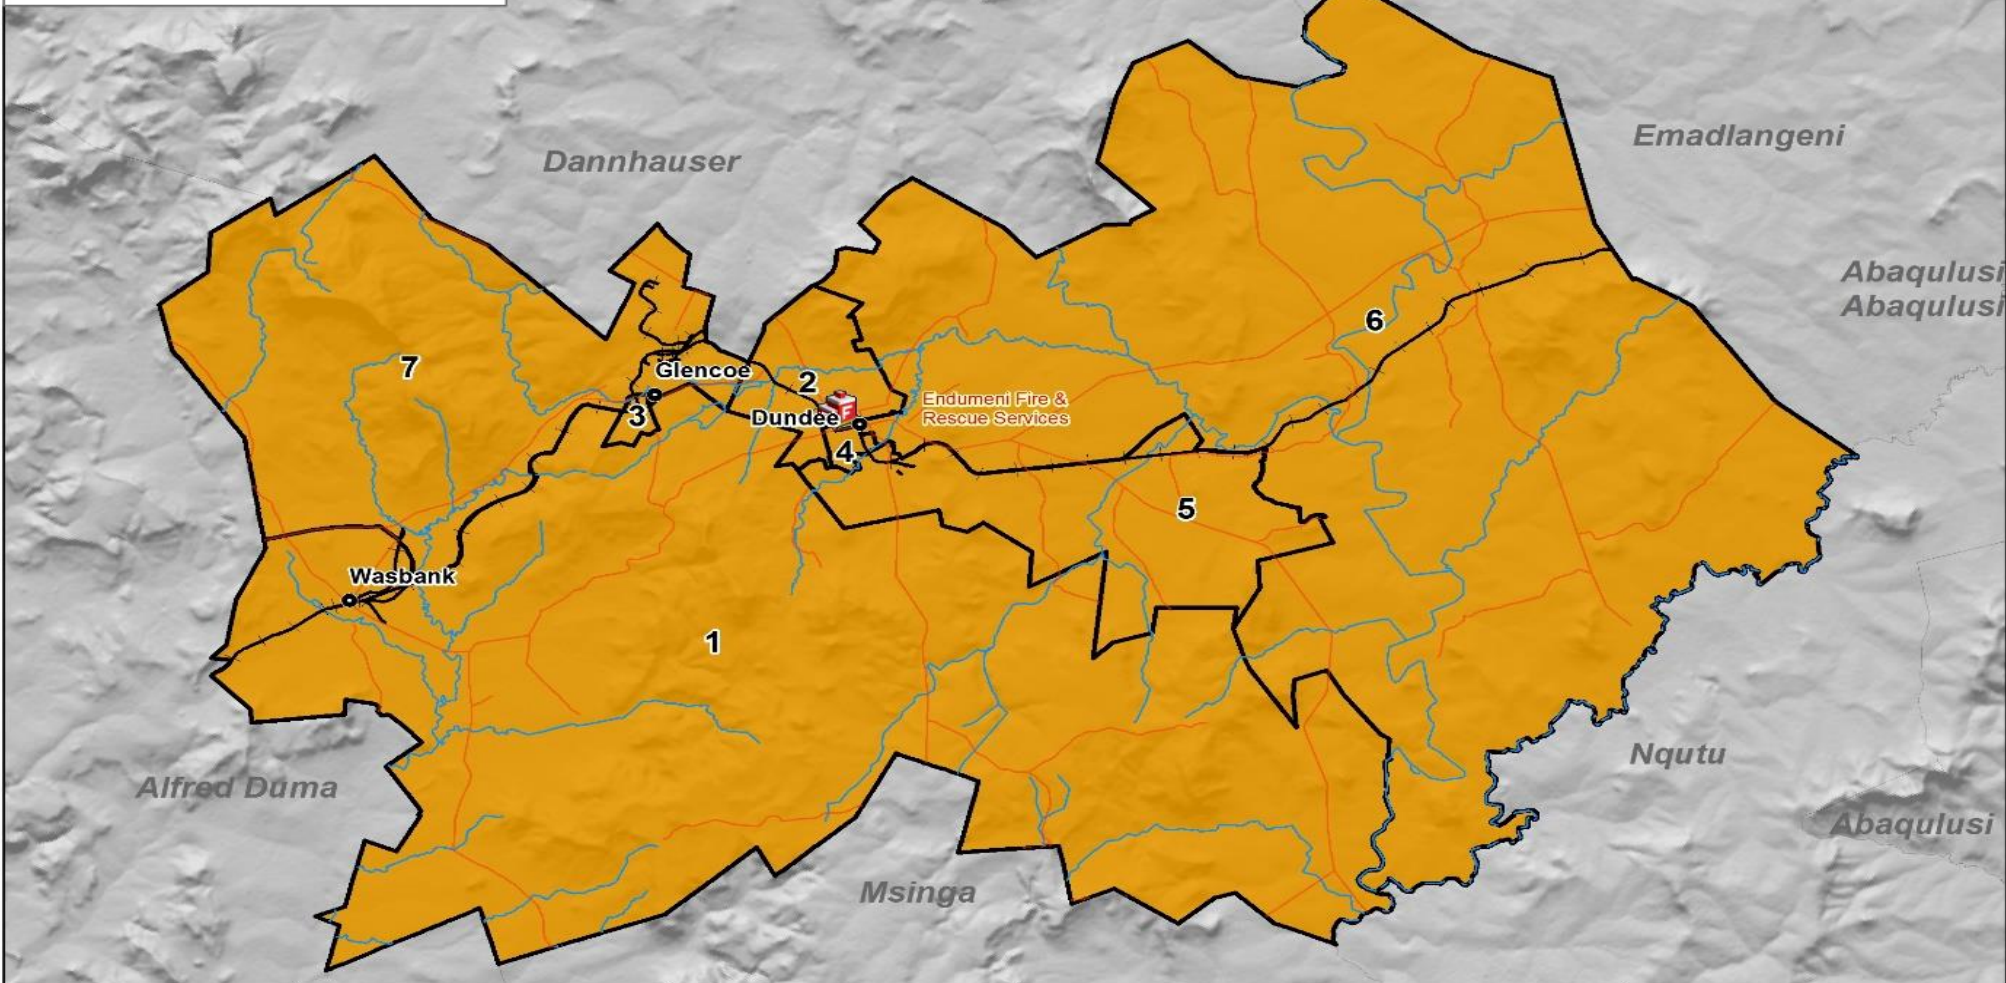

Map Analysis

Since the weather has become unpredictable due to Climate Change, Hailstorm has been one of the major challenges above yellow ward, but it has cause e more damaged to ward 1 as identified as yellow since ward 1 is an informal rural ward with lot of mud houses and unstable households.

Mitigation

Endumeni Disaster Management has reported a huge number of incident form ward1 and is currently working hand in hand with National/Provincial Disaster Management Centre which has set an intervention through LDM Consultancy to conduct an assessment and provide the mitigation advise on the current vulnerable households.

HEAVY RAINFALL HAZARD

Map 20: Heavy Rainfall Hazard

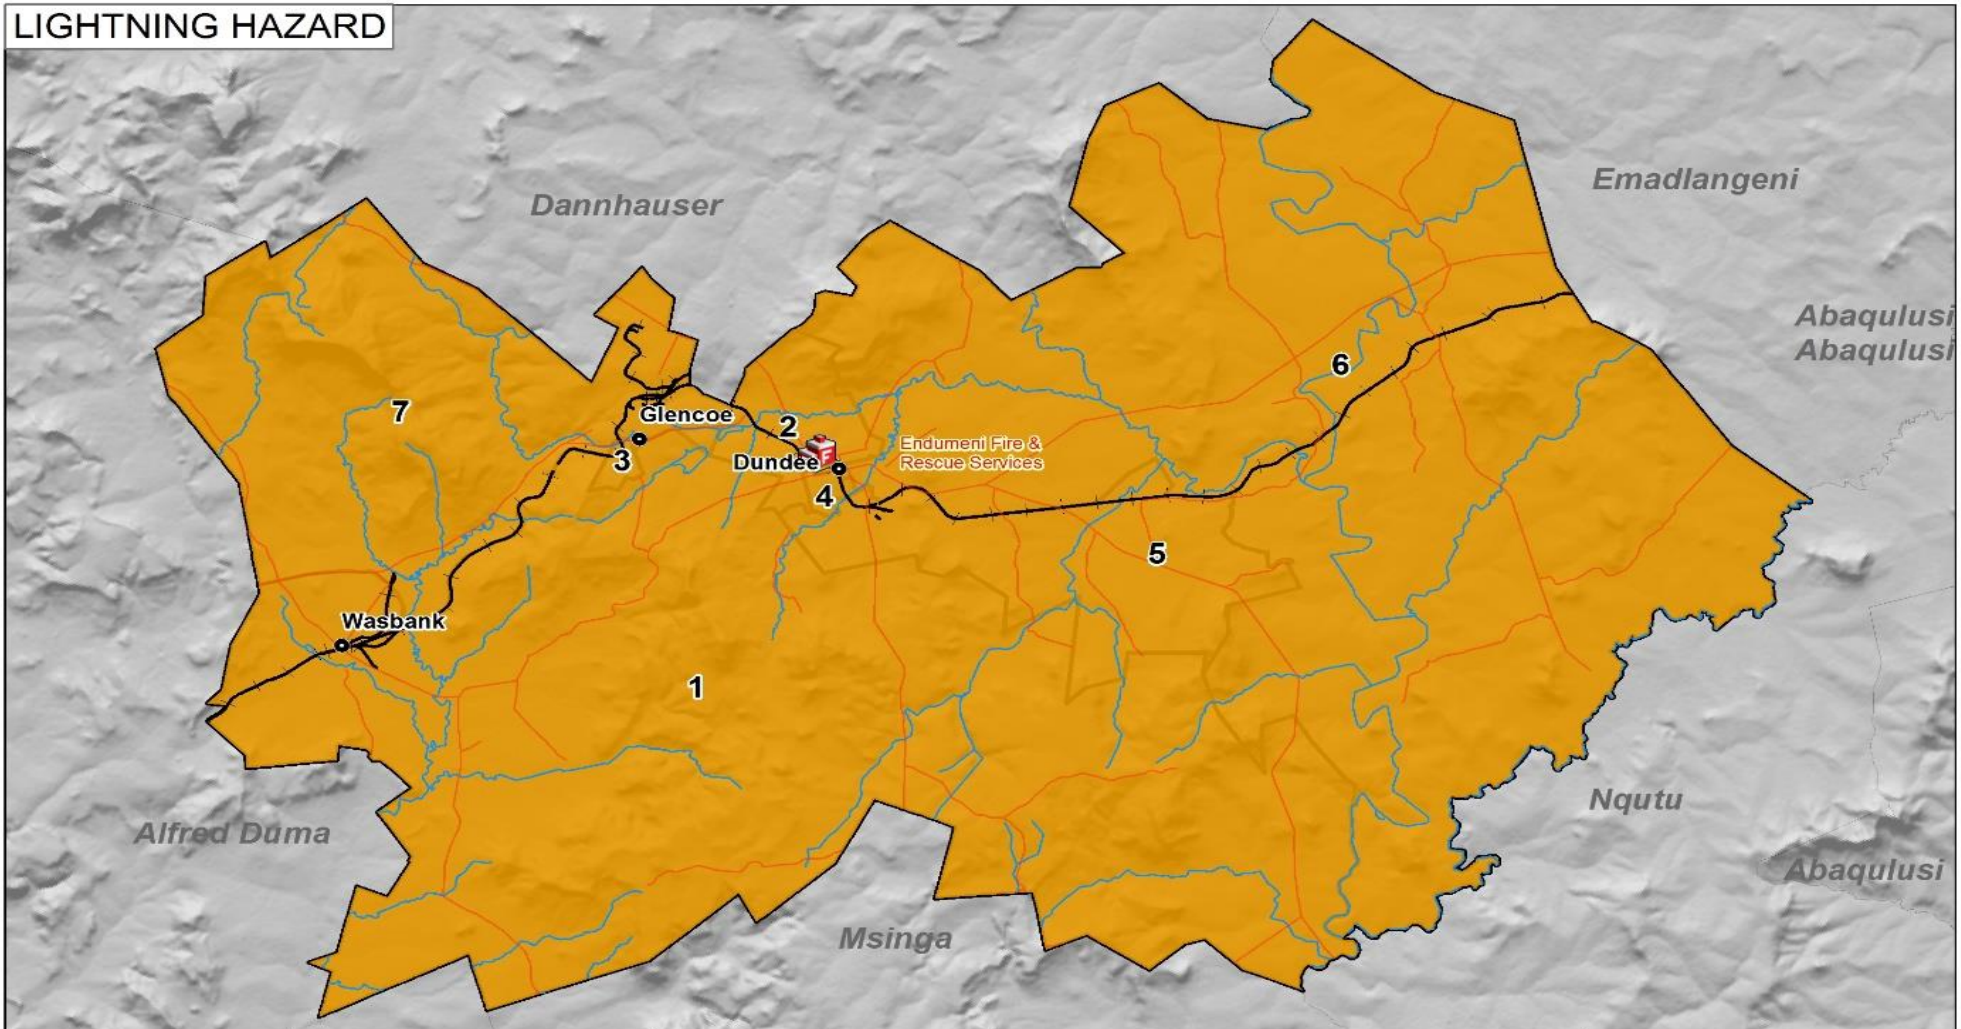

Map Analysis :

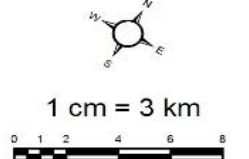

Heavy rains are high in all wards within Endumeni Local Municipality, and this has assisted in mitigating the drought hazards on Map 19. Although rain is of good cause, it also probes danger to the community as part of the wards are still inform rural areas with mud houses.

Mitigation

In other to reduce vulnerability that might cause by heavy rains, Endumeni Local Municipality has included building of RD houses in its IDP 2021/22 to reduce number of mud houses and exposure to heavy rains.

LIGHTNING HAZARD

Map Analysis

The indicated as yellow Areas in the map (Ward 7,2,4,5) are areas with farmers who were given back to the indigenous people within Endumeni. Most of this farmer has no capacity to deal with fire in their farms of capacity to conduct fire breaks in their farms.

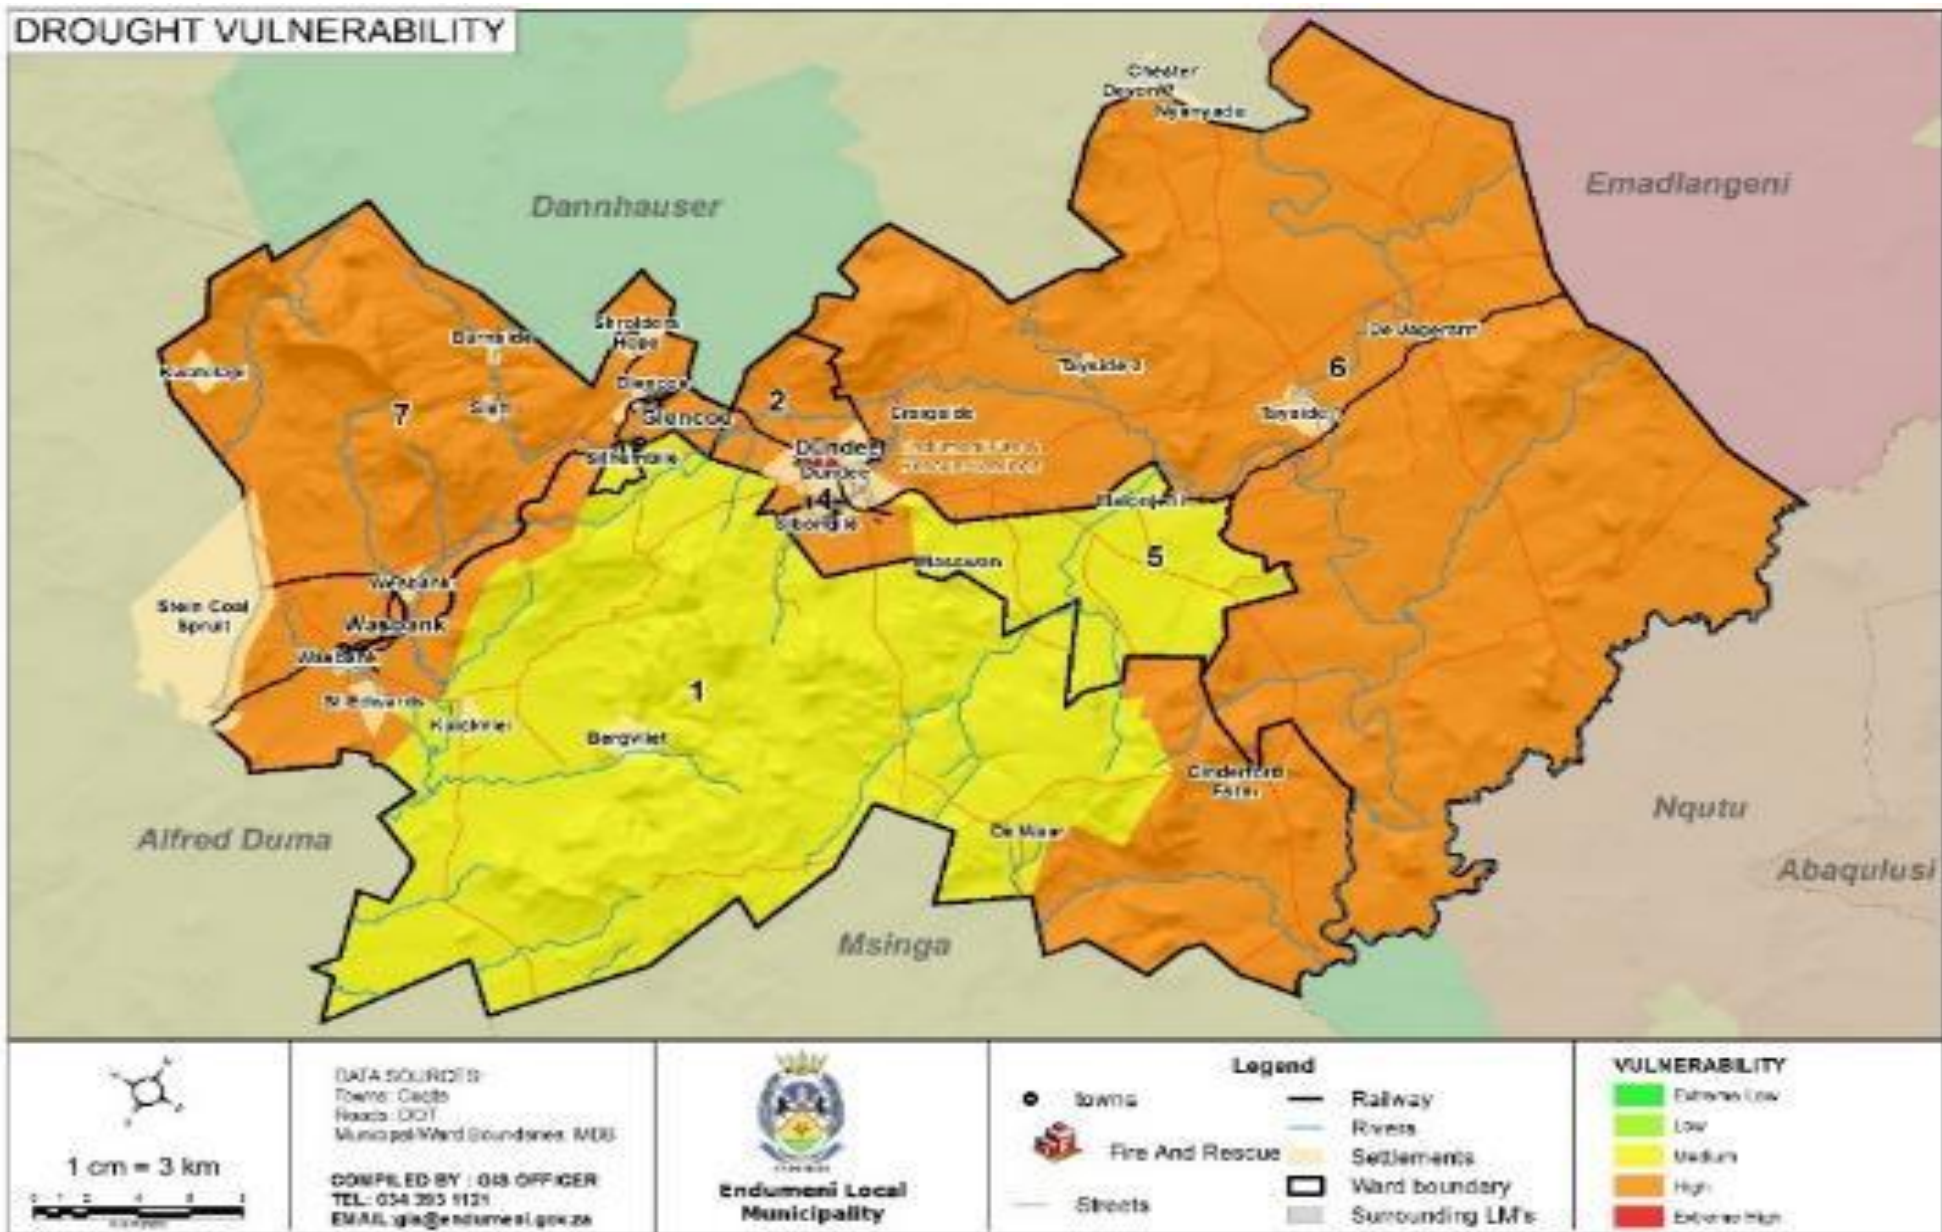

Mitigation

Endumeni Fire and Rescue with Disaster Management has plan to assist the indigenous farmers with fire breaks and capacitate also allocated fund to train them on work on fire programmes to mitigate the level of fire,

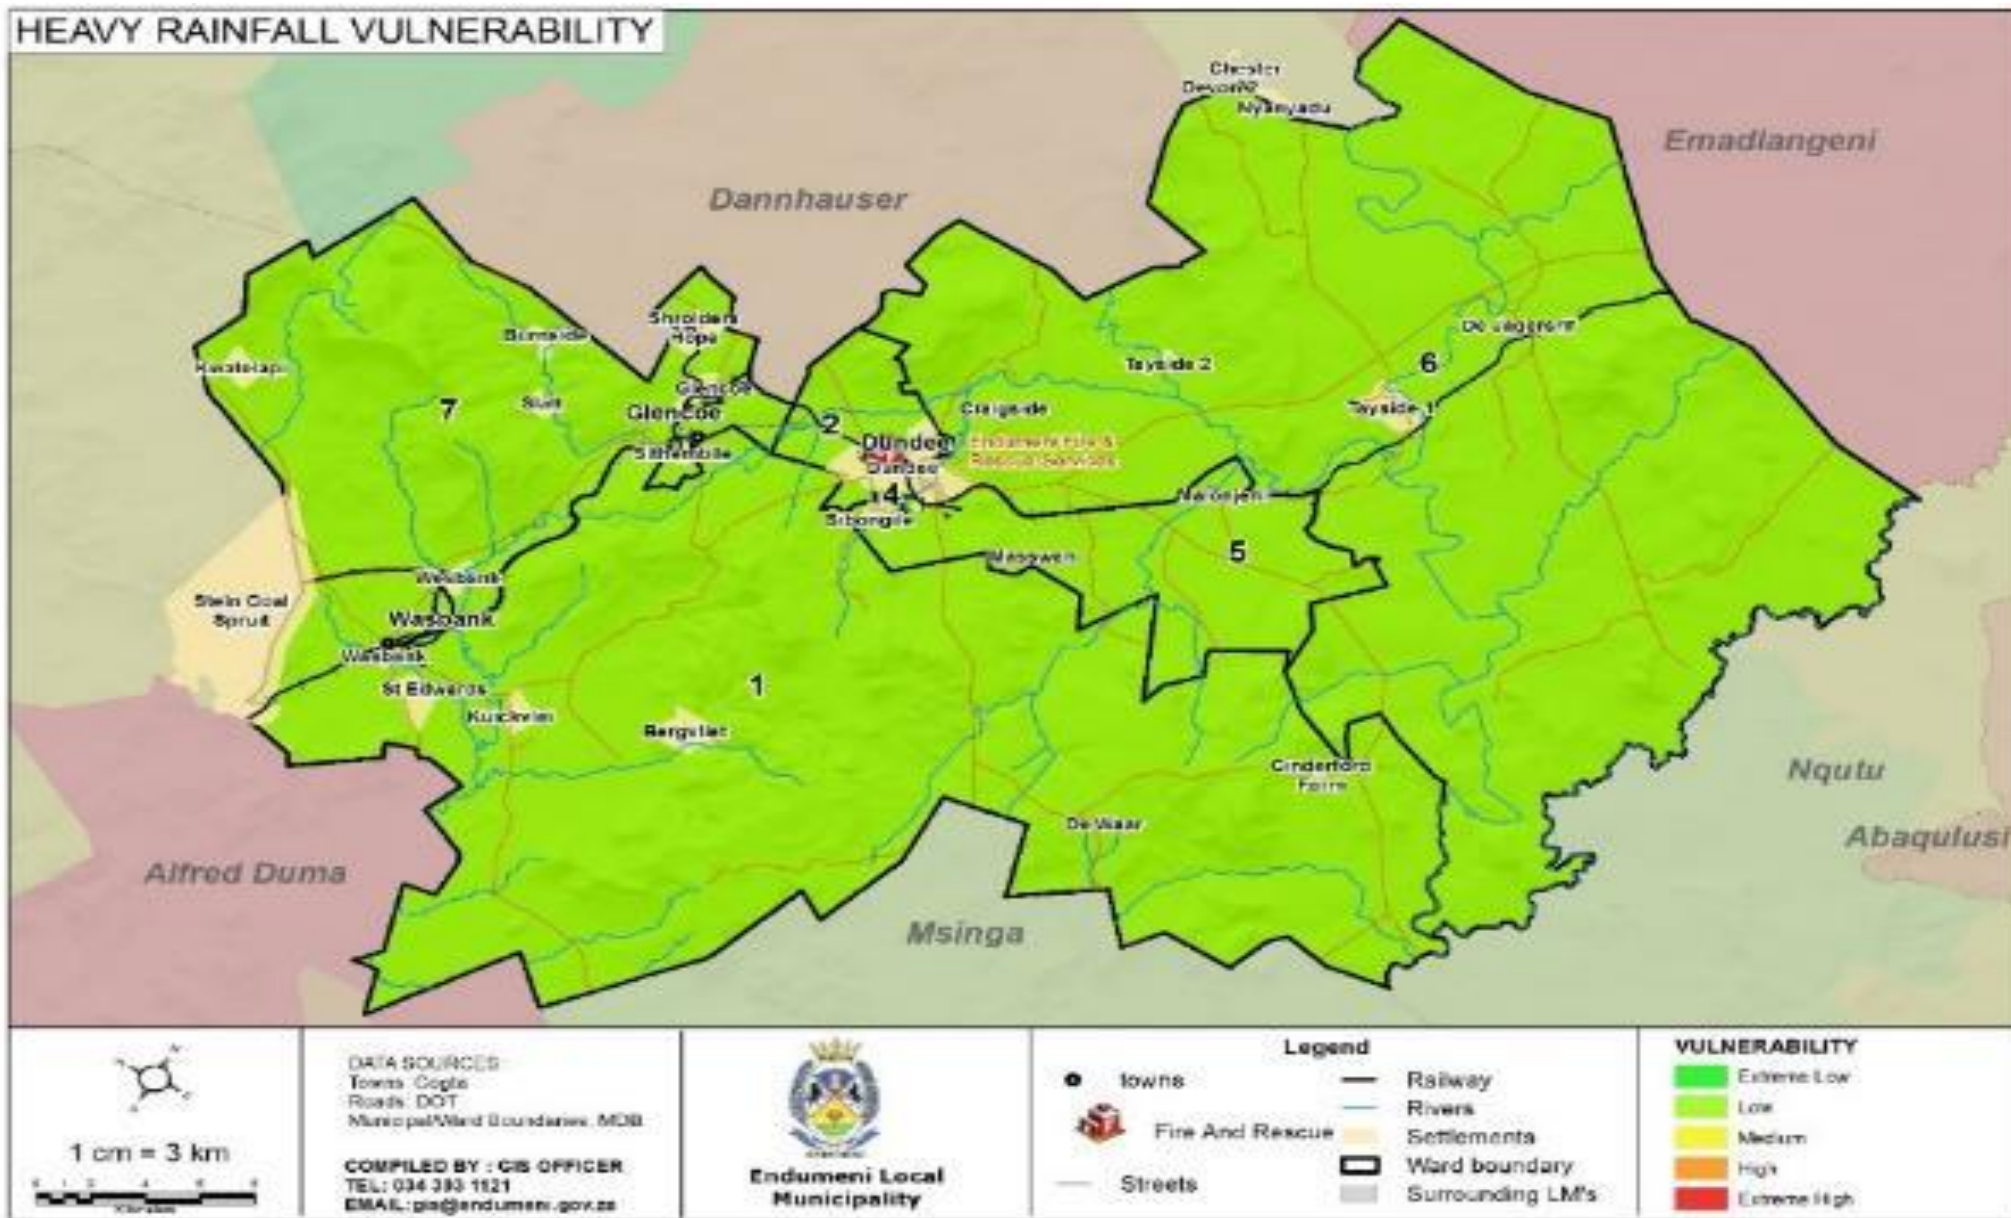

Endumeni Local Municipality has planned to capacitate its fire and rescue department by employing 10 fire fully trained volunteers and plan to move to a 24/7 hours shift to ensure effective response in cases of fire.

2.8 VULNERABILITY MAPS

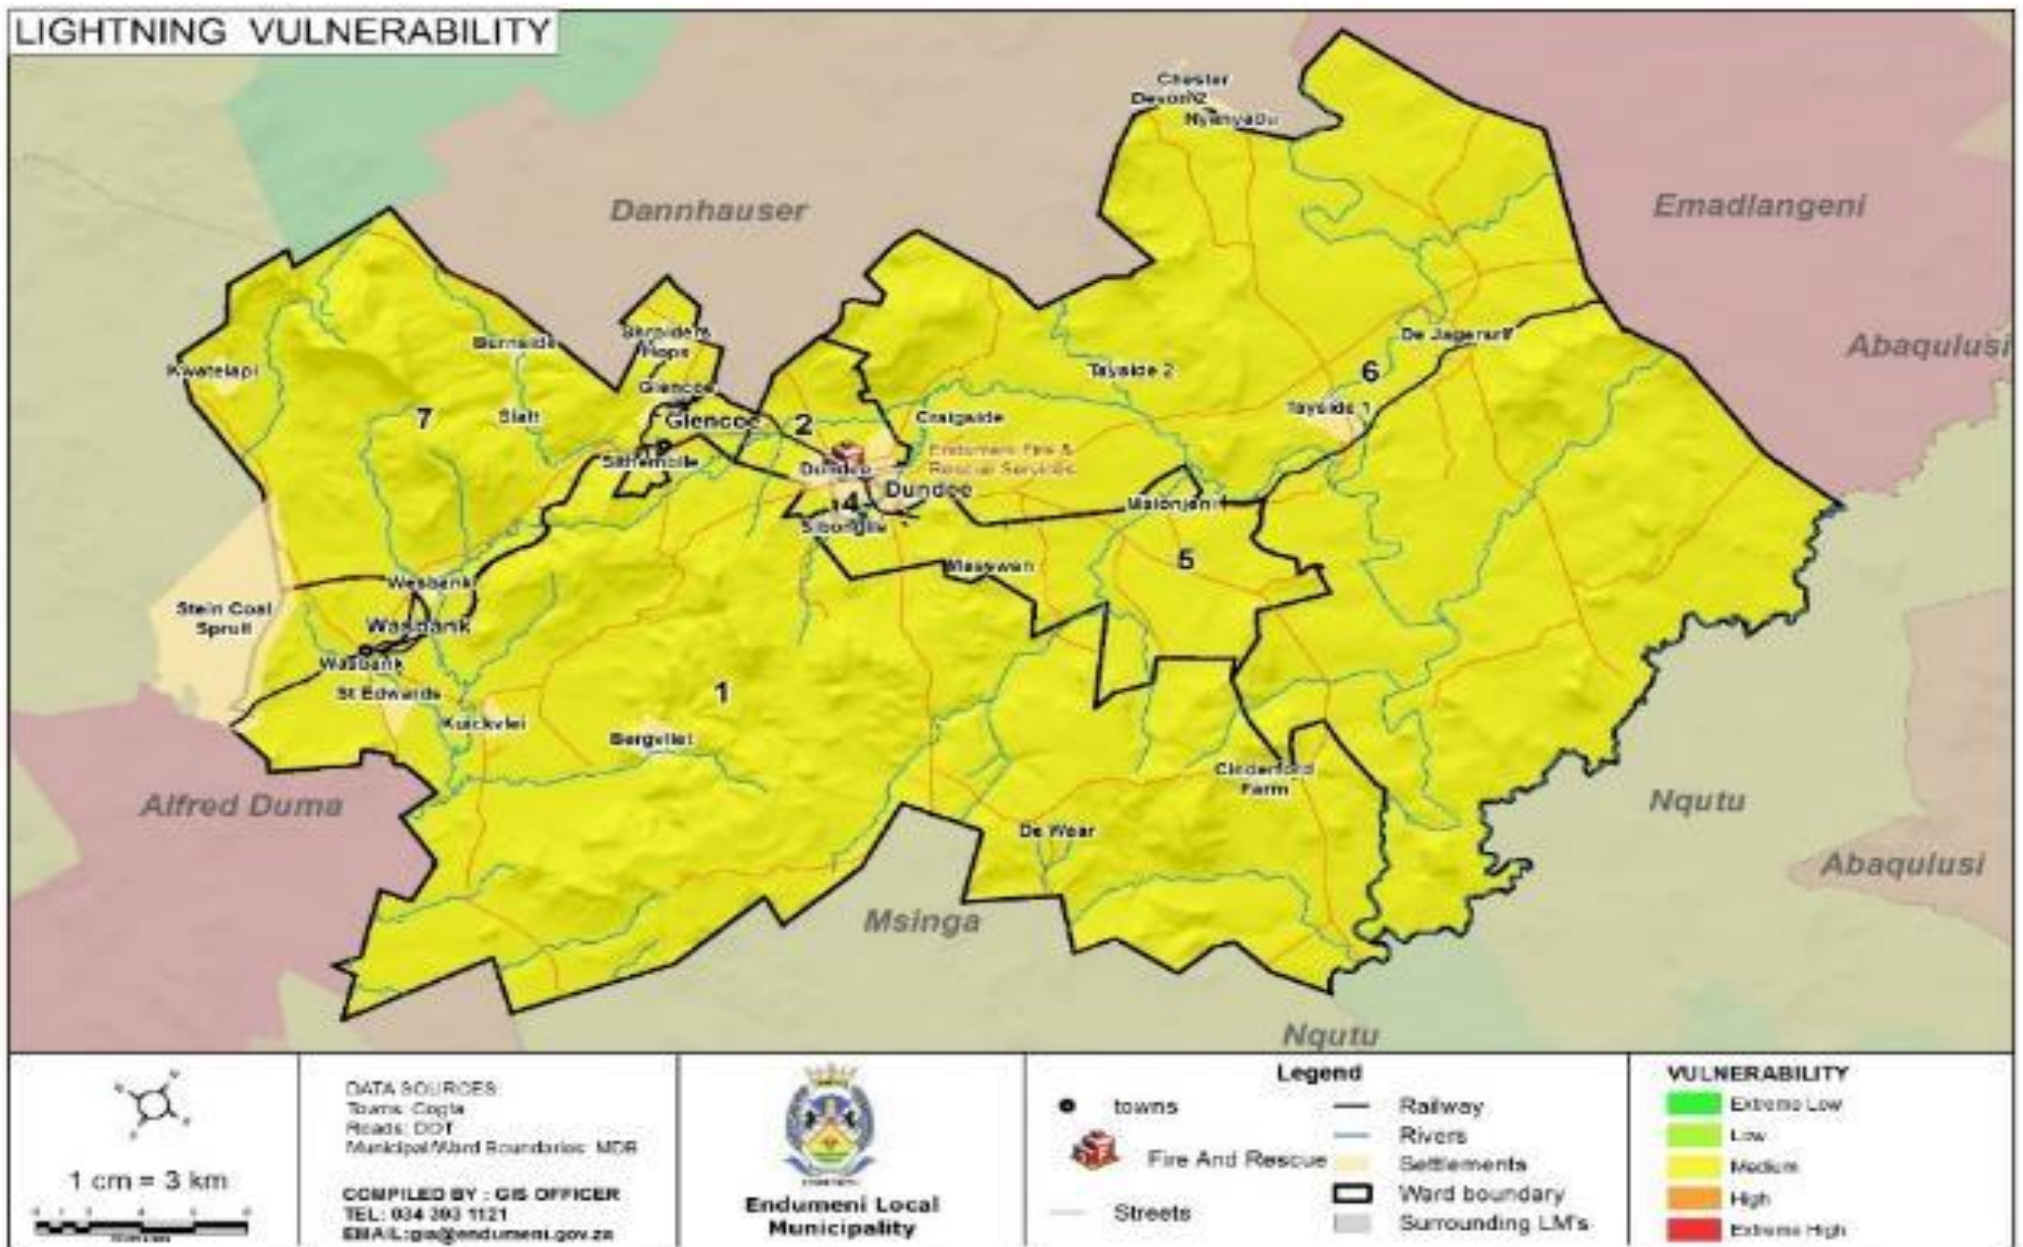

Vulnerability is defined" as the characteristics and circumstances of a community, system or asset that make it susceptible to the damaging effects of a hazard. It a set of prevailing or consequential conditions arising from various physical, social, economic, and environmental factors which increase the susceptibility of a community to the impacts of hazards (UNISDR, 2002:24). Vulnerability maps were produced after careful consideration of critical factors of vulnerability such as political, social, economic, technological and environmental factors.

The map below shows the overall for the entire municipality and the states the level of risk.

Map 41: Disaster risk evaluation

CLIMATE CHANGE ADAPTATION PROGRAMMES

Map 42: Climate Change Adaptation Programme

2.11 DISASTER RESPONSE AND RECOVERY

2.11.1 MUNICIPAL CAPACITY IN TERMS RESPONSE AND RECOVERY

Section 53 of the Disaster Management Act (Act 57 of 2002) deals with disaster management plans for municipal areas. Section 53 (1) (k) of the Act prescribes that a disaster management plan must contain contingency plans and emergency procedures in the event of a disaster, providing for prompt disaster response and relief and the procurement of essential goods and services. The Municipality set aside Disaster management budget annually for the purchase of relief materials in the form of tents, blankets, food parcels and plastic sheeting. This material is provided to victims of disaster incidents when necessary. The municipality does not have necessary capacity to deal with disaster management issues on daily basis as there are only two people dealing with disaster management issues. The mention personnel are strategic as well as operational.

2.11.2 INFORMATION MANAGEMENT AND COMMUNICATION

Information Management

Local Municipality have the responsibility to ensure that all relevant information and reports are submitted to the district Municipalities. The municipality conducts on site visit to monitor, access an extent of the damage, report and evacuate impacts of projects and provide comprehensive reports which include evidence to the KwaZulu-Natal PDMC through uMzinyathi District Municipality. It also provides annual performance evaluations reports to the PDMC within 30 days at the end of the

2.11.3 EDUCATION, TRAINING, PUBLIC AWARENESS AND RESEARCH

Capacity Building Programmes/ Public Awareness Campaigns

Sections 15 and 20(2) of the Disaster Risk Management Act (Act 57 of 2002) specifies the promotion of education and training, the encouragement of a broad-based culture of risk avoidance, and the promotion of research into all aspects of disaster risk management. This key performance area addresses the development of education and training for disaster risk management and associated professions as well as the inclusion of disaster risk management and risk-avoidance programmes in school curricula. It also outlines that awareness needs to be created within the community. For example, community and school awareness campaigns etc. Endumeni Local Municipality will continue to develop and implement capacity building and awareness campaigns programmes in order to create knowledgeable communities. The target audience would

be communities, community leaders, Operation Sukuma Sakhe, school children Amakhosi and other stakeholder.

2.11.4 ENDUMENI DISASTER MANAGEMENT COVID-19 PROGRAMME

1	Provided Shelter to the homeless
2	Co-ordinate & Provide Social relief to the Vulnerable families.
3	Co-ordinate & Monitor Social relief by the private donors
4	Roadblocks with SAPS, Traffic & SANDF to control Illegal people movement
5	Co-ordinated Covid-19 Training for Traffic Officials, Taxi Owners and Taxi Marshals
6	Attend JOC Covid-19 meeting to plan Management Actions on Covid-19 and other disasters
7	Sanitisation of all Public spaces (Ranks, Pension Pay points, Local Taxi waiting Shelters)
8	Monitor Formal & Informal businesses Covid-19 lockdown regulations compliance.
9	Co-ordinated SANDF & SAPS Disaster & Covid-19 Lockdown regulations Community members & Businesses Compliance on Social distance
8	Organise and provide shelter to SANDF
10	Assist in Schools mass sanitisation for re-opening state of readiness
11	Co-ordinated Covid-19 response plan and reediness with department of Health & Dundee Hospital
12	COVID-19 Awareness campaigns through loud hailing and awareness boards
13	Financial assistance to the Municipality on procuring PPE for employees
14	Co-organise Training, Covid-19 safety Plan & Implementation of Testing Station compliance plan for re-opening.
15	Co-ordinate employees COVID-19 capacitation by training before return to work.
16	Procurement of Covid-19 mitigation equipment Sanitisers and temperature screening.
17	Providing support on Covid-19 Vaccination programmes
18	Bio-Waster co-management to prevent covid-19 spread.

3. KPA: MUNICIPAL TRANSFORMATION AND INSTITUTIONAL DEVELOPMENT

3.1 BACKGROUND

Municipal transformation and institutional development relates to a fundamental and significant change in the way the municipalities perform their functions and the calibre of human resources used in the delivery of quality services to the communities served. Service delivery planning has changed from municipal centred approach to community participatory approach.

3.1.1 HUMAN RESOURCE STRATEGY

The municipality has adopted a newly developed Human Resource Strategy that is in line with the vision and mission contained in the 5th Generation IDP. In essence the adopted strategy commits to ensuring that the municipality has the necessary human resource capacity that is aligned to the long-term development plans of the municipality. The human resource capacity in the municipality is dedicated to meet the municipal obligation set out by the IDP such as addressing the challenges and mandate brought about by both new service delivery modalities and ongoing transformation of Local Government.

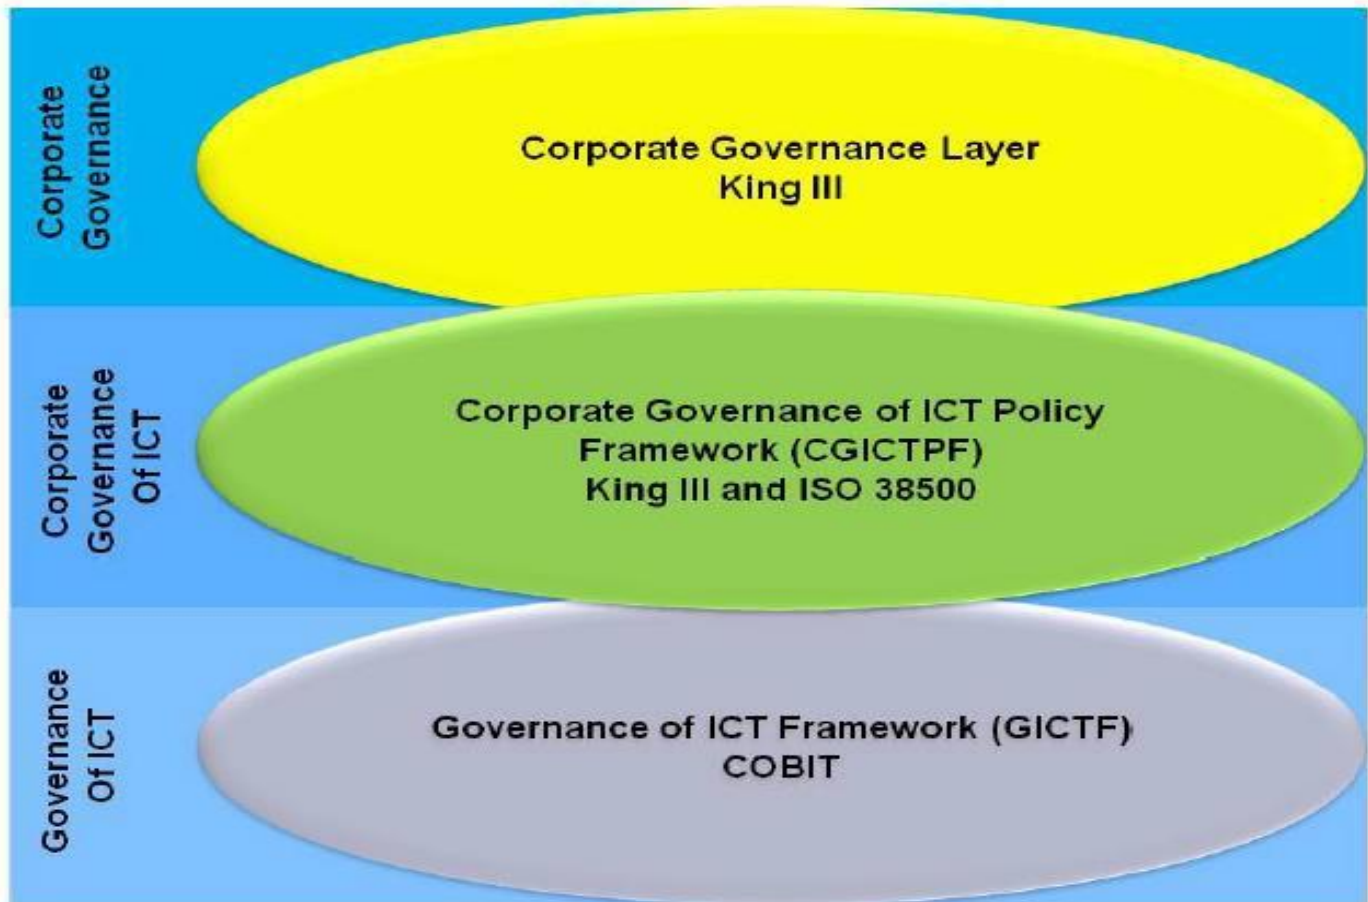

The HR Strategy has detailed the roles and responsibilities of all key municipal departments on how they should perform their duties to achieve the desired goal and objectives of the municipality. It also provides direction on how staff skills should continuously be capacitated.

3.2 ICT POLICY FRAMEWORK

The Municipality has an ICT Framework policy that was adopted by Council on the 24 March 2017. The Public Service Corporate Governance of Information and Communication Technology Policy Framework (2012) stipulates that COBIT should be adopted and implemented as the Governance of ICT Framework on the Governance of

ICT layer. COBIT will enable the municipality to achieve their strategic goals by deriving optimal value from ICT through the realisation of benefits and optimising resources and risk.

The figure below demonstrates the different governance layers with their related frameworks and standards.

3.3 ORGANIZATION OF ADMINISTRATION

3.3.1 ENDUMENI COUNCI; EXCO & PORTFOLIO COMMITTEES

The Municipality's Management Team is headed by the Municipal Manager who functions under the political directive of the Mayor. There are four (4) Section 56 Managers existent in the reviewed organizational structure, with one proposed which is Community Services who reports directly to the Municipal Manager namely:

- ✚ Chief Financial Officer/ Budget & Treasury Office;
- ✚ Executive Manager Corporate Services;
- ✚ Executive Manager Technical Services;

- ✚ Executive Manager: Planning & Economic Development Services; and
- ✚ Executive Manager: Community Services.

MUNICIPAL TRANSFORMATION

The HR strategy has been developed for adoption as part of the 2021. The Endumeni Municipality has a total staff compliment of 378 permanent employees. The organogram for all departments was submitted to the Local Labour Forum as part of the consultation process and it was reviewed and adopted by Council. The employees of the Endumeni Council are represented on the organizational structure as follows:

WORKPLACE PROFILE

The Endumeni municipality's workforce consists of:

- ✚ 107 African Females
- ✚ 5 Coloured Females 13 Indian Females
- ✚ 10 White Females
- ✚ 218 African Males 4 Coloured Males 7 Indian Males
- ✚ 14 White Males

STAFF MOVEMENT

The Municipality has appointed a number of employees from the beginning of the financial year, but there has been some resignations as well. Appointments 1st of July 2020 to 30 June 2021

- ✚ 1st Quarter July to September = 8
- ✚ 2nd Quarter October to December = 11
- ✚ 3rd Quarter January to March = 10
- ✚ 4th Quarter April to June = 5

Table 21: EXITS JULY 2020 TO JUNE 2021 (death, resignation, retirement, medical board)

	Death	Resignation	Retirement/ pension	Dismissal	Medical board
1st Quarter July to Sept 2020	1	3	3	3	1
2nd Quarter Oct to Dec 2020	1	3	3	0	0
3rd Quarter Jan to March 2021	4	2	3	1	0

3.3.2 ORGANISATIONAL DEVELOPMENT

The Endumeni Council has, in accordance with Section 43 of the Municipal Structures Act No. 117 of 1998, established an Executive Committee comprising of three members. The Executive Committee is chaired by the Mayor, while the Council is chaired by the Speaker in terms of Section 48 and Section 36 of the Municipal Structures Act (117 of 1998) respectively.

The Executive Committee functions under delegated authority of the Council, except for those powers and functions as determined by Section 160 of the Constitution of South Africa 1996. The Endumeni Municipality is demarcated into 6 wards with active ward committees.

The purpose of the Ward Committees is to assist the Ward Councillors with organizing, consulting and the cascading of information to all stakeholders of the various wards.

3.3.3 POWERS AND FUNCTIONS OF THE ENDUMENI LOCAL MUNICIPALITY

The Endumeni Municipality is a category B Municipality as described in Section 155(1) (b) of the Constitution of the Republic of South Africa 1996. The powers and functions of the Endumeni Municipality is in compliance with Section 156 of the Constitution of the Republic of South Africa, 1996. The Endumeni Municipality is a category B Municipality as described in Section 155(1) (b) of the Constitution of the Republic of South Africa 1996. The following powers and functions of the Endumeni Municipality is in compliance with Section 156 of the Constitution of the Republic of South Africa, 1996.

Table 22: POWERS AND FUNCTIONS

POWERS & FUNCTIONS	Responsible Department

3.4.1 STATUS OF CRITICAL POST

The status of the critical positions is as follows:

- ✚ The Position of Municipal Manager is filled.
- ✚ The Positions of Section 56 Managers are all filled.

3.4.2 THE STATUS OF CRITICAL & BUDGETED POSITIONS:

In accordance with the approved 2021/2022 organizational structure and annual budget, the critical positions in all departments have been filled and this will create an enabling environment for the smooth implementation of the 2021/22 SDBIP.

3.5 WORKPLACE SKILLS PLAN (WSP)

In accordance with the Skills Development Act and Skills Levy Act, municipalities have to prepare and review the Workplace Skills Development Plan. During 2020/2021, the municipality reviewed and is implementing the Workplace Skills Development Plan as required by the said Act. The plan seeks to address employee's skills development gaps, scarce skills and also skills audit of the municipality.

The municipality is registered with the Local Government Sector Education and Training Authority (LGSETA), and skills development relating to all levels of employees' functions will be undertaken and integrated into the plan. The municipal employees, Councillors and Ward Committees will be trained on various skills development interventions as part of the Workplace Skills Plan. Skills audit has been undertaken to determine the employees' training needs, and these training needs will form part of the Workplace Skills Plan. The municipality is committed in training and developing its employees thereby improving productivity levels.

3.5.1 EMPLOYMENT EQUITY PLAN

The Employment Equity plan for the next Five (5) years is currently being developed, which should be adopted by 30 June 2021. The municipality has been transforming its management structure and has considered people with disabilities in its employ. Currently there is One (01) woman who is the Head of Department, one (1) person living with disability and Nine (09) coloured employees in the municipality. Likewise, a good percentage of the employees are youth.

The Municipality's vision for Employment Equity is to maximize the benefits of diversity, equal opportunity and fair treatment of employees, to maximize growth of employees so

that the Municipality delivers a high-quality service to the people of Endumeni, particularly the poor and those historically disadvantaged.

3.5.2 RETENTION STRATEGIES

Generally, employers want to hire people who will stay with the company. For obvious practical reasons, employers don't want to hire chronic job-hoppers. The cost of recruiting, selecting and training new staff can be extremely high. Turnover is one of valuable and useful non-performance criteria because it measures employment stability. Many factors should be considered in the measurement of turnover. One is *voluntariness* (whether the employee was dismissed, resigned to take another job with better promotional opportunities, or resigned because of dissatisfaction). Another factor is *functionality* (whether the employee was performing the job effectively or ineffectively).

Research reports are replete with studies which measured the relationship between turnover and performance, which concluded that poor performers were more likely to resign voluntarily than good performers. On the other hand, conventional wisdom is such that an employee who resigns is probably appraised better than an employee who was dismissed. However, some organisations will allow an employee to resign to improve his or her prospects of getting another job, this clouds the value of turnover as a measure of performance.

The attitude towards job-hoppers has also changed over the years. Twenty years ago, job-hoppers were viewed with some suspicion at management level: they seemed unstable and unable to hold a job for long. Today, however, job-hoppers are regarded more positively. Exposure to different jobs is taken to mean that they have more breadth of experience. This is an example of how the same behaviour (turnover) acquires different interpretations over time.

A retention strategy adopted by the council must take the above into account and, be flexible enough to enable the retention of employees with scarce skills and be responsive enough so as to mitigate against the loss of institutional memory.

3.6 SKILLS TO BE RETAINED

- (a) Scarce skills: Scarce skills are those skills that are needed to realize the Department's goals and objectives, but which are difficult to recruit and expensive to replace.

- (b) Valued Skills: Valued skills are those skills that are not classified as being scarce skills. Examples are employees with qualifications that are valuable to possess and positively contribute to the service delivery goals of the Municipality and the loss thereof will have a negative impact on a Department's ability to meet its goals.
- (c) High – Risk skills: High – risk skills are the skills that an employee has attained over a long period of time pertinent to the department through years of service experience and such employee has indicated his/her intention to leave soon.

The list of skills which need to be prioritized in terms of recruitment; retention as well as in our skills development plan is gazetted annually, as Occupations in high demand by the Minister of Higher Education, as the shortage of these skills affects the Municipality as it does every other employer in the country. Occupations in High Demand refers to those occupations that show relatively strong employment growth and/or are experiencing shortages in the labour market or which are expected to be in demand in the future.

These occupations can be found in the latest, Gazette No. 43946, Vol. 66527, 27 November 2020.

It becomes therefore a no-brainer that, we should be taking pro-active steps to prevent finding ourselves in a crisis where we are trying to recruit in these fields after having failed to retain these professionals.

3.6.1 LINK STAFF RETENTION WITH AN EFFECTIVE RECRUITMENT AND SELECTION PROCESS.

A lot of staff losses are caused by unattractive salary packages which came as a result of the implementation of the Job/Task Evaluation. To prevent this, accurate job descriptions must be developed that clearly identifies the core competencies required for successful performance. These job descriptions must be used during the recruitment and selection process. In some cases, it has also been shown to be good practice to “hire for capabilities and train for skills”. This is where a person is appointed because he/she has the right capability to be able to do the job even though they may not have the necessary skills required since these can be attained through training.

3.6.2 LINK STAFF RETENTION TO AN EFFECTIVE INDUCTION PROCESS

Best practice studies show that the first few weeks of employment are important for establishing employee commitment to equipment. It is therefore essential that Managers and human resource practitioners lay the foundation for future commitment by being

part of the induction process. A good way of addressing this is to have well-structured and dynamic induction programs that stretches from the employee's first day of work employees to read even if they have not started working.

3.7 ORGANISATIONAL STRUCTURE (ATTACH REVIEWED ORGANIZATIONAL STRUCTURE)

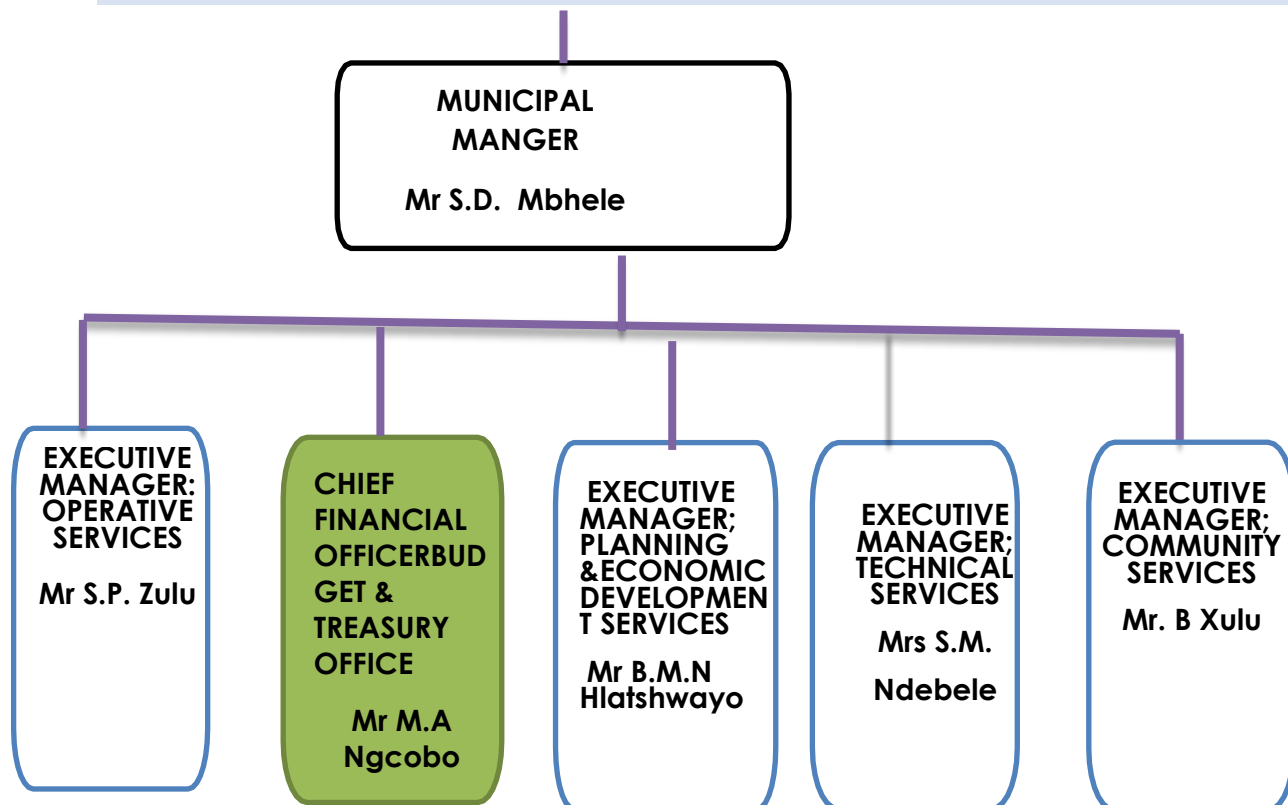

Table 25: MUNICIPAL TRANSFORMATION AND ORGANISATIONAL DEVELOPMENT ANALYSIS

STRENGTHS	WEAKNESSES
Capable and Skilled officials	Lack of a Functional EEP Committee
An Aligned Organizational Structure	Lack of Council adopted Staff Retention Strategy
Active & Functional Unions (Local Labour Forum)	Lack of a Council adopted Succession Planning Policy Framework

A Council Adopted Human Resource Strategy	Slow pace in meeting EEP Targets especially with regards Women Representation at top Management and Middle management levels and with regard to appointment of people living with Disabilities
A Council Adopted Employment Equity Plan	Inconsistent Reporting on EEP to the Department of Labour
A Council Adopted Work Skills Plan (WSP)	Slow pace in implementing the WSP
A Council Adopted ICT Policy Framework	Inconsistent application of regulations (Change Management Strategy)
A Council Adopted IDP and Sector Plans	Lack of a Municipal-Wide Diversity Management Strategy and Plan
A Council Adopted Budget & Budget Related Policies	
A Council Adopted PMS Policy Framework	
A Council Adopted Communication Strategy &	
A Council Adopted Policies and Bylaws	
OPPORTUNITIES	THREATS
Availability of Various Grant Funding Instruments for Skills	Losing skilled personnel through natural attrition
Availability External Technical Support especially from Govt.	Inability to attract and retain scarce skills
Development and Implementation of the Diversity Management Plan for the Municipality	Low staff Morale and reduced productivity levels

4. KPA: BASIC SERVICE DELIVERY

4.1 ACCESS TO WATER

Turning to Endumeni, the Buffalo River and Wasbank River serve the Endumeni municipality well. The main tributaries of Buffalo River are Njiwati, Sterkstroom or Impathi,

the Pondenshalana, Nyende, Eerstelling, Basangoma and Blood Rivers. Wasbank River's main tributaries are Mkomazana, KwaMatchokuza, Busana, Klipspruit, Biggarsgatspruit and Blinkwater Streams. Groundwater resources, perennial rivers and streams and stored water in farm dams are the main sources for stock watering purposes, while river flow and stored water in larger dams are the main sources for irrigation, although high-yielding production boreholes may also be important sources of irrigation water in certain areas.

Regarding perennial river flow the Endumeni area is reasonably well-watered with most of the streams. There are also smaller perennial streams on the Dundee plateau. Portable water is supplied via 5 storage dams and a pipeline from the Buffalo River, which is also reticulated by the local authority. There is a water borne sewerage reticulation system, of which the majority of erven is served by this system. The average dry weather flow is 5 mega litres with the plant having been upgraded to a capacity of 12 mega litres to support development initiatives. It is important to note that the biggest threat in the area is the potential pollution of freshwater sources (surface and groundwater) through decanting of mines (Dysfunctional and active).

Accordingly, at 95% access to piped water (denoted as service provider), seems higher than national average (89.8%), the province (77%) and the district (53%). It is safe to conclude that access to water in Endumeni is impressively high for industrial and residential purposes.

Figure 25: Access to Water

Data Source: Statistics South Africa (2016)

4.2 ACCESS TO ELECTRICITY

Electricity is supplied via the national Eskom grid and reticulated by the local authority. In this arrangement, as shown below, 80% of the population has access to pre-paid metres in the house. Or conventional (Eskom) metres. This percentage is roughly the same as the national average of 81.6% who have access to electricity. Notably, the high number of pre-paid metres is tribute to the municipality, for ease of revenue collection compared to the non-payment challenges linked to the conventional metre. The progress in pre-paid metre delivery should be fast tracked for more revenue benefits, but also easier management of electricity. Also, as illustrated below, 9% of the population claim not to have access to electricity compared to 22% in the district and 11% in the province.

Figure 26: Access to Electricity

Data Source: Statistics South Africa (2016)

4.3 ACCESS TO SANITATION

Sanitation in South Africa is guided by three legislations namely: (a) white Paper on Water Supply and Sanitation (1994); (b) the White Paper on a National Water Policy of South Africa (1997), and (c) the White Paper on Basic Household Sanitation (2001). The white paper on basic household sanitation focuses on rural communities, and was therefore supplemented with national sanitation policy of 2012 to cover urban sanitation delivery. The White Paper on basic household sanitation advances that provision of sanitation services should be demand based and community based (DWA 2001). In addition, the Strategic Framework for Water Services (2003) seeks to achieve easy accessibility of

sanitation services. The 2012 national sanitation policy sought to achieve 93% toilet access by 2019.

Evidently, by 2016, Endumeni had achieved 90% target on flush toilet and chemical toilet. This is a three times the percentage in the District and more than double the provincial percentage with access to proper toilets.

Figure 27: Access to Sanitation (Toilets and Refuse Removal)

Data Source: Statistics South Africa (2016)

UMzinyathi DM is the Water Services Authority (WSA) for the entire district in terms of Section 1 of the Water Services Act, 1997. Water in UMzinyathi District Municipality is mainly drawn from natural sources like streams and rivers. The main surface water sources emerge from Buffalo River and a few small dams but during the drought season's water is augmented from Ntshingwayo Dam. Raw water supply is from the Buffalo River which is treated at the Biggersberg Water Treatment Works with a capacity of 14.6MI. Reservoirs at treatment plant supplying to Dundee are 7.1MI with storage of 36hrs.

This water is purified and stored in reservoirs within Dundee near Strathmore Park and in Reservoir next to Glencoe. The majority of the areas within Endumeni are dependent on rudimentary water schemes. UMzinyathi District Municipality has reviewed the bulk water and sanitation strategy which has quantified the backlogs for each local municipality, funding required to eradicate backlogs and funding sources. The strategy for water is as follows:

- ✚ Many small standalone schemes are being planned;
- ✚ Planned schemes are very costly – above the Department of Water and Sanitation benchmark guidelines; and

- ✚ Serious concerns relate to the availability of reliable and sustainable water sources in the district.

4.4 STRATEGIC ISSUES TO BE ADDRESSED:

- ✚ Bulk Schemes to be assessed to extend services to other areas;
- ✚ Benefits – reduced capital costs;
- ✚ Sustainable water sources as many bore holes are drying up;
- ✚ O&M Costs Reduced; shorten construction time and increase speed of service delivery; and
- ✚ Avoid duplication of bulk infrastructure costs.

4.5 BULK SEWER INFRASTRUCTURE

According to the Department of Water and Sanitation, the Water Treatment Plant in Dundee is one of the eight (8) that are found within UMzinyathi District Municipality. The total design capacity yield for all eight WWTP is 18.2ML/ day and these still have a spare load of 92,5%. The urban areas such as Dundee are provided with advanced bulk water infrastructure such as Waste Water Treatment Plant (WWTP) and associated reticulation. Treatment of sewer is at the Dundee Wastewater Treatment Works with capacity of 10ML. Dundee WWTP received a 77,5% score in terms of Blue Water Status which was the highest within Umzinyathi District Municipality.

The provision of sanitation services is also the responsibility of the District Municipality. This includes the delivery of bulk sanitation infrastructure such as the waste water treatment plants. Most of the treatment plant facilities are owned and managed by the District Municipality other treatment plants are privately owned and managed. There are several pump stations in the reticulated areas whilst waste water treatment plants are generally located in urban towns and these in terms provide these towns with a waterborne sewerage system. The capacity of the existing bulk sanitation infrastructure may need to be confirmed for the purposes of future development. However, there are some parts of the urban areas which are not connected to waterborne sewerage and as such these depend on septic tanks. The rural areas primarily depend on pit latrines, and very few are still using the bucket system; and the target is to ensure that all the rural areas have pit latrines that meet the RDP standards.

4.6 SOLID WASTE MANAGEMENT

4.6.1 REFUSE REMOVAL AND LANDFILL SITE

According to the available 2011 Census Data which has also been confirmed by the final 2017/2018 Reviewed Integrated Waste Management Plan (IWMP) of Endumeni Local Municipality, a total 82% of households have access to decent refuse removal and the remaining 3 500 households have no access at all. It is estimated that, 2895 of the 3 500 households use personal dumping which might constitute illegal dumping. This service is currently offered in the following areas including Dundee Town, Sibongile Township, Glencoe, Sithembile Township and Wasbank. The municipality has placed skip bins at Stratford farm and Ebusi village as a means of introducing refuse removal in rural areas. During the 2015/16 financial year, the municipality purchased a refuse truck which is currently in operation. The municipality owns a licensed Regional Landfill Site which is located within Glencoe Town. The Landfill Site has two cells, which is Cell1 and Cell2. The municipality is currently operating on Cell1 and its life span will come to an end on the year 2021. Cell2 life span have not been estimated since it is not yet in operation. Refuse is now being dumped in phase 2 in order to cover the linings against being damaged, by wind and sun.

The municipality received funding from COGTA for the implementation of the Small Town Rehabilitation Programme (STR). The municipality has utilized part of the STR Grant funding to purchase a total 35 Skip Bins and 250 swivel bins utilizing which have since been placed on strategic points across the municipal area in order to improve provision of the waste management related services. The Dundee CBD and Glencoe being the

major urban centres of the municipality have been major beneficiaries from the STR funding. For the areas in the Rural areas like KwaThelaphi, Mpilonde, Dejaggers drift, Enyanyeni, Strathford Farm and Kunene Farm, the Municipality is seeking to place skip bins in strategic points. The municipality will empty the skip bins twice per week or as and when they are full.

What is also very important to highlight is that Endumeni Local Municipality has since developed and compiled its Integrated Waste Management Plan (IWMP) referred to as Annexure G of the 2020/21 IDP to demonstrate its strategic resolve to execute its constitutional obligations with regards to the Waste Management Plan. An Implementation Plan has been included in the 2019/20 review, detailing on the implementation of the Plan.

The Municipality strongly believe that what is even more encouraging is that, the reviewed IWMP among other aspects contains a comprehensive implementation plan which guides the Municipality on the type of interventions and decisions to be taken ensure that the provision of the waste management services is indeed extended beyond the urban core, but also incorporate the currently un-serviced areas.

There is currently private Companies conducting recycling in the landfill site and the municipality is in a process of building a buyback Centre.

The proposed (2021/22) projects that will be funded by external grants are as follows

- ✚ Endumeni Greening Project (Supported by DEFF)
- ✚ Eradication of allien invasive species (Application process has commenced with DEFF)
- ✚ Buyback Centre (Funding from SLP projects)
- ✚ Development and Upgrade of Donald McHardy Dam (Potential investor/funder yet to be identified. Unlikely to happen in 20/21 financial year)

(Source: statistics community survey 2016)

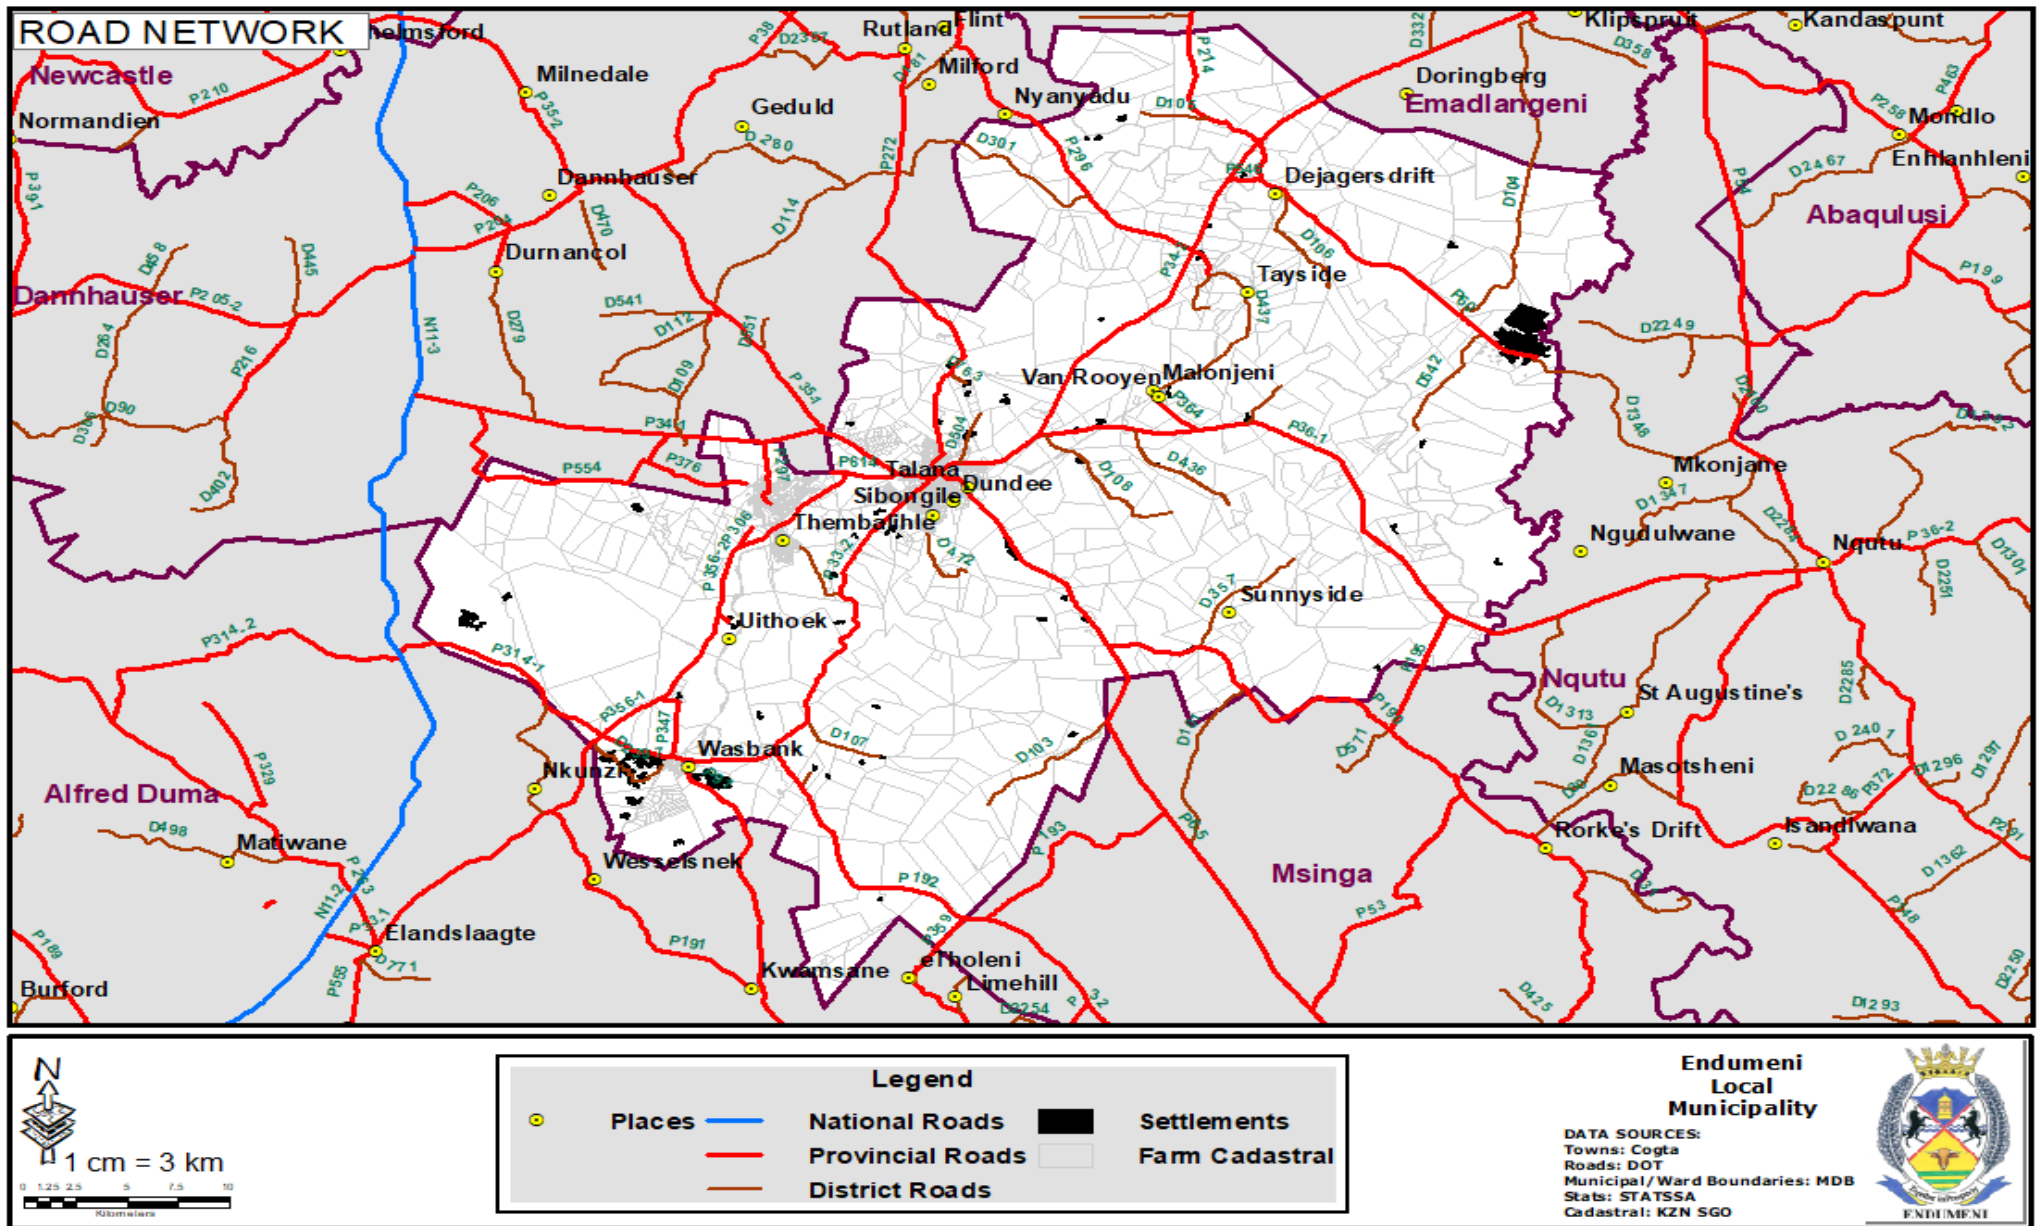

4.7 TRANSPORTATION INFRASTRUCTURE

4.7.1 REGIONAL ROAD NETWORK

At a regional level, Endumeni Municipality is situated away from the national road network. However, N11 (Ladysmith to Newcastle) does provide linkage access via R602 and R68 from the west. It is a key industrial and agricultural route. The municipality is located on an important regional route servicing the agricultural regions of northern KwaZulu-Natal and southern Mpumalanga.

4.7.2 PRIMARY ROAD NETWORK IN ENDUMENI MUNICIPALITY

The R33 is an important provincial corridor which has been identified in the PSEDS as a priority secondary corridor. The R33 which links Dundee to Vryheid, and also to Greytown via Pomeroy and Tugela Ferry, whilst the R33-2 links Dundee to Wasbank, the R602 which links Dundee to Elandslaagte and the N11, the R272 which links Dundee to Hattingspruit and the R621 which links Dundee to Dannhauser.

Map 43: Road Network

4.7.3 TRANSPORT INFRASTRUCTURE

Please note that there are no maps that indicates the status of repairs in the municipal area, we will include it in the next IDP.

Currently we do not have an integrated transport plan, correspondence has been written to DBSA for funding of the plan due to budgetary constraints.

The municipality is responsible for providing of municipal roads only, if there is a requested for national/provincial roads that is done through the intergovernmental processes.

There is a implementation plan, the maintenance plan will drafted when the conditional assessment has been concluded in the month of July by asset management unit, therefore that will clearly inform the maintenance plan based on the available budget.

No the municipality does not have a local transport plan, its have a pavement management system will was approved in 2018 and is due for the reviewal.

4.8 ENERGY

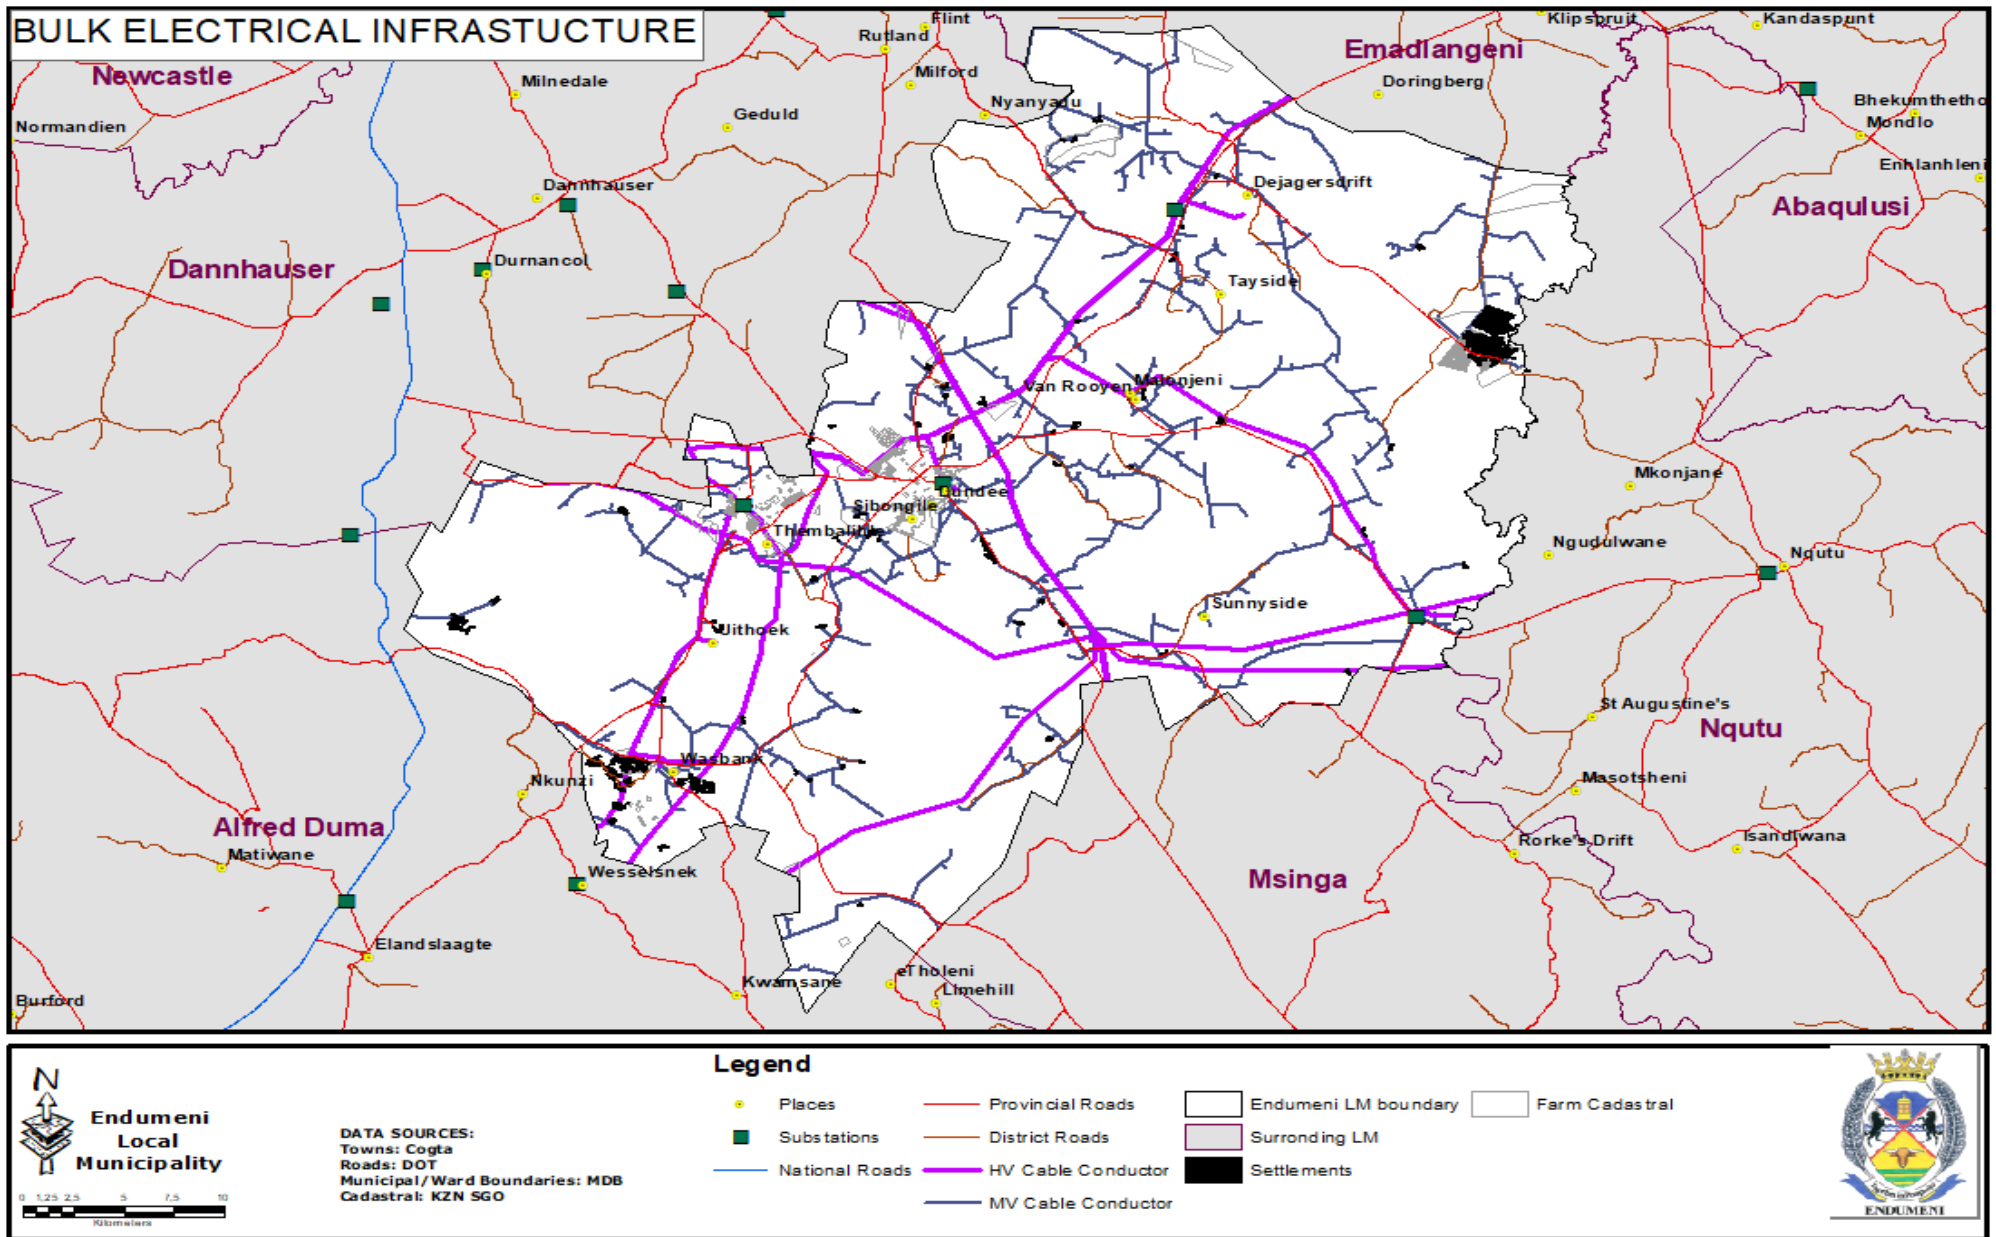

4.8.1 AREAS THAT LACK ACCESS TO ELECTRICITY

The current reticulation network in Endumeni Municipal area as indicated in map shows areas already electrified and the location within the district of the bulk electricity infrastructure. It is no surprise that the bulk electricity infrastructure is concentrated in areas that have the highest population densities which is mainly along the urban areas. Endumeni Local Municipality has recently developed a draft Electricity Sector Plan which was tabled to Council on the 24 May 2016, that addresses the objectives set out in the IDP thus forming linkages with Eskom in implementing the plan. The plan has the following objectives:

- ✚ To communicate the priorities of the municipality and its people to Eskom;
- ✚ Provision of access to make job creation possible;
- ✚ Universal access to electricity by 2019, will improve job creation possibilities; and
- ✚ Improve Local Economic Development, upgrading of existing electricity in all areas.

There are also a number of HV and MV cables that originate from these substations which distribute electricity within different parts of the municipal area. This is further supported by the MV stations. Data that relates to strained network is currently being sourced from

Eskom and it will assist to determine areas that have a strained network load. There are however some clearly defined areas that will not be receiving a supply of grid electricity but will rather be supplied with a non-grid supply, which is mainly solar based. Apart from the above there is very little direct spatial implications contained in the IEP as the supply of electricity is normally demand driven. Care must however be taken to ensure that areas proposed for major development are located within supply areas or alternatively those earmarked for future upgrade.

Map 44: Bulk Electricity Infrastructure

4.8.2 AREAS WITH LACK OF ELECTRICITY

According to the reviewed final 2017/2018 Electricity Provision Sector Plan which is referred to as annexure H of the IDP it has been confirmed that a total 79.1% of households have electrical connections while 20,9% have no connections and form part of the current electricity backlog. This compels the electricity service providers to outline their plans during the new generations of IDP on how they are planning to eradicate this costly backlog. The main affected areas fall under the operational jurisdiction of Eskom. Electricity is one of the major necessities required by all the communities. The urban areas and areas along major roads of Endumeni are supplied with electricity by the Eskom power grid. In rural areas, energy for cooking and heat is generated from wood. There is little indigenous wood for use as an energy source and therefore the practice needs to be discouraged.

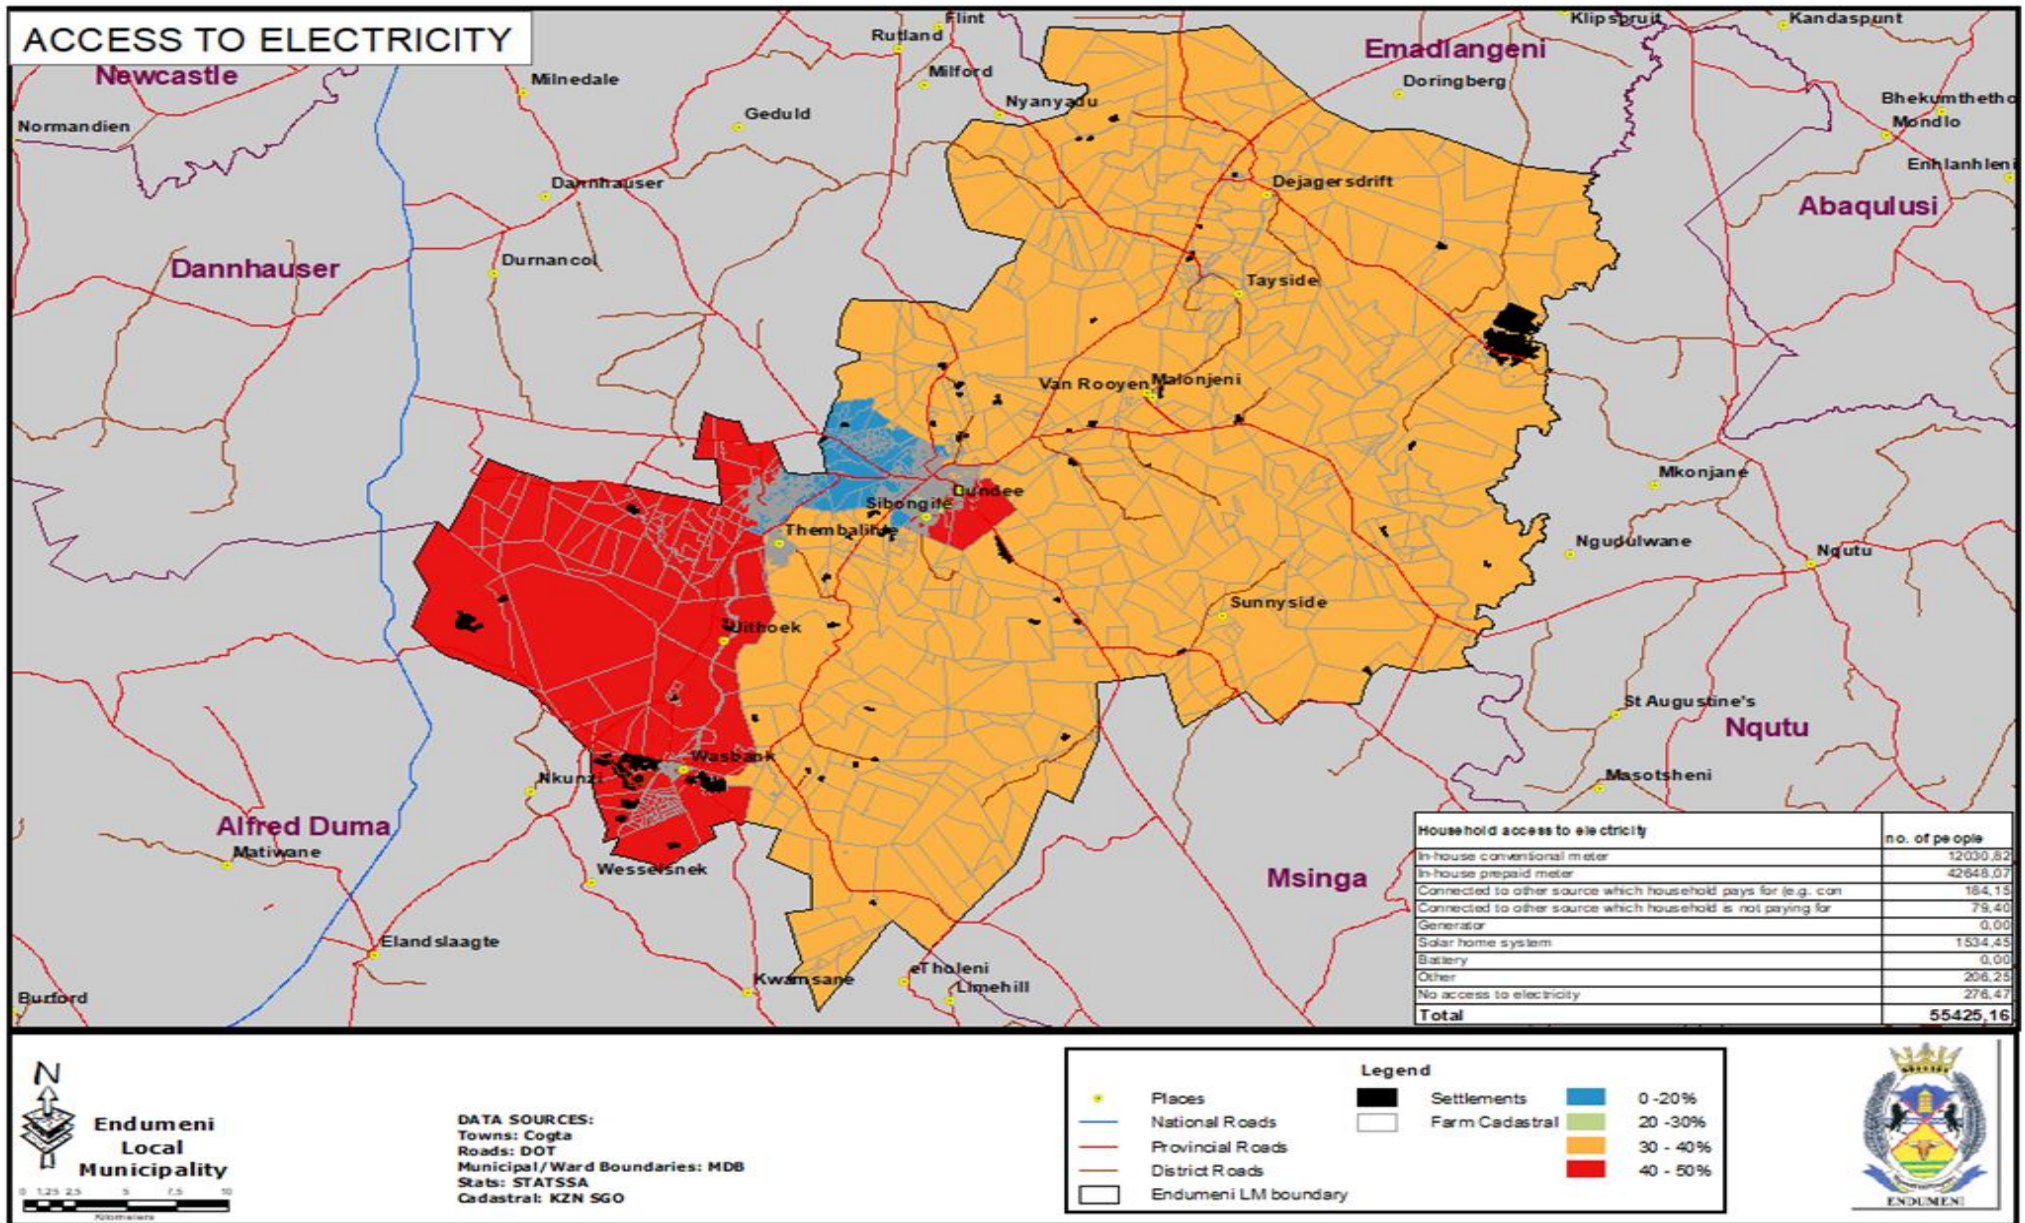

Opportunities for solar power supply throughout the region should be prioritized in the areas that are difficult to electrify. Access to Electricity is measured according to the energy used for lighting purposes. The absence of appropriate electricity infrastructure can often result in the extensive utilization of firewood for cooking and heating purposes with the resulting potential negative impact on natural vegetation. Limited access to electricity infrastructure often contributes to the general deforestation of the surrounding area, and increased levels of air pollution arising from the use of firewood for cooking and heating purposes.

(source: statistic community survey 2016)

(source: statistic community survey 2016)

Map 45: Access to Electricity

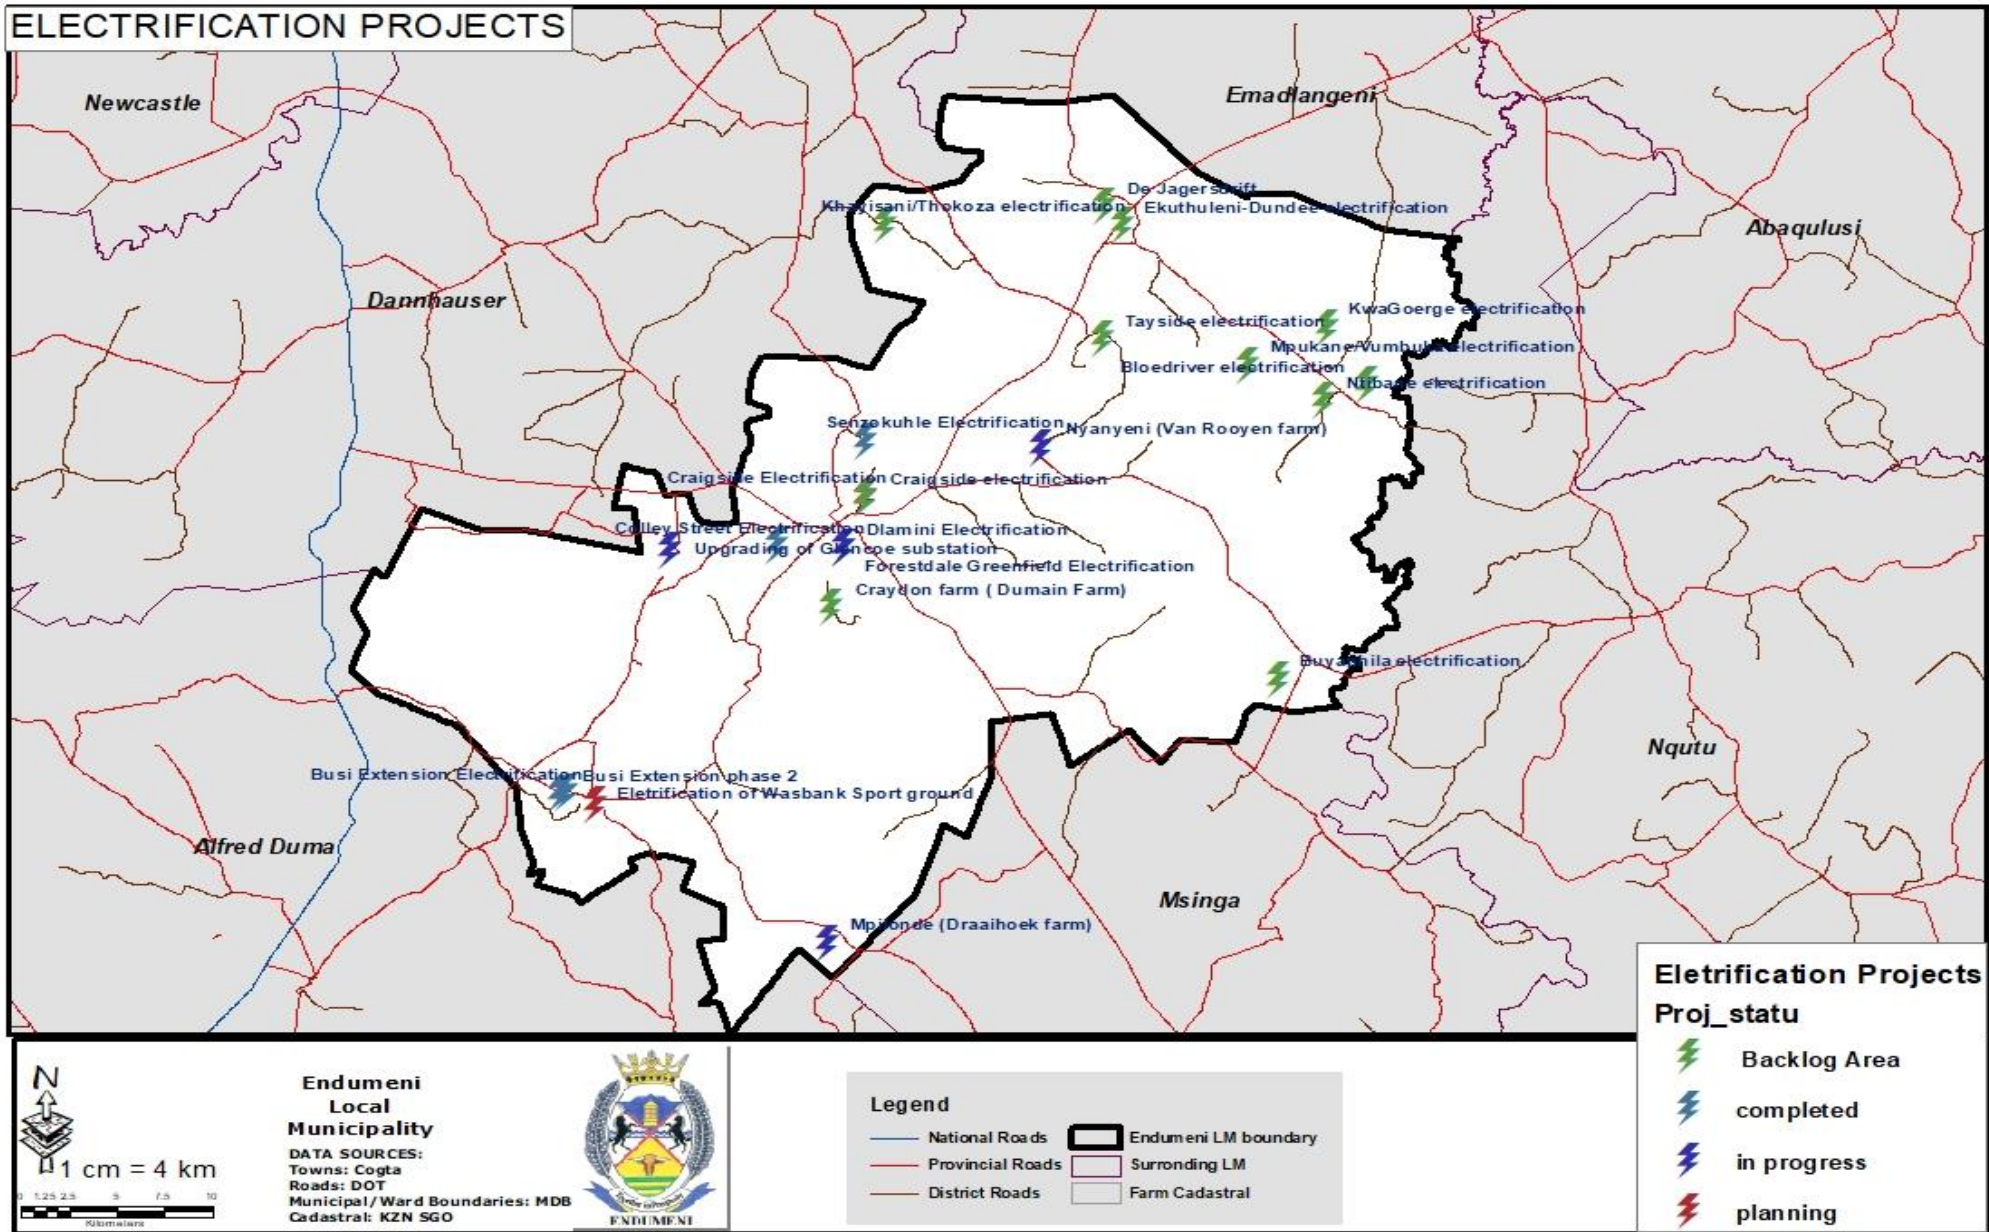

4.8.3 ENERGY / ELECTRICITY PROVIDER

NERSA have issued a license for Endumeni to distribute electricity within the town Of Dundee and Glencoe. Eskom distribute electricity at Wasbank and the rest of the municipality although the municipality is responsible for public lighting throughout the municipality.

The Electricity Master Plan was adopted by council I 2018 attached a copy of Electricity Master Plan as annexure.

The constrain and challenges on the budget has been discovered on this electrical section is inadequate funds. Procurement supply insufficient critical components and leads to negative impact to the maintenance.

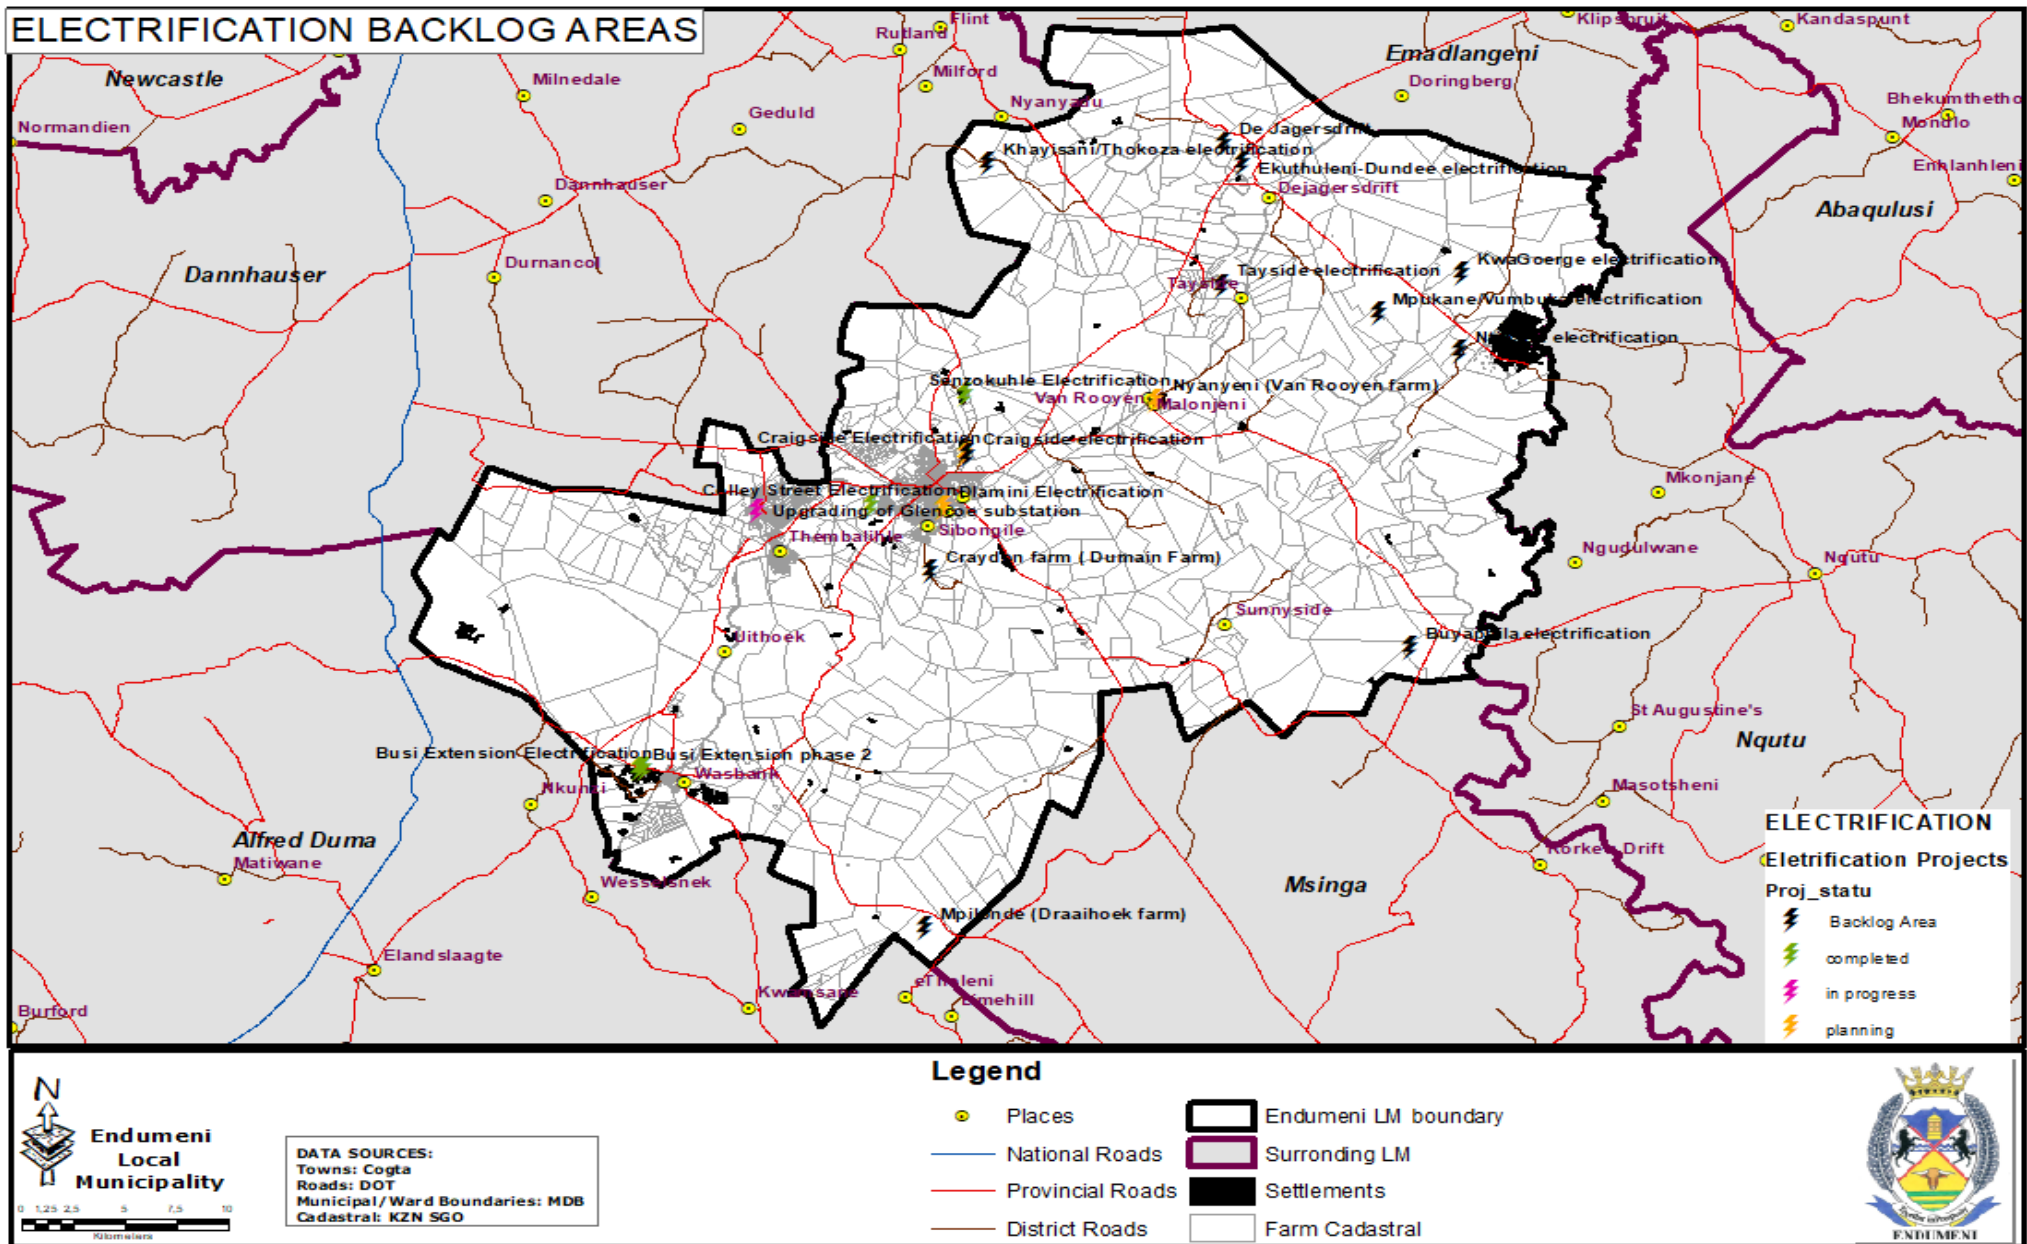

The Budget allocated for maintenance is R600 000. 0 0, due to population growth of Dundee and Glencoe has affected the maintenance. The budget for buildings for electricity installations id R280 000. 00. The day-to-day street light activities is R100.000.00 and for the transformer maintenance is R300.000.00 on yearly basis.

Table 27: RECOMMENDATIONS FROM UMZINYATHI DISTRICT MUNICIPALITY EMF

ISSUE	KEY FINDINGS	RECOMMENDATIONS
CLIMATE	The district falls within the coastal summer rainfall areas, with medium to low rainfall. Endumeni LM experiences 700- 800 mm/annum.	Tree planting initiatives should be initiated in all settlement areas for shading purposes to reduce heat stress during summer months. Community forestry initiatives should be implemented to enable carbon sequestration and to benefit from carbon trading programs.
GEOLOGY	Characterised mostly by the sedimentary soils of the Ecca group arenite which is a dominant feature in the District and fragmented patches of Shale, mudstone and dolerite.	The area's coal reserves are marginal, but increasing demand for coal may cause these reserves to become more viable to mine in future. Although mining opportunities are limited, opportunities for further mineral development may be explored.

MINING	<p>Only coal was mined on a large scale in the Endumeni LM. The area around Glencoe and Dundee has a long mining history. There is currently only one active mine in the area although mining continues north of UDM in the Dannhauser and Newcastle areas. The mine offices and washing plant for Slater Coal are located in Dundee on the R33</p>	
TERRAIN MORPHOLOGY	<p>This area is classified as plains with open or low/high hills of ridges and rolling or irregular low lands with low hills or ridges. Endumeni LM also consists of open high hills or ridges and some low mountains may be found south east of Glencoe.</p>	<p>A complex topography (rolling hills and mountains) across large sections of the District has an aesthetic appeal and holds considerable tourism development potential. Steeper slopes and mountainous areas are more inaccessible and are therefore less disturbed. These areas serve as habitat patches and dispersal corridors to a large number of species. It also acts as important water catchment areas. All areas steeper than 18 degrees should be excluded from development. This will not only protect slopes from erosion and landslide risk, but will ensure that ridges will function as dispersal/habitat corridors.</p>

GEOHYDROLOGY	<p>The district has a large reservoir of high quality groundwater which may be developed to the benefit of local communities and economic development. Borehole yield class ranges from</p> <p>0.5 – 2 median liters per second and electrical conductivity range from 0 – 70 mS/m in the northern and southern areas, and from 70 to more than 300 mS/m in the central area</p>	<p>The Umzinyathi area has a large reservoir of high quality groundwater which may be developed to the benefit of local communities and economic development</p>
SLOPE AND ELEVATION	<p>The general slope of the land varies typically between 1:5 and 1:6 or lower than 9% and it is generally susceptible to soil erosion where it is not carefully and properly managed</p>	
SURFACE WATER	<p>The UDM mainly falls within the Thukela catchment; however portions of two other catchments occur within the district, namely the Mvoti Catchment which is located in the south below Greytown and Kranskop and the Mfolozi catchment which is in the north eastern section of the District, east of Nquthu and Silutshana</p>	<p>Surface water availability is a competitive advantage of the Umzinyathi District. Water should be utilized optimally in a sustainable manner to grow the agricultural, tourism and manufacturing industries. The practice of aquaculture should be promoted as an important tool in food security and job creation. Wetlands should be protected, and degraded wetlands should be rehabilitated as a priority measure to improve water quality, water flow regulation and habitat provision at a regional scale.</p>

RIVERS & WETLANDS	The main rivers within the district are the Buffalo, Mooi and the Mvoti. The major rivers in Endumeni LM are Bloed, Buffels, Mzinyashana, Sandspruit, Wasbank. Wetlands are 539 covering 7274.4ha (4.5%)	
DAMS	The Lake Merthley Dam, which supplies water to Greytown and is the main storage dam in the Mvoti catchment; and the Donald McHardy Dam, which is situated south-east of Glencoe.	
TERRESTRIAL ECOLOGY	There are four biomes in the UDM, namely Wetland, Grassland, Savanna and Forest.	
TERRESTRIAL THREATENED ECOSYSTEMS	The first national list of threatened terrestrial ecosystems for South Africa was gazetted on 9 December 2011 listing all the threatened or protected ecosystems in South Africa in terms of four categories; critically endangered (CR), endangered (EN), vulnerable (VU), or protected. The following threatened ecosystems are encountered in Endumeni LM - 2 vulnerable ecosystems, namely Eastern Temperate Freshwater Wetlands & Low Escarpment Mistbelt forest	

<p>CONSERVATION & PROTECTED AREAS</p>	<p>Protected Areas are areas of land or sea that are formally protected by law and managed mainly for the purpose of biodiversity conservation. Conservation Areas are those areas of land not formally protected by law, but where primary land use is conservation. The known conservancies in UDM include - Doornberg, Gregories Neck, Balgray Farm, Sunset Rest, Biggarsberg, Dundee Agricultural RS, Ilanga, Aalwynkop, Vants Drift, Boschfontein, Ndumeni, Kameelkop, Helpmekaar, Valhalla, Buffelshoek/Umzinyathi Re, Isibindi Eco-Reserve, Fugitives Drift, Thukela Biosphere, Mooi River Valley, Umvoti Vlei, Masonite, Greytown, Umvozaan.</p>	
<p>LANDSCAPE ECOLOGICAL CORRIDORS</p>	<p>The EKZNW (2010) corridor plan identifies corridors as areas of natural to near-natural conditions of vegetation that should ideally be conserved in their natural state in order to maintain linkages within a fragmented landscape. Four (4) corridors are recognised in the UDM, namely - Chelmsford Corridor, Northern Interior Corridor, Tugela Corridor and Tugela North Corridor</p>	

CENTRE OF ENDEMISM	<p>South Africa contains a number of areas where there are high levels of endemism amongst plant species. Endemism means that high proportions of the species are restricted to that area and occur nowhere else. The UDM is located within the Maputaland centre of Endemism. This centre of endemism is a region of approximately 17,000km² that falls within Mozambique, South Africa and Swaziland.</p>	
FAUNA	<p>The Conservation International Southern African Hotspots Programme (2010) shows that the following fauna species are known to be found in the Maputaland-Pondoland-Albany Hotspot and Maputaland centre.</p>	
BIRDS	<p>The Important Bird & Biodiversity Area (IBA) programme of southern Africa (Barnes, 1998) identifies 124 IBAs in South Africa. IBAs are places of international significance for the conservation of birds and other biodiversity and are sites that together form part of a wider, integrated approach to the conservation and sustainable use of the natural environment. There are 2 IBAs occurring in the UDM, namely Umvoti Vlei and Karkloof IBAs.</p>	

SOIL	<p>In the central area of the Endumeni LM soils with a plinthic criterion, and soils with limited pedological development is found. Where on the western and eastern parts podzolic soils are present, as well as small occurrences of the well- structured soils generally with high clay content and rocks with limited soil close to the boarder of Endumeni and Nquthu. Endumeni LM - soil classes 7, 8, 16, 17, 18, 21, 22, 23 and 24.</p>	<p>The District has some areas with naturally fertile soil and soils of favourable structure, which should be conserved. Sustainable agricultural practices that reduce leaching, erosion, compaction and loss of soil structure, should be promoted. Establishment of hedgerows of indigenous plants should be encouraged in all areas susceptible to wind erosion. Also, crop and grain farmers in areas susceptible to wind erosion, should be encouraged to adopt agro forestry principles which aims to reduce wind erosion in cultivated fields.</p>
------	---	--

AIR	<p>No data on ambient air quality data is available at present for the district. There is no Air Quality Management Plan for UDM. According to UDM (2015b), the air quality across most of the district is relatively good, and this may serve as a positive aspect in place marketing efforts, and increase tourism competitiveness of the area.</p>	<p>The air quality across most of the Umzinyathi area is relatively good, and this may serve as a positive aspect in place marketing efforts, and increase tourism competitiveness of the area.</p>
-----	---	---

4.9.1 SPORTS AND RECREATIONS

There are number of existing sport facilities within Endumeni. These include Soccer fields, which are within Dundee (Oval, Kallis and Mpumelelo). During the 2015/16, financial year the municipality built a Sports field in the Wasbank area. This indicates that the majority of these facilities are located within the main urban centre (Dundee town). The municipality is investing R4 000 000.00 to build Multi-purpose centre in the Sithembile area on 2017/18 financial year the project is still ongoing. There are five arts and culture events that are co-ordinated by the municipality which includes the following:

-  The annual Dundee July
-  The Siyaya Emhlangeni
-  Heritage Day
-  Battlefields Street Carnival
-  The learn and Play

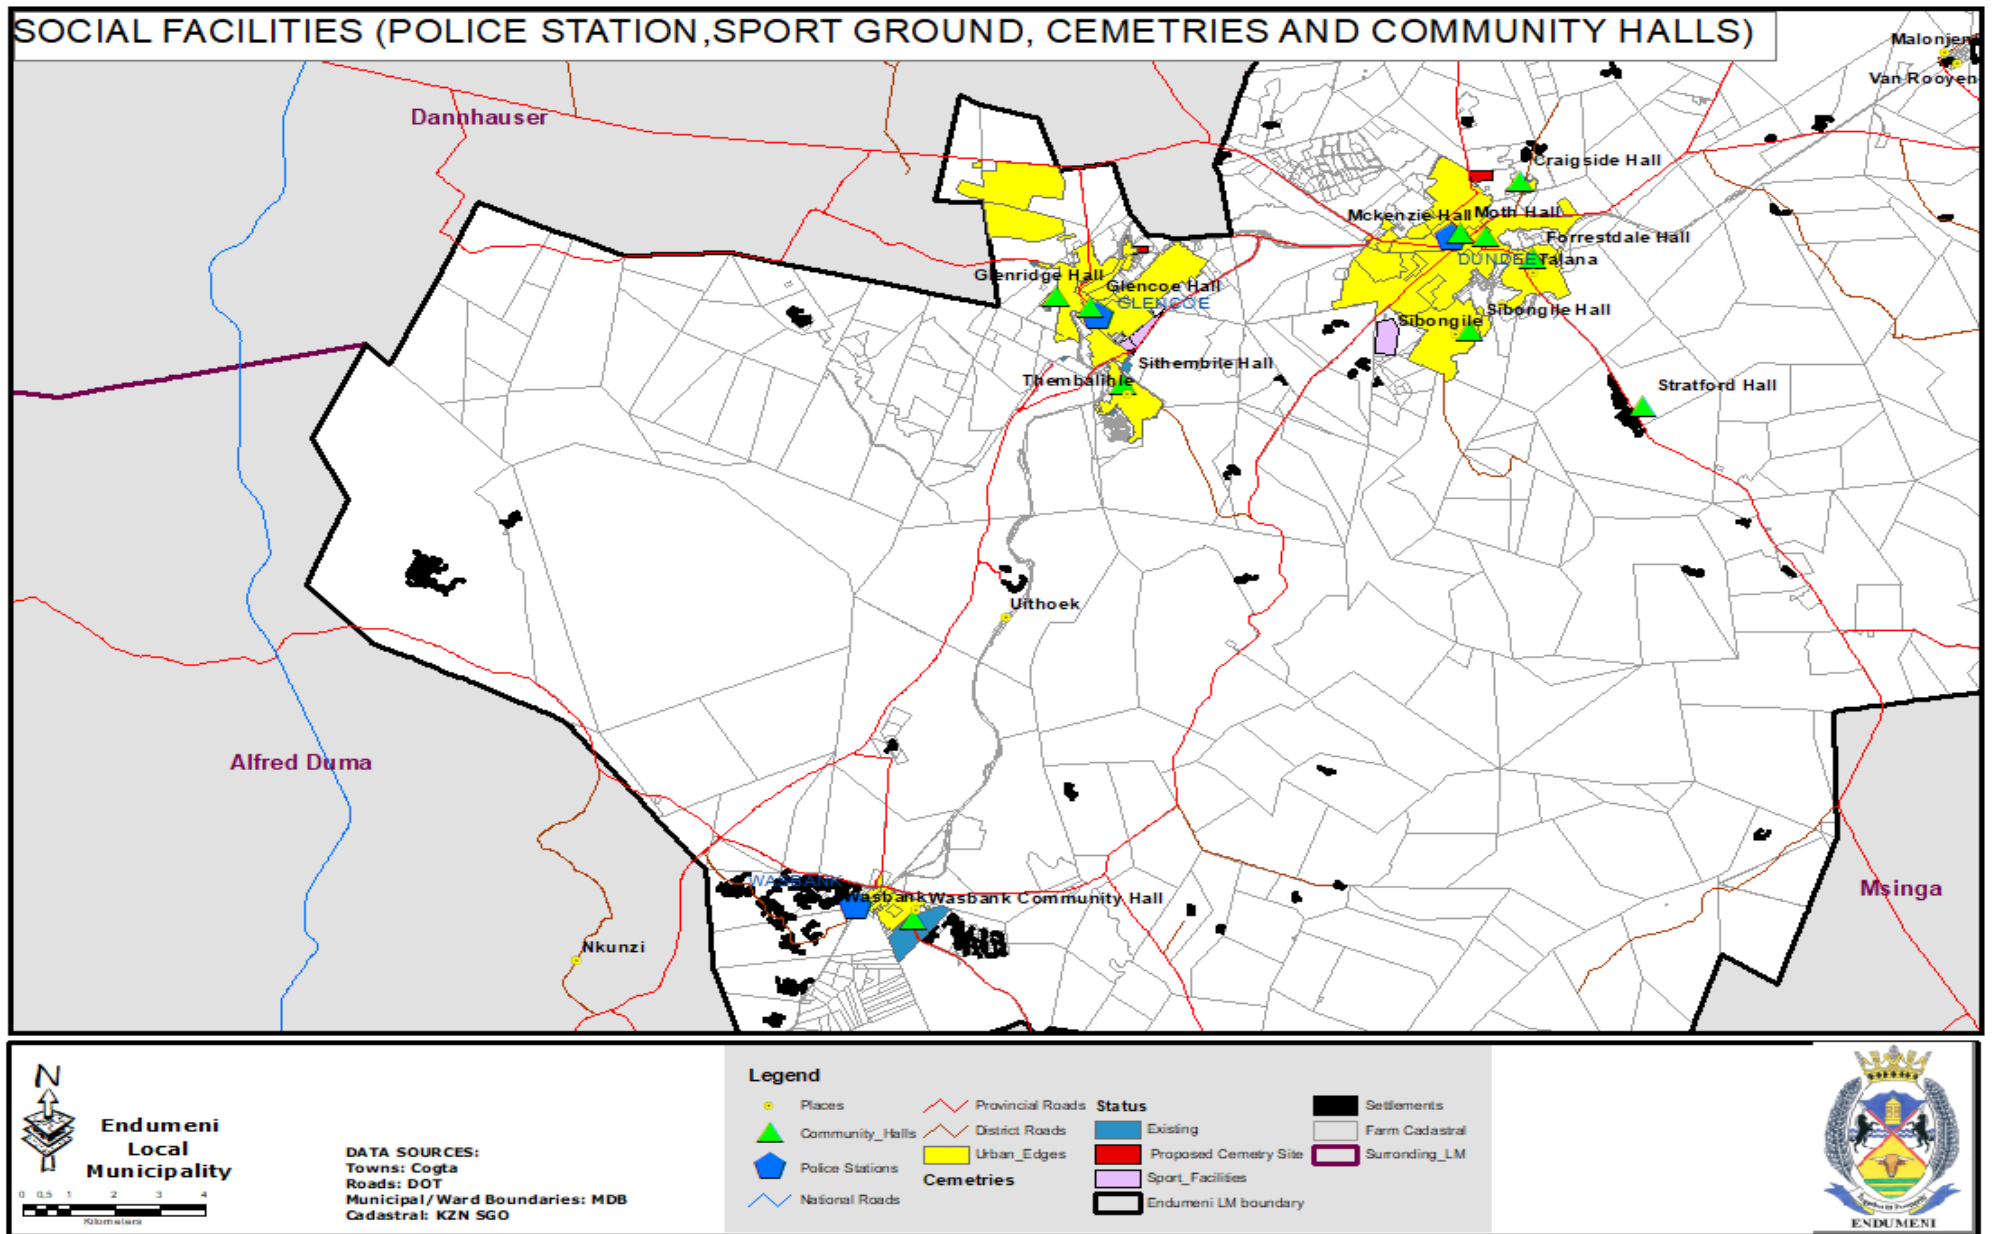

These events are considered as important not just in terms of arts and culture, sports and recreation but also has proven to be major contributors to the Local Economic Development agenda of Endumeni Local Municipality.

4.9.2 THUSONG CENTRES AND COMMUNITY HALLS

In accordance with the Endumeni 2017-18 IDP, there are six (6) Community Halls in existence. The number of Thusong Centres and Community Halls required for the area versus the currently provided facilities depends on an application of the KwaZulu-Natal Draft Norms and Standards which requires one hall for 5 000 people within a 30-minute walking time or 1.5km walking distance. According to these standards, there are 13 community hall facilities that should be in existence within Endumeni LM. The provision of these facilities is very necessary for rural area such as Endumeni LM.

4.9.3 CEMETERIES

There are numerous cemeteries, and graveyards in the municipal area. These are associated with townscapes, rural landscapes, farmsteads, church land, and battlefields. Although formal cemeteries are reflected in existing data bases there are no accurate records of informal cemeteries and graves. The rural hinterland for instance, indicate numerous graves and informal cemeteries when studying aerial photographs of the area. However, these are not reflecting in any existing database.

Map 48: Social facilities

4.10 HUMAN SETTLEMENTS

All preliminary studies have been concluded for the project. A preliminary layout plan highlighting various development interventions on the project site has been developed. The project remains constrained due to ongoing land invasions on site that need to be managed by the developer. Availability/confirmation of bulk service infrastructure and service level agreement to be entered into between the developer and water services authority (WSA) before the project can be implemented.

Project Name	Project Type	Project Status	Financial Year	Local Municipality	Total Project Cost	Actual Expenditure 2019/20
Dlamini Forestdale Integrated Housing Project	IRDP	Construction	2019/20 and 2020/21	Endumeni	R32,603,710.53	R11,002,585.11
OSS for 7 Beneficiaries in Endumeni-Umzinyathi	Special Project	Construction	2020/21	Endumeni	R776,629.00	R0.00

Table 28: Human Settlements projects

4.11 TELECOMMUNICATIONS

Telecommunication services within the area are provided by Telkom and all licensed cellular phone companies in the country. Telecommunication infrastructure remains one of the major challenges in all the municipal areas, information on infrastructure is difficult to access from the various service providers due to competition. In formal urban settlements majority of the people have access to Telkom services. In rural areas, the majority of people rely on cellular phones. Some key issues faced by the Municipality access to telecommunication service, infrastructure information and a lack of co-ordinated planning to meet the district's needs.

The growing importance of direct access to appropriate telecommunication infrastructure to facilitate access to appropriate sources of information in support of Local Economic Development is becoming an increasingly important development consideration. The inclusion of aspects such as rural telecentres as part of the housing development initiative could play an important role to address this gap.

4.12 STATUS OF SECTOR PLAN

Table 29: The following sector plans have been developed and are hereby submitted for adoption together with the 2021/2022 IDP Review

Municipal Sector Plan	Completed (Y/N)	Adopted (Y/N)	Adoption Date (if adopted)	Date of Next Review
Approved 2021/2022 Annual Budget	Y	Y	30 January 2020	2021/2022 FY
2020/2022 Spatial Development Framework (SDF)	Y	Y	30 May 2019	2020/21 FY
2017/18 Disaster Management Plan	Y	Y	30 May 2019	2020/21 FY
2020/2021 Reviewed Organizational Structure	Y	Y	26 June 2020	2020/21 FY

TABLE 29: SWOT ANALYSIS OF THE SERVICE DELIVERY AND INFRASTRUCTURE

STRENGTHS	WEAKNESSES
A Council Adopted Electricity Provision Sector Plan	Illegal Electricity connections- loss of potential income
Road network captured A Spatially captured Road Network	Moratorium on bulk water and sanitation on newly established townships
A Council Adopted Integrated Waste Management Plan (IWMP)	Rural housing stock with no access to water and sanitation
A Council Adopted Human Settlement Sector Plan	Multi-purpose centre not being fully realized
Availability of MIG funding	Turn-around times for installation of electricity (multi-sectoral partnerships)
Implementation of the Front-loading Strategy which thus make Development funding readily available	Ageing Roads and storm water drainage Systems
A Fully Fledged Project Management Unit (PMU)	Municipal Airfield in poor condition
A Council Adopted Operations and Maintenance Policy Framework	No municipal Taxi Rank (land available for the purpose) and inadequate provision of taxi lay
Capable and Skilled Personnel	Lack of Electricity, Human Settlement and other basic services in rural areas
OPPORTUNITIES	THREATS

Availing municipal services to the FET college site	LIFESPAN AND MAINTANANCE: Capacity and state
Establishment of community facilities i.e. Libraries, sports fields, etc	Emerging of informal settlements
Provision of municipal service/bulk to urban area for security of rates	
Securing of funding for Eskom areas	
Explore the purchase privately owned land and transfer of State land	

5. KPA LOCAL ECONOMIC DEVELOPMENT AND SOCIAL DEVELOPMENT

5.1 LOCAL ECONOMIC DEVELOPMENT

5.1.1 LED FUNCTIONALITY AND CAPACITY

The Endumeni Local Municipality has once again reviewed its LED Strategy referred to as Annexure F of the final 2020/21 IDP. The primary aims and objectives of the LED regeneration strategy are as follows, The Strategy and Action Plan sets out the Endumeni Municipality's programme for development of the local economy over the period 2018-2022 outlining:

- ✚ Our **Vision** for Endumeni
- ✚ The Governance and Partnership arrangements
- ✚ The Policy Context against which the strategy will be delivered
- ✚ The Sector Based Economic Context that informs our approach
- ✚ The Challenges and Opportunities faced
- ✚ The Strategic Priorities and Outcomes which we will seek to achieve
- ✚ The Actions that will be prioritised by partners
- ✚ How we will **Monitor, Measure and Report** on progress

The report is designed to capture sector analysis, challenges and opportunities in that particular sector and further provide strategic priorities envisaged to improve economic performance of the sector thereby achieve broad economic vision of the municipal

economic partners. Finally, action programme is presented, and it should commit all the partners to play their respective roles and realise their respective mandates through the realised body of Endumeni Economic Partnership.

The Strategy and Action Plan underpins the Endumeni Outcome Agreement 2018 – 2022 and articulates how partners across the municipality will work collaboratively to deliver better economic outcomes for the area and its people. The LED Forum has been resuscitated and sits on quarterly bases to deliberate on economic matters. The progress on the implementation of LED Strategy is reviewed annually.

5.1.2 POLICY/REGULATORY ENVIRONMENT AND ALIGNMENT

With regards to the status of Stakeholder engagement in LED Planning, Implementation and Monitoring it is worth mentioning that, both the reviewed LED Strategy well as the reviewed IDP very serious attention has been put towards this particular aspect. The LED Strategy in particular advocates for a position which says a Municipality on its own conniver achieve the LED Strategic Objectives it has set itself as outlined in the LED Strategy without working with a variety stakeholders and strategic partners.

In response to the finding of the MEC for CoGTA during the 2021/20 IDP Assessment, Endumeni Municipality from the 2017/2018 Financial Year and beyond has prioritized the implementation and institutionalization of the following stakeholder engagements mechanisms in planning and implementation of various economic development interventions and processes within its area of jurisdiction to name just a few:

- ✚ Complete the review of the LED Strategy and align it to National LED Framework by July 2021
- ✚ Revived the Municipal-Wide LED Forum and operational
- ✚ 8-Aside meetings sits quarterly
- ✚ Hosting and staging at least two (2) Emerging Framers Engagement Sessions.
- ✚ Hosting and staging at least 4 Business Inspections throughout the Municipal area
- ✚ Hosting and Staging Informal Economy Sector Workshops/ Seminars
- ✚ Facilitating numerous Small Business and Informal Economy Sector Training and Business Skills Training

- ✚ Have facilitated and Convened Various Tourism Sector Specific Workshops and Meetings
- ✚ Signed a Partnership agreement with Small Enterprise Development Agency (SEDA)
- ✚ Signed SLA with uMzinyathi Development Agency
- ✚ Have strengthened the relationship of the Municipality with Tourism Sector by Signing a Memorandum of Agreement with the Community Tourism Organization affectionately known as Dundee Tourism
- ✚ Initiate the processes towards the re-establishment of the Endumeni Business Chamber

In addition the Municipality through its Planning & Economic Development Department is participating and is involved in a number of joint LED initiatives with a variety of members of the Municipal-wide LED Forum in order to promote collective efforts towards inclusive and radical economic transformation within our municipal area.

The above outlined activities also form part of the KPI's of the performance plan for the Executive Manager Planning & Economic Development. Those KPI's are monitored on a regular basis.

5.1.3 STRATEGIC ECONOMIC ANALYSIS AND INTERVENTIONS

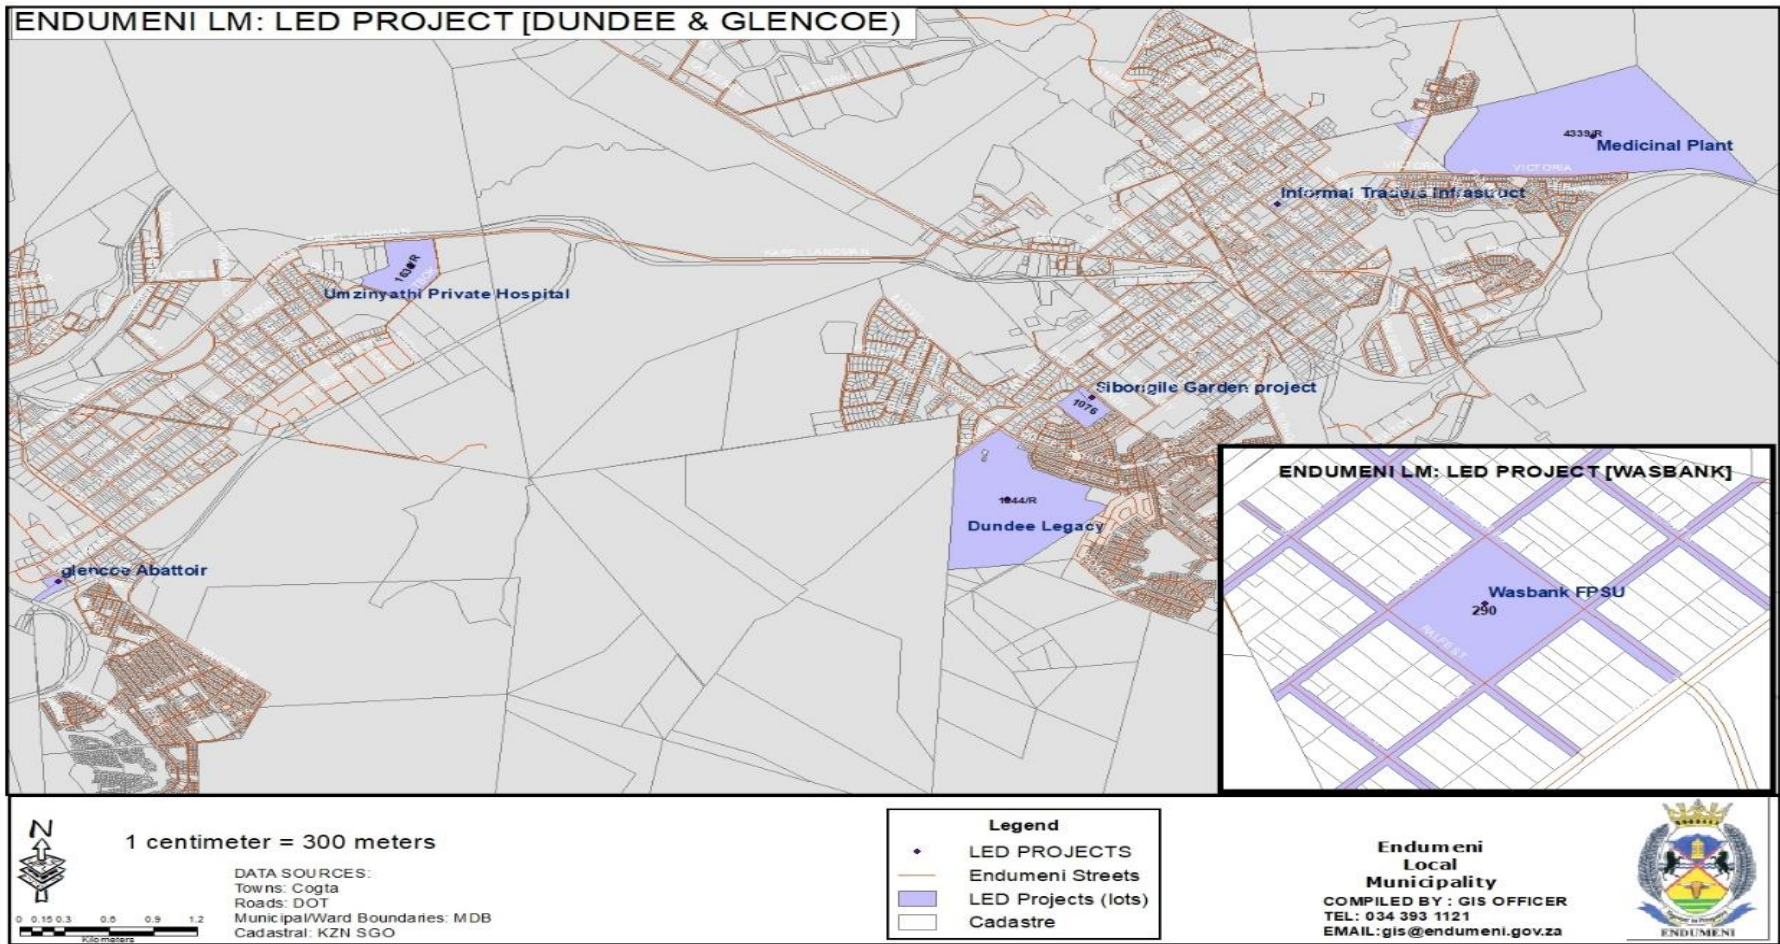

The total population for Endumeni Local municipality was estimated at 64 862 people dispersed across six municipal wards in 2011, while in 2016 the population was estimated at 76 639 (see figure above). The total population grew by 15.6% (11 957) since 2011 and recorded an average annual population growth rate of 3.79 percent. The population is dominated by females accounting for 51 percent of the total population, this may be attributed employment opportunities that reside elsewhere outside of the municipal boundary which in most males are thus obliged to migrate out to get better chances of being employed. This then translates to be one of the reasons for high numbers of female headed households approximately 44 percent of the population within the municipality is female headed.

The household dynamics of the municipality suggest that the number of households has increased from 16 851 in 2011 to 21 134 in 2016 translating to an increase of 4283.

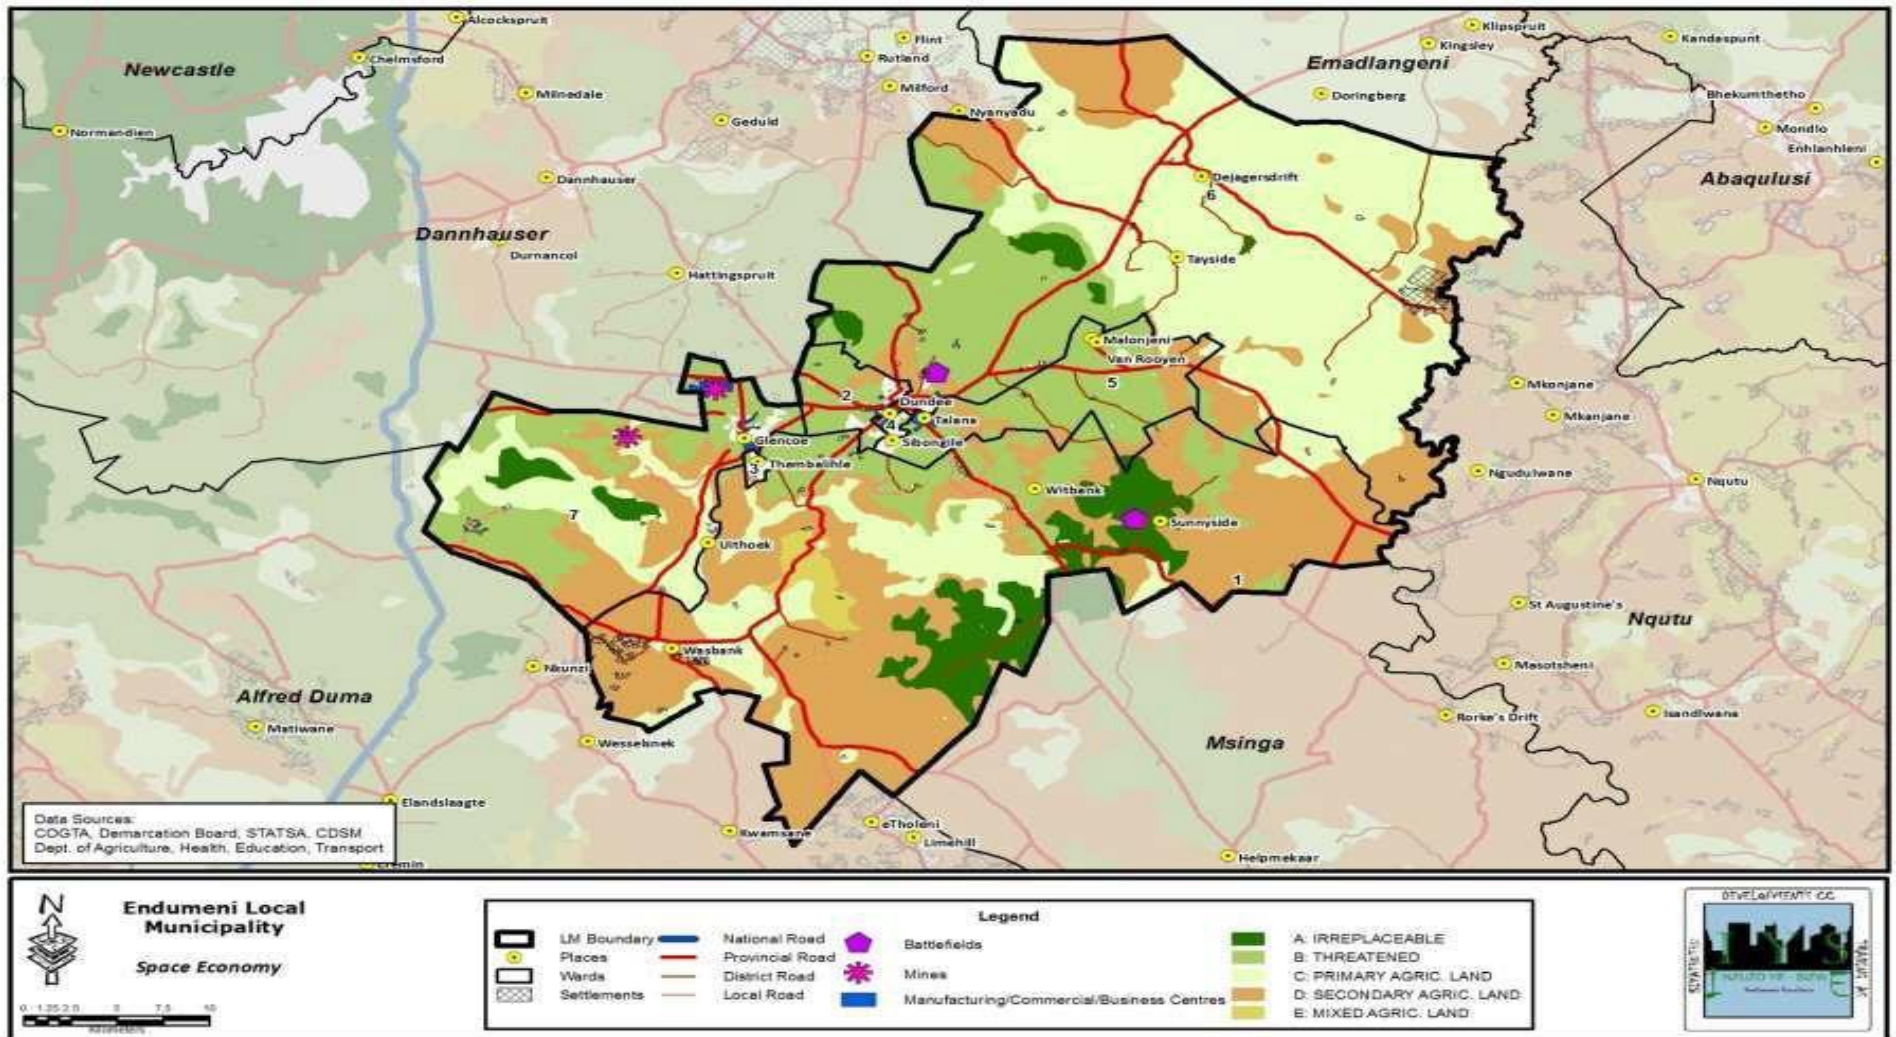

However, it is worth noting that although the number of households increased the average household size decreased from approximately 3.7 in 2011 to 3.6 in 2016 relating to a 0.1 percent increase in 2016. The age structure of the municipality as depicted in the figure above shows that the population is dominated by the working age population of between 15 to 64 years of age accounting for approximately 64 percent and 66 percent in 2011 and 2016 respectively. The working age population has increased since 2011 by 2 percent to 2016 suggesting that there is great demand for employment creation to put these numbers to good use.

The rest of the population is termed the dependent population mainly consisting of the population below 15 years and the population above 65 years accounting for approximately 30 percent and 5 percent respectively in 2016. Though relatively small when compared to other municipalities this suggests that 35 percent of the municipality's population is dependent with a dependency ratio of 53 suggesting that for every 100-independent people in the municipality 53 are dependent. According to Stats SA census 2011 the municipality's official unemployment rate stood at 26 percent whilst the youth unemployment rate was estimated at 36 percent.

Although relatively low when compared to the district the other local municipalities these numbers are alarming especially the youth unemployment rate as the total population is fairly young, suggesting that more initiative are needed to ensure that this youth is put to production in order to further grow the local economy. The municipality's population over age of 20 is relatively educated with only about 4 percent recorded as having no form of education, 40 percent who have matriculated and approximately 12 with higher education in 2016. This numbers aside from the population with no education have increased since census 2011 with the number of people with matric growing by approximately 8 percent and the number of people with higher education by approximately 1.5 percent. The population with no formal schooling on the other hand had decreased by approximately 3 percent which suggests that the population over 20 may be eager to educate themselves and hence increases chances of being employed.

Map 49 LED Project

Map 50: Space Economy

TABLE 30: LOCAL ECONOMIC DEVELOPMENT (SWOT ANALYSIS)

Strengths	Weaknesses
150 ha of land for crop farming and livestock	Land given back to community for LED purposes is not fully utilized.
Capacity building initiative/ skills development programmes, etc for the community	Unimplemented By-laws
Craft market	Operation and maintenance of the aerodrome establishment
Agri processing businesses; existing Abattoir,	No sustainability of LED projects once handed over to beneficiaries
Skills development related to Agri-processing plants	Unavailable/ undeveloped LED infrastructure i.e. market stalls
Tourism , existence of govt. institutions locally	Challenges in providing service delivery in LRAD Land
Biggest suppliers of livestock farming	Inadequate Capacity to mobilise external funding for implementation of the LED Strategy & Plan
Availability of budget	Underutilization of Industrial Park
Suitable geographic area for tourism (Battlefields Route) Link to tourism above	Lack of proper infrastructure to support investment e.g.: Mining Sector
Have a dedicated LED & Tourism Unit	Limited Implementation of LED Strategy
Have a Council Adopted Strategy	Lack of a Business Chamber with the Municipal Area
Have a Fully Functional LED Forum	
Have an 8-Aside Business Structure which serve as a voice of Business within the municipality	
Have a Fully functional Community Tourism Organization, the Dundee Tourism	
Have signed an MoA with SEDSA in an effort to promote Enterprise development and support	
Convenes an annual Small Business Week Event	
Convenes at least two Mayoral Business Engagement Session per	

Continuously creating creating Job Opportunities through EPWP and CWP Programmes	
Have a Fully functional Informal Economy Chamber	
Have a Council Adopted Informal Economy policy Framework	
Conducts at least 4 quarterly Business Inspections within the Municipal area	

OPPORTUNITIES	THREATS
Compilation of the Tourism Plan	Ignorance of approved by-laws
Mobilization of external funding for implementation of the LED Plan	Drought
Involvement of other sectors of LED matters	Limited services to accommodate Dundee July event, e.g. electricity, access roads, parking demarcation, security, congestion etc.
Dedicated support for Emerging farmers	Increased levels of Unemployment
Skills Development in agriculture	Uncoordinated Business engagement Interventions
Great investment interest from outside, e.g. cement manufacturing plants, etc.	Implementable LED Strategy
Existing land strip for economic purposes	Lower levels of Trade and Investment into the Municipal area
Formalization of boarding institution to regulate municipal rates.	
Implementation of the Agri-Parks Programme	
Implementation of the District-Wide Investment Attraction and Promotion Strategy	
Establishment of Partnerships with key Strategic Partners	
Establishment of the Business Chamber for Endumeni Local Municipality	

5.1.4 STRATEGIC PROGRAMMES RESPONSES

Endumeni has a Gross Domestic Product (GDP) which is estimated R3 377 080 310.10 which accounts for 38, 23% of UMzinyathi District Municipality GDP which is estimated at R 8 833 587 000.00. The economy of the municipality is relatively well developed with Dundee and Glencoe as its major towns having well-established.

THE SIZE OF THE LOCAL ECONOMY

Endumeni has a Gross Domestic Product (GDP) which is estimated R3 377 080 310.10 which accounts for 38, 23% of UMzinyathi District Municipality GDP which is estimated at R 8 833 587 000.00. The economy of the municipality is relatively well developed with Dundee and Glencoe as its major towns having well-established.

AGRICULTURE

Agriculture is one of the key sectors of the municipality with over twenty-one thousand hectares of land under commercial production. This sector accounts for approximately 8% of the municipality's economy and has a great potential for growth and employment creation. Although the sectors has been growing since 1996 in terms of contribution, its contribution to economic growth has drastically decreased in 2015 experiencing a negative growth rate of -0.0035.

The GDP-R of the municipality has been increasing in relative terms since 1996 to 2015 showing an upward trend as seen in the figure above with the key economic sectors contributing to this including: Community services (26%); trade (15%); finance (14%); manufacturing (12%); transport (9%); mining (9%); agriculture (8%); construction (4%); and electricity (3%). is can however be attributed to numerous factors beyond the control of the municipality including climatic factors such as drought affecting total productions, the rising oil prices affecting the price of fuel, low commodity prices and much more.

Source: Global Insight, 2016

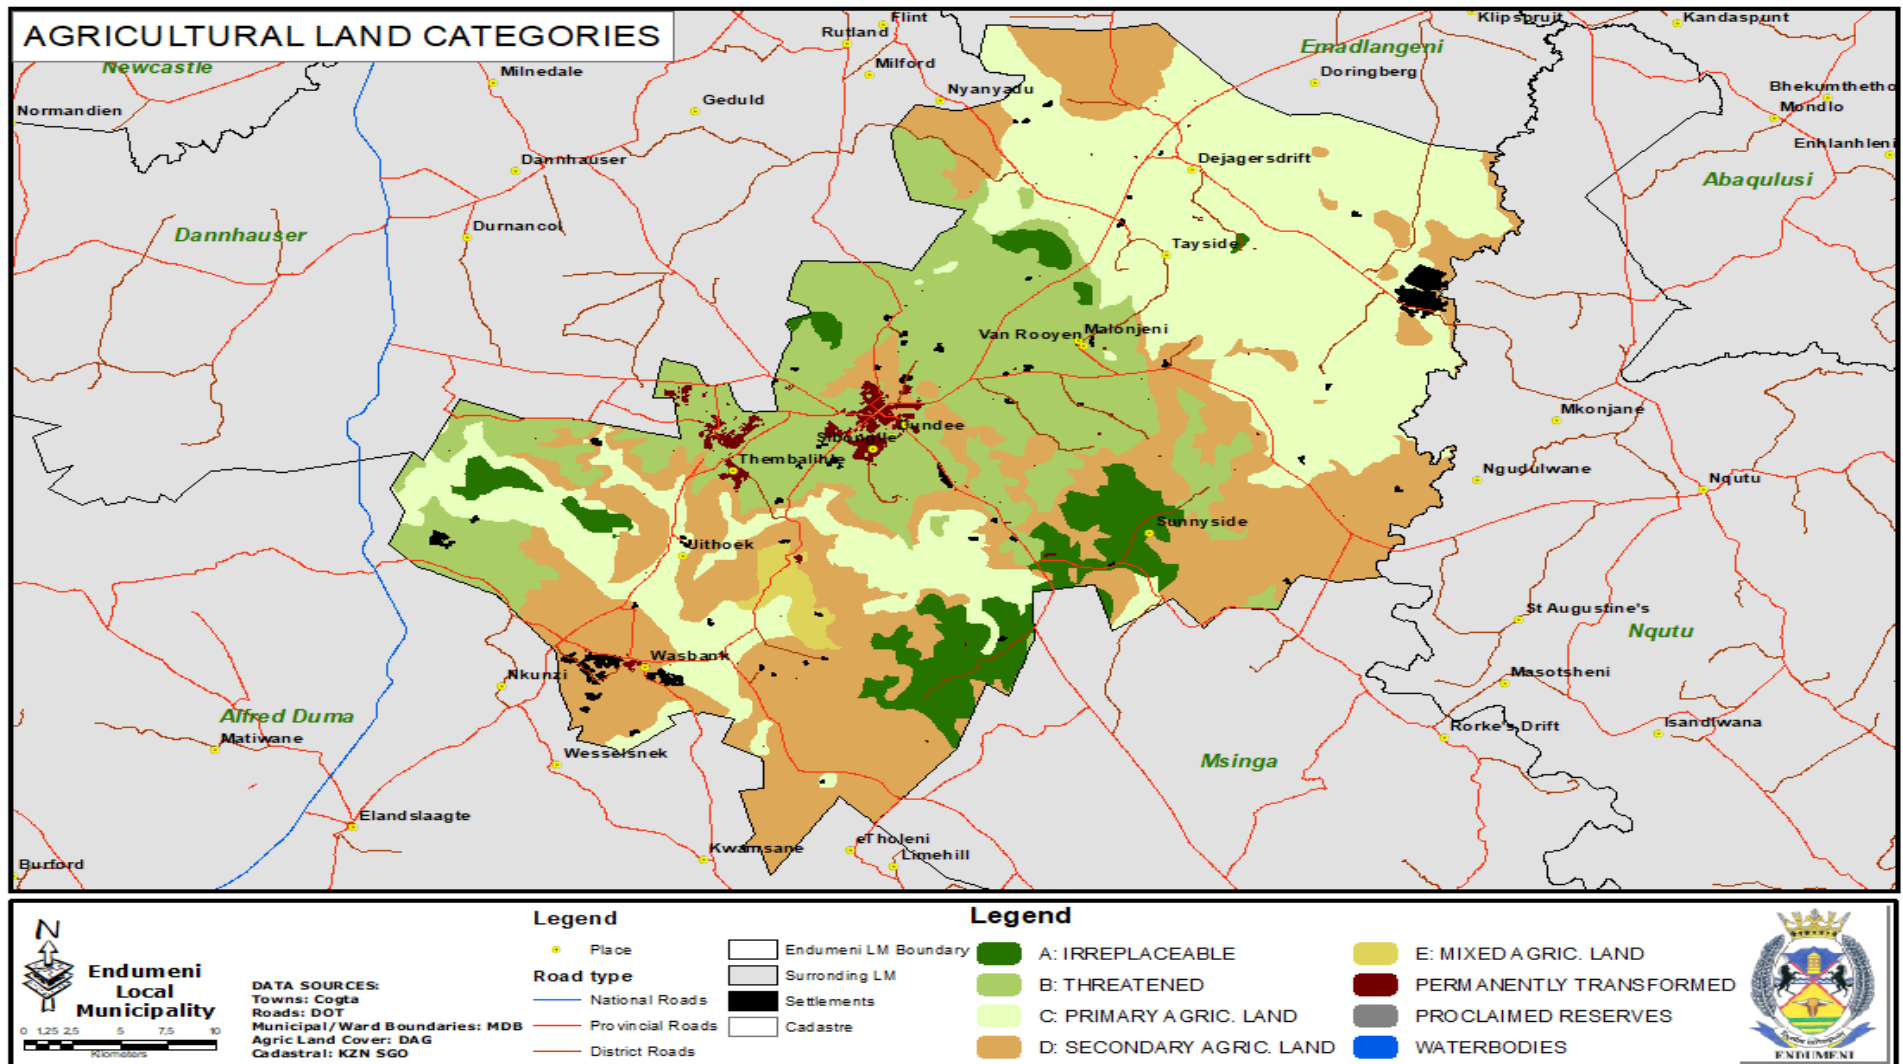

There are only few agricultural households in Endumeni municipality. Evidently, of the 21,134 households in the municipality (in 2016), only 1 654 (which translates to 7.8%) are engaged in agricultural activities. Agricultural Value chain development is a timely intervention given this low number of agricultural households. An interesting dynamic is that of inequality. If we consider that most agricultural households claim not to have any income while an approximately similar number earn between R38000 and R307,000, the inequality gap is wide. This inequality relates to households which engage in subsistence agriculture on one hand, on the other, those which engage in commercial agriculture. Households engaged in subsistence agricultural activities tend to be trapped in low income levels. Historically, these would be black households, with limited capital for agricultural inputs, limited access to markets and limited access to credit facilities. This inequality requires state intervention -perhaps of a Keynesian type (massive investments to jump start growth).

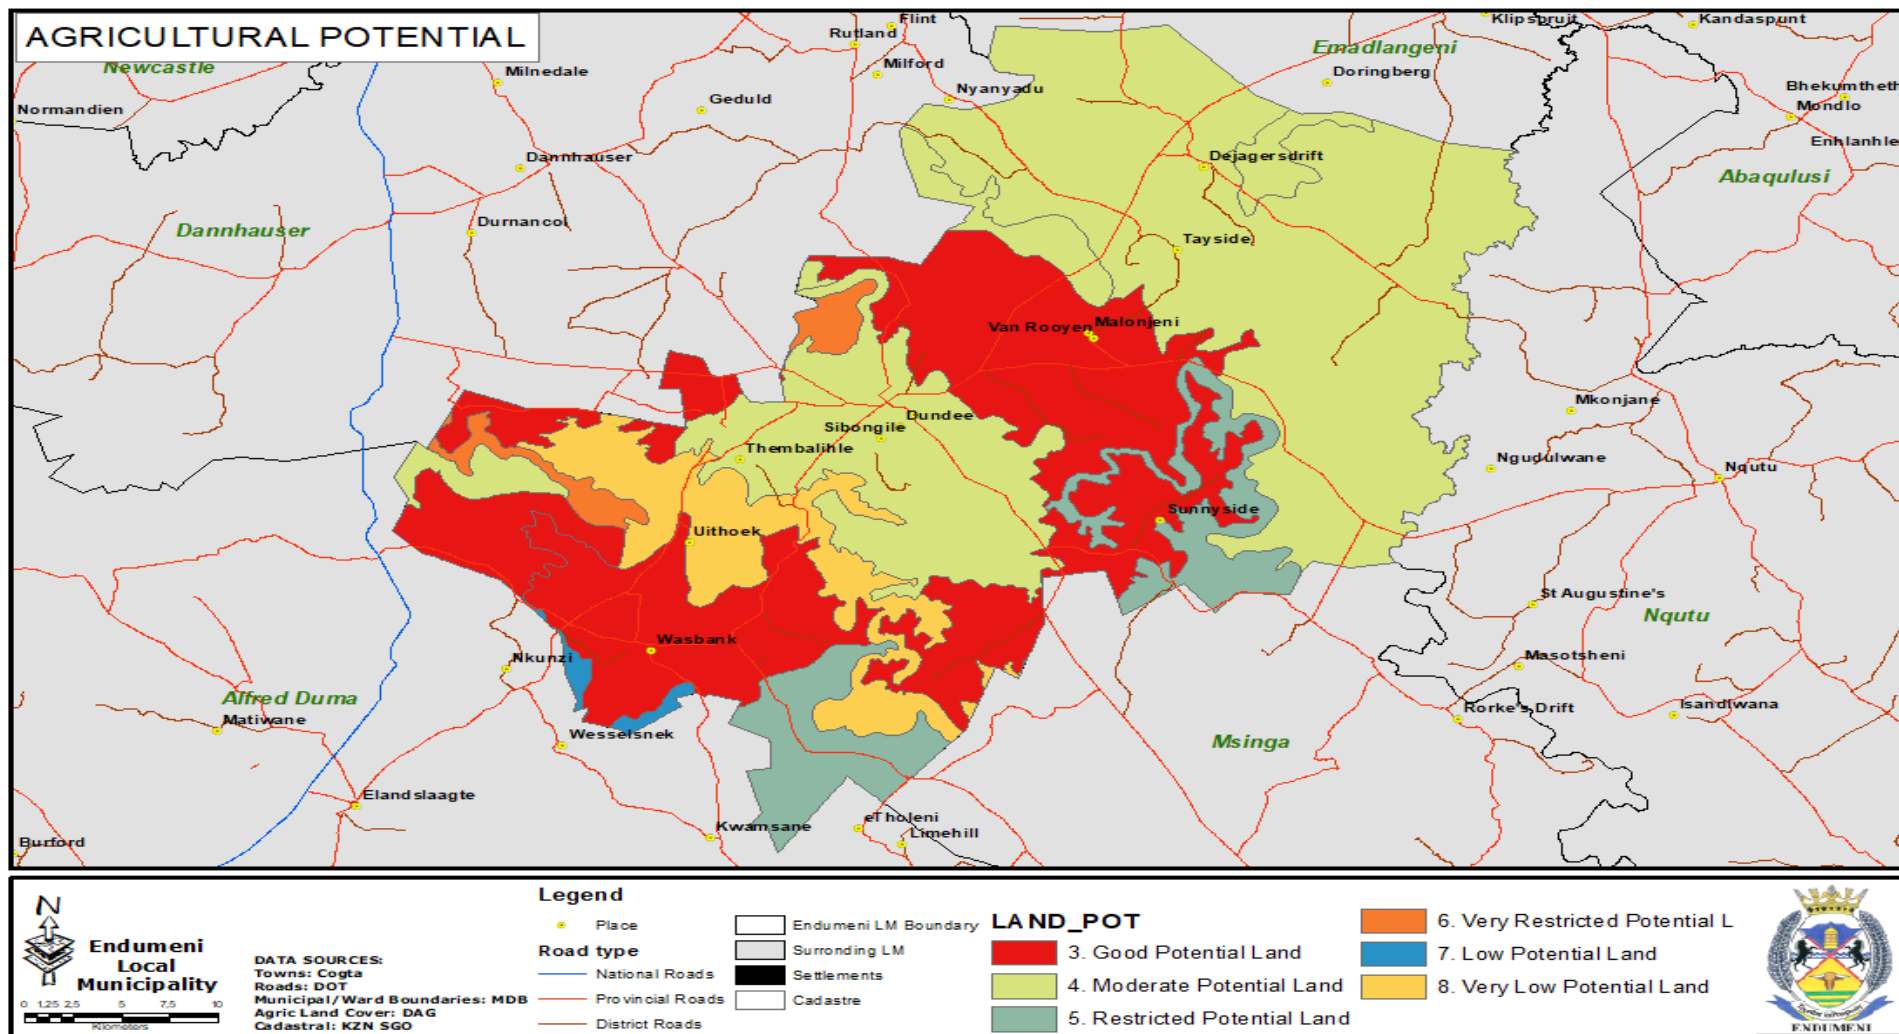

Figure 4: Agricultural Households

Data Source: Statistics South Africa (2016)

Map 51: Agricultural Land Categories

Map 52: Agricultural Potential

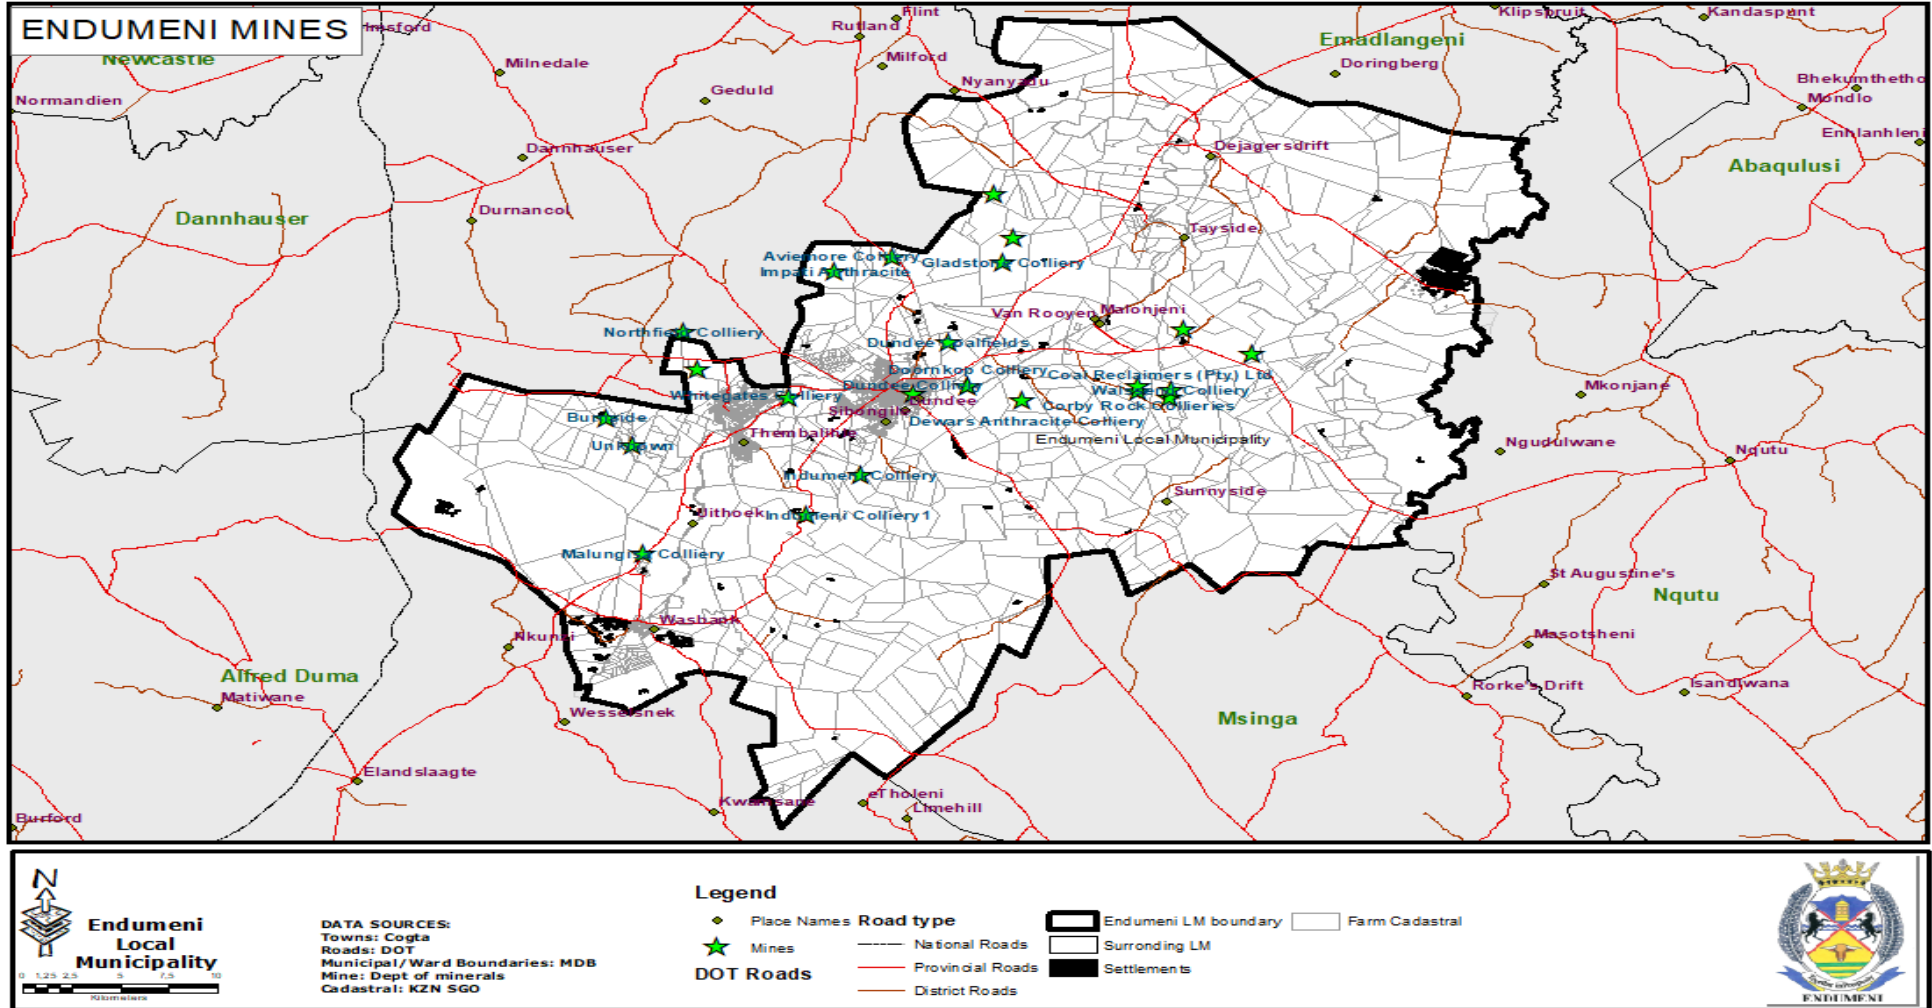

MINING MINERAL OCCURANCES (SLP MANAGEMENT)

There are four are four active mining areas within Endumeni Municipality. These include on the table below :

Mine	Latitude	Longitude	Type
Burnside Colliery	28.18130	30.08810	Coal mine
Northfield Colliery	28.15140	30.12730	Coal mine

Source: <http://en.infodesti.com/ZA/Mines/Endumeni> - 18 April 2017

The mining sector has been up and down since 1996 experiencing a sharp drop in 2002 of 43% of total contribution. Nonetheless since 2002 the sector began picking once again in terms of contribution nut however experiencing small scale regeneration of the coal belt for SMME development which will hopefully revive not only the SMME's economy but also stimulate investor interest, create employ and grow the overall economy. negative growth over this period. The sector's current contribution of approximately 9% towards local economic contribution. According to the municipal IDP 2016/2017 the industry is in the process of restructuring to promote.

Map 53: Endumeni Mines

Table 31: Endumeni Municipality has a very good working relationship with all mining houses within the area of jurisdiction and the following is the list of approved Social Labour Plans (SLP):

Name of Municipality	Mining Houses	SLP - Project	Budget	Duration	Status
Ndumeni Municipality	1. Buffalo Cola Mine	1. Glencoe Sportified	R 6 Million	2019-2023	Construction pending completion by the Municipality
		2. Informal Traders Stalls	R 1.950 Million	2019-2023	Appointed consultant and pending appointment of contractor.
		3. Morningside Crèche	R 2 Million	2019-2023	Inception stage

	2. Afrimat (Sunshine Crushers)	1. Construction of classes for Morningside Intermediate School	R 250 000	2019-2023	Four classes completed and pending 5 more classes.
	3. Corobrick Quarry Mine	Construction of Vukuzenzele Creche at Sibongile Township	R 1 Million	2020-2022	No construction has commenced as yet.
	4. Ultimate Goal	Construction of Ward 1 access roads	Budget to be determined after roads identified.	2021-2026	Roads to be identified

	<p>5. Umsobomvu Coal (Pty) Ltd</p>	<p>Drilling and Installation of 13 Boreholes for Wards 1, 5, 6 & 7 and beneficiary communities are Fankomo, Buyaphile, Enyanyeni, Mome, Dejargs, Drift, Tayside, Vergkop, Mtshilwane, kwaViki, Livangeli, Mpilonde, kwaSheke, & Stratford farm.</p>	<p>Budget to be determined after geology study report.</p>	<p>2020-2022</p>	<p>The project will commence upon mine operation.</p>
--	---	--	---	-------------------------	--

MANUFACTURING AND INDUSTRIES

The manufacturing sector was found to be the fourth largest contributor in the municipality accounting for 14% of the municipal economy with light to medium manufacturing industries. The sector has been growing since 1996 but however declining between 2008 and 2015.

TERTIARY SECTOR

In terms of growth the sectors has had a positive growth from 1996 but experienced a positive decline between the years 2002 and 2008 and further experiencing a negative growth between 2008 and 2015 which may be due to the lack of diversity within this industry. Manufacturing within the municipality is in the form of agro- processing whereby production is directly linked to the agricultural sector which provides inputs. These industries are located within the formal industrial areas of Dundee and Glencoe with some activity related to agro-processing on commercial farms in the area. Within the municipality three major agro-processing activities occur namely dairy processing at the Orange Grove processing plant, maize processing and beef processing inclusive of feedlots and tanneries.

Source: Global Insight, 2016

ELECTRICITY

The electricity sector is the sector with the least contribution within the locality accounting for approximately 3 percent in 2015. In 1996, 2002 and 2008 the sector experienced growth with a growth increase of 0.0028 percent between 1996 and 2002 but however it sharply declined with an observed negative growth rate of 0.0015 percent and a slight increase of negative 0.0002 percent in 2015.

Source: Global Insight, 2016

COMMERCIAL AND BUSINESS SECTOR

The commercial economy of Endumeni mimics that of a small-rural based town. Retail activities dominate, as well as those associated regional administrative activities e.g. government departments. Commercial (retail and office) activities are located within the urban core towns of Dundee and Glencoe. Informal trading occurs in the former township areas and within public nodes in Glencoe and Dundee.

The commercial economy of Endumeni mimics that of a small-rural based town. Retail activities dominate, as well as those associated regional administrative activities e.g. government departments. Commercial (retail and office) activities are located within the urban core towns of Dundee and Glencoe. Informal trading occurs in the former township areas and within public nodes in Glencoe and Dundee. This sector is the third largest contributor to the local economy accounting for approximately 14 percent to the total economy. The sector has been up and down since 1996 with the highest contribution observed in 2002 but however in terms of growth that year experienced negative growth. Since then, the economy has been experiencing positive marginal growth of 0.0026 in 2008 and 0.0028 in 2015.

The trade sector is the second largest contributor to the municipality's regional GVA accounting for approximately 15 percent in 2015. This sector has been growing in terms of total contribution from 1996 although experiencing a negative growth rate between 2002 and 2008 and then rising again between 2008 and 2015 with a growth rate of approximately 0.0005. The decline in employment opportunities in the formal economy over the last decade has seen a growth in the informal sector within the municipality. Consequently, the municipality is in the process of developing policies for the informal sector to guide the empowerment of upcoming local

entrepreneurs accessing the informal economy.

Source: Global Insight, 2016

CONSTRUCTION

The construction sector is one of the sectors with potential for growth in the municipality contributing approximately 4.5 percent towards the local economy. This is evident from the figure above showing the sectors increase in contribution and growth, since 2002 the construction sector has been on the rise moving from a negative growth to a growth of 0.0005 in 2015.

Source: Global Insight, 2016

COMMUNITY SERVICES

The social services sector is the dominant sector of the municipality contributing a staggering 26 percent towards the local economy in 2015. This sector has been growing in terms of total contribution from 1996 although experiencing a negative growth rate between 1996 and 2002 positive growth is observed from the period between 2002 and 2008 and the period between 2008 and 2015 with a growth rate of approximately 0.0009 and 0.0011 respectively. This suggests that this sector is of great significance in terms of further growing the economy. This positive growth can be attributed to the activities mainly centred in Dundee and Glencoe.

TRANSPORT

The transport sector along with the mining sector are the fifth major sectors in terms of contribution accounting for approximately 9 percent to the total economy. Its contribution has been on the rise since 1996 and has more than doubled in 2015, from contributing just over a hundred million in 1996 to approximately two hundred and eighty million in 2015. In 2002, its growth shot from 0.0011 percent in 1996 to 0.0031 in 2002 and further declined 0.0017 in 2008 and 0.0014 in 2015.

At constant 2010 prices R'000

INFORMAL TRADE

The decline in employment opportunities in the formal economy over the last decade has seen a growth in the informal sector within the municipality. Consequently, the municipality has developed the informal Economy Development & Support Policy Framework in order to guide the empowerment of upcoming local entrepreneurs accessing the informal economy. Endumeni final Informal Economy policy states that there has been an increase in the number of informal traders within the municipality as a result of job losses suggesting that this is indicative of its significant in employment creation. This form of business activity is increasing because of its flexible working hours as well as the opportunity it provides for additional income generation for the poor.

The policy identifies numerous types of informal trading present within the municipality, including: Street / Curbside trading; trading at transport interchanges; trading in Public Open Spaces; mobile Traders (roving, bakkies and containers); intersection Trading; special events;

car washers; hairdressers; livestock trading; woodworks; clothing and textile manufactures; motor mechanics; electrical and electronics services; catering services; and other. This sector has great potential to grow the local economy if harnessed well. For more details the reader is encouraged to access the final adopted Informal Economy Policy in order to have a comprehensive picture about the strategic approach to supporting this important sector of the local economy. The value added of the informal sector in Dundee and Glencoe was estimated at approximately one billion rand while Endumeni was estimated at four hundred and seventy million.

TOURISM SERVICES

The tourism sector within the municipality contributes significantly to the local economy and is dominated by cultural tourism boosted by the Anglo-Zulu and Anglo-Boer war battlefields located in Dundee. Glencoe serves as a secondary centre to Dundee in terms of tourism having cultural assets such as Monuments and Museums (e.g. Talana Museum), Maria Ratschitz Mission, Battlefield sites (Talana and Lennox Hills), Other Cultural sites (i.e. Talana Crafts, Talana Zulu Cultural Village, Iron Age smelting sites) and the Rifleman's Road and Red Soldier's March Battlefield Routes. The municipality is abundantly endowed with exceptional tourism, pleasant climatic conditions, cultural diversity and good infrastructure. These already established tourism services create a competitive tourism destination with a great growth prospect.

LEVERAGE PRIVATE SECTOR FUNDING RESOURCES

The Endumeni Local Municipality wants to embark on a retail sector study for the Dundee and Glencoe Towns. It is noted that according to Census Statistics for the Dundee and Glencoe Area, unemployment levels are extremely high. Therefore, the establishment of a shopping mall within the area will not only create several employment opportunities, but will also impact positively both financially and socially on the local residents. It is envisaged that the development of a retail facility could underpin the emergence of a strong, local economy. At present there is no large scale shopping mall in the Dundee and Glencoe Area. This situation forces most residents to travel towards Newcastle which results in residents paying high transport fees in addition to the movement of goods and capital to outside areas. It is envisaged that with new development in place, the residents of Dundee and its surrounds will now be able to frequent an establishment that is much more accessible. This in turn will promote the locking of resources within the area which will create conditions for a better standard of living.

The aim is to establish a shopping mall. The proposed above-mentioned project cycle could be initiated with the drafting of a Retail Sector Study for the Dundee, Glencoe Area. This entails the study of disposable income in the Dundee Glencoe Area, the result of which will be an understanding of the spending patterns; and the question of supply and demand within Dundee and Glencoe. This information is important in terms of understanding the critical mass that is required to support the Retail Centre and other such commercial entities. The end product of the Retail Sector Study would then be the development of a Shopping Framework. This would thus allow the Municipality to attract both developers and investors to the area as it would help create an environment of certainty whereby decisions would be based on facts and figures.

MONITORING & EVALUATION PLAN FOR LED

In the 2017/18 MEC comments the municipality was requested to fast-track the development of the Investment Retention Policy, Identify the key economic players, develop the Municipal Safety Plan, to identify to what extent the job creation methods is attempting to tackle the existing number.

This is in progress and a Comprehensive Project matrix for all the LED programmes and projects within the municipal area is being developed and will be presented regularly in the revived LED Forum for monitoring purposes. In addition, all the prioritized interventions implemented by the Municipality have all been incorporated in the 2018/2019 SDIBIP and will be incorporated in the subsequent SDIBIPs which is monitored regularly as part of the Municipality's PMS Policy Framework.

LED CONSTRAINTS AND CHALLENGES

The LED Unit of the municipality is functional but under resourced. The municipality has appointed both LED officer and Tourism Officer Positions that were prioritized in the 2017/18 financial year and no longer utilizing Sabalala Consultants for technical support. The LED unit consists of the LED manager, LED officer and Tourism Officer. It is a work in progress and more positions are needed for this unit in order for effective implementation of the LED strategy and the LED Budget must be prioritised each year.

5.1.5 EASE OF DOING BUSINESS/ RED TAPE REDUCTION

1. Definition of Red Tape

Red tape refers to rules, regulations, and/or bureaucratic procedures and processes which are excessively complex. They impose unnecessary delays, inaction and/or costs which exceed their benefits, and/or is no longer effective in achieving the purpose for which they were

originally created. The results of red tape include undesirable economic, business and/or social impacts or outcomes because of negatively impacting on productivity. This also involves excessive, or unevenly enforced, regulation or rigid conformity to formal rules that is considered redundant or bureaucratic and hinders or prevents effective action or decision-making (National Red Tape Reduction Guidelines, DTI, 2013).

Red Tape in Municipalities spans across a spectrum of activities and processes which impact on big, medium and small businesses. The role of municipalities is to create an enabling environment within which development can occur. In doing so, there are many legislative requirements, policies and frameworks which dictate and/or provide guidance to their responsibilities. Whilst regulation and procedures are necessary, they can sometimes become encumbrances in achieving the goals and objectives for which they have been formulated.

Small, Medium and Micro Enterprises (SMMEs) receive special attention in the South African public policy. However, despite their extensive contribution to the national Gross Domestic Product (GDP), they are faced with burdensome circumstances. SMMEs are one of the key drivers of economic growth, innovation and have proved to be major contributors to job creation. The Department of Cooperatives Governance and Traditional Affairs has assisted the Municipality with the development of action plan to address redtop issues within the municipality.

2. Red Tape Indicators

Red Tape affects the operation of businesses and the regulations, rules and procedures that are regulate the business operation create undesirable consequences on business, the economy and individuals when not properly implemented. There are three main types of red tape in any given problem as illustrated below:

- Inefficient procedures as a result of administrative management
- Inefficiencies in communication and information exchange
- Rules that have unintended consequences, or fail to properly address problems

Therefore, Endumeni Municipality through EDTEA has provided training of stakeholders in the Online Business License Applications and approval thereof. Moreover, the system has not been working hence the recap or refresh workshop will need to be done in order to ensure user friendliness of the system to both government officials and the business community. The municipality is currently reviewing the LED Strategy and the implementation plan for all indicators will be thoroughly outlined in the new LED Strategy.

5.1.6 FUNDING AND IMPLEMENTATION

As part of the LED Strategy which was developed by the municipality and adopted during the 2018/19 financial year, the municipality then prepared the implementation plan which will serve as an implementation, monitoring, evaluation and report tool of the key programmes and projects identified in the LED Strategy. Undoubtedly, the size of the municipal budget might not be allowing any significant implementation of many high impact investment projects. Nevertheless, the packaging of strategically and economically significant initiatives will serve as a catalyst in driving the economic emancipation of the municipality.

In the Local Economic Development Strategy, the municipality has considered various strategic thrust as appropriate measures towards bringing desired economic change. To this end, it would surely be impractical to implement all strategic pillars and their key action areas given the limitedness of resources. Nevertheless, the key priority strategic pillars for implementation are as follows:

- (i) Strengthening of Institutional Arrangements
- (ii) Agricultural beneficiation and Diversification
- (iii) Improved Physical Infrastructure Development for Economic Growth
- (iv) Business Development and Investment Promotion
- (v) Skills Development and Training

By 2030, South Africa's rural communities should have greater opportunities to participate fully in the economic, social and political life of the country. People should be able to access high – quality basic services that enable them to be well- nourished, healthy and increasingly skilled. Rural economies will be supported by **agriculture**, and where possible by **mining, tourism, agro-processing and fisheries**.

The driving force behind this will be expansion of irrigated agriculture, supplemented by dry-land production where feasible. In areas with low economic potential, quality education, health care, basic services and social security will support the development of human capital. In areas with some economic potential, non – agricultural activities (such as agro–industry, tourism, small enterprises or fisheries) will boost development.

The details of the above Strategic Pillars are as follows:

1. Institutional Arrangements

The main objectives of this pillar are to:

- To formalise stakeholder engagements thereby allow them to find common economic ground for Endumeni;

- To extend the area of responsibility to all people with vested interest of growing Endumeni to be a home for all races and address collaboratively all existing social ills; and
- To understand the scope of planned economic initiatives beyond the public sector or government driven initiatives.

On the 17 March 2020, the municipality in partnership with the Department of Economic Development, Tourism and Environmental Affairs, and Trade and Investment KwaZulu Natal, organised a Business Breakfast with the prominent and emerging business community of Endumeni Municipality laity. On the main, the aim of the breakfast was to to bring the Public and Private sector together, with the intention of forming a partnership with the primary objective being to build up trust and develop common goals and strategies between the municipality and local businesses,

The session also served to identify key strategic issues which can be partnered on thereby creating a conducive environment for investment. At the end of the session, five members were nominated to engage with the municipality with the intention of forming Endumeni Business Chamber.

2. Agricultural Focus Area

As the primary economic activity in rural areas, agriculture is the focus of this action plan. In the main, Endumeni together with affected stakeholders need to:

- Expand irrigated agriculture, through the better use of existing water resources and developing new water schemes;
- Convert some under-utilised land in communal areas and land reform projects into commercial production;
- Pick and support commercial agriculture sector participants that have the highest potential for growth and employment;
- Support job creation in the upstream and downstream industries. Potential employment will come from the growth in output resulting from the first three strategies;
- Find creative combinations between opportunities. For example, emphasis on land could benefit from irrigation infrastructure; give priority to successful farmers in communal areas; and support industries and areas with high potential to create jobs, all these will increase collaboration between existing farmers and beneficiaries of land reform; and
- Develop strategies that give new entrants access to product value-chains and support from better-resourced players.

3. Importance of Economic Infrastructure Development

The infrastructure is important for faster economic growth and alleviation of poverty in the country. The adequate infrastructure in the form of road and railway transport system, ports, power, airports and their efficient working is also needed for integration of the Endumeni economy with other economies of the world.

It needs to be emphasized that good quality infrastructure is important not only for faster economic growth but also to ensure inclusive growth. By inclusive growth we mean that benefits of growth are shared by the majority of the people of a country. Thus, the inclusive growth will lead to the alleviation of poverty and reduction in income inequality in the country.

For example, micro, small and medium enterprises (MSME) are dispersed throughout the economy and production by them and their growth require access to quality and reliable infrastructure services to compete efficiently with large-scale enterprises which can often build some of their own infrastructure such as installing their own small power plants or generators. Besides, large-scale firms can even locate themselves near ports and near transport hubs where required infrastructure is available.

Small enterprises, on the other hand, are dispersed widely in the economy and have to rely on the availability of the general infrastructure facilities. Thus, by building up general infrastructure facilities helps the small enterprises to compete successfully with large-scale industries and being labor-intensive generate large employment opportunities for the workers. This will help to alleviate the poverty in developing countries.

The expansion in infrastructure facilities such as irrigation, rural electrification, roads and road transport will promote agricultural growth and setting up of agro-processing industries. These general infrastructure facilities will help farmers and owners of processing industries to get their requirements of raw materials, fertilizers and other inputs at cheap rate and also help them to bring their products to the markets which are located in big towns and cities.

Thus, according to Thirlwall, "For poor farmers improved infrastructure will reduce their input cost and increase agricultural production and reduce traders' monopoly by improving their access to markets. Nearly two-thirds of African farmers are cut off from national and world markets, because of poor infrastructure and market access. Better transport means greater access to public resources including schools, hospitals and other health facilities".

It follows from above that the expansion of infrastructure facilities will ensure sustained growth of employment in agriculture and small-scale rural industries and bring prosperity in the rural areas and in this way ensure inclusive growth. Besides, this will also help to prevent the mass exodus of the rural people to urban areas where they cause problems of urban congestion, growth of slums and acute housing shortage.

The above overview suggests that, the focus on infrastructure development will serve as a catalyst for future investments thereby expedites growth and development of the area.

4. Business Development and Investment Promotion

The government economic strategy advocates for the provision of “business support environment”. Thus, the Municipality understands that local economic development is a product of public policy through which government encourages the growth of the private sector, through seeking to create an enabling environment which encourages entrepreneurs and investors to build new businesses in particular territories.

To this end, the Municipality will delve on a plan to:

- Develop an investment strategy as well as developing an investment profile that seeks to promote the Municipal investment opportunities. The aim of this is to attract and encourage new investment into the Municipality area of jurisdiction;
- Design and develop business retention programme that will tighten the bond between business and Endumeni Economic Partnership; and
- Design and develop a business incubation programme to actively support SMMEs to seek out and explore opportunities that focus on growth through innovation, organisational development, market development, strategy development, investment and business improvement

5. Skills Development and Training

The aim of this pillar is to engage with training institutions in Endumeni to serve as a focal point to equip Endumeni labour force and thereby drive economic growth. Institutions such as Amajuba FET and Asikhule Youth Development will be engaged to develop training and educational content which will meet the skills requirement as demanded by the key sectors within Endumeni.

5.1.7 POTENTIAL EMPLOYMENT/ JOB CREATION

Table 32: EPWP Phase 4

3. Project Monitoring and Reporting

In order to achieve coordinated development in Endumeni, the LED / Tourism Unit will assist with monitoring of progress on implementation of certain private sector and public sector owned initiatives.

b) The development agency

1.1. The 2020 Strategic Planning of the Development Agency

Vision

UMzinyathi District, an inclusive, growing and wealthy economic territory.

UMzinyathi district shall be an investor destination with sustainable vibrant economy based on active economic sectors, world-class economic infrastructure and inclusive participation to provide socioeconomic benefits to the capacitated local people.

Mission statement

UMzinyathi Development Agency exists to be an economic transformation and development governance hub that promotes sustainable employment creation through agriculture, tourism,

manufacturing and mining, prioritizing human and business development for the benefit of UMzinyathi district people.

Our values

- People centered
- Integrity
- Professionalism
- Accountability
- Innovation

Our strategic pillars

Economic sector development 2. Infrastructure development 3. Socio-economic development and transformation 4. Governance, management and investment attraction.

2. Strategic goals and objectives

Our strategic goals

Development, promotion and revitalization of active economic sectors.

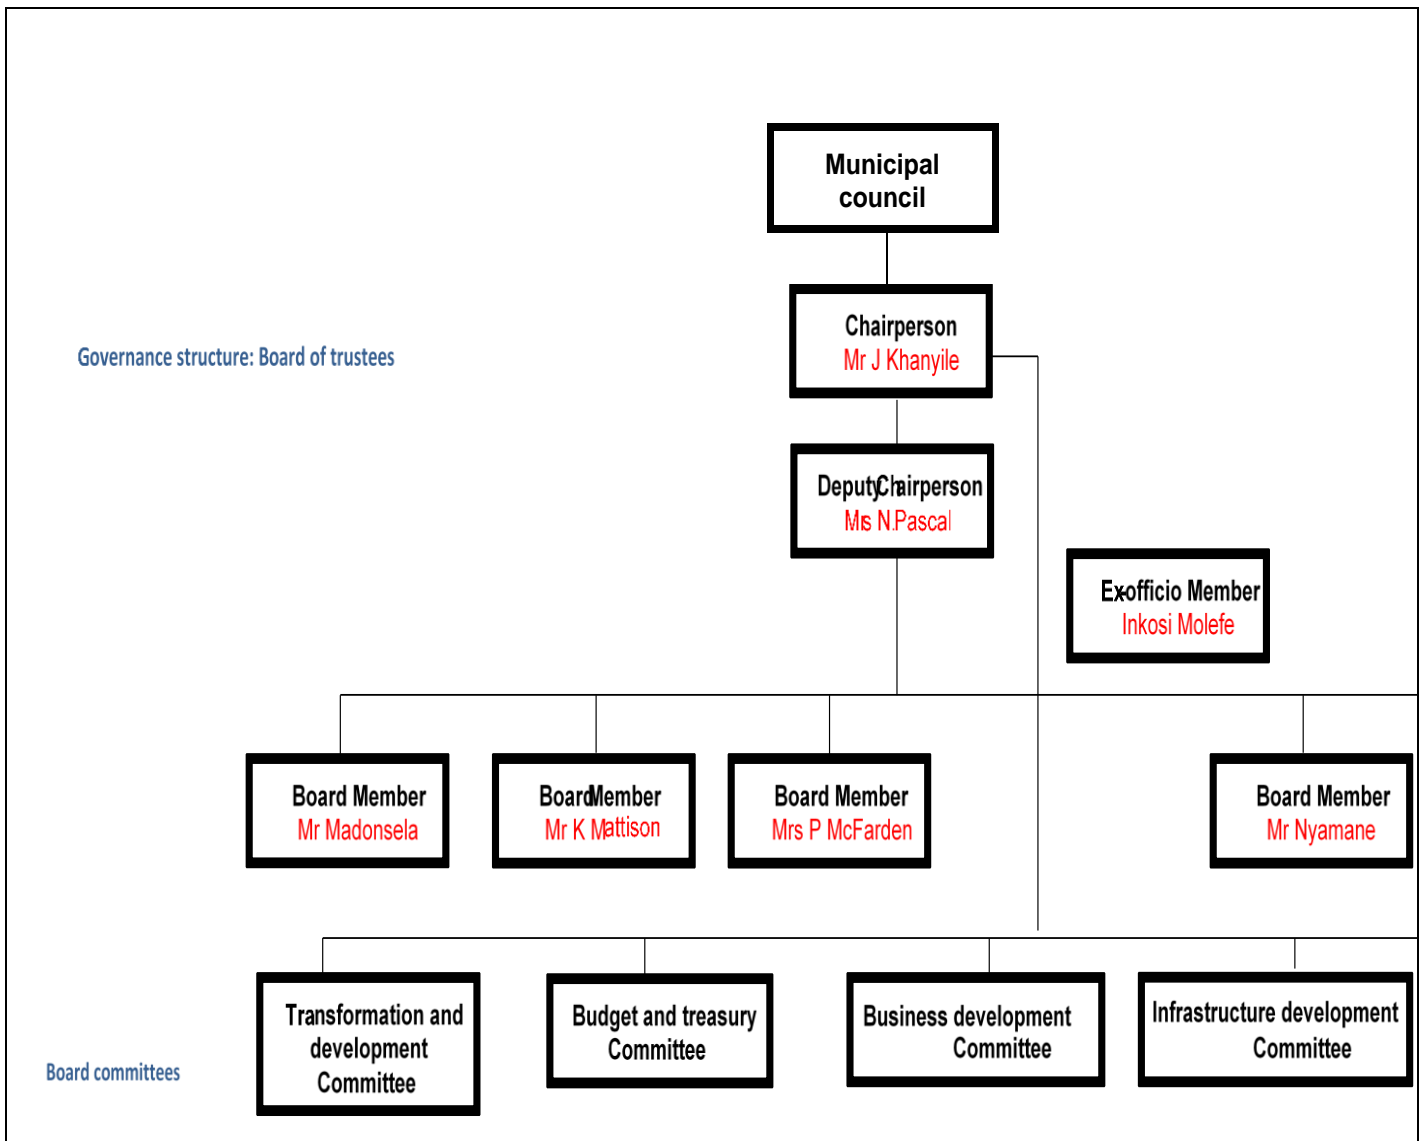

- ✓ Demand driven and equally distributed infrastructure and services.
- ✓ Promotion of socio-economic transformation within active economic sectors.
- ✓ Promotion of self-sufficient economic development.

3. Strategic objectives

- Unleashing the district agricultural potential.
- Expansion and diversification of the manufacturing activities.
- Revitalization and support for districts mining activities.
- Development, support and promotion of the district as a tourist destination.
- Promotion and practice of green economy.
- Improve the provision of infrastructure development and services.
- Facilitate and provide the development and capacitation of role players and beneficiaries of economic development.
- Improve social development and seizure of economic opportunities by the majority people of the district.
- Institute inclusive, viable, transparent and accountable governance and management practices.
- Promotion of the district as an investor destination

4. Measurable objectives

1. Improvement of coordination between all parties critical to agricultural development
2. Commodity development
3. Improve the food and drink value chain
4. Practice conservation agriculture
5. Promote inclusive participation within the agricultural sector.
6. Prioritise manufacturing sector policy and planning.
7. Create and conducive environment for SMME participation within the manufacturing sector.
8. Create a conducive environment for business retention and expansion within the manufacturing sector
9. Revive and resuscitate mining the district mining activities
10. Promote inclusive participation within the sector.
11. Promote the expansion of the tourism attractions and activities
12. Ensure information dissemination, marketing and promotion
13. Facilitate provision of tourism specific infrastructure upgrades
14. Support the development of the green economy sector
15. Resume project management role for strategic infrastructure and service projects
16. Advocate for infrastructure development achieve economic development
17. Facilitation of human development for the local people
18. Facilitate the creation of business opportunities for seizure by local people
19. Uphold participative partnership and governance structures.
20. Uphold transparent and accountable management system.
21. Maintain an efficient, adequate and sustainable financing system.
22. Promote investment and mobilise project funding

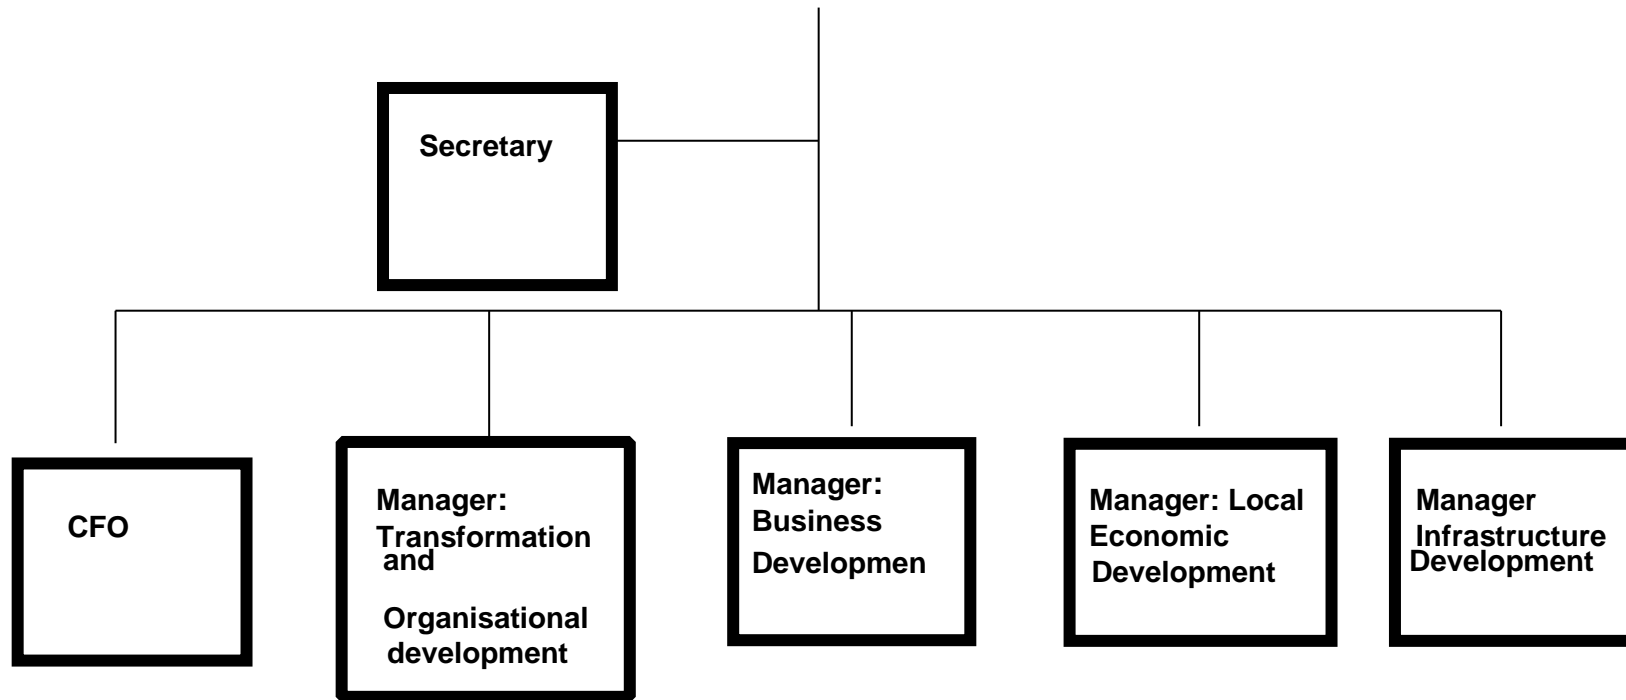

Agency management

Table 34: Strategic function identification and allocation

Key Performance Area	Goals	Incumbent	Strategic objectives	Incumbent
1. Economic sector development	1.1 Development, promotion and revitalization of active economic sectors.	Manager: Economic Development	1.1.1 Unleashing the district agricultural potential.	Agricultural development officer
			1.1.2 Expansion and diversification of the manufacturing activities.	SMME / Development Finance officer
			1.1.4 Development, support and promotion of the district as a tourist destination.	Tourism development officer
			1.1.5 Promotion and practice of green economy	Agricultural development Officer
2. Infrastructure development	2.1 Demand driven and equally distributed infrastructure and services	Manager: Infrastructure development	2.1.1 Improve the provision of infrastructure development and services	Regional planner Civil engineers

			4.1.1.3 Maintain an efficient, adequate and sustainable financing system.	4.1.1.3.1 Mobilize funding for agency operations				All departments
				4.1.1.3.2 Mobilize funding for project financing				All Departments
				4.1.1.3.3 Provide professional services to raise funds	Manage implementation of UMzinyathi water projects			Infrastructure development Department

			4.1.1.3.4 Invest in viable commercial projects					Business development Department and Budget and treasury department
	4.1.2 Promotion of the district as an investor destination	4.1.2.1 Promote investment and mobilise project funding	4.1.2.1.1 Conduct feasibility studies and business plans for funding mobilization purposes					Business development Department and Budget and treasury department
			4.1.2.1.2 Encourage domestic and foreign direct investments					Business Development department

UMzinyathi DEVELOPMENT AGENCY support

Endumeni Municipality has a very good relationship with Umzinyathi District Development Agency and both parties have signed the Service Level Agreement (SLA) on the 29th January 2021 which then reaffirms the working relationship. The parties agree to undertake a joint planning exercise on Economic Development Framework of the area thereby allow the parties to identify catalytic initiatives that will call for strategic investments into the area. As part of the SLA, Umzinyathi District Development Agency commits to provide a rand-to-rand funding on planning phases of strategic initiatives with potential impact to turn around the economy.

5.2 SOCIAL DEVELOPMENT

5.2.1 SOCIAL DEVELOPMENT ANALYSIS BRAOD BASED COMMUNITY NEED

In the 2019/20 MEC comments, the municipality was advised to give attention to the analysis of the social development challenges and identify three social developmental priorities per ward demonstrating an understanding of participatory planning methodologies. The municipality has undergone an extensive community-based planning in all seven (7) wards.

The 7 wards then generated the following priorities per ward:

Table 41: WARD 1

NO.	OBJECTIVE	PROJECT NAME	LOCATION	WHO WILL BENEFIT	HOW MANY WILL BENEFIT	TIMEFRAME
1	Maintenance (roads, grounds, Access Roads (kwa Herodi Road)	General Maintenance	Whole ward	Ward	100%	2019- 2027
2	Provision of services (water, sanitation and electricity)	Service Delivery	Rural areas of the ward	Ward	100%	2019-2027
3	Training of SMMEs	Local Economic Development	Whole Ward	Ward	100%	2019-2027
4.	EPW jobs Buffalo Coal Mine Funding Access Roads School Buses	Local Economic Development	Whole Ward	Ward	100%	2019-2027
5.	School Buses	Transport	Whole ward	Ward	100%	2019-2027

6.	To use community Hall for Clinic Youth NGO support					2019-2027
----	--	--	--	--	--	-----------

WARD 2

- ✚ Ensure safety of the community through maintenance of streams, houses, drainage system Implement skills development programme
- ✚ Creation of Job opportunities
- ✚ Establishment of Early Childhood development Refurbishment of Sport Grounds
- ✚ Building of a hall Reduction of Taverns
- ✚ IDP Road Shows
- ✚ Rates rebates for businesses Classification of races
- ✚ Bursary budget to be increased Support FET (TVET)

Table 42: Ward2

NO	OBJECTIVE	PROJECT NAME	LOCATION	WHO WILL BENEFIT	HOW MANY WILL BENEFIT	TIMEFRAME
1	To ensure health and safety of the community through maintenance of infrastructure	Clearing of sewerage	France	Community Children Youth	40% of the Ward	Three (3) Months – On going
2		Reduce widening stream	France	School going children Community that crosses	50%	2years
3		Construction of roads and humps	Ext. 18	Community Children	100%	3years

WARD 3

- ✚ Employment
- ✚ Eradicate poverty and crime
- ✚ Develop rehabilitation Centre and dilapidated buildings War room to be functional and maintained
- ✚ Sport and Recreational facilities

- ✚ Construction of infrastructure in rural areas e.g. roads Skills development
- ✚ Town old age home Stream maintenance Hostel renovations Solar gyzers
- ✚ Disaster reduction activities

Table 43: Ward3

NO	OBJECTIVE	PROJECT NAME	LOCATION	WHO WILL BENEFIT	HOW MANY WILL BENEFIT	TIMEFRAME

2	Construction of infrastructure in rural communities	Infrastructure development	Rural areas the ward	Youth		2019-203
3	LED programme	Local Economic Development	Whole ward	Youth Community Businesses	100%	2019-202

5.2.2 EDUCATION SECTOR

The educational facilities seem to be fairly spread amongst different parts of the municipal area. Although there are a number of schools in the municipal area, it does not indicate that the condition of those education facilities is up to standard. There are overall 52 schools within the Endumeni LM (30 Primary, 8 Secondary and 18 Combined). The KwaZulu-Natal Draft Norms and Standards suggests that primary schools should be accessible within 1,5km while secondary schools are within a 2km traveling distance. The population catchment threshold differs on the basis on the density requirements whereby the lowest density settlements can be provided with a Micro Primary School for every 60 households while the population catchment which warrants the small Secondary School is 200 households.

What becomes evident from the application of this requirement is that some of the settlements do not have access to schools within the required distance. However, there are areas of the municipality, particularly in the north-west where there are limited primary school facilities. All secondary educational facilities are located within the urban core of Glencoe and Dundee. Small parts of Endumeni do not conform to the 5km service radius of facilities. The location of educational facilities occurs on access corridors (roads).

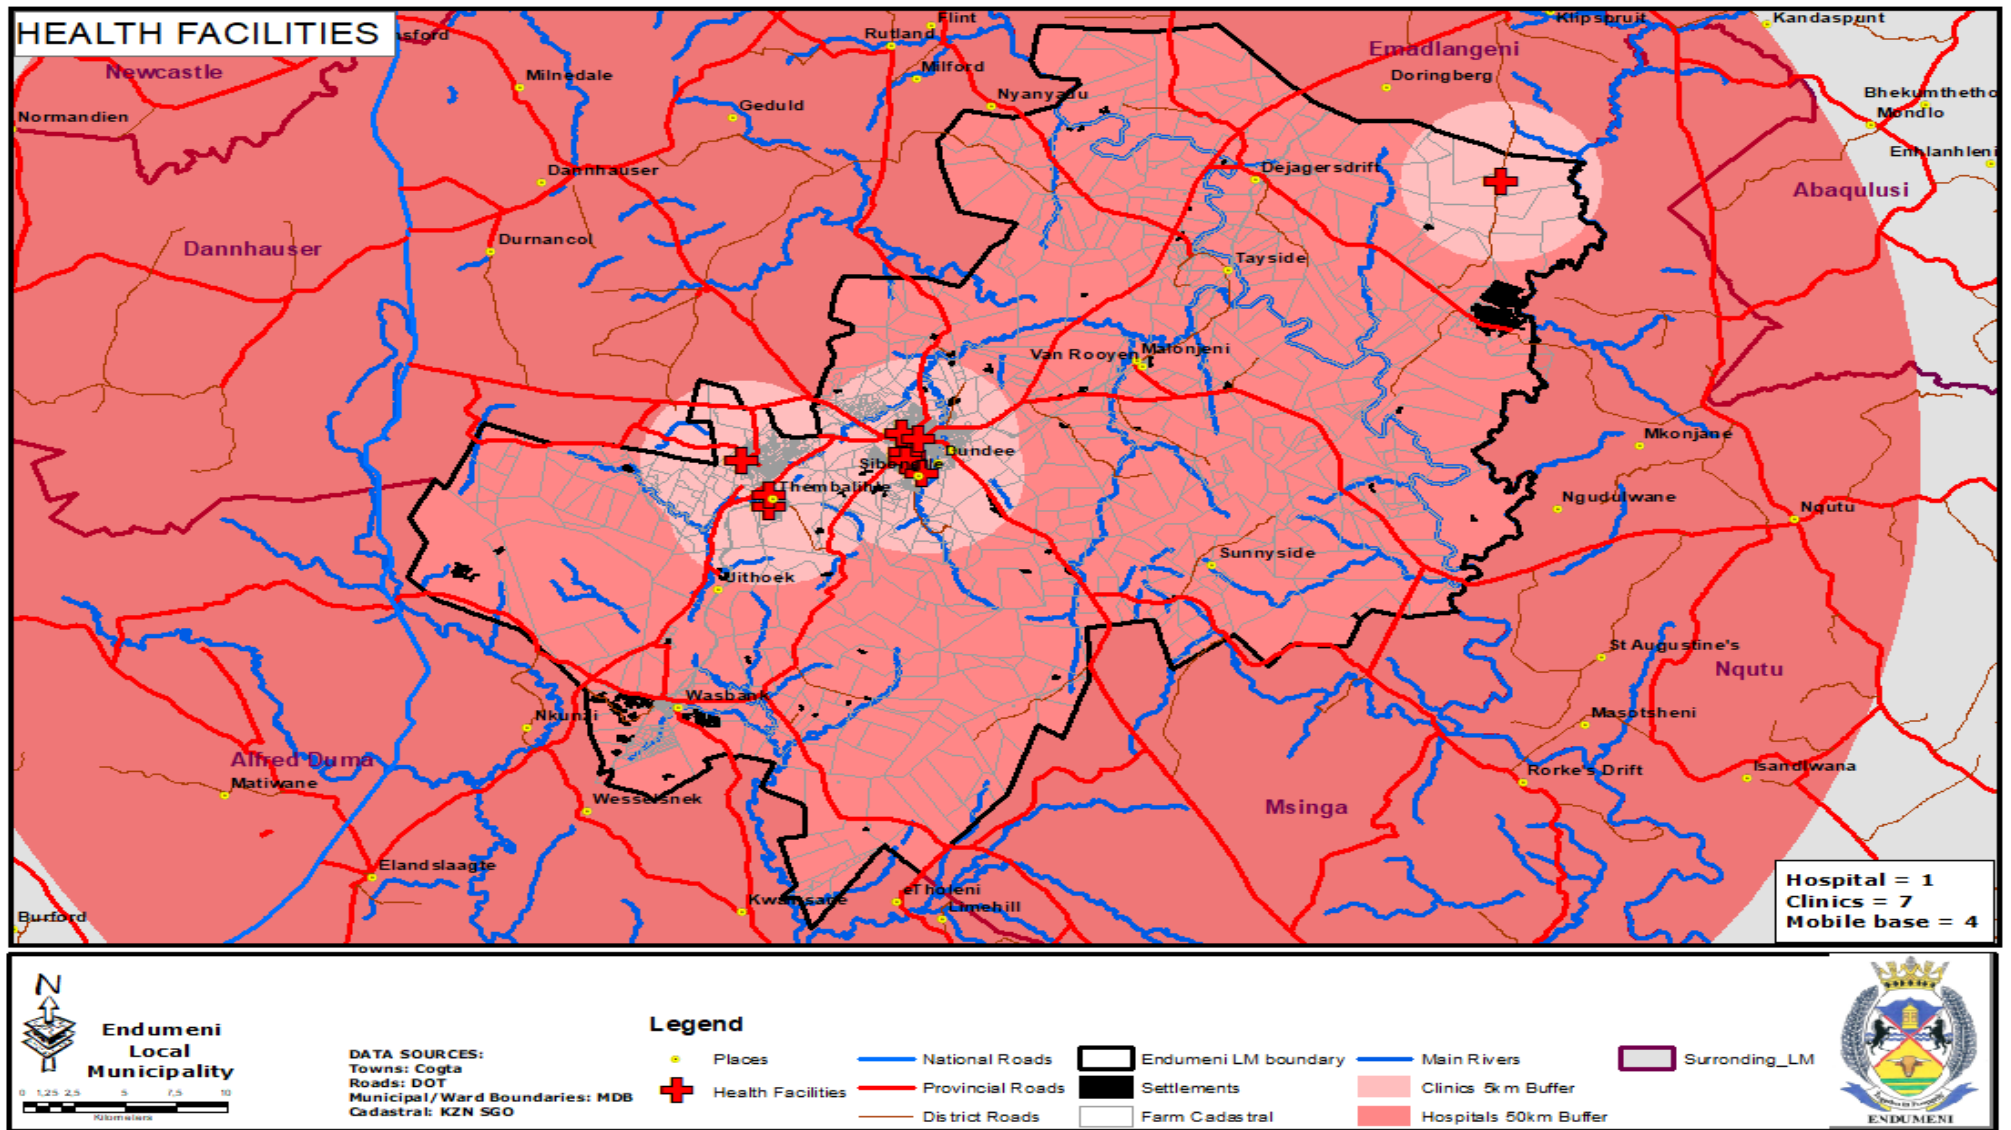

The challenge, with this number of facilities, will be the maintenance, upgrading and quality of these facilities. Depending on the topography, and natural features such as rivers (which negate access to facilities) accessibility might also pose challenges to the community

Map 54: Educational facilities

5.2.3 HEALTH SECTOR

There are nine (9) health facilities within Dundee which includes seven clinics, one public hospital and one private hospital. The standards for the provision of Health Facilities are sourced from the KZN Provincial Publication "Guidelines for Planning of Facilities in KwaZulu-Natal". The KZN Department of Health has also developed the Norms and Standards for the provision of health facilities. According to the Norms and Standards a clinic should be provided within a catchment of 5000 people within a range of 5km. The municipality obviously does not conform to these standards given that there are areas such as Wasbank which are not provided with the health facilities within close proximity. Facilities are clustered within the urban core of Dundee and Glencoe. Facilities are required in the rural and satellite nodes, particularly in the north-west of the Municipality. Endumeni is serviced by only one public hospital located In Dundee.

Map 55: Health Facilities

5.2.4 SAFETY AND SECURITY

There are three (3) police stations within Endumeni Municipality. These are located within the urban centres of Dundee, Glencoe and Wasbank. According to the 2013 crime statistics, the highest incidents of criminal activities are taking place in Dundee followed by Glencoe. With reference to the figure above read in conjunction with a table below, Drug-related crime are the highest reported cases which amount to 365 in Dundee. The provincial planning standards suggests that a population 50 000 people needs to be provided with one Police Station at a radius of 10km. There are few areas that this radius does not reach. Institutionally, the Safety and Security functional areas within the Municipality is spearheaded by the Senior Manager: safety and Security Section within the newly established Department of Community Services. At a strategic level, Endumeni Local Municipality as part of its priorities for 2021/2022 includes the development and adoption of a comprehensive Safety & Security Sector Plan which will be adopted together with the 2021/2022 IDP not later than 30 June 2022.

Table 49: Crime Statistics

CRIME	Dundee	Glencoe	Wasbank
Murder	21	7	1
Total Sexual Crimes	52	35	6
Attempted Murder	8	2	2
Assault with the intent to inflict grievous bodily harm	156	88	14

TOTAL	2274	716	148

5.2.5 COMMUNITY DEVELOPMENT: VULNERABLE GROUPS YOUTH DEVELOPMENT

Through its Social Programmes Section within the Office of the Municipal manager, Endumeni Municipality has the responsibility of co-ordinating the development and promotion of youth development initiatives, establishment of youth desk and youth structures and implementation of procedures, reporting and upliftment of youth programmes.

DEVELOPMENT OF PEOPLE WITH DISABILITIES

The number of people living with disabilities is estimated at 2 677 which accounts for 4% of the total population. The municipality has adopted policies and practices to ensure that these residents are not excluded from any development initiatives that are championed by council.

These include the unbiased employment and recruitment procedures as well as the supply chain management systems. The recently reviewed Employment Equity Plan (EEP) of the Municipality is one of the major tools to ensure that the needs of this sector of the community are accordingly provided. Institutionally, the Municipality does have dedicated personnel as well as dedicated programmes targeting people living with various disabilities.

DEVELOPMENT OF THE ELDERLY

There are two programmes that the municipality undertakes on an annual basis for the development of elderly which are Maiden Camp and Golden Games.

DEVELOPMENT OF WOMEN

According to the demographical data, Endumeni has more females (33 225 which amounts to 51% of the total population) than males. Endumeni Municipality places a very strong emphasis on the employment of women within both the public and private sector.

PEOPLE AFFECTED BY CRIME, HIV/ AIDS AND DRUGS

Endumeni has the highest percentage of HIV+ people, which was 16.49% of the population in 2007. The percentage of AIDS related deaths stood at 61.19% in 2007. The crime statistics also suggests that there are 3138 people affected by criminal activities and 411 affected by drugs.

EARLY CHILDHOOD DEVELOPMENT

The Endumeni Municipality has the responsibility to take care of the children that are still attending the crèches. We give them support in terms of equipment (educational, recreational and sporting). We work hand in hand with the Department of Sport and Recreation, Social Development and Department of Education as the Non-Governmental Organisations that has the responsibility in ensuring that the Early Childhood Development programmes are implemented.

There is also a structure that is aiming at promoting and advocating a culture of children's rights through co-ordinating and effectively monitoring and evaluating the realization of the child's right to survival, development, protection and participation.

LOCAL AIDS COUNCIL

The establishment of a Local Aids Council on the 23rd October 2008 greatly assisted in the Endumeni Council's endeavours in regard to having a unified approach which has become particularly evident in the planning of Endumeni Aids Awareness events. The Endumeni Aids Awareness Events began in 2002 with one event held annually to coincide with World Aids Day. These commenced with the first two in Dundee and then circulated to Glencoe, Wasbank, Sibongile and Sithembile. In 2008 however, the Endumeni Council decided that smaller events need to be held during the year to reach out to communities on the outskirts and rural areas of Endumeni. On an average, three events were held within a financial year.

In the 2021/22 financial year, the municipality will continue to be working closely with Umzinyathi District Municipality. That will eliminate the duplication of awareness's to be held with the Endumeni Local Municipal area. In Umzinyathi District Municipality, the HIV/AIDS infection rate for 2005 was 23% (Monitor Group, 2006) which is lower than the national average of 27.9% and significantly lower than the 37.5% average for the province of Kwazulu-Natal. The province has the highest HIV prevalence rate in South Africa. According to KZN Department of Health, April-November 2015 data on HIV/AIDS prevalence Endumeni Local Municipality has HIV prevalence of 10.1% which is relatively high than the other local municipalities.

The municipality will be working together with the Department of Health and the District municipality to mitigate the increase of HIV/AIDS within our District. This can be done through IGR structures, sharing of information, awarenesses and alignment.

NB: Generally it is worth mentioning that all there are dedicated programmes and activities targeting various vulnerable groups of society in line with the National Development Plan and Provincial Growth and Development Strategy and other policy guidelines at all levels, however Endumeni Local Municipality equally believes and implement the principle of mainstreaming and inclusivity. What this means is that as far as possible the strategic objectives for the development and support of the vulnerable groups are mainstreamed across all programmes and interventions. This is very key to ensuring that although they require dedicated support in order to address the imbalances of the past, but similarly the target audience should not feel excluded from the society but must be treated equally to all other members of society.

TABLE 50: SOCIAL DEVELOPMENT: SWOT ANALYSIS

STRENGTHS	WEAKNESSES
<p>Facilities for safety and security are fairly spread amongst all three urban areas.</p> <p>Programmes for Nation Building and</p>	<p>Public Facilities (Education & Health) are mainly clustered within the urban centres</p> <p>Crime levels are high Low levels of education</p>
OPPORTUNITIES	THREATS
<p>The provincial programmes for youth, women and children can be successfully piloted within Endumeni</p>	<p>The increase in crime would further discourage investments.</p>

6. KPA FINANCIAL VIABILITY AND MANAGEMENT

6.1 CAPITAL FUNDING EXPENDITURE TO ADDRESS SERVICE DELIVERY

The Budget for 2020/21 financial year has been prepared, aligned and integrated into the 2019/20 IDP Review. The budget below also contains indicative figures for 2019/20 and 2020/21.

- The municipal income for 2019/20 was R **338 153 618** and it has increased to R **365 536 998.20** for 2020/21 financial year.
- The expenditure for 2019/20 was R **332 132 087** and it will be increased to R **337 884 935.90** for 2020/21 financial year, in line with the projected municipal income.
- The budget for capital projects for 2019/20 was R **23 058 686** and it has increased to R **30 197 409.22** for 2020/21.

6.2 CAPACITY OF THE MUNICIPALITY TO EXECUTE CAPITAL PROJECTS

MIG & Energy Efficiency Grant funding has been made available for the execution of capital projects. MIG & INEP grants were not fully spent in 2019/20 financial year. The Disaster and Electrification Grant rollover application was denied and the two grants were removed from Grant register, consequently the total value of unspent grants dropped.

6.8 INDIGENT SUPPORT

The indigent policy and register of the municipality are updated on an annual basis, the municipality provides support to indigent households through refuse, rates and electricity based on set criteria, and once the household is approved as indigent. The current Indigent register was implemented as from the 1st July 2019. New applications for the 2021/22 financial year are currently being accepted by the municipality. There are currently 1909 indigent households, and the breakdown in terms of ward is as follows:

Table 51: WARDS INDIGENT SUPPORT

WARDS	NO
1	1
2	497
3	299
4	241
5	551
6	255

7	65
TOTAL	1909

The funds that have been allocated for Indigent support from the equitable share for 2021/2022 is R 4,983,132.00, 2022/2023 is R 5,322,894.00 and 2023/2024 is R 5,703,986.00.

Table 52: The indigent support has been categorised as follows:

Financial Year	2021/2022	2022/2023	2023/2024
Electricity	1811 494	1929 241	2072 77
Refuse	3171 638	3393 653	3631

Indigent support increasing yearly from 2020/21 awareness campaigns conducted at Roadshows.

6.3 REVENUE ENHANCEMENT AND PROTECTION STRATEGIES

The challenge facing the municipality is to successfully turn around the current declining cash position and to build a sustainable municipality for the future; Revenue enhancement was developed and approved by Council in phases. The municipality has implemented the strategy through amnesty process on electricity theft and further appointed a company auditing meters. However, more avenues must be explored to curb the electricity theft.

Treasury has appointed a revenue advisor to assist municipality on revenue matters. An introductory meeting was held on 4th May 2021 to map the way forward.

Total Income and Expenditure for period ending 30 June 2021 are as follows:

Table 53: YEAR TO DATE COLLECTION

Description	YTD Adjusted Budget
Property Rates	83,407,732.00
Service charges - electricity revenue	81,238,557.79
Service charges - refuse revenue	19,407,718.00

6.4 MUNICIPAL CONSUMER DEBT POSITION

The non-payment for municipal services adversely affects the cash flow situation. There is a significant loss of electricity revenue from theft of electricity and distribution losses. The bottom line is that if every consumer regularly pays for the services rendered the municipality will improve on service delivery, increase maintenance of existing infrastructure and the provision of additional amenities. Ward councillors and members of ward committees must play a significant role in creating community awareness of the impact of the practices of theft and non-payment of rates and services and contribute to the accessibility to the areas by council's audit teams. By write off old debt we debt we update customer details and cleanse the debtor's book. We can also focus on customer who can afford to pay.

6.4.1 AGE ANALYSIS OF CONSUMER DEBT

The municipality has an age analysis, reasons for constrained collections is due to:
Deceased estates:

- ✚ Executors are not appointed to finalize the matters of the Deceased.
- ✚ Government debt: Human Settlements and Land Reform have not paid their outstanding Rates.
- ✚ Meetings have been held with the respective departments.
- ✚ Due to Covid 19 many people lost their Job leading low revenue collection as they are not able to settle their debt in time.
- ✚ Unemployment and low income.
- ✚ Culture of non-payment and tampering of electricity meters still very strong.

Table 54: DEBTORS AGE ANALYSIS

Detail	0 - 30 Days	31 - 60 Days	61 - 90 Days	91 - 120 Days	121 - 150 Days	151 - 180 Days	181 Days - 1 Year	Over 1 Year	Total

6.5 GRANTS AND SUBSIDIES

Government grants make up 24% of the budgeted revenue for 2020/21. This indicates that the municipality is not grant dependent. Grants received for capital expenditure are spent in accordance with the grant conditions.

Table 55: The following table presents a stream of grants that the municipality will receive from national treasury between 2020/21 – 2022/23 financial years.

Grant Description	2020/21	2021/22	2022/23
Equitable Share	55 616 000	53 751 000	57 554 000
Municipal Infrastructure Grant	16 087 000	15 836 000	16 782 000
INEP	9 000 000	14 111 000	9 000 000
Finance Management Grant	2 200 000	2 100 000	2 100 000
Expanded Public Works Programme	0	1 589 000	0
Energy Efficiency Grant	0	0	

6.6 MUNICIPAL INFRASTRUCTURE ASSETS AND MAINTENANCE

The Municipality has budgeted 3% of its property, plant and equipment for maintenance and repairs. In the determination of the 3% labour and overhead costs were excluded. Due to financial constraints the municipality is unable to budget for repairs and maintenance at 8% which is a minimum acceptable rate.

In terms of the acquisition of new service delivery Assets, the municipality relies on the five (5) year strategic plan of the municipality known as the IDP. Then utilize the SDBIP for annual review of such.

6.6.1 ASSETS MAINTENANCE PLANS

The electricity infrastructure plan has been developed and will be implemented in the next financial year. The plan is as attached as annexure.

The road maintenance plan will be developed in the 2021/22 financial year. The municipal asset register is maintained monthly to ensure that the assets are properly

recorded and maintained. At every financial year end an assessment of the condition of the assets are made and assets are considered for possible impairment. The municipality endeavours to adhere to the asset management policy in order to ensure the safeguarding of assets.

Heads of departments are responsible for the maintenance of assets falling within their departments. A maintenance plan of assets above a certain threshold should be prepared and submitted to the CFO for budgeting and cash flow purposes.

The municipal repairs and maintenance budget for the 2021/22 financial year amounted to R11,6 million. This is however only 3% of operational expenditure. The municipality plans to accommodate a realistic budget towards repairs and maintenance which is near the norm of 8% in the future budgets. A turnaround strategy will have to be employed to improve the financial position and direct more financial resources towards the maintenance of existing infrastructure.

6.7 CURRENT AND PLANNED BORROWINGS

In terms of the loans taken out by the municipality there are no loans currently.

6.8 REMUNERATION TO TOTAL EXPENDITURE MONTHLY REPORT

Total budget for salaries (Employee Related Cost + Councillors Allowance) is R133 345 664.05 which is 39% of the total expenditure budget of R339 093 114.77

6.9 SUPPLY CHAIN MANAGEMENT

The Municipality has a fully functional Supply Chain Management Unit and all SCM policies and procedures are in place and being implemented accordingly.

SCM POLICY

The municipality had adopted and implemented the supply chain management policy as per s111 & 112 of the MFMA and it is reviewed annually.

ESTABLISHMENT OF SCM UNIT

The municipality has established the supply chain management unit to implement the SCM policy, but it is not fully functioning, more staff is needed.

APPOINTMENT OF BID COMMITTEES

6.10 AUDITOR -GENERAL'S OPINION

MUNICIPALITIES CREDIT RATING: AUDITOR-GENERAL'S OPINION

2018/19	2019/20
Unqualified with other matters	Qualified with Matters

STATUS OF THE MUNICIPAL RISK MANAGEMENT COMMITTEE

Mandate

In compliance with Section 62 (1) (c) (i) of the Municipal Finance Management Act (MFMA) No. 56 of 2003, the Municipality has established a risk management unit within the Office of the Municipality.

Enterprise Risk Management (ERM) forms a critical part of any institution's strategic management. It is the process whereby an institution both methodically and intuitively addresses the risk attached to its activities with the goal of achieving sustained benefit within each activity and across the portfolio of activities. ERM is therefore recognized as an integral part of sound organizational management and is being promoted internationally and in South Africa as good practice applicable not to only in private sector, but also across the public sector spectrum, and this has been legislated as alluded to above.

The underlying premise of risk management is that every governmental body exists to provide value for its stakeholders. Such value is based on the quality of service delivery to the citizens. All institutions face uncertainty, and the challenge for management is to determine how much uncertainty the institution is prepared to accept as it strives to grow stakeholder value. Uncertainty presents both risk and opportunity, with the potential to erode or enhance value. Value is maximized when management sets objectives to strike an optimal balance between growth and related risks, and effectively deploys resources in pursuit of the institution's objectives.

RISK MANAGEMENT POLICY STATEMENT

The municipality recognizes that the management of risks is an integral part of sound management and therefore adopts a comprehensive approach to the management of risk. The features of this approach are outlined in the municipality's Risk Management policy and Strategy.

Effective risk management is imperative to the Endumeni Local Municipality to fulfil its mandate, the service delivery expectations of the public and the performance expectations within the municipality. The realization of our IDP document depends on us being able to take calculated risks in a way that does not jeopardize the direct interests of stakeholders. Sound Management of risk will enable us to anticipate and respond to changes on our service delivery environment as well as make informed decisions under conditions of uncertainty.

RISK MANAGEMENT INFRASTRUCTURE

Endumeni Local Municipality has developed and approved the following risk management policies and strategic documents to give effect towards the implementation of Enterprise Risk Management within the Municipality:

- Risk management policy
- Risk Management Strategy; and
- Anti-corruption strategy and Fraud Prevention Plan

RISK MANAGEMENT UNIT

Responsibilities:

1. To develop and facilitate the implementation an enterprise-wide risk management policy, risk management strategy, risk management implementation plan, Anti-corruption strategy and fraud prevention plan;
2. Conducting risk assessment which involves managing the process of analysing risk as well as identifying, describing and estimating the quantitative and qualitative risks affecting the Municipality;
3. Facilitate the annual risk assessment, control self-assessment exercise and the maintenance of a comprehensive risk register;
4. Monitoring and reviewing processes to ensure that risk and compliance systems are in place;
5. Providing support, education and training to staff, at management level and Councillors on matters relating to risk management;
6. Ensuring that risk management strategy and its supporting processes are implemented;

7. Monitoring the implementation of management action plans to mitigate identified risks.

The Endumeni Local Municipality has identified top ten risk factors within the municipality mainly in the below sections:

1. Inability to attract and retain critical/scarcce/technical and suitable skills to the municipality to fulfil the mandate.
2. Failure to provide direction on information technology governance processes.
3. Inability to meet service delivery needs and requirements: Housing development, Road Infrastructure, Electricity provision, Waste collection services, Cemetery Facilities, Infrastructure maintenance
4. Failure to create an enabling environment to develop and grow the local economy.
5. Vulnerability to Fraud and Corruption
6. Possible Failure to achieve clean audit and administration.
7. Inability to achieve the goals as set on the 5-year strategy (IDP) by 2021/2022
8. Failure to manage and sustain municipal finances.
9. Uncoordinated planning to guide future development.
- 10.

nability to timely recover normal business operations in the event of a disaster / disruptions.

The issue of risk Management remains a standing item in the following committee

 Audit Committee

The municipality has a functional Risk Committee. The members of the Risk Committee are Top Manco & the Chairperson is the Municipal Manager.

Table 57: The table below shows the members of the Endumeni Risk Committee:

NAME OF MEMBER	DESIGNATION
Mr. SD Mbhele	Municipal Manager (Chairperson)
Mr. A Ngcobo	Chief Financial Officer

Mr. B Hlatshwayo	Executive Manager Planning and Economic Development
Mr. S Zulu	Executive Manager Corporate Services
Mr. B Xulu	Executive Manager Community Services
Mrs. S Ndebele	Executive Manager Technical Services

Identification of Child Headed Households	

7. KPA: GOOD GOVERNANCE AND PUBLIC PARTICIPATION ANALYSIS

7.1 BACKGROUND

Good Governance is described as “involving fairness, accountability, responsibility and transparency on a foundation of intellectual honesty”. Good governance encourages municipal representatives and officials to collaborate with their communities in order to fulfil their needs in a more efficient manner and accountability. The participation of the public in all IDP processes forms the indispensable and integral part of the process and ensures identification with the final product.

7.1.1 2020/2021 IDP REVIEW MEC COMMENTS

The 2020/2021 IDP Review was submitted to the Department of Co-operative Governance and Traditional Affairs for commenting purposes as required by Chapter 5, Section 25 of the Municipal Systems Act. The Department of Co-operative Governance and Traditional Affairs has submitted comments on the 2020/2021 IDP Review to the municipality to serve as a base for the development of the 2021/2021 IDP, comments pertaining to the municipal IDP were received, and the municipality developed an action plan to address the comments and is structured as attached in Section C no. 1.

7.1.2 BATHO PELE PRINCIPLES

BP as a concept was officially pronounced by Government in 1997 as an initiative to get public servants to be service oriented or customer focused, to strive for excellence in service delivery and to commit to continuous service delivery improvement. BP was designed as a transparent mechanism to allow customers to hold public servants/officials accountable for the type of services they deliver.

The White Paper on Transforming Public Service Delivery (1997) provides direction on how service should be rendered informed and guided by the sixteen principles. The Endumeni Municipality has resolved to appoint a designated Batho Pele Coordinator with the aim of ensuring implementation of BP principles is reflected in organisational strategic, operational, budgetary and Service Delivery Improvement Plans. Also to ensure that regular monitoring and evaluation of progress with regards to all BP initiatives through regular reporting is achieved.

Following are the Batho Pele Principles that Endumeni Municipality's administrative and political structures strive to achieve when delivering services to the people:

Batho Pele Principles: -

 **Consultation:** we can only assume to know what our customers want. The only way we can find out for certain is by asking them. This can be done through surveys, questionnaires, meetings, suggestion boxes, izimbizo and by talking to our customers. It's important to report back to customers so they know what to expect, and to our staff so they know what is expected from us.

 **Service Standards:** Citizens should be told about the level and quality of the services they receive. If possible they should be given an opportunity to choose the service they want.

✚ The standards we set are the tools we can use to measure our performance, and therefore need to be realistic depending on available resources. We should also be able to measure these standards so that everyone can see if they are being met.

✚ **Access:** There is much more involved when referring to access. It means making it easy for our customers to benefit from the services we provide. Easy access can be made possible by: -having wheelchair ramps, disabled parking bays, taking our services out to the community. Staff attitude may determine how approachable your component/directorate/department is.

✚ **Courtesy:** We must be polite and friendly to our customers. Customers should be treated with respect and consideration. We must always be willing to assist. Telephone etiquette is vital. All our correspondence must be respectful.

✚ **Information:** Citizens should be given full accurate information about the public services they are entitled to receive. Information is about reaching all our customers to make sure they are well informed about the services our department provides. This may be done in a number of ways-for example through newspapers, radio, posters and leaflets. It's important to remember that different customers have different needs and they do not all speak the same language.

✚ **Openness and Transparency:** We should be open about our day to day activities, how much our departments receive, how that money is spent. This information should be available to the public. Annual reports, strategic plans, service commitment charters, etc must be made available to the public

✚ We should tell our customers where to complain and how to *do it*.

✚ **Redress:** Redress is making it easy for people to tell us if they are unhappy with our service. We should train staff to deal with complaints in a friendly, helpful manner.

✚ An apology, full explanation and effective, speedy remedy should be offered when the promised standards of service have not been delivered.

✚ When complaints are made, we must give our customers a sympathetic ear. Have positive Responses to complaints.

✚ **Value for Money:** We need to make the best use of available resources. Avoid wastage of time, money, and other resources. It also means eliminating waste, fraud and corruption and finding new ways of improving services at little or no cost;

✚ **Encouraging Innovation and Rewarding Excellence:** Innovation: using new ways of doing things Encourage partnerships with different sectors in order to improve service delivery. Rewarding Excellence is also about rewarding the staff who "go the extra mile" in making it all happen.

✚ **Customer Impact:** If we put all the Batho Pele Principles into practice, we then increase the chances of improvement in our service delivery. This in turn will have a positive impact on our customers. It is about how the nine principles link together to show how we have improved our overall service delivery. Here we look at the benefits we have given to our customers both internally and externally.

✚ **Leadership and Strategic Direction:** Our leaders must create an atmosphere which allows for creativity. Management must ensure that goals are set and that planning is done.

7.1.3 BATHO PELE POLICY AND PROCEDURE MANUAL

The Endumeni municipality is the process of developing its very own custom made Batho Pele Policy. The aim of the policy is to outline what makes an organization effective in delivering services to the public, and in so doing comply with the principles of Batho Pele. It will also serve as a comprehensive and systematic process to manage the implementation of Batho Pele Principles. The policy proposed is an adaptation of a model or set of principles of how client centred organizations are run and what makes them successful, based on findings of studying service delivery to the public. The policy will further enable the municipality to be Batho Pele compliant and infused with reinforcing values, norms and beliefs strongly focused on the public and beneficiaries of their (the departments') services. This culture ensures that the concerns of the public and their needs are at the heart of all key decisions, actions and communications in the departments. The municipality will have adopted the final Batho Pele policy by 30 June 2020 together with the Final 2020/21IDP.

7.1.4 BATHO SERVICE DELIVERY CHARTER

The municipality has recently developed a service delivery charter that describes the general mandate and responsibilities of the Municipality of Endumeni. The services provided by the municipality have been prioritized as the requirements of a standard service delivery charter. The public has been involved notices on the local newspaper and furthermore through war rooms, engagements occur at all levels. Powers and functions of the municipality are clearly defined, and the standards are linked to Objectives & strategies of the municipality. Standards have been developed in a SMART manner that can enable performance against the standards to be easily measured and reported on. The municipal standards are clear in terms of timelines and awareness's will be conducted in order to familiarize the community about them.

7.1.5 SERVICE DELIVERY IMPROVEMENT PLAN (SDIP)

The municipality has developed the Service Delivery Improvement Plan in line with its constitutional mandate. The SDIP will outline the current baseline of the municipality; where do our citizens want us to be, and furthermore addresses how do we get there. Key services that require improvement will be identified and the SDIP will be developed on those findings.

7.2 OPERATION SUKUMA SAKHE

The main aim of Operation Sukuma Sakhe / War on Poverty campaign is to reach out to more poverty-stricken communities, with the intention of making maximum impact on those communities in the shortest possible way, and also to ensure that communities including the private and the public sector join forces to fight against poverty.

The Operation Sukuma Sakhe programme is the new approach of how government and its social partners would fight poverty. Endumeni has a designated OSS champion who regular visits war rooms in all municipal wards together with the IGR personnel ensuring the needs of the people are addressed.

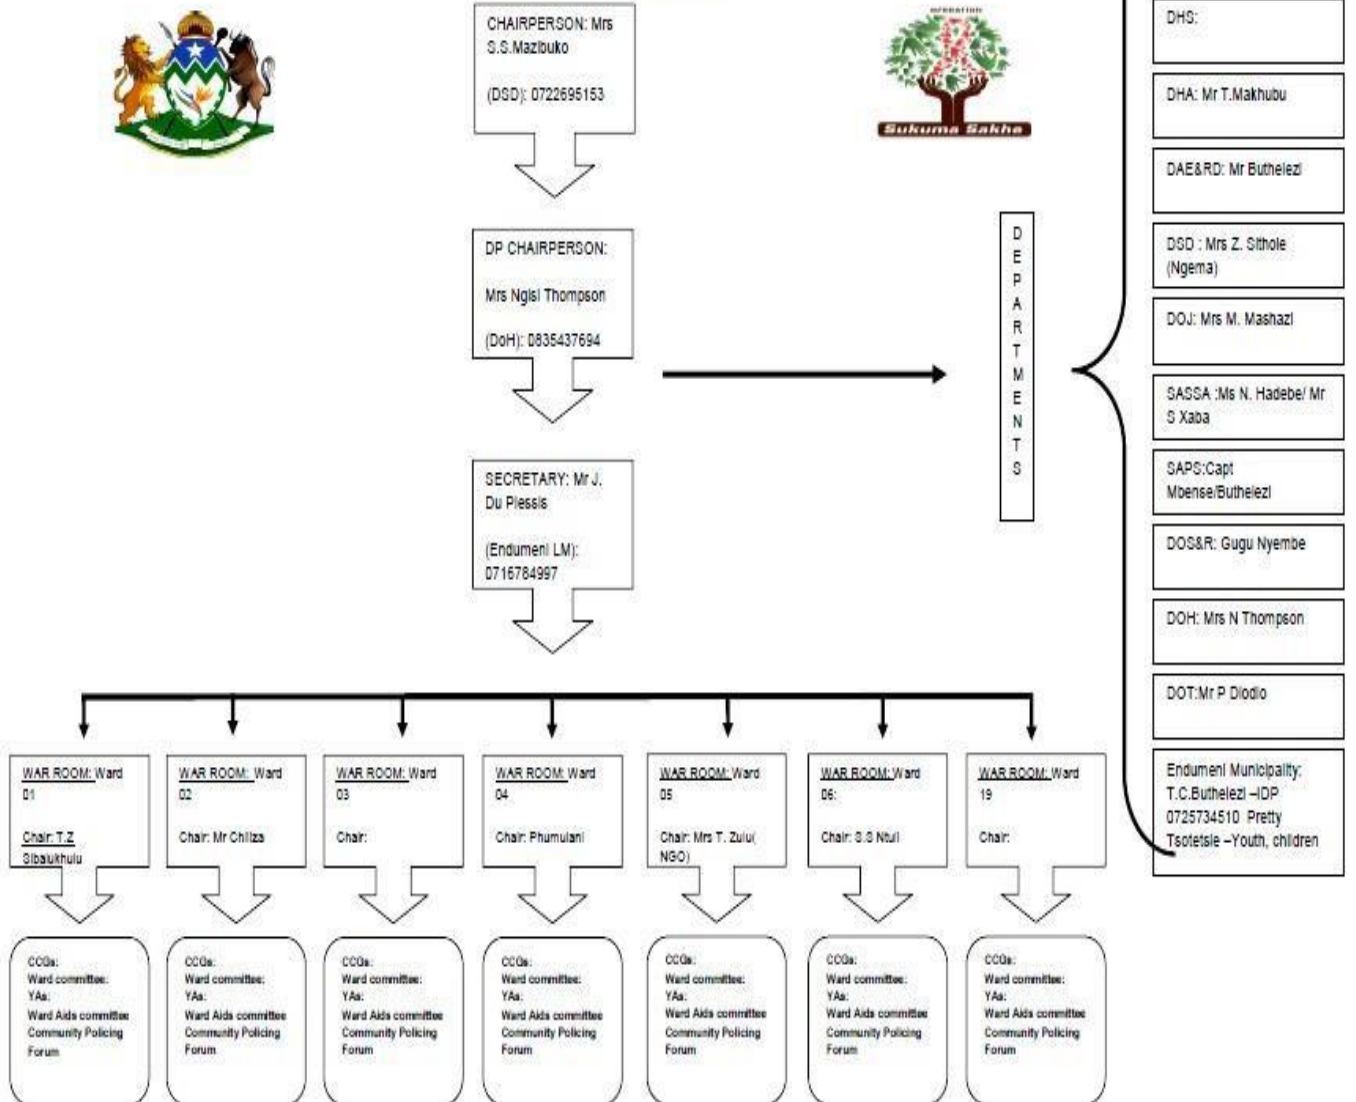

7.2.1 FORMATION OF THE ENDUMENI LOCAL TASK TEAM: FLAGSHIP PROGRAMS

During May 2010, the Endumeni Local Task Team was formed with Mrs S S Mazibuko of the Department of Social Development – Dundee and Mr J A du Plessis of the Endumeni Local Municipality as the Secretariat of the Task team. At present there are 35 registered members consisting of Departmental Officials and other organisations. These members are basically also the members of the Endumeni Aids Council, the difference being that the Local Aids Council is chaired by the Mayor of Endumeni with relevant Councillors forming the Executive membership thereof.

The programs from the Office of the Premier administered by the Local Task Team were known as "Flagship Programs" but have recently been changed to "Operation Sukuma Sakhe", meaning Rise up & Build. Although these programs are aimed at Poverty Alleviation they cannot be separated from HIV/AIDS infections as it is a well-known fact that poverty leads to malnutrition which compromises the human immune systems. The Local Task Team meets every first Thursday of the new month and the below figure shows its structure.

KWAZULU-NATAL PROVINCIAL GOVERNMENT
Endumeni Local Municipality Operation Sukuma Sakhe

"Sindawonye senza kubonakale!!!"

7.2.2 IDP ALIGNMENT TO OPERATION SUKUMA SAKHE (OSS)

The Endumeni Local Municipality's together with the Endumeni Local Task Team under the banner of OSS decided to align their operations after the District OSS meeting held on the 27th September 2016 at Mont Hall, Dundee. The below generated formula is yet to be presented to the District OSS Forum for adoption as it was also supported by the Local Task Teams of Nquthu and Msinga.

7.1.3 BACKLOGS

Backlogs are a shared burden of the municipality and sector departments, regardless of the profiling done at ward war room level. Therefore, the shared eradicating programmes/projects should be classified according to immediate/ short term/ medium term and long term.

Therefore long & medium term programmes/projects should be those featured in the IDP and short term to immediate should be seen as "operational". Therefore, to be reported on the IDP as past financial year activities of the OSS since they can be predicted or planned for.

7.2.4 SERVICE DELIVERY

A Local Strategic Action Plan is therefore needed in order to action and monitor the work done under the banner of OSS. This will help in clearing the confusion in the Powers & Functions of the Municipality vs Sector Departments, and that of the two conflicting financial year structure. Both Municipality and Departments are to generate projects by the end of November. Therefore OSS profiling and IDP "Ward to Ward"

public engagements must be done in order to inform departmental projects/budgets before end of October. This will help the Local Strategic Action Plan to have financial commitments from the municipality and sector departments.

7.2.5 CHALLENGES AND SUCCSSES OF WAR- ROOMS SCHEDULED DATES FOR WAR ROOM SITTINGS

Table 60: Unless advised otherwise well in advance the meetings of the various war rooms shall be take place as per the recommended schedule:

<i>Ward Name</i>	<i>Place</i>	<i>Dates</i>
Ward 1	Was bank municipal office	Every Wednesday per week @ 11h00
Ward 2	Ext 18 Container	Every Tuesdays per week @ 11h00
Ward 3	Sithembile community Hall	Every Thursday per week@ 11h00
Ward 4	Sibongile old Admin building	Every Friday per week @12h00
Ward 5	Anglican church (Sibongile)	Every Wednesday per week @ 10h00
Ward 6	Mackenzie Hall	Every Wednesday per week @ 10h00
Ward 7	Glencoe Town Hall	Second Wednesday of every month @ 10h00

7.2.6 WAR ROOM FUNCTIONALITY

All 7 wards are functional. The war room are operating under the supervision of ward councillors as Ward champions and ward war rooms structure. The issues reported by community into war rooms may be referred to relevant stakeholders including the municipality and to the top structure which is Endumeni Local Task team. The most common issues reported during war room meetings in no order of importance includes among others the following:

-  Housing issues in all wards Electricity Theft
-  Drainage system in all areas which cause flooding in most households Access to Grant-In-Aids and all social ills
-  Lack of Access to Job opportunities Sanitation Services (i.e. Toilets) Access to Water
-  Disaster issues
-  Lack of Access to Waste Management Services Social relief
-  Pauper burials Municipal services

- ✚ Inconsistent attendance by certain Sector Departments and Municipal Officials at war room meetings Lack of operating Furniture and stationery in some of the War Rooms
- ✚ Delays by certain stakeholders in resolving reported challenges and issues

The operation Sukuma Sakhe/LTT sit once every first Tuesday of the month and the structure is operating under the superior of Executive Mayor as a Champion and it has its own structure. The purpose for the structure to sit is tackle all issues reported through war rooms or ward councillors, if the LTT does not get joy on issue referred it to the principal structure. Operation Sukuma sakhe /LTT must work hand with Local municipality because it is fulfilling the needs for communities of that particular LM.

7.2.7 OSS PROGRAMS ON PIPELINE

- ✚ Operation mbo in all 7 wards
- ✚ Ward profiling/ households profiling
- ✚ Isibaya Samadoda campaigns in all Wards to deal with GBV issues
- ✚ School uniforms donations Awareness campaigns
- ✚ Clean-up campaigns at all angles

7.2.8 EXPANDED PUBLIC WORKS PROGRAMME (EPWP)

Endumeni Local Municipality is also committed in training and developing communities through the EPWP programme, thereby promoting economic growth and creating sustainable development. 25% of the MIG projects to be undertaken by the municipality are EPWP compliant. The municipality during the 2018/19 Financial year, appointed 65 people through the EPWP programme. The Department of Cooperative governance and Traditional Affairs has nominated Endumeni Local Municipality to implement the Community Work Programme in the 2018/19 Financial Year. It is a National funded programme implemented by municipalities. The programme is community driven through partnerships between community, government and civil society. The CWP programme falls under the umbrella programme EPWP in the Non-state sector as public employment programme. The municipality will recruit 450 participants to form part of the programme, and in line with the guiding principles and policies of the programme.

Generally, the programme is progressing according to plan and is indeed beneficiary to the Municipality and the benefitting community members especially those from the vulnerable groups of society, i.e. Women, Youth, Aged, People Living with Disabilities; etc.

7.2.9 BACK TO BASICS PROGRAMME (B2B)

The Endumeni Local municipality is reporting on monthly basis to National Cooperative Governance and Traditional Affairs regarding back to basics. The municipality reports on a quarterly basis to the Provincial Cooperative Governance and Traditional Affairs. The feedback received has been between 62% and the reason for this constant position in the district is due to the ward functionality and the challenge in filling the critical posts for the municipality. The Municipality is working with Provincial specialists to improve on the issues that put the municipality in a challenged positioned. The reporting is based on the below mentioned pillars.

7.2.10 FIVE PILLARS OF BACK TO BASICS IMPLEMENTATION

-  Pillar 1 – Putting People First and Engaging with Communities
-  Pillar 2 – Delivering Basic Services
-  Pillar 3 – Good Governance
-  Pillar 4 – Sound Financial Management
-  Pillar 5 – Building Capabilities

7.2.11 THE INTERGOVERNMENTAL RELATIONS (IGR) FUNCTIONALITY REPORT

The Constitution of South Africa sets the rules for how government works. There are three spheres of government in South Africa:

-  National government.
-  Provincial government.
-  Local government.

The spheres of government are autonomous and should not be seen as hierarchical. The Constitution says: The spheres of government are distinctive, inter-related and inter-dependent. At the same time, they all operate according to the Constitution and laws and policies made by national Parliament.

The government machinery is made up of three parts:

-  The elected members (legislatures) – who represent the public, approve policies and laws and monitor the work of the executive and departments.
-  The Cabinet or Executive committee (executive)– who co-ordinate the making of policies and laws and oversee implementation by the government departments.
-  The departments and public servants – who are responsible for doing the work of government and account to the Executive Provincial Inter-Governmental Structures

The Premier in each province is responsible for coordinating relationships between national, provincial and local government in the province. A Premier's Inter-Governmental Forum (PIF) consists of the Premier, the local government MEC, other MECs, Metro and District Mayors and other Mayors where necessary. The PIF meets regularly and consults on broad development in the province, as well as on the implementation of national and provincial policy and legislation. It also seeks to coordinate the alignment of provincial and municipal development planning and strategic planning. The PIF reports through the Premier to the PCC. PIF meetings are usually preceded by PAF (Provincial Advisory Forum) meetings where provincial heads of departments meet with all municipal managers.

The municipality actively participates in the above-mentioned forums.

Endumeni Local Municipality has since appointed dedicated IGR personnel; the appointed official will ensure the participation of relevant officials in various district and provincial level IGR structures as and when required to attend. Among the various IGR Structures the following can be mentioned:

- ✚ The Premiers Coordination Forum the Provincial IDP Forum
- ✚ The Provincial SPLUMA Forum the Provincial LED Forum
- ✚ The District Mayoral Forum
- ✚ The District Speakers Forum
- ✚ The District Municipal Managers Forum
- ✚ The District Planning & Economic Development Forum the District CFO's Forum
- ✚ The District IDP Representative Forum the District OSS Task Team
- ✚ The District and Local AIDS Council
- ✚ District Technical Performance Management Systems Advisory Forum

The above forums have been able to sort out intergovernmental issues at record time due to their functionality. One can then make an example out of the due payment contributions to the District for the functioning of the District's Development Planning Shared Services utilised by all LMs.

7.2.12 MUNICIPAL STRUCTURES

The Endumeni Municipality appoints representatives to its political structures and external bodies after completion of each municipal election and representations to such Committees and external bodies are listed as follows:

7.2.13 ENDUMENI COUNCIL

Endumeni Local Municipality is made out of Thirteen (13) Councillors from the seven (7) Municipal wards. The Members of Endumeni Council are as follows:

- ✚ SPEAKER, CLLR L.T KHUMALO – CHAIRPERSON OF THE COUNCIL
- ✚ HIS WORSHIP MAYOR CLLR SB MDLULI– CHAIRPERSON OF THE EXECUTIVE
- ✚ DEPUTY MAYOR CLLR.M I NKOSI
- ✚ COMMITTEE (EXCO) CLLR.A S NDLOVU: MEMBER OF EXCO
- ✚ CLLR MH XABA: CHAIRPERSON OF MPAC
- ✚ CLLR. A. RAUBNEHEIMER.
- ✚ CLLR. S. ZWANE.
- ✚ CLLR. T. MAKABA.
- ✚ CLLR NE KHANYILE.
- ✚ Cllr AZ SADECK
- ✚ Cllr B. KHAN
- ✚ Cllr C.J CARELSE
- ✚ Cllr FN MTHETHWA

7.2.14 EXECUTIVE COMMITTEE (EXCO)

As per delegation by Endumeni Municipal Council the Executive Committee (EXCO) comprises of the following Councillors with:

- ✚ HIS WORSHIP MAYOR CLLR. SB MDLULI – CHAIRPERSON OF THE EXECUTIVE COMMITTEE (EXCO)
- ✚ CLLR. AS NDLOVU.
- ✚ CLLR. MI NKOSI.

7.2.15 PORTFOLIO COMMITTEES

The municipality has properly constituted all necessary portfolio committees. These committees are functional and are actively involved in monitoring and evaluating progress of projects. All projects that are undertaken in the municipality are presented to the portfolio committees for comments and inputs before proceeding to the next phase / level. In this way, the political structure is well-informed on what is happening on project implementation. Table 61: The portfolio committees are proportionally represented.

Portfolio Committee	Name of Portfolio Chair	Gender
Finance Committee	CLLR SB MDLULI	Male
Technical Services	CLLR SB MDLULI	Male

Corporate Services	CLLR MI NKOSI	Male
Planning & Economic Development Services	CLLR AS NDLOVU	Male

7.2.16 LABOUR FORUM

The Labour Forum is fully functional its members are as follows:

-  CLLR. MH XABA.
-  CLLR. B KHAN.
-  Cllr. NE KHANYILE.

7.2.17 THE IDP ORIENTED STRUCTURES WARD COMMITTEES

Endumeni Municipality has elected Ward Committees in all the 7 wards in the municipality are fully functional and active in all development issues affecting their wards and the municipal area at large, however there has been a challenge with sectorial reports submissions and the interventions from the office of the speaker through public participation unit has been required, These structures are in continuous contact with the community at the ward levels and all issues raised in the meetings are conveyed to the council for consideration. These committees receive ongoing training. The Ward Committees accounts for the work they do via their Ward Councillors to the Office of the Speaker of the Municipality where they are required to submit regular monthly functional reports.

7.2.18 IDP REPRESENTATIVE FORUM (RF FORUM)

Chapter 5 of the Municipal Systems Act (Act 32 of 2000) dictates that every municipality must prepare an IDP and that, the IDP must include representation from members of the community. Endumeni Municipality has established the IDP Representative Forum that represents the interests of all residents in the IDP process.

The IDP Representative Forum comprises of government departments, NGO's that are active in a range of issues, Corporate Service Providers and all other structures that exists within the community. The municipality will continuously identify the groups and ensuring their representation in the IDP Representative Forum. For example, each meeting of the Representative Forum is advertised on local paper, invitations are also delivered using door-to- door in the most accessible addresses, through posters and announcement in social meetings.

In order to ensure maximum participation in the Representative Forum (Rep Forum) meetings from members of the public, representatives and relevant government officials, Rep Forum meetings are to be scheduled as and when required during the key stages of the IDP Process to ensure focused and meaningful contributions by participants.

The first Rep Forum meeting was planned in alignment with the Umzinyathi District, unfortunately the first meeting was never convened due to the Challenges at the District municipality. The Municipality held its REP forum to finalize on issues outstanding for the Draft 2021/22 IDP Review.

Resolution from the meeting for the next financial year is to hold these sessions four (4) times a year and have the terms of reference circulated to each and every stakeholder for a proper functionality.

7.2.19 IDP & BUDGET STEERING COMMITTEE

As part of the IDP preparation process, the IDP/Budget Steering Committee chaired by the Mayor acts as a support to the IDP Representative Forum, the Municipal Manager and the IDP Coordinator/ Manager. This structure will continue functioning throughout the process.

The committee facilitates the participation of the management and other senior officials of municipality in the process. The committee also ensures efficient alignment and co-ordination between IDP projects and the budget to ensure that there is sufficient funding for the proposed projects. The functionality of this committee is to improve the IDP in various areas of expertise and some decisions made are based on its recommendations.

7.3 COMMUNICATION AND PUBLIC PARTICIPATION

The municipality undertakes communication and public participation interventions and activities in accordance with its developed and adopted Integrated Public Participation & Communication Strategy. The purpose was to ensure that there is increased synergy between both the Public Participation and Communication functions when engaging various stakeholders. Endumeni Local Municipality has a fully- fledged public participation and Communication's unit, and every effort has been made to ensure that the two interlinked units conduct their day to day business in an integrated fashion given the interconnectedness of their portfolios. At a very board level the Integrated Public Participation and Communication Plan aims to realize the following objectives:

- ✚ Improve communication with the local community as well as other organs of state within the local and provincial spheres of government;
- ✚ Enhance accountability, openness, transparency and responsive local government; and
- ✚ Inform the community of the activities and intentions of the municipality.

7.4 INTERNAL AUDIT COMMITTEE

7.4.5 INTERNAL AUDIT MANDATE

The Internal Audit Unit mandate emanates from Section 165(1) of the Municipal Finance Management Act, No.56 of 2003 (MFMA) which states:

- (a) Each municipality and each municipal entity must have an internal audit unit.
- (b) Internal Audit unit of a municipality or municipal entity must:
 - Prepare a risk based audit plan and an internal audit program for each financial year;
 - Advise the accounting officer and report to the audit committee on the implementation of the internal audit plan and matters relating to:
 - Internal audit;
 - Internal controls;
 - Accounting procedures and practices;
 - Risk and risk management;
 - Performance management;
 - Loss control; and
 - Compliance with this act, The annual Division of Revenue Act and any other applicable legislation
- (c) Perform such other duties as may be assigned to it by the accounting officer

The Internal Audit Charter as adopted by the Performance/Audit Committee regulates the work of the Internal Audit Activities. The Municipality has an approved structure of internal audit unit. Endumeni Municipality has appointed two incumbents under the Internal Audit and are full time in the Municipality being responsible for the co-ordination of the work of the Internal Audit in the Municipality.

7.4.6 The role of Internal Audit

The Institute of Internal Auditors defines internal auditing as:

“An independent, objective assurance and consulting activity designed to add value and improve an organisations operation. It helps an organisation accomplish its objective by bringing a systematic, disciplined approach to evaluate and improve the effectiveness of risk management, control and governance processes.”

The internal audit activity should therefore evaluate and contribute to the improvement of risk management, control and governance systems of the organisation. Typical input/responsibilities of the internal audit activity should include, amongst others:

Governance

The Internal Audit Activity should assist management in achieving the goals of the Municipality by evaluating the process through which:

- Goals and values are established and communicated.
- The accomplishment of goals is monitored.
- Accountability is ensured and corporate values are preserved.

Controls

Internal Audit should evaluate whether the controls, which management relies on to manage the risks down to acceptable levels, are appropriate and functioning as intended (i.e. are they effective yet efficient) and propose recommendations for enhancement or improvement.

The Internal Audit unit will conduct audits in accordance with the “Code of Ethics” and “Standards for the Professional Practice of Internal Auditing- of The Institute of Internal Auditors, as well as other corporate governance regulations.

Internal Audit Strategic/Coverage Plan

The “Standards for the Professional Practice of Internal Auditing- as issued by the Institute of Internal Auditors requires that: “The internal audit activity’s plan of engagements should be based on a risk assessment, undertaken at least annually. The inputs of senior management should be considered in this process.”

The critical success factors for an effective Internal Audit Plan are that it:

- Is aligned with strategic objectives of the organisation.
- Covers the strategic risk areas facing the organisation
- Is risk based – addresses the key risks areas/concerns of management.

- Is prepared in consultation with management, the audit committee and external auditors.
- Matches assurance needs with available resources.

The Internal Audit Plan will be aligned with the strategic risks identified and could encompass risk-based, compliance, financial discipline and cyclical reviews.

The output of the risk assessment process at the Municipality will, amongst others, be used to develop the Internal Audit plan by:

The plan for each year will be determined by the priority ranking (based on the risk assessment) of identified audit areas and the expertise and resources available to Internal Audit.

Authority

Internal audit reports via the Accounting Officer to the Municipal Audit Committee and has unrestricted access to the Chairperson of Audit Committee, the Accounting Officer and Senior Management.

Internal Audit is authorised to:

- Have unrestricted access to all relevant functions, records, property and personnel.
- Have full and uninhibited access to the Audit Committee and the Accounting Officer.
- Allocate its own resources; determine frequencies, subjects, scope of work to be performed; and apply the techniques required to accomplish its audit objectives.
- Obtain the necessary assistance of personnel in the various departments, sections and units of the Municipality where they perform internal audit reviews, as well as other specialised services from within or outside the organisation.

Internal Audit is not authorised to:

- Perform any operational duties for the Municipality.
- Initiate or approve accounting transactions external to the Internal Audit Activity.
- Direct the activities of any Municipality employee except to the extent that such employees have been appropriately assigned to the internal auditing teams or to otherwise assist the internal auditors in carrying out investigations.

7.4.7 THE AUDIT COMMITTEE

Endumeni municipality has established an Audit Committee in accordance with section 166 of the Municipal Finance Management Act, no 56 of 2003, the term of office of the current Audit Committee will expire in June 2021. The role of the Audit Committee is to assist the Council and the Accounting Officer in fulfilling its oversight responsibilities with regard to the integrity of internal control and accounting function, internal auditing and external auditing and reporting practices of the municipality and other such duties as may be directed by the Council and Accounting officer, and in so doing shall Advise the municipal council, the political office-bearers, the accounting officer and the management and staff of the municipality on matters relating to :

- ✚ Internal Financial Control and Internal Audits;
- ✚ Risk Management;
- ✚ Accounting Policies;
- ✚ The adequacy, reliability and accuracy of financial reporting and information; and
- ✚ Performance Management;
- ✚ effective governance;
- ✚ compliance with the Municipal Finance Management Act, the annual Division of Revenue Act and any other applicable legislation; performance evaluation; and
- ✚ any other issues referred to it by the municipality.
- ✚ Review the annual financial statements to provide the council of the municipality with an authoritative and credible view of the financial position of the municipality, its efficiency and effectiveness and its overall level of compliance with the Municipal Finance Management Act, the annual Division of Revenue Act and any other applicable legislation;
- ✚ respond to the council on any issues raised by the Auditor-General in the Audit report;
- ✚ carry out such investigations into the financial affairs of the municipality as the council +of the municipality may request; and perform such other functions as may be prescribed.

In performing its functions, an audit committee-

- ✚ Has access to the financial records and other relevant information of the municipality;

- ✚ Must liaise with-

The internal audit of the municipality; and the person designated by the Auditor General to audit the financial statements of the municipality.

Audit Committee members are as follows and they served in both Audit committee matters and Performance Audit matters:

- ✚ Mr S Majola Chairperson

- ✚ Ms N Thungo Member

7.4.8 AUDIT CHARTER

The Endumeni Local Municipality has approved an Audit Charter. The purpose of the Audit Committee charter is to set out the status, authority, roles and responsibilities of the Audit Committee of the Municipality. The status, authority, roles and responsibilities are in accordance with section 166 of the Municipal Finance Management Act (MFMA), no 56 of 2003 read together with MFMA Circular 65 of 2012 as issued by National Treasury. Consideration has also been given to the recommendations contained in the King Report on Governance for South Africa 2009 (King III). This charter guides the Audit Committee in fulfilling its obligations.

The role of the Audit Committee is to assist the Endumeni Local Municipality in achieving its strategic goals and objectives, by helping to maintain effective internal controls, risk management, accurate financial reporting and corporate governance principles.

---------------------------------------	---	--	-------------------------	--------------

7.4.10 MUNICIPAL RISK MANAGEMENT COMMITTEE

The municipality has a functional Risk Committee. The members of the Risk Committee are Top Manco & the Chairperson is the Municipal Manager. However, the municipality employed the Risk Officer during the 2020/2021 financial year as per the Performance Audit Committee Chairperson Recommendations. In addition, the municipality will be appointing an independent Risk Management professional who will serve as the Chairperson of the Risk Management Committee in line with work of the Audit Committee.

In terms of s62(1)(i) of the Municipal Finance Management Act No. 56 of 2003, the municipality must have and maintain an effective, efficient and transparent system. For financial and risk management and internal control. The Endumeni Local Municipality has identified 37 risk factors within the municipality mainly in the below sections:

- ✚ Disaster recovery, Business continuity risk Financial risk
- ✚ Cultural risks
- ✚ Technological and Systems risk Strategic and Service Delivery risk Health and Safety security risks Process operational risks
- ✚ Social risks
- ✚ Human resources risk
- ✚ Progress is noted in some of the risk areas identified however according to the risk register the addressing all of the issues will be achieved in the 2018/19 financial year. The municipality maintains a risk register that is updated on a regular basis. The issue of Risk Management remains a standing item in the following committees:
 - ✚ MANCO
 - ✚ Audit and Performance Audit Committee
- ✚ The municipality has an Anti-Fraud & Anti-corruption Strategy in place, to minimise risk and the members of the Risk Committee are all Heads of Departments and the Municipal Manager.

7.4.11 MUNICIPAL BID COMMITTEES

The municipality's Bid Committee is in place and functional. All tenders go through evaluation under the watchful eye of the bid committee. The committee comprises of members with independent minds and relevant skills.

7.4.12 APPOINTMENT OF BID COMMITTEES

Bid committees were established as per SCM Regulation and are fully functioning. The full complement is reflected in the table below:

Table 63: Appointment of BID Committees

NAME OF THE BID COMMITTEES	NAME & SURNAME OF MEMBERSHIP OR	RESPONSIBILITY
BID SPECIFICATION COMMITTEE (BSC)	M.P Khumalo Budget Manager	CHAIRPERSON BSC MEMBER
	T. Ndlovu LED Manager	BSC MEMBER
	S.E Ndimma Administration Manager	BSC MEMBER
	M. Mthembu Assistant Manager Social	BSC MEMBER
BID EVALUATION COMMITTEE (BEC)	Ms N.Z Zulu SCM Manager	CHAIRPERSON BEC MEMBER
	Ms M Mbatha PMU Manager	BEC MEMBER
	Mr S. Mhlungu HR Manager	BEC MEMBER
	Mr Z Mndaweni Environment and waste Manager	BEC MEMBER
	Mr N. Bezuidenhout Chief	BEC MEMBER

BID ADJUDICATION COMMITTEE (BAC)	Mr M.A Ngcobo	Chief	CHAIRPERSON
	Financial Officer		BAC MEMBER
	Mr B.M.N Hlatshwayo		
	Executive Manager		
	PLANNING		BAC MEMBER
	Mr S.P Zulu		
	Executive Manager		
	Corporate Services		BAC MEMBER
	Mrs S.M Ndebele		
Executive Manager Technical Services			
Ms N. Chenia	Senior		BAC MEMBER
Manager Compliance			

The committees have fixed dates for meetings every week. BSC sits every Thursdays, BEC sit 5 days after bid closing and BAC sits in days after BEC. The Management has been trained by the Provincial Treasury on Bid committees so as to have a pool of people who are trained on Bid Committees.

7.5 MUNICIPAL PUBLIC ACCOUNTS COMMITTEE

The municipality has a functional Municipal Public Accounts Committee which is charged with the responsibility to:

- ✚ Assist Council to hold the executive and administration to account;
- ✚ Councillors are therefore responsible for exercising oversight over both the executive and administration;
- ✚ Proper administration of oversight requires Councillors to be fully informed of their own agenda, business or affairs; and
- ✚ Councillors are accountable for the performance of the council; hence they must supervise the Municipal Council agenda, in order to achieve the desirable performance.
- ✚ The Chairperson of the MPAC is Cllr. NE khanyile

7.6 MUNICIPAL BYLAWS

The municipality has developed, adopted and promulgated various municipal bylaws. These bylaws are under the custody of various municipal departments and the department ensure the bylaws are adhered implemented. Likewise, all businesses and

developments within the municipal area expected to operate within the municipal bylaws. All bylaws have clear punitive measures should they be breached. The council together with the relevant government stakeholders monitor adherence of businesses on the bylaw and ensure that all culprits face appropriate and laid-out penalties or punishments. The table below reflects the existing municipal bylaws.

7.7 PUBLIC PARTICIPATION ANALYSIS

One of the objectives of local government in terms of section 152 (1) I of the Constitution of South Africa is to encourage the involvement of communities and community organisations in local government. The White Paper on Local Government puts forward the vision of “developmental local government” which it defines as:

“Local government committed to working with citizens and groups within the community to find sustainable ways to meet their social, economic and material needs and improve the “quality of their lives.”

The vehicle and system for involving the public is given more emphasis in Section 16 of the Municipal Systems Act, which requires that municipalities develop a culture of community Participation and create mechanisms, processes and procedures. These mechanisms would involve communities in planning, performance management, budgeting and service delivery.

Municipalities are also required to build the capacity of the local community to participate, as well as the capacity of councillors and staff to foster community participation. Emphasis is placed on ensuring representative in terms of age, gender, race, disability, as well as reaching those previously excluded from formal local government structures.

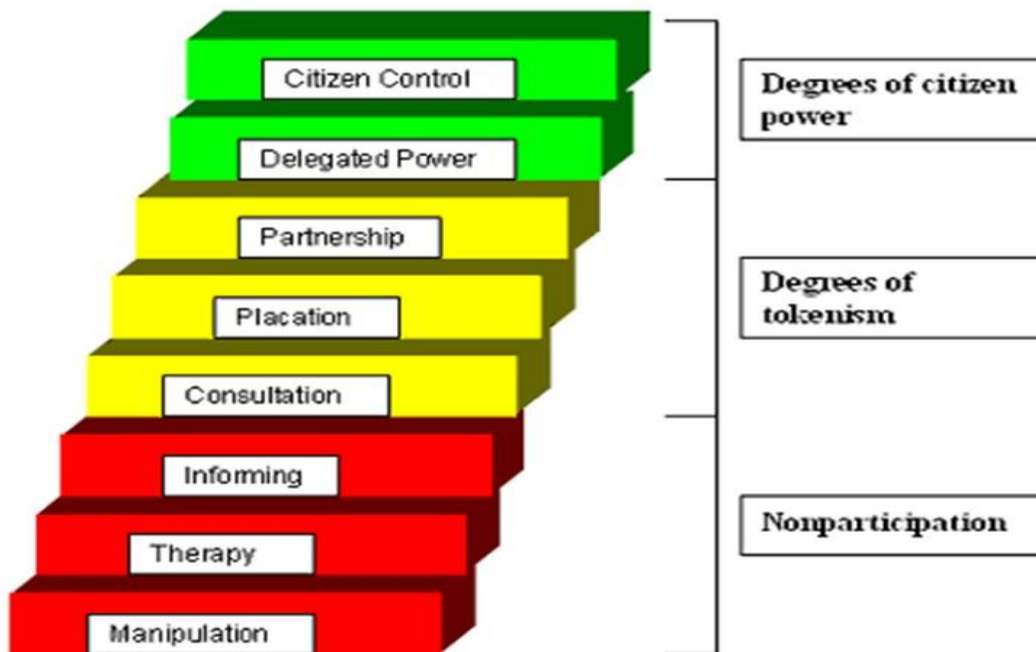

“The purpose of the Endumeni Local Municipality is to facilitate and ensure the provision of infrastructure, services and support, thereby creating an enabling environment for all citizens to utilize their full potential and access opportunities, which enable them to contribute towards a vibrant and sustainable economy with full employment, and thus create a better life for all.

The municipality is in the process of developing a community participation policy. The main purpose of the policy is to provide guidelines for increasing the level of active citizen participation in the decision-making process of local government and to create an enabling environment for civil society in which ordinary citizens and social groups may

find platform upon which they voice out their concerns and take part in the fundamental decision making on issues that affect their lives.

SPECIFIC OBJECTIVES OF THE POLICY ENTAIL THE FOLLOWING:

- ✦ Strengthening democracy by increasing participation of citizens in local government's decision-making; Developing mutual trust between citizens and local government officials and Councillors;
- ✦ Improving communication to allow citizens to have access to information and to feedback to the local government;
- ✦ Keeping local government abreast of citizens' needs, which enables the creation of an environment where local government resources are directed to meet the needs;
- ✦ Creation of additional resources for development to encourage and promote civic initiatives and public-private partnerships and Promoting programmes for skills capacity enhancement of local government authorities and citizenry.

7.7.5 AG COMMENTS AND RESPONSES FOR 2019/20 FINANCIAL YEAR

Table 64: Our municipality received Qualified Audit Opinion with matters of emphasis for the financial year 2019/2020.

NO	CATEGORY/ KEY AREA	Misstatement/ Non-compliance/Internal control deficiency	FOCUS AREA (FINDING)	ROOT CAUSE OF NON-COMPLIANCE / INTERNAL CONTROL DEFICIENCIES	RECOMMENDATION FROM AG	ACTION PLANS TO BE TAKEN	PROGRESS AS AT 31 MAY 2021	WHAT ASSISTANCE DO YOU NEED	DUE DATE
1	Assets (Property plant and equipment)	Misstatements in financial statements	Assets selected from the asset register could not be verified for existence	Management did not perform adequate review and monitoring over the preparation of fixed asset register to ensure that accurate information is captured and support the disclosure of PPE in the financial statement.	Management should follow-up on the assets that could not be verified and revisit the assets register population to identify any other assets that have incomplete and ambiguous, then confirm their existence make necessary adjustments to the assets register and financial statements.	Full asset verification will be conducted	Verification will start at the beginning of May	Appointment of Engineers to assist with infrastructure and unbundling of Infrastructure assets.	30-Jun-21

			items that were not within the approved scope	monitor internal controls to ensure goods procured under transversal contracts are procured from correct service providers.	statements to make necessary adjustment as well as strengthen the review and monitoring controls on the procurement process.				
31	Commitments	Internal control deficiency	Incorrect classification of operational into capital commitment	Management should make necessary adjustment to the commitments disclosure note, and perform adequate reviews and monitoring of the AFS preparation process to ensure accurate information is reported	Management should make necessary adjustment to the commitments disclosure note, and perform adequate reviews and monitoring of the AFS preparation process to ensure accurate information is reported.	AFS Amended	Complete		
32	Commitments	Internal control deficiency	Incorrect classification between contracted and not-contracted approved commitment	Management did not adequately review and monitor the AFS preparation process to ensure accuracy of information presented.	Management should make necessary adjustment to the commitments disclosure note, and perform adequate reviews and monitoring of the AFS preparation process to ensure accurate information is reported.	AFS Amended	Complete		
33	Commitments	Internal control deficiency	Incorrect calculation of approved and contracted for commitments amounts	Management did not adequately review and monitor the AFS preparation process to ensure accuracy of information presented.	Management should make necessary adjustment to the commitments disclosure note, and perform adequate reviews and monitoring of the AFS preparation process to ensure accurate information is reported.	AFS Amended	Complete		

34	Commitments	Internal control deficiency	Capital commitments contracts disclosed not complete	Management did not adequately review and monitor the AFS preparation process to ensure accuracy of information presented.	Management should revisit the disclosure of capital commitments to ensure that all contracts that should have been included in the disclosure are actually included and make necessary adjustment to the commitment's disclosure note.	SCM Manager will ensure that contract register is up to date. This will assist in compiling the commitment registers			
35	Governance	Non-compliance with legislation	Performance evaluation by audit committee not submitted to council	Audit committee did not adequately promote accountability and service delivery through evaluating and monitoring the effectiveness of financial and performance reporting and compliance with legislation.	The audit committee should have a slot in the agenda of at least the mid-year and year-end council meetings to enable it an opportunity to report and advise the council on the performance of the municipality	Management will ensure that Performance Audit Committee do meet on a quarterly basis as per the approved workplan as to ensure that reports are prepared that will be presented to Council bi-annually	1X Performance Audit Committee (26 March 2020)	Not Applicable	30 June 2021
36	Governance	Non-compliance with legislation	Disciplinary board not established by the municipality	Management did not implement adequate monitoring controls to ensure compliance the MFMA and other regulations.	The should establish the disciplinary board as it has enough capacity to establish such board and all matters of alleged financial misconduct be referred to the board for investigation and disciplinary hearings.				
37	Audit of Pre-determined Objectives (AOPO)	Misstatement in annual performance report	The reported targets per APR submitted for audit were not consistent and aligned with the planned targets	Management did not adequate review information reporting and against the SDBIP	Management should revisit the APR and make necessary adjustments to ensure all planned indicators and targets are included in the APR.	Completed			

			per approved SDBIP	to ensure completeness in the reporting of indicators and targets.				
38	Audit of Pre-determined Objectives (AOPO)	Misstatement in annual performance report	Reported actual achievement in annual performance report (APR) does not agree to supporting schedules	Management did not adequate review the performance information reporting and supporting schedules to ensure accuracy.	Management should revisit the reported achievement in the APR and make necessary adjustments to ensure it agrees to the supporting schedules provided for audit.	Completed		
39	Audit of Pre-determined Objectives (AOPO)	Misstatement in annual performance report	The indicators per the planned and approved SDBIP were not included in the APR	Management did not adequate review the performance information reporting and against the SDBIP to ensure completeness in the reporting of indicators and targets.	Management should revisit the APR and make necessary adjustments to ensure all planned indicators and targets are included in the APR	Completed		
40	Audit of Pre-determined Objectives (AOPO)	Misstatement in annual performance report	Supporting schedules for the reported achievement were not submitted for audit	Management did not implement proper controls in collection and keeping the records to support reported achievements	Management should follow-up and provide the supporting schedules to be audited	In Progress		30-Jun-21
41	Audit of Pre-determined Objectives (AOPO)	Misstatement in annual performance report	Reported indicator per APR was not part of the planned indicators per approved	Management did not adequate review the performance information reporting and against the SDBIP to ensure that only planned indicators were	Management should revisit the APR and make necessary adjustments to ensure only planned indicators are included in the APR	Completed		

				included in the APR					
42	Audit of Pre-determined Objectives (AOPO)	Misstatement in annual performance report	Planned indicator per approved service delivery budget implementation plan (SDBIP) was not correctly aligned in the Annual performance report (APR) submitted for audit	Management did not adequate review the performance information reporting and against the SDBIP to ensure correct alignment in the reporting of indicators	Management should revisit the APR and make necessary adjustments to ensure all planned indicators are aligned in the APR.	Completed			
43	Audit of Pre-determined Objectives (AOPO)	Misstatement in annual performance report	Number of m2 of pothole patching indicator is not accurate	Management did not adequate review the performance information reporting and supporting schedules to ensure accuracy	Management should revisit the reported achievement in the APR and make necessary adjustments to ensure it agrees to the supporting schedules provided for audit	In Progress			30-Jun-21
44	Audit of Pre-determined Objectives (AOPO)	Misstatement in annual performance report	Number of m2 pothole patching indicator reported achievement could not be verified from the maintenance register	Management did not adequate review the performance information reporting and supporting schedules to ensure accuracy	Management should revisit the reported achievement in the APR and make necessary adjustments to ensure it agrees to the supporting schedules provided for audit	In Progress			30-Jun-21
45	Audit of Pre-determined Objectives (AOPO)	Misstatement in annual performance report	Number of m2 of pothole patching indicator is not complete	Management did not adequately implement and monitor controls during the performance reporting to ensure that the reported	Management should implement controls over processing, validation and reconciling of reported performance information in the APR	In Progress			30-Jun-21

				achievements were accurate and supported by valid evidence.					
46	Audit of Pre-determined Objectives (AOPO)	Misstatement in annual performance report	Reported actual achievement in annual performance report (APR) does not agree to supporting schedules	Management did not adequate review the performance information reporting and supporting schedules to ensure accuracy	Management should revisit the reported achievement in the APR and make necessary adjustments to ensure it agrees to the supporting schedules provided for audit.	completed			
47	Audit of Pre-determined Objectives (AOPO)	Misstatement in annual performance report	Supporting schedule for the reported achievement was not accurate	Management did not adequate review the performance information reporting and supporting schedules to ensure accuracy	Management should revisit the reported achievement in the APR and make necessary adjustments to ensure that proper assessment of the project before it is reported o	Completed			
48	Audit of Pre-determined Objectives (AOPO)	Misstatement in annual performance report	Supporting schedules for the reported achievement were not submitted for audit	Management did not implement proper controls in collection and keeping the records to support reported achievements.	Management should follow-up and provide the supporting schedules to be audited	In Progress			30-Jun-21

49	Information Technology Governance	Internal Control Deficiency	Information and Communication Technology governance framework was not adequately implemented	The municipality management did not take the accountability and ensure that the ICT Governance Framework is adequately implemented once the framework was approved by the Council.	The ICT Governance Framework addresses key elements which the municipality should undertake to implement ICT governance. Therefore, the ICT Manager, Corporate Services Executive Manager and Municipal Manager should ensure that the approved ICT Governance Framework initiatives are implemented and compliance to the ICT Governance Framework is monitored on regular basis.	An ICT Maintenance Plan will be formulated A benefit realisation process will be documented. ICT Policies will be workshopped to Council and Management	ICT Policies were workshopped to Council and Management on 23 April 2021		30-Jun-21
50	Information Technology Governance	Internal Control Deficiency	Information and Communication Technology plan was not adequately designed	The municipality management did not adequately review the ICT strategic plan and ensure that services to be provided by ICT Department to the municipality are adequately addressed. Furthermore, the planned ICT initiatives / projects were not achieved during 2019-20 financial year as there were not funded.	The ICT Manager, Corporate Services Executive and Municipal Manager should ensure that the ICT strategic plan is adequately designed and aligned to strategic direction and business objectives and the ICT initiatives / projects which are defined on the ICT strategic plan are funded and implemented	Projects which are in progress will be carried out and completed. Where there is no budget availability submissions will be made to BTO to fund project		Funding	30-Jun-22

51	Information Technology Governance	Internal Control Deficiency	Municipal Standard Charts of Account project governance documents not adequately designed	The municipality management did not take accountability to ensure that MSCOA project governance documents are adequately designed based on project management framework which was adopted by the municipality. The municipality management relied on the service provider to design SMCOA project governance documents and implement them. Therefore, the service provider designed the project governance using their adopted project management framework and implemented the documents without the approval of the municipality	The ICT Manager, Corporate Services Executive Manager and Municipal Manager should ensure all projects governance documents including the documents for MSCOA project are designed based on project management framework which was adopted by the municipality. Thereafter the project governance documents are approved by municipality officials before they can be implemented.	None			
52	Information Technology Governance	Internal Control Deficiency	Return on investment and benefit realisation processes were not developed	The ICT management did not comply to the ICT Governance Framework which indicated that the return on investment and	The ICT Manager and Corporate Service Executive Manager should ensure that the processes of measuring the ROI and BR on ICT spending are formally developed as per approved ICT Governance Framework.	A ROI and benefit realisation process document will be developed			30-Jun-21

				benefit realisation document should be formally established to indicate the processes for measuring the ROI and BR on ICT spending					
53	Information Technology Governance	Internal Control Deficiency	Information and Communication Technology risk management process was not adequately implemented	The ICT department and risk management department failed to ensure that the ICT risks were effectively managed and monitored as per approved risk management policy.	The ICT Manager should engage with the Chief Risk Officer and ensure that ICT risk management process is adequately implemented and the ICT risk register is adequately maintained as per approved risk management policy.	ICT Risks to be reviewed and included on the organizational risk register and reported on periodically			30-Jun-21
54	Information Technology Governance	Internal Control Deficiency	Information and communication technology skills gap analysis was not performed	The municipality management did not take accountability and ensure that ICT skill gap analysis was conducted for 2019-20 financial year.	The ICT Manager and Corporate Services Executive Manager should ensure that ICT skills analysis is conducted to identify skills requirements within the ICT Department. The results of the skills analysis will assist the municipality in capacitating the ICT Department with required skills and can also be used to ensure that skills development plan / training plan is designed for ICT officials based on required skills.	An ICTskills gap will be conducted for ICT staff			30-Jun-21

55	Information Technology Governance	Internal Control Deficiency	Lack of software's management controls	The ICT Department was relying on Finance Department to maintain ICT expenditure and there was no tool to keep the record of software's running on the municipality's network.	The ICT Manager and Corporate Services Executive Manager should ensure that there is a process in place to monitor ICT expenditure including software's expenditure and there is a tool to log and manage the software's that are used by the municipality. The ICT Manager and Corporate Services Executive Manager should also ensure that all software's in use are valid and adequately managed to avoid penalties being charged against the municipality.	Budget submission will be made in the next budget cycle to procure automated software monitoring tool.			30-Jun-23
56	Information Technology Governance	Internal Control Deficiency	Service level agreements were not adequately managed	The municipality management did not take accountability and ensure that the controls to manage and monitor service providers are adequately designed and implemented.	The ICT Manager and Corporate Services Executive Manager should ensure that service level agreements / master agreements / contracts with the above mentioned service providers are adequately designed, discussed and signed by municipality officials and representatives from the service providers.	Bid to be advertised for Traffic Management System			31-Mar-22

58	Information Technology Security Management	Internal Control Deficiency	Deployment of patches was not adequately implemented	The ICT management did not comply to the approved Antivirus, Firewall and Patch Management Control Policy and ensure that the patches are adequately deployed. Failed patches could be attributed to aging ICT infrastructure and unsupported operating software's.	The ICT Manger and Corporate Service Executive Manager should ensure that the latest and critical patches are deployed within the municipality's ICT environment and deployment of patches is adequately monitored as per approved Antivirus, Firewall and Patch Management Control Policy.	Deploy Systems Center/WSUS with procurement of new domain controller Appoint ICT Security Officer			30 June 2021 30 June 2022
59	Information Technology Security Management	Internal Control Deficiency	Password configuration settings were not configured as per approved End User Security Policy	Controls over Information Technology systems The ICT management did not take accountability and ensure that password settings are adequately configured and activity log is enabled as per approved End User Security Policy	The ICT Manager should ensure that password configuration settings are adequately implemented as per approved End User Security Policy and compliance to the policy is regularly monitored. The ICT Manager should also ensure that the application systems are configured to record users' activities and maintain activity log and the logged activities are regularly reviewed to ensure that only authorised activities are performed by the users	Password compliance test to be conducted and password configurations to be updated on all systems			31-May-21

60	Information Technology Security Management	Internal Control Deficiency	Firewall management controls was not adequately designed and implemented	Controls over Information Technology systems The ICT management did not take accountability and ensure that firewall management controls are adequately implemented as per approved Antivirus, Firewall and Patch Management Control Policy. The municipality was using a Fortigate firewall that was supported and maintained by the service provider, Vox Telecoms. As a result, the municipality placed over-reliance on Vox Telecoms to manage and maintain Fortigate firewall.	The ICT Manager should ensure that the firewall rulesets are formally defined and firewall management controls are adequately implemented and managed as per approved Antivirus, Firewall and Patch Management Control Policy and compliance to the policy is regularly monitored.	The firewall rulesets will be formally defined and firewall management controls will be adequately implemented and managed as per approved policy			31-Jul-21
61	Information Technology Security Management	Internal Control Deficiency	Information and communication technology asset inventory was not maintained	The ICT management did not take accountability and ensure that the ICT assets inventory is maintained as per approved End User Security Policy.	The ICT Manager should ensure that the ICT assets inventory is established and maintained as per approved End User Security Policy.	ICT asset register will be developed			30-Jun-21

62	Information Technology User Access Management	Internal Control Deficiency	User access management controls were not adequately implemented	The ICT management and systems data owners within the municipality structure did not comply to the approved End User Security policy and ensure that user access management controls are implemented as per approved End User Security policy	The ICT Manager and Corporate Services Executive Manager should ensure that user access management controls are adequately implemented as per approved End User Security policy to address above mentioned weaknesses.	Access rights on systems to be assigned as per job function Generic accounts to be disabled and those with specific users to be named accordingly		30-Jun-21
63	Information Technology Service Continuity	Internal Control Deficiency	Disaster recovery plan was not adequately designed	The information and communication technology (ICT) management did not take accountability to ensure that firewall backup procedures are adequately designed and implemented. The firewall was fully outsourced to the service provider. Therefore, ICT management over-relied on the service provider to design and implement the firewall management controls.	The ICT Manager should ensure that the DRP is adequately designed and addresses all disaster recovery procedures including firewall backup procedures and the plan is aligned to the approved Business Impact Analysis (BIA). Thereafter the plan is formally approved and communicated to the relevant officials for implementation. The ICT Manager should also ensure that testing of the approved DRP is conducted regularly. The frequency of policy testing should be dictated by system criticality and should occur at least annually.	DRP to be reviewed to address finding		30-Jun-21

64	Information Technology Service Continuity	Internal Control Deficiency	Backup management controls were not adequately designed and implemented	The municipality was running off-the-shelf systems which are owned and managed by the various service providers. Therefore, the ICT management and systems data owners within structures of the municipality placed over-reliance on the service providers to perform and manage backups	Although the municipality was using off-the-shelf systems, the accountability should be with the municipality as the system data owners to ensure that adequate systems controls are designed and implemented. Therefore, the ICT Manager and systems data owners within structures of the municipality should ensure that backup management controls are adequately designed, approved and communicated to the relevant officials for implementation.	Monthly backup reports will be submitted to Management			30-Jun-21
65	Information Technology Change Management	Internal Control Deficiency	Lack of application system change log	The Payday, Munsoft, TCS, Contour, and Baud systems did not have functionality to log changes implemented.	The Information and Communication Technology (ICT) Manager should ensure that the Payday, Munsoft, TCS, Contour and Baud systems are adequately designed and have the functionality to log and extract implemented system changes. The system change log will assist the municipality in recording all unauthorised system changes (updates and upgrades) which can be implemented on Payday, Munsoft, TCS, Contour and Baud systems.	Service providers to be consulted regarding functionality on system Report to be drawn once functionality available			31 May 2021 30 September 2021

7.7.6 KEY CHALLENGES

-  Reduction of debt
-  Reduce electricity loss
-  Non functionality of IGR structure
-  Ageing of infrastructure
-  Water crisis

TABLE 65: GOOD GOVERNANCE AND PUBLIC PARTICIPATION SWOT ANALYSIS

GOOD GOVERNANCE & PUBLIC PARTICIPATION ANALYSIS	
Strengths	Weakness
Public Participation	Inadequate communication
By-laws in place	Policies not always followed
Policies in place	ICT not fully operational
Structures	Internal Audit Section
	No official Communication Plan
IGR	Non-compliance leading to lawsuits
Public Private Partnerships	Failure to tap into existing expertise
	ICT hacking viruses
	Abuse of municipal equipment and property

7.7.7 WARD BASED PLANS

The Ward based Plans have been developed for all 7 wards of Endumeni Municipality and will be implemented in the next financial year. Municipality has ensured that the priorities have been identified and are aligned with the IDP objectives and strategies.

SECTION D: VISION, GOALS, OBJECTIVES AND STRATEGIC PLANNING

Council and Management held a Strategic Planning Session on the 22 - 23 April 2021, and the following resolutions were the outcomes of the session.

Table 66: Strategic Planning Resolution

NO	STRATEGIC PLAN	MUNICIPAL BENEFITS
1.	Completion of the Skills Audit	Redirection of existing resources to critical skills
2.	Engagement of the MEC and HOD for COGTA on the provision of bulk water and sanitation	Enhance investment and service delivery
3.	Installation of bulk meters to eradicate / reduce electricity theft	Enhance revenue collection
4.	Cashflow Management	Increase cash coverage ratio and investor confidence in the municipality
5.	Introduction of a shift system e.g electricity section	Reduction on overtime and electricity Theft
6.	Infrastructure Provision - Increased Pressure	Increase on rates and services
7.	Increase on Indigent provision e.g land and housing	Social economic services
8.	Repairs and Maintenance - For the next 3 years the municipality must increase this allocation by, at least, 3% to 6%.	Proper maintenance of infrastructure
9.	Development of the Wayleave Policy	Regulating the installation of wayleaves and protection of municipal infrastructure

10.	Audit to be undertaken for the redundant municipal immovable properties, with the intention of being disposed	Enhance revenue collection
11.	To quantify the number of properties which still need to be registered and transferred	Increase the number of ownership e.g private and municipality
12.	Identification and advertisement of the sites in Dundee and Glencoe for middle income housing development, to test the market response (already identified a site in Glencoe which is along Ladysmith road)	Enhance revenue collection
13.	Development of the Cell phone Mast Policy	Regulating Cell phone Masts approvals and revenue enhancement
14.	Finalise the audit of the Transit Camps at Dhlamini Village	To facilitate the allocation of households
15.	Development of the future outlook plan (3 – 5 years)	To serve, guide and enhance development
16.	Reducing electricity losses (12%)	Enhance revenue collection <ul style="list-style-type: none"> • June 2020 – 33,924,634 Units • March 2021 – 16,928,153 Units
17.	Survey, subdivide and register municipal immovable properties	To enhance revenue enhancement

1. THE VISION, MISSION, CORE VALUES AND DEVELOPMENTAL PRIORITIES FOR THE MUNICIPALITY ARE AS FOLLOWS:

1.1 THE VISION, MISSION, CORE VALUES AND DEVELOPMENTAL PRIORITIES FOR THE MUNICIPALITY IS AS FOLLOWS

1.2 VISION

“Endumeni Local Municipality, a Dynamic, Inclusive and Responsive Centre of Service Delivery Excellence, Capable of Meeting Rural and Urban Development Needs of Its Residents for their Social and Economic Prosperity”

1.3 MISSION

“To work with our communities and stakeholders in planning and provision of services in an effective, efficient and economical way, ensuring accessibility and affordability whilst upholding good governance & clean audit status”

1.4 MOTTO

“TOGETHER IN PROSPERITY”

1.5 CORE VALUES

1.6 MUNICIPAL CHALLENGES

Below are some of the challenges which are being experienced by the municipality.

- Electricity theft,
- Non payment of services (Poor collection levels);
- Limited resource base;
- Unemployment rate;
- Mushrooming informal settlements; and
- Lack of proper management of the land reform farms for the intended purpose.

1.7 KEY DEVELOPMENT PRIORITIES

Table 67: Key developmental priorities were developed and prioritised which are used as an instrument in order to realise the developmental mandate, and they are as follows in a priority manner:

NO	PRIORITY	SPECIFIC AREA OF INTERVENTION
1.	Electricity	Infrastructure
2.	Water	Infrastructure
3.	Sanitation	Infrastructure
4.	LED (Inclusive Economic Growth)	Economic Development
5.	Human Settlement	Infrastructure
6.	Social Amenities (Sports Fields, Parks, Swimming, Community Halls, Media Centres, Cemeteries)	Social Amenities

7.	<p>Environmental Management</p> <ul style="list-style-type: none"> • Waste Management - Regional waste sites • Climate Change 	Infrastructure
8.	Access Roads	Infrastructure
9.	<p>Special Programmes</p> <ul style="list-style-type: none"> • Youth Development • Women and Children • Arts and Culture • People Living with Disabilities • Disaster Fund • Bursaries • Public Participation Programmes • Ward Allocation • Communication Strategic 	Social
10.	<p>Good governance and Policy</p> <ul style="list-style-type: none"> • Strengthen Policy Implementation • Sound financial management • Anti fraud and corruption 	Governance
11.	HIV / Aids programmes	Social

1.8 STRATEGIC OBJECTIVES

- ✚ To generate sufficient revenue for sustainability and viability
- ✚ To provide services effectively, timely & economically.

-  To revive municipal structures for effective collaboration and optimal functionality
-  To align organizational processes, policies & procedures with national & best practices
-  To streamline planning processes to promote rural & urban sustainably economical viable spatial development
-  To sustainably manage our environmental landscape

1.9 EMDUMENI MUNICIPALITY GOALS AND OBJECTIVES ARE ALIGNED WITH KZN PGDS

KZN PGDS STRATEGIC GOALS	Matters to be addressed Goals	Matters to addressed Objectives
Job Creation	Economically viable municipality prominent in investment and job creation	Improve support to local development
Human Resource Development	Ensure Effective and Efficient Human Resource Management	Improve Institutional and Organisational Capacity
Human & Community Development	Create an accountable municipal that encourage good governance	Effective implementation of special programmes
Strategic Infrastructure	Eradicate of service Delivery backlog and improve access to basic services and operation and maintenance of infrastructure projects	Improve access to basic Services and maintenance of Municipal assets.

Environmental sustainability	Disaster Management and Building Control and Compliance	To ensure improved response to Disasters
Governance and Policy	Create accountable municipality that encourages good corporate governance	Improve functional Municipality oversight committees and elevate coordination of public participation
Spatial Equity	Facilitate integrated Land Use Management and spatial planning	Ensuring Improvement of spatial equity and Land use Scheme

Table 66: GOALS AND OBJECTIVES ARE ALIGNED WITH KZN PGDS

1.10 DEVELOPMENT STRATEGIES

TABLE 67: ENDUMENI LOCAL MUNICIPALITY HAS REVIEWED THE DEVELOPED STRATEGIES IN LINE WITH THE DEPARTMENT OF CO-OPERATIVE GOVERNANCE AND TRADITIONAL AFFAIRS COMMENTS AND ALSO DEVELOPMENTAL PRIORITIES IN ORDER FOR THE INTENDED RESULTS TO BE ACHIEVED AND TO ENHANCE THE SERVICE DELIVERY THEREBY IMPROVING THE COMMUNITIES LIVES. THE FOLLOWING STRATEGIES HAVE BEEN DEVELOPED FOR THE 2021/2022 IDP REVIEW.

ORGANISATIONAL SCORECARD/TOP LAYER SDBIP									
IDP REF. NO.	OBJECTIVE	REF	STRATEGIES	REF	INDICATORS	ANNUAL TARGET	Responsible Dept	Budget	Portfolio of Evidence
MUNICIPAL TRANSFORMATION AND INSTITUTIONAL DEVELOPMENT									
MT1	Ensure Functional Performance Management System implemented	MT1.1	Implementation of PMS Policy & Framework	MT1.1.1	Date PMS Framework/Policy reviewed and adopted	30-Jun-22	Planning Department	R 10,000	Council Resolution
MT2	Improve Institutional and Organisational Capacity	MT2.1	Filling of identified critical posts	MT2.1.1	Date organizational structure reviewed and adopted	30-Jun-22	Corporate Services		Council Resolution
				MT2.1.2	% of critical identified posts filled	100%	Corporate Services		Signed performance agreements

MT2.2	Employment Equity Plan adopted	MT2.2.1	No. of people from employment equity target groups employed in compliance with approved equity plan	1	Corporate Services	Appointment letters
		MT2.2.2	Number of persons with disabilities employed in terms of employment equity Plan	1	Corporate Services	Appointment letters
MT2.3	Preparation and submission of the Employment Equity Annual Report to the Department of Labour	MT2.3.1	Date of the Employment Equity Plans to be submitted to the Department of Labour	15-Jan-22	Corporate Services	Council Resolution
MT2.4	Skills Development Plan adopted and implemented	MT2.4.1	Date Skills development Plan adopted	30-Jun-22	Corporate Services	Council Resolution

MT3	To ensure an effective and efficient HR systems that addresses Human resources within the municipality	MT3.1	Revised HR Strategy	MT3.1.1	Date Human Capital Strategy reviewed and adopted	30-Jun-20	Corporate Services		Council Resolution
			Develop and adopt all HR policies	MT3.1.2	Date all Human Capital policies reviewed and adopted	30-Jun-22	Corporate Services		Council Resolution
			Preparation and submission of the Workplace Skills Plan	MT3.1.3	Date the Final Workplace Skills Plan Submitted to LGSETA	30-Apr-22	Corporate Services		Acknowledgement of Receipt from the LGSETA
MT4	To ensure the effective and efficient functionality of the municipality.	MT4.1	Develop and adopt I.T. Governance Framework	MT4.1.1	Date all IT policies reviewed and adopted (IT Security Policy; IT Governance Framework; ITC Restore and Backup Policy)	30-Jun-22	Corporate Services		Council Resolution
MT5	Ensure Functional Performance Management System implemented	MT5.1	Implementation of PMS Policy & Framework	MT5.1.1	Date PMS Framework/Policy reviewed and adopted	30-Jun-22	Planning & Economic Development Department		Council Resolution

				MT5.1.2	No. of performance agreements signed for filled positions of the S54/56 posts	6	Planning & Economic Development Department		Signed Performance Agreements
				MT5.1.3	Advertisement of the signed performance agreements and submission to COGTA	28-Feb-22	Planning & Economic Development Department		Copy of the advert / Acknowledgement of receipt by COGTA
				MT5.1.4	No. of s54/s56 performance assessments conducted by 30 June 2022	1	Planning & Economic Development Department		Agenda/ attendance register
				MT5.1.5	Date Final 2020/21 Annual Report Adopted	31-Mar-22	Planning & Economic Development Department		Council Resolution
				MT5.1.6	No of B2B quarterly performance reports submitted to Provincial CoGTA	4	Planning & Economic Development Department		Quarterly reports / Acknowledgement of receipt from COGTA

MT6	Ensure Functional Performance Management implemented	MT6.1	Cascading of Performance Management System	MT6.1.1	Develop Individual Performance Management Policy by September 2021	30-Sep-21	Corporate Services		Council Resolution
				MT6.1.2	Workshop for all middle managers to cascade the Performance Management System	30-Oct-21	Corporate Services		Agenda/Attendance Register
				MT6.1.2	Develop Work Plan to cascade Performance Management System	31-Mar-22	Corporate Services		Work Plan Report
MT7	To enlighten Councillors with legislation and standing orders	MT7.1	To enable councillors to perform their duties	MT7.1.1	Council Orientation to be held by 31 March 2022	31-Mar-22	Corporate Services		Agenda/Attendance Register
MT8	Effective Labour Relations	MT8.1	Compliance with legal prescripts	MT8.1.1	Number of quarterly reports on litigation cases submitted to Municipal Manager	4	Corporate Services	R1,400,000.00	Monthly report/ minutes

				MT8.1.2	Number of Monthly report Disciplinary cases submitted to the Portfolio	12	Corporate Services		Monthly report/ minutes
				MT8.1.3	Number of monthly reports on Municipal vehicles with proper audit of kilometers per month	12 reports	Corporate Services		Monthly Report with schedules of all municipal vehicles
MT9	To ensure effective and efficient internal and external communication strategy	MT9.1	Develop and implement Communication Framework/ Strategy	MT9.1.1	Adoption date of the Communication Framework/Strategy	30-Jun-22	Office of the MM	R 270,000	Council Resolution

SECTION E: STRATEGIC MAPPING

1. SPATIAL DEVELOPMENT FRAMEWORK

1.1 BACKGROUND

Endumeni is one of four Local Municipalities located within the District Municipality of Umzinyathi within the valleys of the Biggarsberg Mountain Range with the two main towns of Dundee and Glencoe located at the base of the Indumeni Mountain.

Endumeni is located on the northern edge of the Umzinyathi DM and is bordered by the Amajuba District Municipality to the North, the Uthukela District Municipality to the South West, the Msinga Local Municipality to the South and Nquthu Local Municipality to the East. Endumeni constitutes 11% of the Umzinyathi DM.

Endumeni is 1,612km² in extent, 55km wide from north-west on the R33/R602 and 30km on the R33/R621 south-east to north-west. In the context of national transportation systems, the Endumeni Municipality finds itself “out on a limb” situated away from the national road network. At a regional level, the municipality is located on an important regional route servicing the agricultural regions of northern KwaZulu-Natal and southern Mpumalanga. Endumeni dominates the district economy as it serves as the key administrative, educational and economic centre for the entire district.

Dundee is the centre from which tourism based on the cultural heritage of the Zulu Kingdom and 'Battlefields' is emphasized and managed to some extent. Glencoe serves as a secondary centre to Dundee. The municipality, in conjunction with its north-western neighbour Dannhouser and Emandlangeni Local Municipalities, is branded as the battlefields region of the Zulu Kingdom spanning a history of conflict between Zulu and Boer, Boer and Brit and Brit and Zulu. This branding is of international and regional significance.

1.2 DUNDEE TOWN

1.2.1 LOCATION

Dundee is centrally located within Endumeni Local Municipality. It is situated in the picturesque valley of the Biggarsberg Mountains in KwaZulu-Natal. It is positioned as a focal point where the major provincial routes diverge within it. This reinforces its status as a municipal node. At a provincial level, it is equidistant from both Johannesburg and Durban.

1.2.2 ROLE AND FUNCTION

Dundee is 46.60 km² in terms of geographical size and has a population of 34 924 people. Dundee was established in 1882 as a coal mining town which was discovered by the boer farmers close to the surface. It is the largest town within UMzinyathi District Municipality. Dundee town functions as a regional rural service center to the surrounding agricultural areas. Dundee is a very important administrative and commercial centre for the District and Local Municipalities. It houses both Endumeni and UMzinyathi Municipal Offices. The CBD is currently provided with piped water. Adjoining areas are also well served with water reticulation covers within the CBD and adjoining areas in the immediate vicinity.

1.2.3 STRUCTURE

Dundee is well layout in grid iron pattern which is common for the urban areas. There is a distinct Central Business District surrounded by residential areas and Avon, an industrial area. Light industrial workshops providing farming equipment line Karen Landman at the entrance of the town. The main vehicle routes that traverse the Dundee town CBD are the R33, R602 and R68. While pedestrian activity occurs on all the sidewalks throughout the town, there is a noticeable amount of pedestrian between Sibongile township, the CBD and surrounding residential areas, through the open space alongside Ziga Sithole Road and on Road 17 which going on to Tandy Street.

1.2.4 LAND USE PATTERN

The land use pattern within Dundee can be described as follows:

- a) Businesses, Offices and Commercial: a clearly defined CBD comprises of diverse land use activities which includes retail and businesses.
- b) Tourism accommodation: this includes bed and breakfast establishments and lodges within town.
- c) Industrial and manufacturing: there are several industrial activities that are found on the southern part of Dundee.
- d) Residential and social facilities: there are a number of residential areas which surrounds the town. These exist with the surrounding social activities such as churches, schools and parks.

1.2.5 SPATIAL PLANNING CHALLENGES

The following are the challenges that face the town:

- a) Illegible town layout map.
- b) Restricted lay-by close to an intersection.
- c) Undefined pedestrian walkway.
- d) Informal settlements occurring at the extension of Sibongile Township.
- e) Some of the private signage overpowers the town's entrance feature.
- f) Lack of public amenities like street furniture, ablution facilities
- g) Aesthetic quality and character of the town not maintained.
- h) Lack of new residential/housing products such as cluster housing.
- i) A large number of roads are in dire need for upgrading and maintenance.

1.2.6 SPATIAL PLANNING PROPOSAL

The spatial planning proposals are as follows:

- a) Integrated mixed residential development.
- b) Informal Settlement Upgrade around Sibongile Township.
- c) Development of a road to Glencoe into an Urban Linkage Activity Spine in order to unlock land parcels that could be used for interface development.
- d) Delineation of the urban edge in order to promote compact and integrated development.
- e) Upgrade of informal settlements, greening and beautification of the entry of the town (Craigside).
- f) Implementation of Dundee Regeneration Plan.

1.3 GLENCOE TOWN

1.3.1 LOCATION

Glencoe is located 8 km from Dundee Town. It is located on the main route from Ladysmith to Dundee. As the main entry town from Alfred Duma Local Municipality, it is highly accessible and visible at the sub-regional level. It is surrounded by a number of commercial farming areas as well as the mining areas.

1.3.2 ROLE AND FUNCTION

Glencoe is 25.23 km² in terms of the geographical size and has a total population of 17 548 people. Glencoe, although, enjoys a high level of accessibility and visible, the town is very small compared to Dundee. Literature suggests that Glencoe was established in 1934. Its establishment was motivated by the transportation of coal from Dundee to

Durban and Johannesburg. It was then considered important to have storage facilities and transportation depo areas for the coal. Over the years, the town has faced decline and lack of growth. It is currently a small decaying town with dilapidated buildings and roads that are in a state of disrepair. Glencoe currently functions as a struggling commercial and social centre to the surrounding hinterlands. Regardless of the challenges that have defamed it, Glencoe still has a potential to become a notable node to support and contribute towards the economy. The locality of the town is significant because its use to be one of the areas that created and sustained a vast number of job opportunities in the past, but due to the scaling down of the coalmines in the area, this situation has changed drastically over the years. However, this node is still serving a purpose in terms of the provision of housing and other support infrastructure for fits inhabitants.

1.3.3 STRUCTURE

Glencoe is well layout in grid iron pattern which is common for the urban areas. The town of Glencoe has a clearly demarcated CBD. However, this CBD is physically separated by the Railway line. The residential areas surround both the CBD and the Railway Area. The settlement patterns is fairly organized due to the conventional layout of the towns.

1.3.4 LAND USE PATTERN

The land use pattern within Glencoe can be described as follows:

- a) Commercial Centre: this includes the CBD area with mixed land uses. This is centrally located within the town.
- b) Railway Station: this station is located on the northern part of the CBD.
- c) Industrial: these manufacturing, storage and industrial sites are located on the southern part of the municipality.
- d) Residential: the residential land uses surround the whole town and stretches towards Sithembile Township.

1.3.5 SPATIAL PLANNING CHALLENGES

The following are the challenges that have been identified:

- a) Dilapidated and ageing infrastructure.
- b) Economic stagnation.

- c) Lack of new residential/housing products such as cluster housing.
- d) Housing stock within Glencoe comprises mainly of old and tired buildings.
- e) A large number of roads are in dire need for upgrading and maintenance.

1.3.6 SPATIAL PLANNING PROPOSAL

The spatial planning proposals are as follows:

- a) Development of a road to Dundee into an Urban Linkage Activity Spine in order to unlock land parcels that could be used for interface development.
- b) Integrated residential development including Middle Income Housing.
- c) Land use integration as a means to address the course grain-land use pattern.
- d) Urban renewal programme which may include infrastructure upgrade, redevelopment and refurbishment of buildings. CBD expansion including gateway developments at strategic points.
- e) Delineation of the urban edge in order to promote compact and integrated development.
- f) Strengthening spatial linkages with the neighboring settlements such as Sithembile.

1.4 WASBANK TOWN

1.4.1 LOCATION

Wasbank is located 25km southwest of Dundee within proximity to Wasbank River. It is accessible by R602 and P33-1 Provincial Routes from the towns of Dundee and Ladysmith. It is surrounded by the peri-urban settlements that emerged in the recent years.

1.4.2 ROLE AND FUNCTION

Wasbank is 6.29 km² in extent and has a total population of 1 323 people. It was developed as a service centre for the surrounding farming community and the rural settlements. It is poorly developed with social and economic infrastructure and has declined in significance as a service centre. As a result, Wasbank has become just another neglected towns in the spatial system.

1.4.3 LAND USE PATTERN

An analysis of the land use pattern in Wasbank reveals that the area is a simple residential area and a typical small town. Land uses in the area include the following:

- a) Residential use dominated by typical old houses.
- b) Social facilities such as sports fields, schools, churches, community hall and a clinic all located.
- c) Rural/ Informal settlement occurring as an extension to the township.
- d) Industrial/ manufacturing land located mainly along the main road.
- e) Central area which comprises of a range of small scale economic and business uses.

1.4.4 STRUCTURE

Wasbank is laid out in the form of a grid. The advantages of this pattern include the ease efficiency in the delivery of services, and urban structure, which improves functionally, and systemic spread of land uses in space.

1.4.5 SPATIAL PLANNING CHALLENGES

Spatial issues facing Wasbank could be summarised as follows:

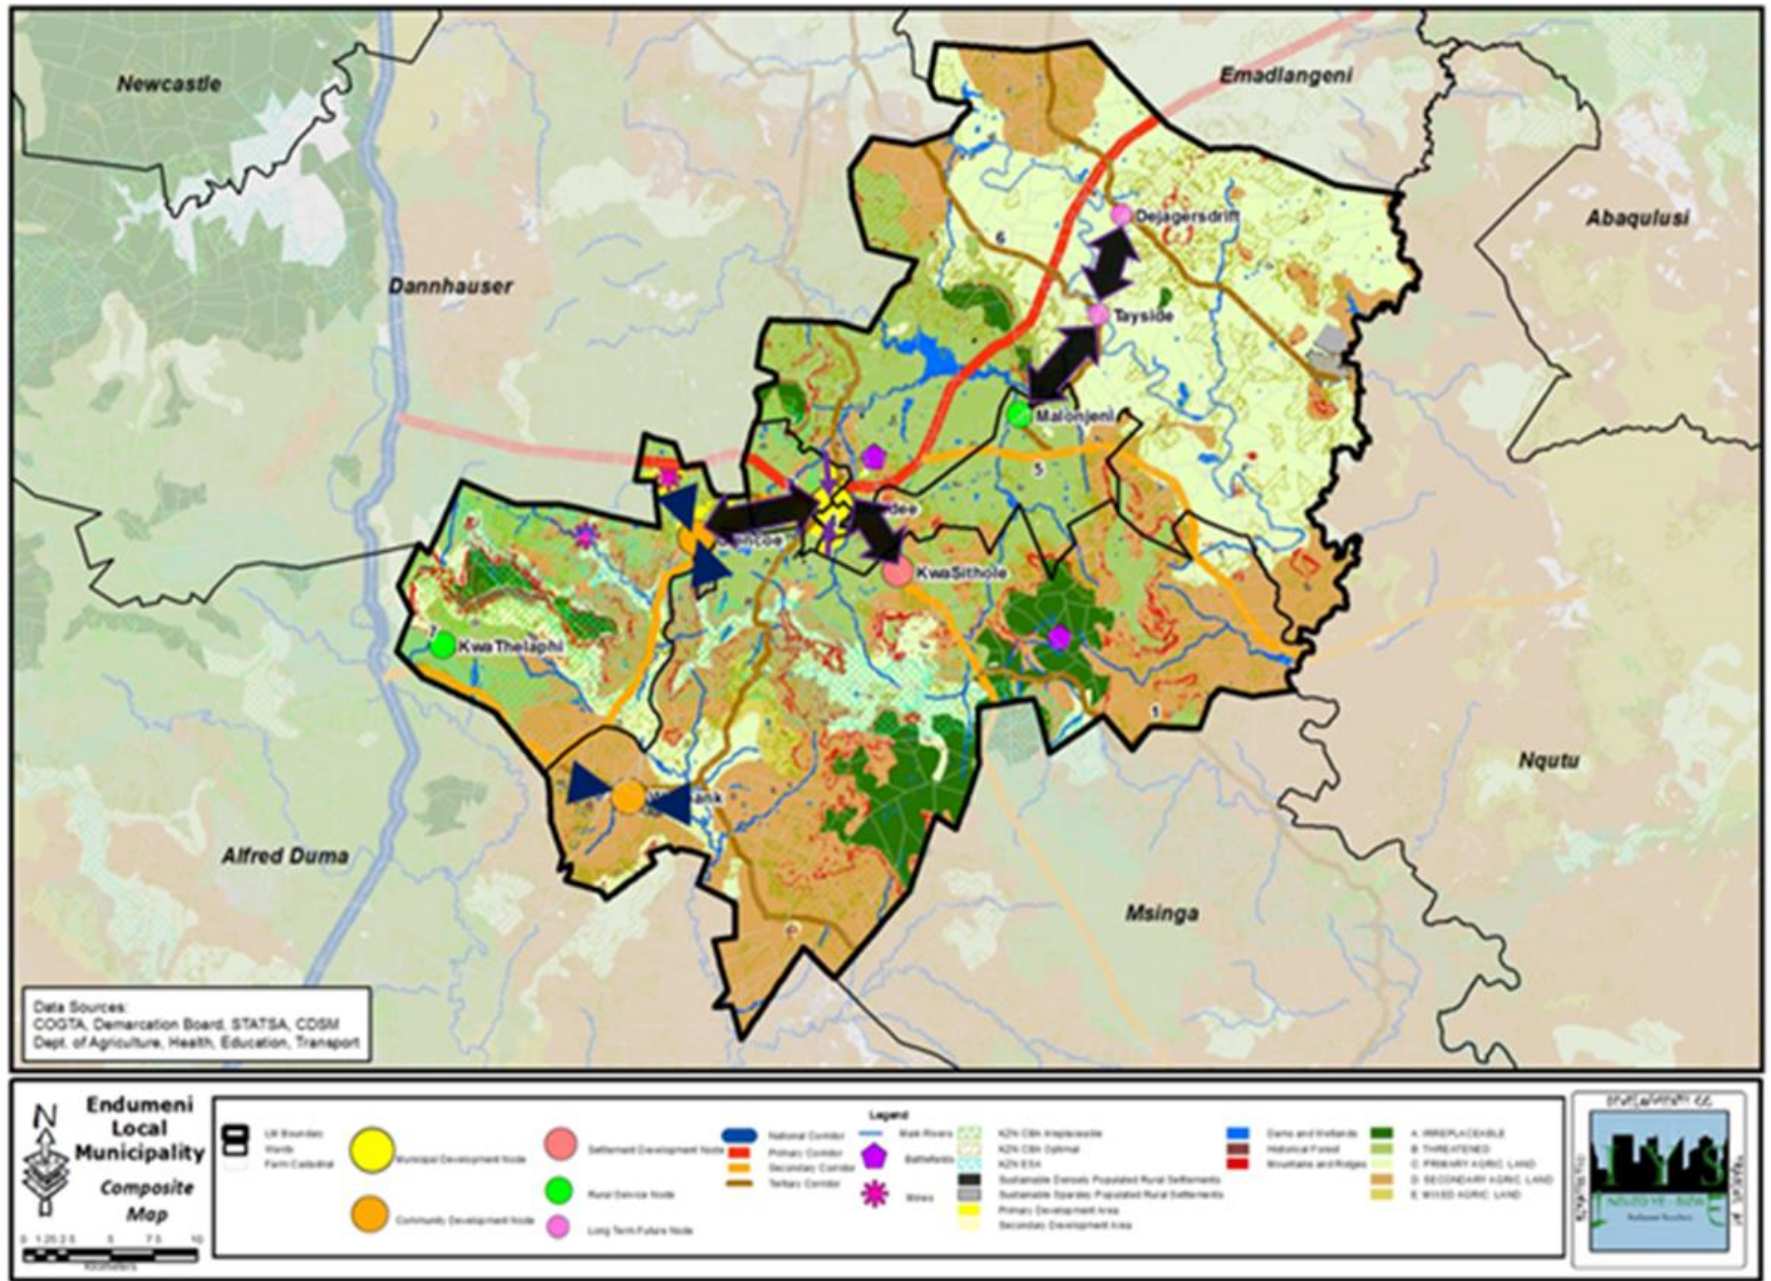

- a) Urban renewal programme which may include infrastructure upgrade, redevelopment and refurbishment of buildings.
- b) CBD expansion including gateway developments at strategic points.
- c) Redefining the role of the town.
- d) Need to enhance functional and spatial integration into the surrounding areas.

1.4.6 SPATIAL PLANNING PROPOSAL

The spatial planning proposals are as follows:

- a) Undertake and pilot an urban renewal programme targeting infrastructure upgrade, redevelopment, refurbishment of buildings and amenity building.
- b) Development of Gateway at strategic points.
- c) Wasbank Economic Assessment.
- d) Urban Edge re-adjustment.

DIRECTION FOR FUTURE GROWTH

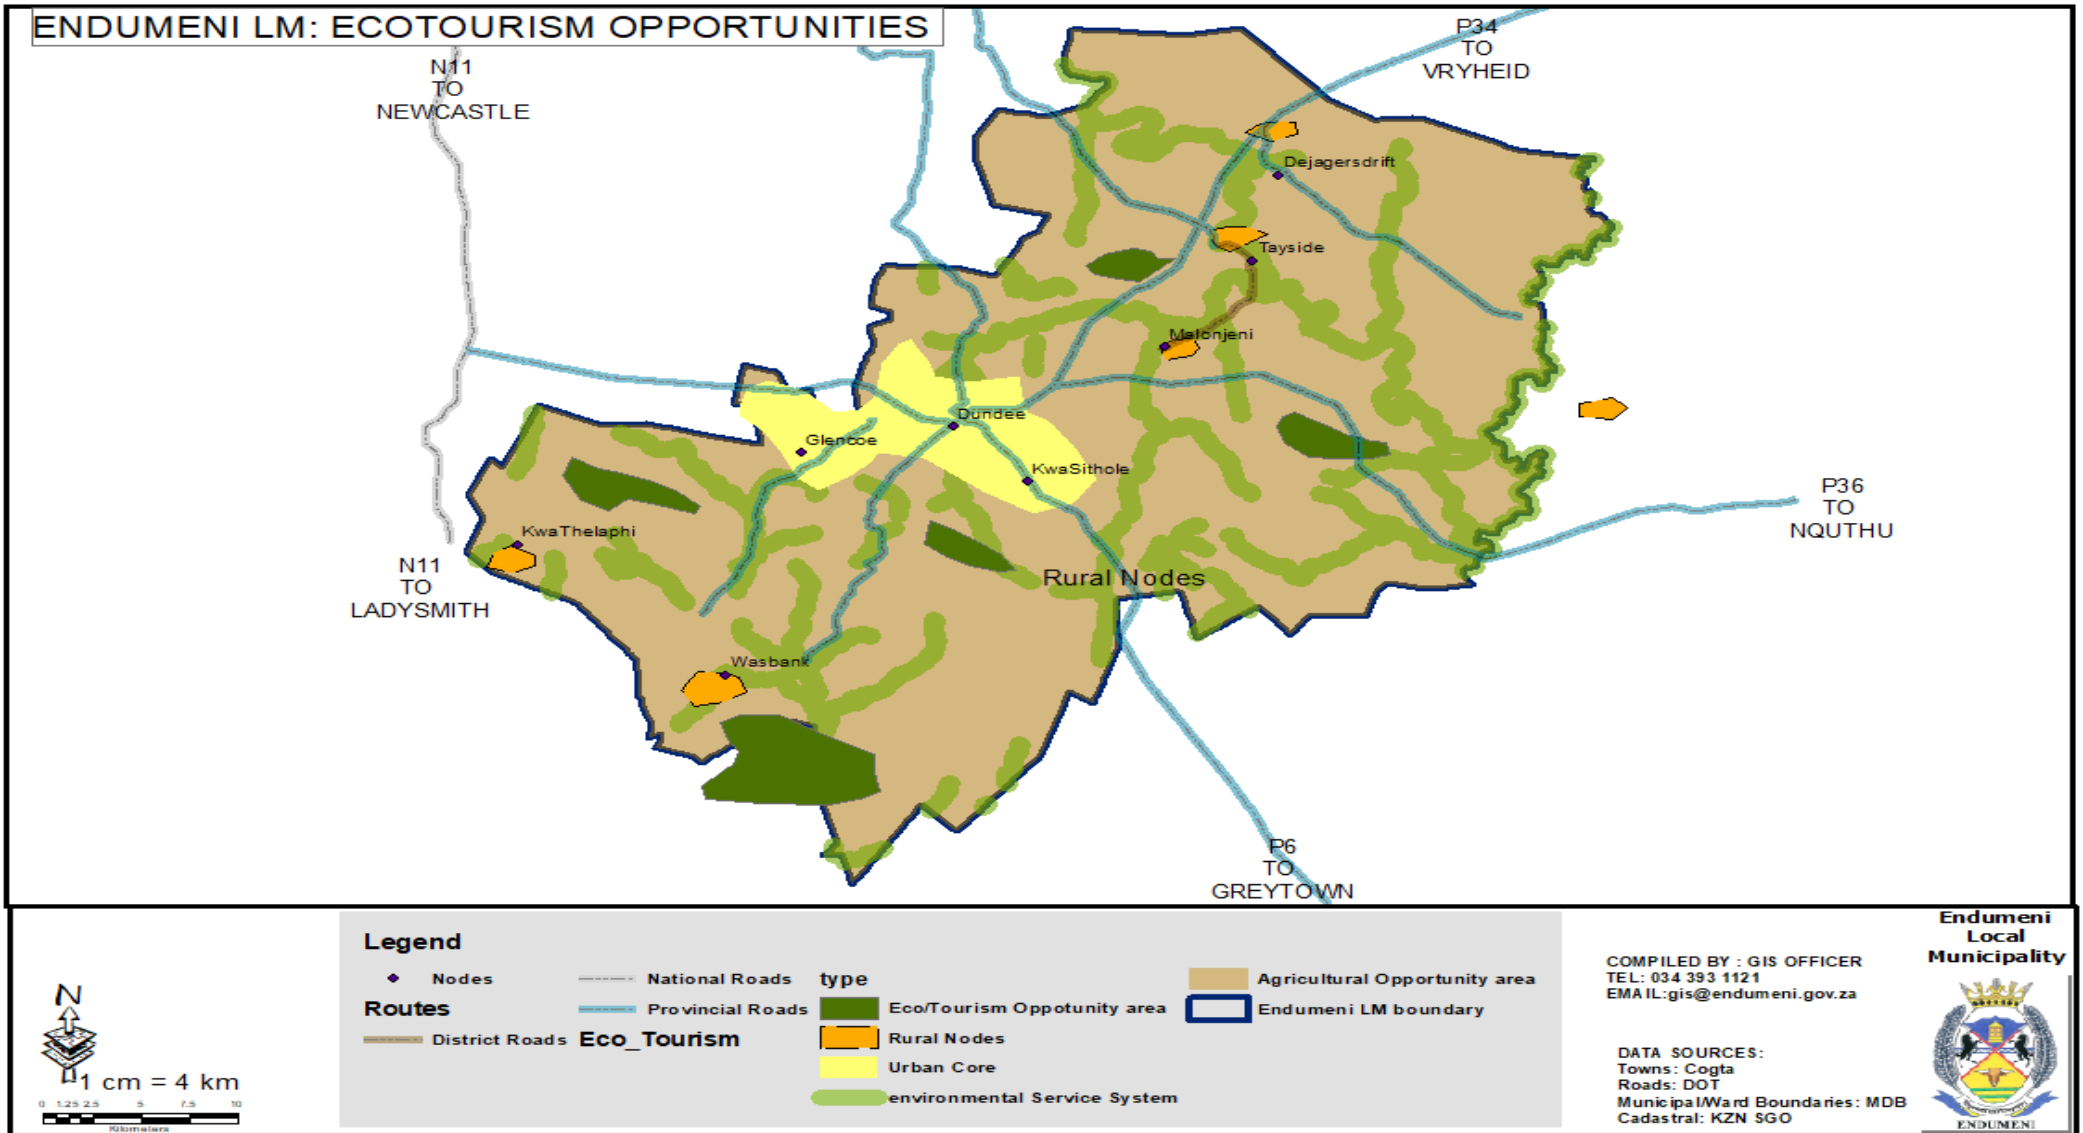

1.5 TOURISM AREAS

Endumeni has few mobility tourism routes which includes the R33 and Battlefields. A number of farms that are located along these routes have diversified from traditional agricultural land uses to agri-tourism uses over the years. The municipality has a great variety of tourism assets and accommodation establishments (such as hotels, bed and breakfasts and guesthouses). The local tourism sector in Endumeni had a strategy session in regard to developing the tourism market within the municipality. It has been recognized that battlefield tourism is a niche market that does not appeal to everyone. However, the area has numerous interesting and unusual places to offer than just battle sites. There are Zulu cultural experiences, craft and birding routes, the Talana museum, game reserves, fishing in dams and rivers, white-water rafting, horseback safaris and a host of other adventures.

There is a wide range of accommodation available from hotels to caravan parks, as well as, a number of gracious homes that have been turned into tourist accommodation. The KZN PSEDS has identified areas with a large impact on Tourism opportunities, as a consequence Endumeni constitutes Cultural Tourism in accordance to the Plan. This is because it is dominated by cultural tourism, bearing in mind that Dundee is centrally situated to a number of Anglo-Zulu and Anglo-Boer war battlefields. The local Museum, Talana Museum, is one of the foremost museums in the country. Dundee forms a pivotal part of the northern KwaZulu-Natal tourism route, as well as itself being a tourist destination. The R33 and R621 form the central spine of the secondary provincial priority corridor. The focus of this corridor is agriculture and tourism.

Cultural assets in the area include:

- ✚ Monuments and Museums (e.g. Talana Museum);
- ✚ Maria Ratschitz Mission; Battlefield sites (Talana and Lennox Hills);
- ✚ Other Cultural sites i.e .Talana Crafts, Talana Zulu Cultural Villafe, Iron Age smelting sites; and
- ✚ Rifleman's Road and Red Soldier's March Battlefield Routes. Tourism is also linked to the natural assets of the region and there are three formal game reserves within Endumeni with potential for more. Kamelkop; Ilanga Game Ranch; and Botha Group Game Ranch.
- ✚ A complex topography (rolling hills and mountains) across large sections of the district has an aesthetic appeal and holds considerable tourism development potential.

Map 53: Ecotourism Opportunitie

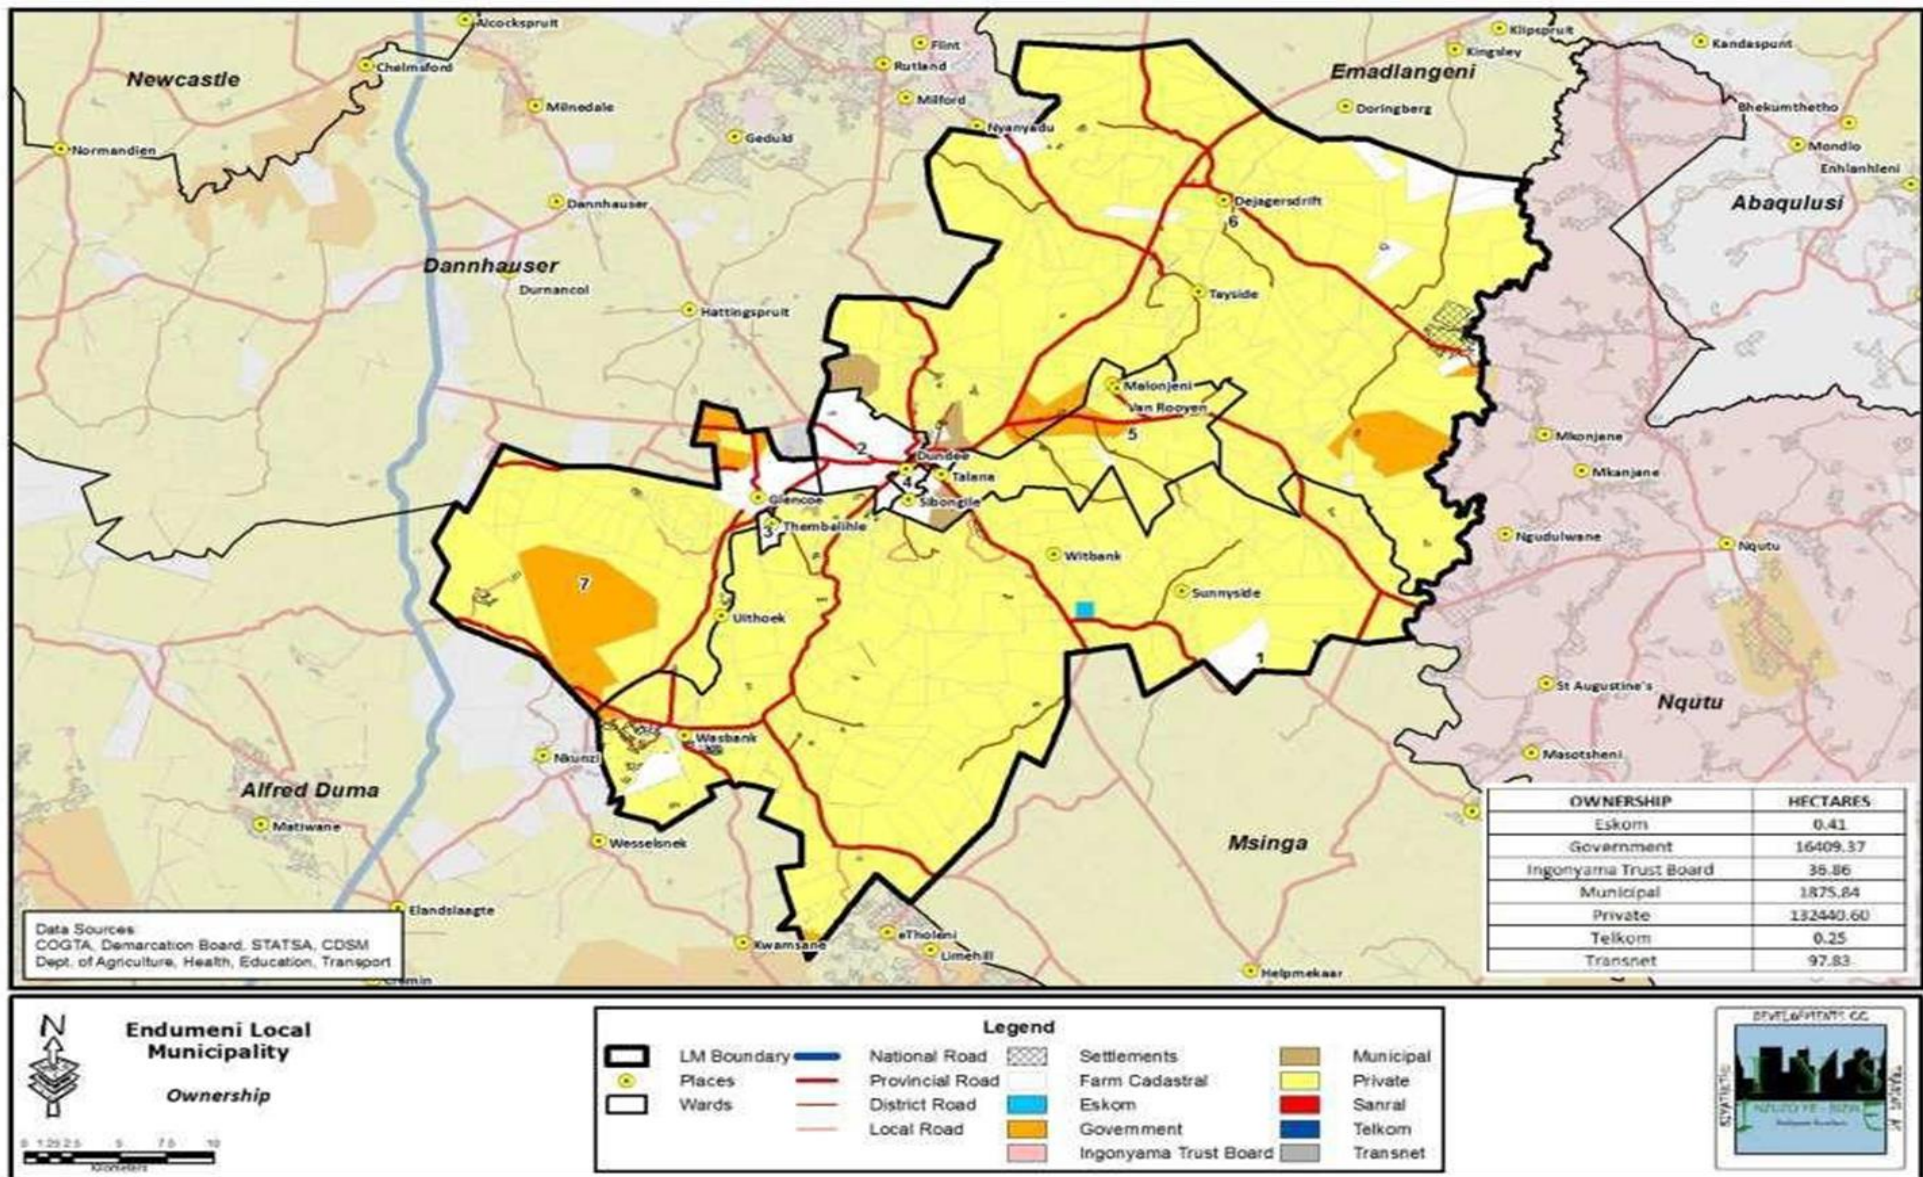

1.4 LAND USE MANAGEMENT

The Spatial Planning and Land Use Management Act, 2013 (Act No. 16 of 2013) better known as SPLUMA requires all municipalities across the country to develop and adopt a "Wall-to-Wall Schemes" throughout their area of jurisdiction. This must take place within 5 years from the commencement of the Act. In addition, SPLUMA requires that the wall-to-wall scheme be reviewed every after 5 years in order to achieve consistency within the Municipal Spatial Development Framework. Endumeni has commenced with a process to develop a wall-to-wall land use management scheme for the area of jurisdiction. It must contribute towards sustainable development and improve governance (as it relates to land use management) within Endumeni. As such, alignment and integration with the other tools (land audit, valuation roll, etc.) should be maintained. The introduction of the scheme in rural areas should:

- ✚ Provide for the participation of municipal officials in all land allocation processes as undertaken by traditional councils.
- ✚ Involve the participation of local communities in Endumeni, particularly traditional councils and other structure that are responsible for spatial planning and land allocation.
- ✚ Include the development of maps, systems and procedures for effective decision making to guide traditional councils in the execution of this function. Incorporate the KwaZulu-Natal Rural Land Use Norms and Standards as soon as these are gazette.

1.5 LAND OWNERSHIP

Land ownership within Endumeni is diverse but the dominant owner is Private Ownership (88%). This is followed by Government (11%), Municipal (1,2%) and Transnet (0,1%). The other minimal landowners are Ingonyama Trust Board and Telkom.

Map 57: Ownership

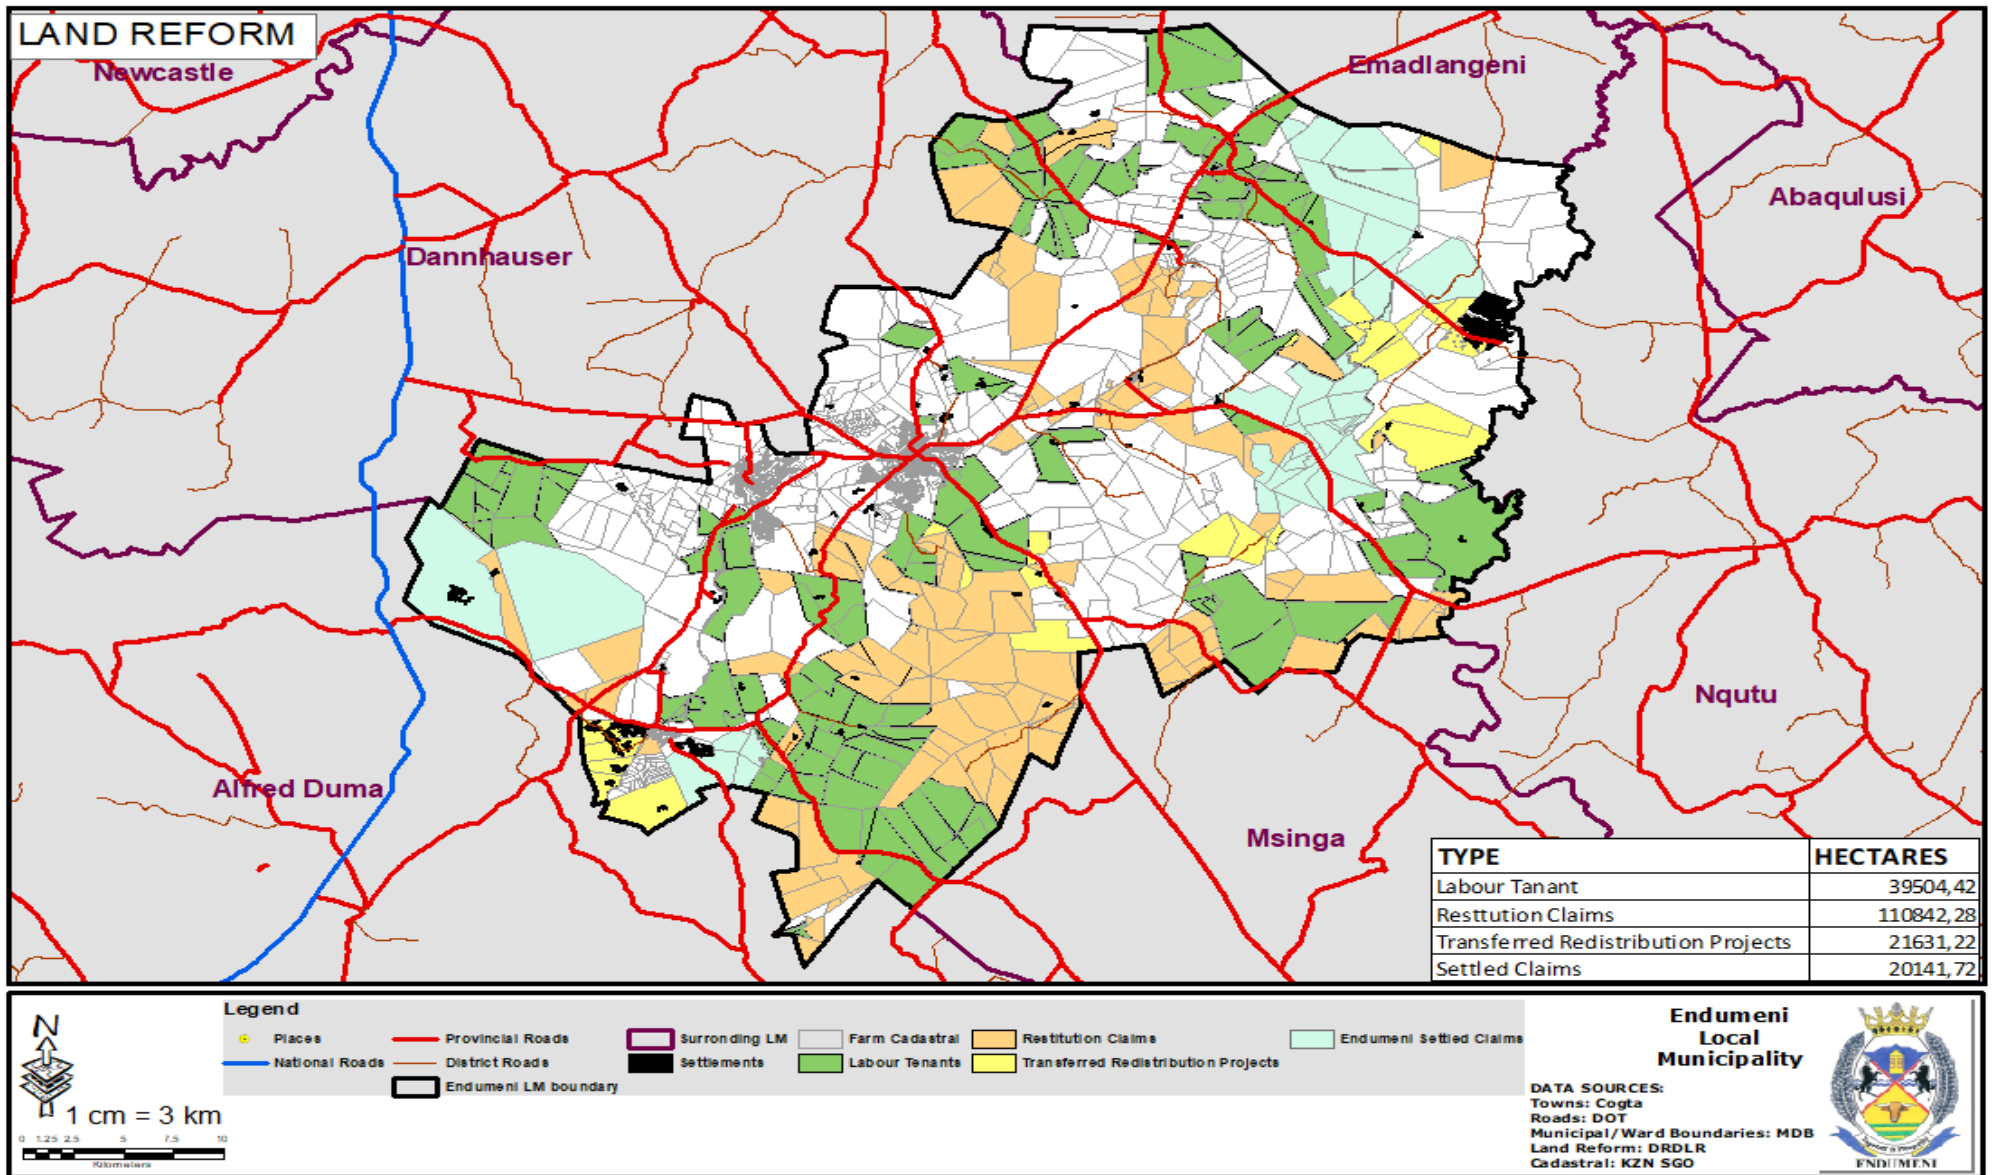

1.6 LAND REFORM

A total amount of land that is under claims within Endumeni is estimated at 171 977.92 ha. Labour tenant claims amounts to 39 504.42ha, Restitution Claims occupy 110 842.28ha and the transferred redistribution projects amounts to 21 631.22ha. there are over 1700 beneficiaries for the transferred redistributed projects. The overarching goal will be to ensure agrarian reform is realized from these projects as these are located within good agricultural land so these should be used as productive farms. The municipality also has a responsibility in terms of promoting proper land use controls which includes avoiding of uncontrolled settlement growth within these agricultural areas. Table 68 below is descriptive indication of these transferred land reform projects.

Project Name	Legal Entity Name	Number of Beneficiaries	Size of the land
Croydon	Senzangakhona	36	386

Map 58: Land Reform

1.7 LANDSCAPE CHARACTER AND BUILT FORM

Endumeni (particularly the town of Dundee) has several old heritage buildings and sites given its position in relation to the historical battlefields. The built form within the town is low rise with most buildings being either single or double storey. The municipality in association with Amafa aKwaZulu needs to play an active role in terms of the protecting these buildings from demolition or any transformative destruction. The cultural assets in the area include: Battlefields sites (Talana, Blood River/ Ncome, Elandslaagte, Fugitives Drift, Helpmekaar, Isandlwana, Rorkes Drift); Monuments and Museums (Rorkes Drift, Talana Museum, Prince Imperial, Fort Pine, MOTH Museum, Fort Mistake, etc.); Cultural Attractions and Crafts (Bushman Paintings, Iron Age Smelting Site, ELC Craft Centre, Talana Crafts, Talana Zulu Cultural Village); and Maria Ratschitz Mission. There are a number of natural features as well which include: The rivers; Rugged terrain; and Other nature based assets (biodiversity, wetlands, habitats and breeding sites, nature reserves and conservation areas). Given the fact that these are mainly found within farms, there are limited built form features that may threatened these landscape features. The key goal will be maintaining the existing cultural assets and conserve the natural resources. This importance of these landscape features is evident from the role that these play in terms of tourism within the area and the downstream beneficiation thereof.

1.8 DISASTER MANAGEMENT AREAS

1.1 BACKGROUND

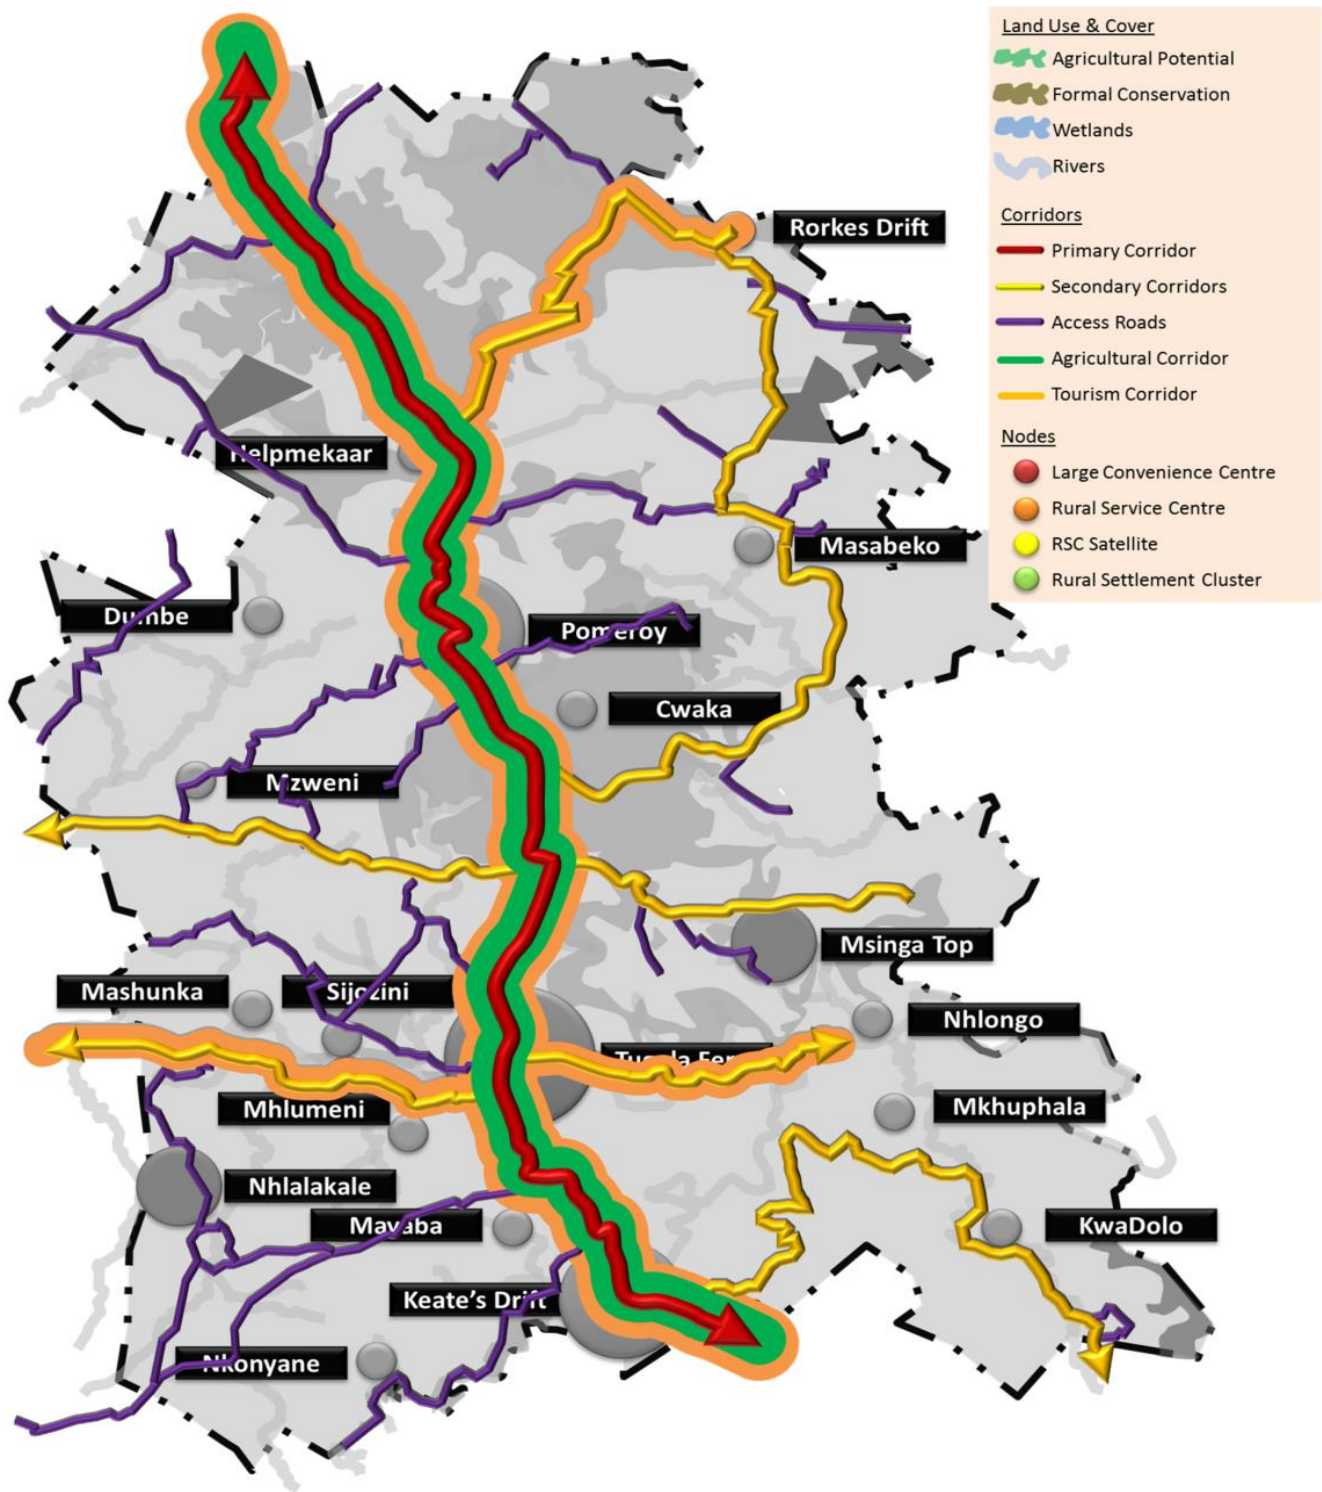

In terms of Section 53 of the Disaster Managements Act of 2002 (Act 57 of 2002), each municipality (Metropolitan, District and Local) must prepare a Disaster Risk Management Plan for its area of responsibility. In order to develop a Disaster Risk Management Plan, it is necessary to conduct a Risk Analysis which will identify and prioritise potential hazards and threats that are likely to occur within the area of responsibility of the Municipality. Endumeni has prepared its Disaster Risk Management Plan which has reflects Disaster Risk Profile, that is unique to the whole of the Endumeni Local Municipality.

1.2 NATURAL HAZARDS

The list of high-profile risks that were identified include the following: Floods (landslides); Fire (veld / structural); Drought; Storms (snow/wind/hail); Epidemics (illness); Soil Erosion; Railway; Water Contamination; and Lightning significant hazard between May and June.

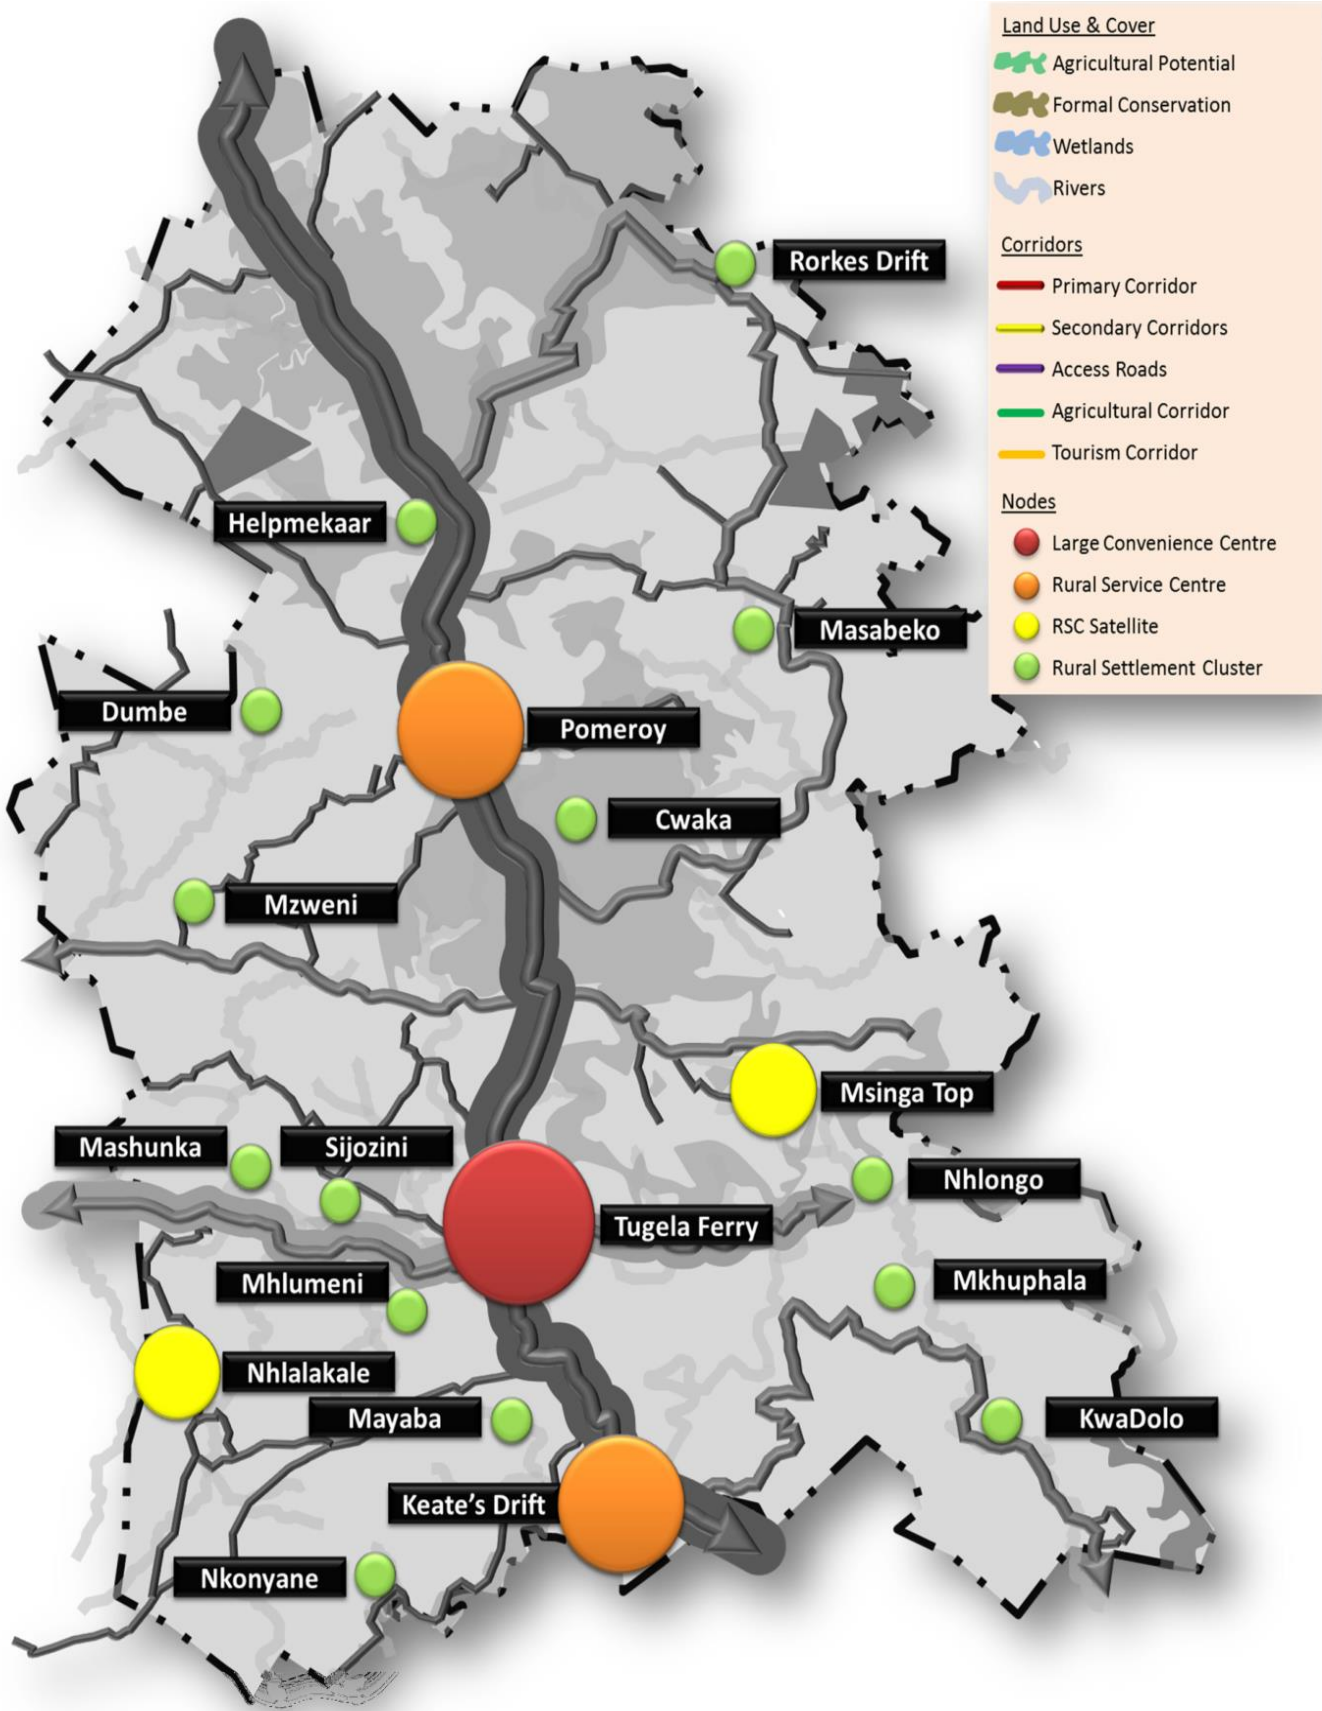

SPATIAL ALIGNMENT WITH NEIGHBOURING MUNICIPALITIES

MSINGA LOCAL MUNICIPALITY SDF – PROPOSED CORRIDORS

Source: Vuka Planning Africa 2012

MSINGA SDF

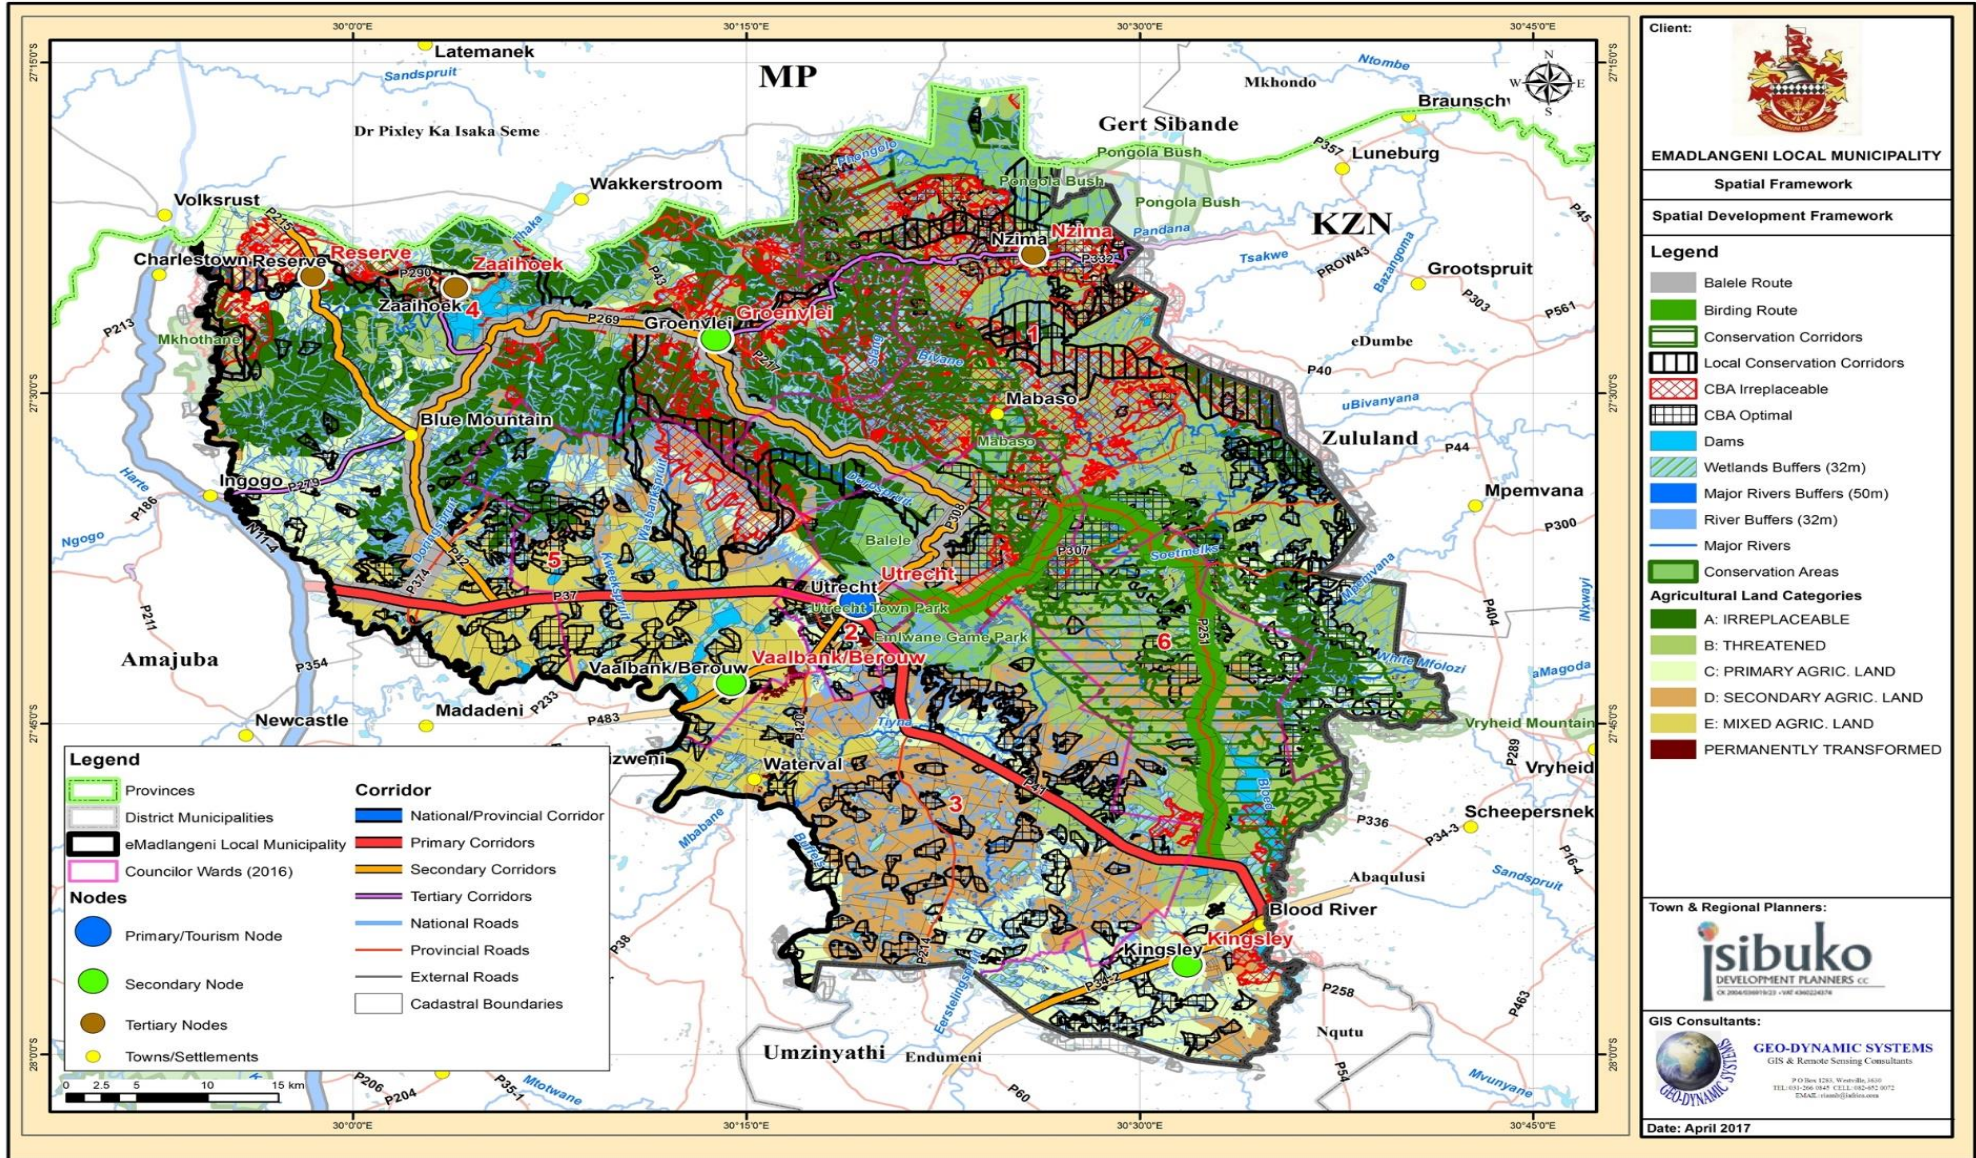

Source: Vuka Planning Africa 2012

Msinga LM Alignment Aspects

- ✚ Development Corridors - R33 is identified a primary corridor. A tourism corridor from Pomorey to Helpmekaar and to R74 is also linked to Dundee
- ✚ Cross Boundary Dependencies - Helmekaar Rural Settlement cluster and Rorker Drift rural Service centre.
- ✚ Cross Boundary Co-operation - The provision of services should not be duplicated on the identified nodes within the region.
- ✚ Potential Contradictions - N0 potential contradictions discovered.

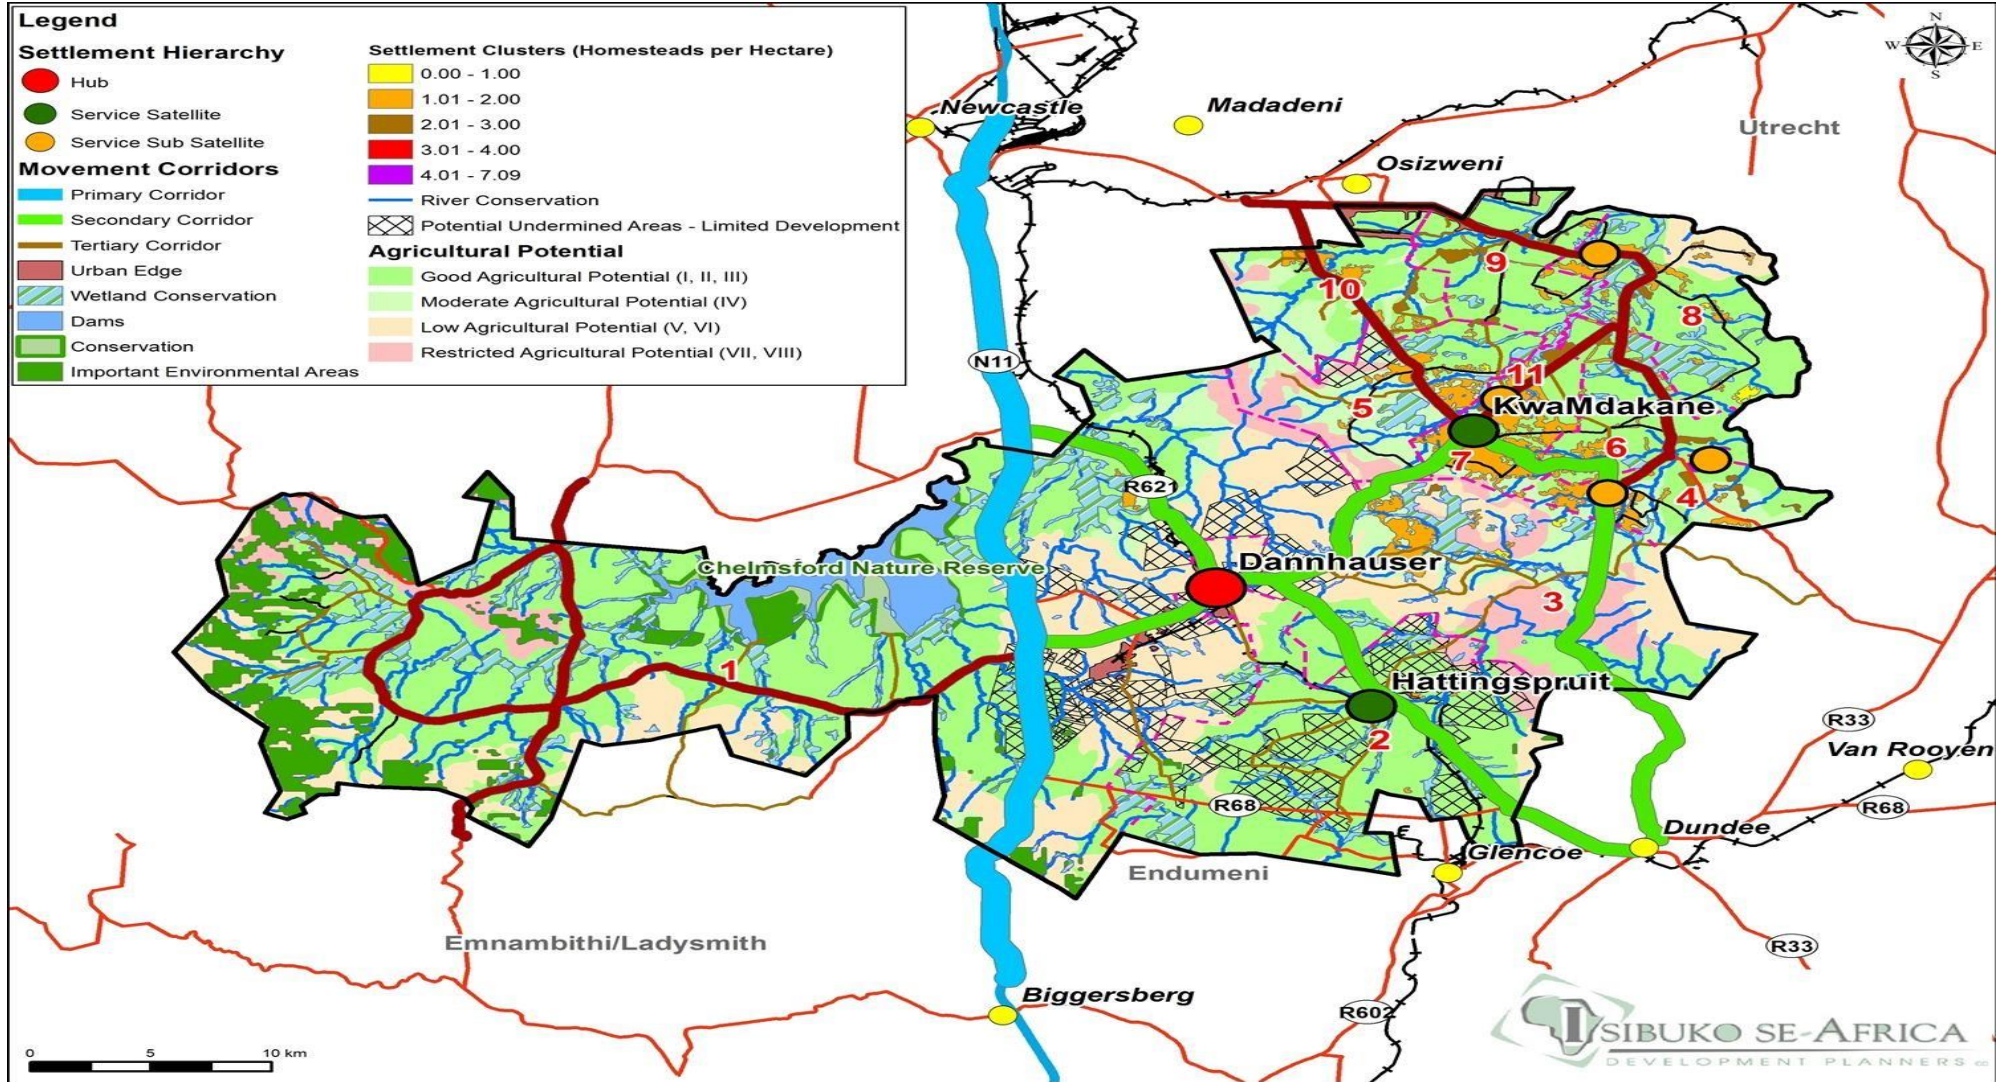

EMADLANGENI LOCAL MUNICIPALITY SPATIAL DEVELOPMENT FRAMEWORK

Emadlangeni Local Municipality Alignment Aspects

- ✚ Development Corridors - R33 is identified a primary corridor. A tourism corridor from Pomorey to Helpmekaar and to R74 is also linked to Dundee
- ✚ Cross Boundary Dependencies - Helmekaar Rural Settlement cluster and Rorker Drift rural Service centre.
- ✚ Cross Boundary Co-operation - The provision of services should not be duplicated on the identified nodes within the region.
- ✚ Potential Contradictions- No potential contradictions discovered.

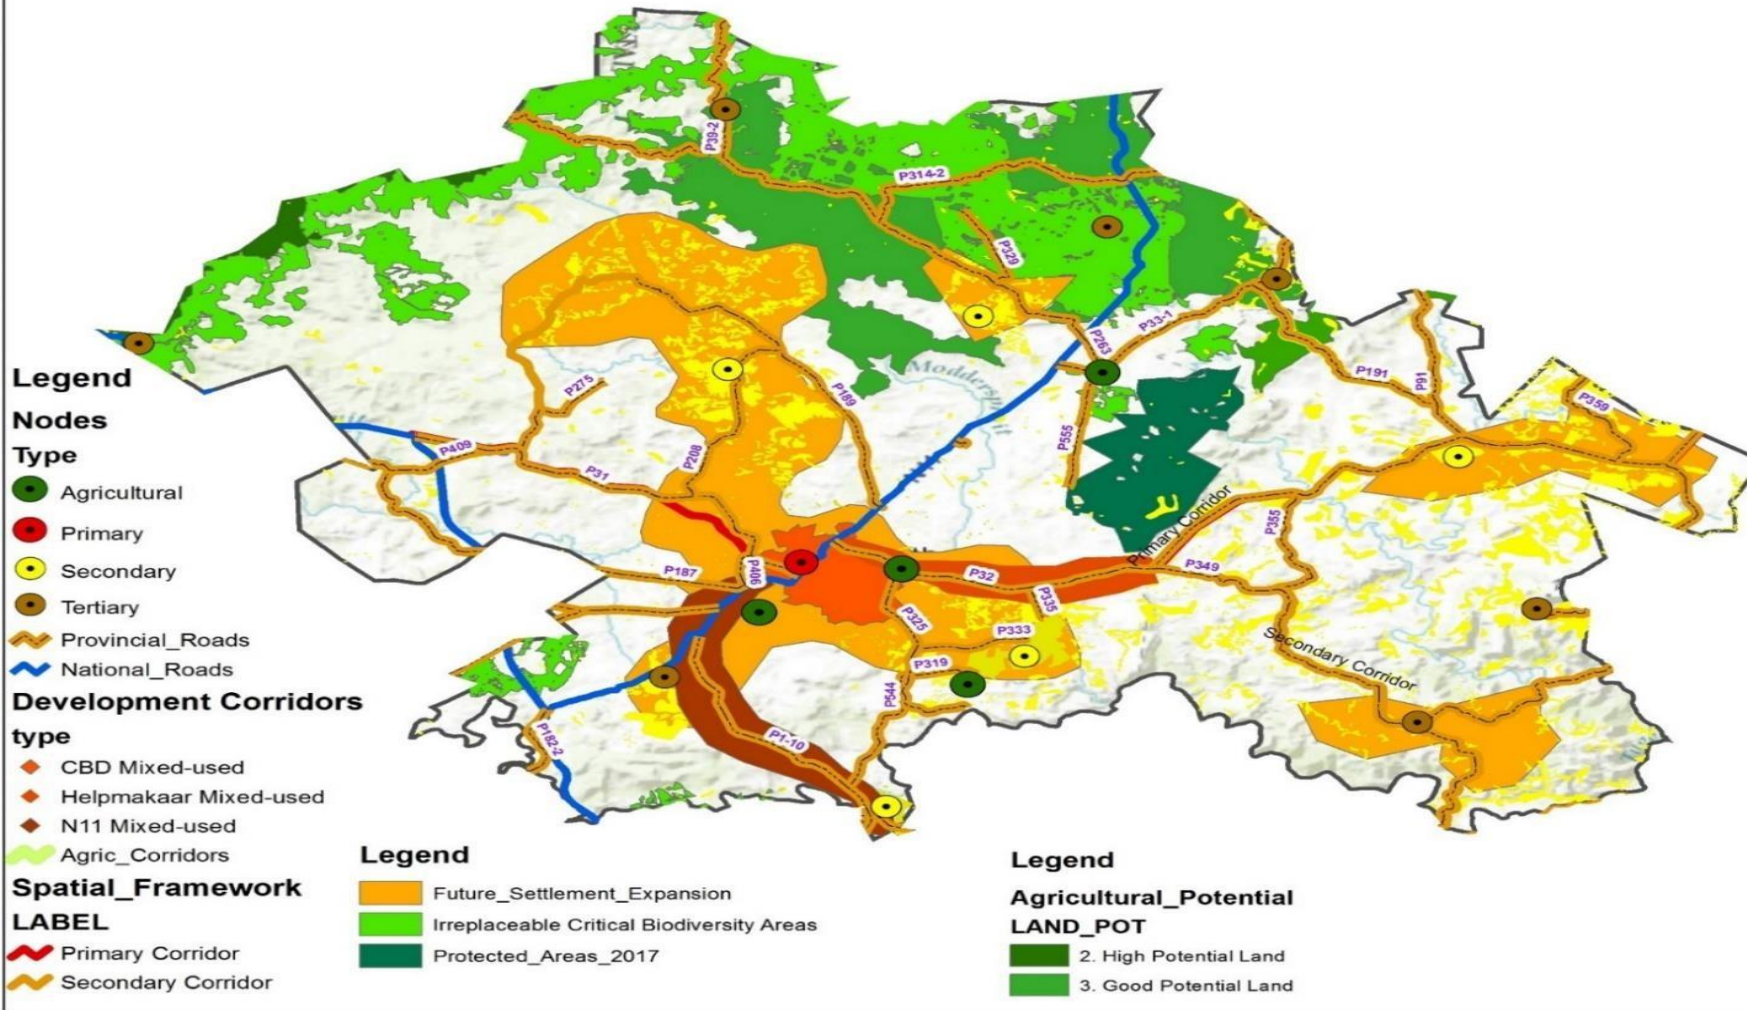

DANNHAUSER LOCAL MUNICIPALITY SPATIAL DEVELOPMENT FRAMEWORK

Dannhauser Local Municipality Alignment Aspects

- ✚ Development Corridors - R33 is identified a primary corridor which runs through both municipalities.
- ✚ Management of high potential agricultural and key industrial mining.
- ✚ Dannhauser, Dundee and Glencoe have Functional linkages between this towns.

Alfred Duma Local Municipality Alignment Aspects

- ✚ Management of high potential agricultural and is a key industrial and agricultural corridor.
- ✚ Management of the escarpment as bio-diversity corridor and a source of e.a number of major provincial rivers.
- ✚ Ladysmith and Dundee have Functional linkages between this town.
- ✚ The N11 does not pass through Endumeni it does provide access to the R602 and R68 for access to the area from the west.

SECTION E.2 IMPEMENTATION PLAN

1. IMPLEMENTATION PLAN

Table 69: Endumeni Local Municipality has prepared an implementation plan according to the National Key Performance Areas of the Five Year Strategic Local Government Agenda and they are also aligned to the departments of the municipality in relation to their implementation. The implementation plans serve as the alignment between the IDP and Budget, and they also unpack the strategies in terms of their programmes.

KEY PERFORMANCE AREA	GOAL	OBJECTIVE	STRATEGY	KPI	BASELINE	MTEF TARGETS			Budget Funding Source	Responsible department
						2021/22	2022/23	2023/24		
Municipal Transformation and Institutional Development.	Ensure the review and adoption of municipal organogram before the 30 June 2022	Improve Institutional and organisational Capacity	Filling of identified critical posts	Date organisational structure review and adopted	30 June 2021	30-Jun-22	30-Jun-23	30-Jun-24	N/A	Corporate Services

44.	Ibusi Multi purpose Centre	Social Amenity	1	TBD	R 6,500,000.00

2.4 ELECTRIFICATION MASTER PLAN

During the 2019/20 financial year, the municipality prepared the electrification master plan which serves to ascertain future growth and upgrading needs of the municipalities 11kV and 6.6Kv distribution networks. The other goals of the electrification master plan are as follows:

- Undertake a physical inspection of the municipalities medium voltage (MV) electricity network;
- Provide a comprehensive single line diagram of the MV network in the electronic format;
- Model the MV network on a suitable power system modelling software and identify any possible weak points;
- Assess electrification needs and backlogs including a growth forecast plan for a ten (10) year period;
- Identification of energy service options including off-grid solutions;
- Analyse the existing networks and determine optimal switching arrangements; and
- Make recommendations on networks strengthening plans with an associated capital plan (CAPEX)

The table below indicates the electrification projects which have been packaged as part of the master plan, which include the project description, estimated costs, timing in terms of the financial year and estimated households to be serviced. These projects have been packaged in terms of the project costs for Dundee and Glencoe, as Wasbank is being supplied by Eskom:

Table 71: DUNDEE PROJECT COST SUMMARY

No.	Project Description - Dundee MV Network	Estimated costs	Timing	Remarks	Estimate of people likely to benefit from the proposed project
1.	Negotiate with Eskom for a new 20MVA NMD for Dundee Main Intake bulk input point by year 2021.	12,00	2021	Notified Maximum Demand Upgrade: Limitation: Notified Maximum Demand (NMD) Exceedance. Dundee Intake peak maximum demand projected to exceed current NMD by year 2022. The current NMD of the Dundee Main intake substation is 17MVA and it is projected that the peak maximum demand will above this value year 2023. A new NMD of 20MVA has to be negotiated with Eskom Distribution by year 2021.	<ul style="list-style-type: none"> • 9842 Households
2.	Negotiate with Eskom for a new 20MVA NMD for Dundee Main Intake bulk input point by year 2021.	21,60	2024	Network upgrade: Sibongile A & B Ring is overloaded above 150% cable rating during a single leg cable outage contingency. This will result in increased cable insulation and cable joint failures if the cable is loaded beyond its allowable thermal rise threshold limit. The ring has a 95mm2 XLPE cable currently installed.	<ul style="list-style-type: none"> • General / Unskilled labourers for the excavation of cable routes. • Skilled labourers (Electricians). • Professionals (protection relays coordination)

3.	Upgrade the Dundee Central A & B cables to a minimum of 2 x300mm2 XLPE copper cable. Choose one option between or	37,20	2022	Network Upgrade: Dundee A & B Ring is overloaded above 200% cable rating during a single leg cable outage contingency. This will result in increased cable insulation and cable joint failures if the cable is loaded beyond its allowable thermal rise threshold limit. Currently the ring is composed of 95mm2 and 150mm2 XLPE cables in parallel.	<ul style="list-style-type: none"> • General/ Unskilled labourers for the excavation of cable routes. • Skilled labourers (Electricians) • Professionals (protection relays coordination)
----	---	-------	------	--	--

4.	Upgrade the Top Town 11KV Ring (Bulwer NR 27-McKenzie NR 3) cables to a minimum of 1 x 150mm ² XLPE copper cable or	28,10	2023	Network Upgrade: Top Town 11KV Ring (Bulwer NR 27-McKenzie NR 3) is overloaded above 226% cable rating during a single leg cable outage contingency. This will result in increased cable insulation and cable joint failures if the cable is loaded beyond its allowable thermal rise threshold limit. Currently the ring has a 70mm ² XLPE cable.	<ul style="list-style-type: none"> • General/ Unskilled labourers for the excavation of cable routes. • Skilled labourers (Electricians) • Professionals: (protection relays coordination)
----	--	-------	------	---	---

5.	De-load the ring by splitting it into 2 rings. Two extra MV circuit panel will need to be installed at Dundee Central if this option is chosen.	13,80	2024	Network Upgrade: Business Central Town 11KV Ring (Central NR2- NLK SUB NR 28) is overloaded above 154% cable rating during a single leg cable outage contingency. This will result in increased cable insulation and cable joint failures if the cable is loaded beyond its allowable thermal rise threshold limit. Currently the ring has a 70mm ² XLPE cable.	<ul style="list-style-type: none"> • General/ Unskilled labourers for the excavation of cable routes. • Skilled labourers (Electricians) • Professionals: (protection relays coordination)
----	---	-------	------	--	---

6.	Upgrade the Bottom Town 11KV Ring (Kajees NR 65 - Dundee Glass MS) cables to a minimum of 1 x 150mm ² XLPE copper cable, or	10,80	2025	Network Upgrade: Bottom Town 11KV Ring (Kajees NR 65 - Dundee Glass MS) is overloaded above 141% cable rating during a single leg cable outage contingency. This will result in increased cable insulation and cable joint failures if the cable is loaded beyond its allowable thermal rise threshold limit. Currently the ring has a 70mm ² XLPE cable.	<ul style="list-style-type: none"> • General/ Unskilled labourers for the excavation of cable routes. • Skilled labourers (Electricians) • Professionals: (protection relays coordination)
----	--	-------	------	--	---

7.	Upgrade Craigieburn 6.6kV MV Overhead line to 11kV template to 70oC using a Hare conductor. Change all the transformers on the feeder to 11//0.4KV voltage ratio.	2,00z	2023	Network Upgrade: Craigieburn 6.6kV MV Overhead line is overloaded above 147% conductor acting during peak load periods. This will result in increased line jumper failures if the overhead line is loaded beyond its allowable thermal	<ul style="list-style-type: none"> • General/ Unskilled labourers for the excavation of cable routes. • Skilled labourers (Electricians). • Professionals: (protection relays coordination)
8.	Replace all Dundee Network old oil MV switchgear in a coordinated phased program.	10,00	2021	MV Switchgear Replacement: Craigieburn 6.6kV MV Overhead line is overloaded above 147% conductor acting during peak load periods. This will results in increased line jumper failures if the overhead line is loaded beyond its allowable thermal	<ul style="list-style-type: none"> • General/ Unskilled labourers for the excavation of cable routes. • Skilled labourers (Electricians). • Professionals: (protection relays coordination).
9.	Replace Dundee old power transformer and minisubstations in the MV network in a coordinated phased program.	11,00	2021	MV Power transformer replacement: Most of the oil filled power transformers are in bad maintenance state with visible oil leaks. This exposes the operating personnel and the general public within the substation vicinity to serious fire and flash hazard risks.	<ul style="list-style-type: none"> • General/ Unskilled labourers for the excavation of cable routes. • Skilled labourers (Electricians). • Professionals: (protection relays coordination).

10.	Replace the fencing for Dundee Main Intake Power factor capacitor to prevent free access to general public. Also carryout maintenance on capacitor banks.	11,00	2021	MV Power transformer replacement: Power factor capacitor banks at the Dundee Main Intake (installation is outside main substation) have no controlled access. The fence of the installation has broken down there is a high risk of the public/vandals attempting to cut the energised 11Kv cables supplying these bank	<ul style="list-style-type: none"> • General/ Unskilled labourers for the excavation of Fencing routes and installation. • Skilled labourers (Fore-man). • Professionals: (protection relays coordination).
11.	Dundee MV network Protection Relay maintenance and coordination studies	1,50	2020	MV Equipment Protection maintenance and upgrade: Glencoe MV protection checks have not been done for the past 5 to 10 years. It is important to periodically check the correct intended functioning of protection systems to ensure that they will be able to operate and initiate fault isolation.	<ul style="list-style-type: none"> • General/ Unskilled labours for the excavation of cable routes. • Skilled labourers (Electricians). • Professionals (protection relays coordination)

Table 72: GLENCOE PROJECT COST SUMMARY

No.	Project Description - Dundee MV Network	Estimated costs	Timing	Remarks	Estimate of people likely to benefit from the proposed project
-----	---	-----------------	--------	---------	--

1.	Negotiate with Eskom for a new 10MVA NMD for Glencoe Bulk input point by year 2020	10,00	2020	Notified Maximum Demand Upgrade: Limitation: Notified Maximum Demand (NMD) Exceedance. Glencoe Intake peak maximum demand projected to exceed current NMD by year 2020. The current NMD of the Glencoe Main intake substation is 7MVA and it is projected that the peak maximum demand will be above this value year 2020.	4339 Households
2.	Upgrade the OK-Value to Sub 3 MS 11 KV Ring (Inner Ring) 16mm ² and 35mm ² PILC cable segments to a minimum of 70mm ² XLPE copper cable.	5,50	2020	Network upgrade: Cable is overloaded during one leg cable outage contingency on the ring.	<ul style="list-style-type: none"> • General / unskilled labourers for the excavation of cable routes. • Skilled labourers (Electricians). • Professionals (protection relays coordination)

3.	Upgrade the Robor - Sithembile to Abattoir 11kV Ring cables to a minimum of 2 x95mm ² XLPE copper cable and OHL line portion to Hare conductor template at 70oC or	12,00	2024	Limitation: Cable is overloaded during one leg cable outage contingency on the ring. Robor - Sithembile to Abattoir 11kV Ring is limited by 35mm ² XLPE cable and Vlei overhead line segments. The 35mm ² PILC cable segments is overloaded above 260% cable rating during a single leg cable outage contingency.	<ul style="list-style-type: none"> • General / unskilled labourers for the excavation of cable routes. • Skilled labourers (Electricians). • Professionals (protection relays coordination)
4.	Upgrade SAR Sub- to PIETER VAN DERBERG SUB 6.6kV MV Feeder to 1x150mm ² XLPE 11kV cable feeder. Change all the transformers on the feeder to 11//0.4KV voltage ratio. Note that most power transformers in this ring have a dual voltage transformation ratio, (11 - 6.6/0.4KV)	17,00	2025	Network Upgrade: SAR Sub- to Pieter Van Derberg feeder ring is limited by 16mm ² PILC cable segments. The 16mm ² PILC cable segments are overloaded above 500% cable rating during a single leg cable outage contingency.	<ul style="list-style-type: none"> • General / unskilled labourers for the excavation of cable routes. • Skilled labourers (Electricians). • Professionals (protection relays coordination)
		15,00	2025		<ul style="list-style-type: none"> • General / unskilled labourers for the excavation of cable routes.

					<ul style="list-style-type: none"> • Skilled labourers (Electricians). • Professionals (protection relays coordination)
5.	Upgrade 2nd Avenue Sub to Civic Sub 6.6 kV MV Ring feeder to 1x70mm ² XLPE 11kV cable feeder. Change all the transformers on the feeder to 11//0.4KV voltage ratio. Note that most power transformers in this ring have a dual voltage transformation ratio, (11 - 6.6/0.4KV)	7,20	2022	Avenue Sub to Civic Sub 6.6 kv MV Ring feeder ring is limited by 16mm ² PILC cable segments. The 16mm ² PILC cable segments are overloaded above 200% cable rating during a single leg cable outage contingency.	<ul style="list-style-type: none"> • General / unskilled labourers for the excavation of cable routes. • Skilled labourers (Electricians). • Professionals (protection relays coordination) <hr/> <ul style="list-style-type: none"> • General / unskilled labourers for the excavation of cable routes. • Skilled labourers (Electricians). • Professionals (protection relays coordination)

6.	Replace all Glencoe Network old oil MV switchgear in a phased coordinated manner.	5,00	2022	MV Switchgear Replacement: Most of the switchgear is oil filled and has been operated beyond its operational life with serious implications of components disintegration inside each switchgear unit. This expose both the network and operating personnel to fire and flash hazard risks during operation	<ul style="list-style-type: none"> • General / unskilled labourers for the excavation of cable routes. • Skilled labourers (Electricians). • Professionals (protection relays coordination)
7.	Replace Glencoe old power transformer and mini-substations in the MV network in a phased program.	5,00	2020	MV Power transformer replacement: Most of the oil filled power transformers are in bad maintenance state with visible oil leaks. This exposes the operating personnel and the general public within the substation vicinity to serious fire and flash hazard risks.	<ul style="list-style-type: none"> • General / unskilled labourers for the excavation of cable routes. • Skilled labourers (Electricians). • Professionals (protection relays coordination)

8.	Glencoe MV network Protection Relay maintenance and coordination studies	1,50	2020	MV equipment Protection Maintenance and upgrade: Glencoe MV protection checks have not been done for the past 5 to 10 years. It is important to periodically check the correct intended functioning of protection systems to ensure that they will be able to operate and initiate fault isolation.	<ul style="list-style-type: none"> • Skilled labourers (Electricians). • Professionals (protection relays coordination)
9.	Install metering on all 11kv substation incomers and feeders	0,80	2020	MV network Statistical Metering: No statistical metering for monitoring loading and energy losses on all MV feeders	<ul style="list-style-type: none"> • Skilled labourers (Electricians). • Professionals (protection relays coordination)
Total Project Estimate (R (Millions))		87,80			

2.5 UNFUNDED ELECTRIFICATION PROJECTS

The following table 73 indicates the electrification projects which are required to be implemented by the municipality and Eskom as obtained during the IDP Roadshows, but they are not funded as yet, and external funding and forming partnerships with the private sector and also the mining houses which are operating within the municipal jurisdiction, to enable the success implementation of these projects.

2.6 HUMAN SETTLEMENT MASTER PLAN

The municipality has a Human Settlement Master Plan in place which is a sector plan of the Integrated Development Plan (IDP) and constitutes a framework to guide the Municipality in performing its functions and executing its mandate in terms of the provision of human settlements in the Municipality as mandated by the Constitution, the National Housing Act and other related human settlement related legislation and policies.

The municipality has been implementing human settlement projects to address the shelter needs of the population and improve the standard of living of the local communities. The projects being implemented fall within different categories and include Integrated Residential Development Programme, Upgrading of Informal Settlements, Rural housing, rectification and others.

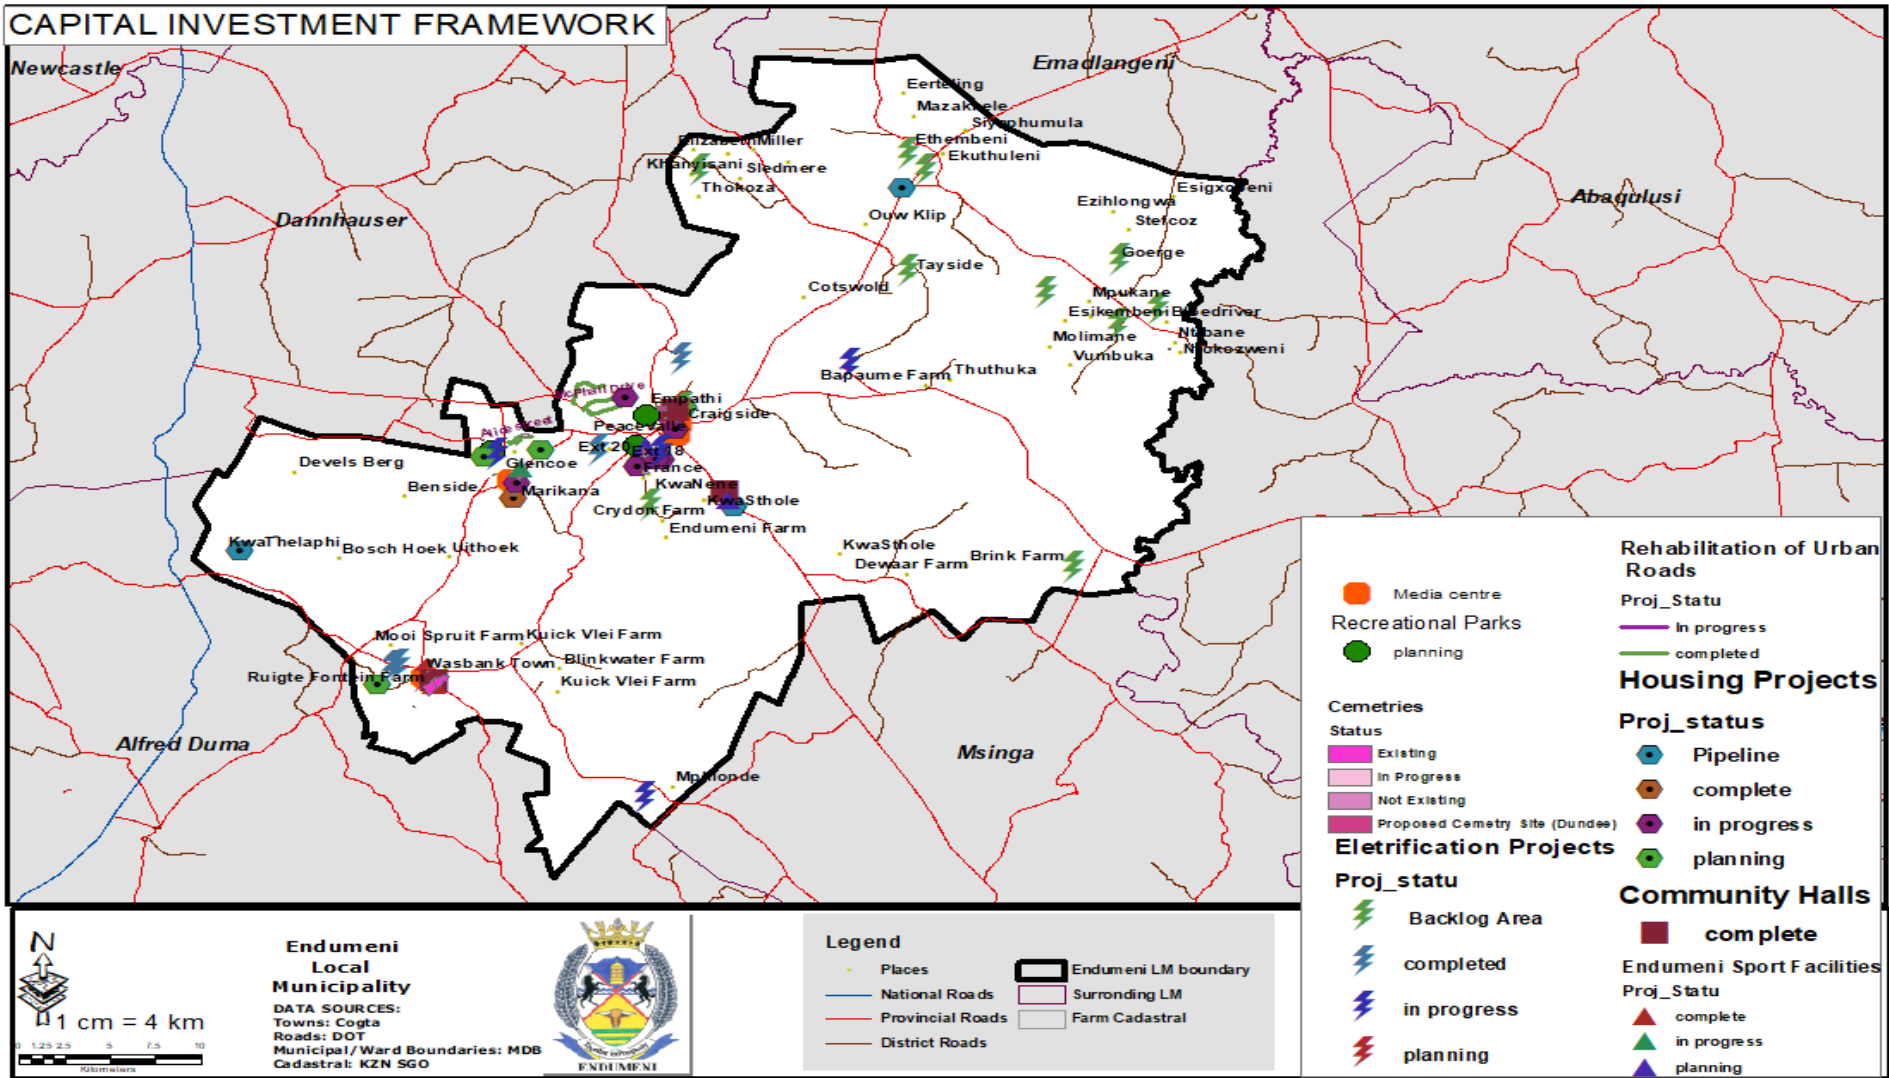

The KZN Settlement Spatial Master Plan objectives:

- a) Spatial transformation
- b) Compact Settlements and settlement patterns
- c) Connected Settlements and settlement patterns
- d) Integrated Settlements and settlement patterns
- e) Functional residential property market in urban and rural areas
- f) Consistent application of principles and objectives across various scales (provincial regional, local precinct etc)

Map 59: Capital Investment Framework

SECTION F: FINANCIAL PLAN

1. FINANCIAL PLAN 2021/2022

This is the executive summary of the Endumeni Local Municipal Financial Plan 2021/22.

1.1 BACKGROUND AND PROCESS

The purpose of the annual budget is to provide details of available sources of revenue, expenditure requirements and operational surplus / deficit. It is a tool for implementation of council policies, a basis for control of revenue and expenditure. It also informs the tariff calculations.

The budget process began with the approval of the Budget Process Plan by Council. Inputs and requests were received from the various departments and consolidated by the Budget and Treasury Department. A budget steering committee meeting was held on the 23rd March 2020.

Similar to the rest of government, municipalities face a difficult fiscal environment. Even as demand for services rises, weak economic growth has put stress on consumer's ability to pay for services, while transfers from national government are growing more slowly than in the past. The local economy is beginning to recover after a short recession in early 2017, however the improvement is insufficient. Growth has remained stagnant at less than 2% and the unemployment remains high at 29%.

The budget has been prepared after due consideration of the difficult economic conditions, the current performance of the municipality, as well as its financial position, spending patterns, service delivery capacities and financial and economic indicators. Financial sustainability remains the municipality's primary long-term goal. Management has tried to find a balance in ensuring the financial sustainability of the municipality whilst ensuring that the tariffs are cost reflective and affordable to the community.

1.2 OPERATING BUDGET

With the compilation of the budget, there were numerous requests for expenditure that could not be included in the budget. The reasons for this can be attributed to the significant amount lost due to electricity theft. The municipality is now considering the introduction of split meters to deter and curb the theft. Service delivery related expenditure has however been prioritised.

The national government has been aware of the need to contain costs and Cabinet resolved that all spheres of government, including municipalities and municipal entities must implement measures to contain operational costs and eliminate all non-essential expenditure.

Expenditure line items have yet again been reduced in an effort to contain costs and eliminate non- priority spending. Firm control over expenditure is necessary together with revenue collection and revenue enhancement initiatives. The 2020/21 financial year National and Provincial grant allocations are as follows:

- Equitable Share – R51m
- Municipal Finance Management Grant (MFMG) – R2.2m
- Municipal Infrastructure Grant (MIG) – R15.1m
- Expanded Public Works Programme (EPWP) – R1.3m
- Energy Efficiency Grant – R4m
- Museum Subsidy – R488 000
- Cyber Cadet Library grant – R1.089m
- Library Subsidy – R3.619m

1.3 CAPITAL BUDGET

The needs identified for capital projects were reviewed more than once. The capital budget amounts to R 27 386 693.00 which includes R14 687 000 MIG, R30 000 FMG, R4 000 000 Energy Efficiency and Internal funds R8 669 693.

1.4 THEFT OF ELECTRICITY

The theft of electricity continues to remain a significant challenge to the financial sustainability of the municipality. Despite the measures put into place to curb theft in the past years, a significant amount is still lost, and management will implement more stringent controls in the new year. The loss of revenue caused by the theft of electricity (meter-tampering) cannot be over emphasised, we have also included in the budget the cost of auditing of meters within the municipality. The loss of revenue due to electricity theft is dealt with in more detail under the heading challenges.

1.5 CHALLENGES

Due to the economic landscape, municipalities are under pressure to generate revenue. The ability for customers to pay for services is declining. As a result, we continue to still experience meter tampering.

METER TAMPERING (THEFT OF ELECTRICITY)

The theft of electricity continues to remain a significant challenge to the financial sustainability of the municipality. Despite the measures put into place to curb theft in the past years, a significant amount is still lost, and management will continue to explore innovative ways to curb theft and implement more stringent controls in the new year. The loss of revenue caused by the theft of electricity (meter-tampering) again cannot be over emphasised, we have also included in the budget the cost of auditing of meters in the municipality. The loss of revenue due to electricity theft is dealt with in more detail under the heading challenges.

Table 75: The loss of revenue from electricity services due to theft by means of tampering with electricity meters for the first seven months of the 2019/20 financial year is calculated as follows:

kWh Purchased	R62 152 459
kWh sold	
Loss	R13 550 538
Calculated distribution 8% loss -KwH	R 6 917 524
calculate lost due to theft	R19 242 645

Management has implemented an action plan to address this challenge, a meter auditing company has been appointed and continuously inspect meters in the municipal area and disconnecting the tampered meters. Management has noted that some progress has been made with reducing the theft, however despite the efforts made by the municipality it has also been noted that the community persists in the tampering with the meters.

Management will continue to monitor this matter as this matter has a significant impact on the financial sustainability of the municipality. The reality is that theft of electricity will eventually cause a major cash flow crisis if not addressed. Ward Councillors and

members of ward committees have all been engaged and much community awareness initiatives have been implemented to drive this process. Management will continue to explore innovative ways to prevent and detect meter tamper and apply more stringent controls in the area of revenue enhancement and debt collection. Table 76

Areas	% losses due to theft
Dundee	18%
Glencoe	29%

1.6 NON-PAYMENT FOR RATES AND SERVICES

The rate of non-payment for rates and services leads to the need for a high provision for bad debt. The contribution to the bad debt reserve for 2020/21 is calculated at R 7 463 668.00. This contribution again has to be financed.

Irrecoverable debts have been written off in the previous financial year and much has been done to provide incentives to consumers to pay arrear debt and cleanse the debtors book. Management also encourages debtors who are classified as indigent to complete the necessary documentation to ensure that they register as Indigents and take advantage of the additional rebates and free basic services provided to them.

1.7 TARIFF PRINCIPLES

In funding the operational budget, the following criteria provide a good indication of the various levels to which the tariffs for individual services should be adjusted:

- **Trade services**

Services such as electricity are classified as trade services, where tariffs should be determined in a way that will ensure that the service is delivered at a surplus.

- **Economic Services**

A service such as refuse removal is classified as an economic service. Tariffs should be set at a level to ensure that expenditure is recovered and that there is at least a break even

- **Subsidised services**

These are services not classified as Trade or Economic Services and funded from sundry revenue and revenue obtained from property rates.

TARIFF INCREASES

Having consideration of the difficult economic realities of consumers and also the necessity to ensure sustainability, it would be necessary to increase certain tariffs to fund the expenditure provided for in the budget.

- **Rates:**

The rates tariff will increase by 5% from the prior year.

- **Refuse removal:**

In considering the tariffs for this service, a general increase of 5% in related tariffs is required to render a sustainable service.

- **Electricity**

In order to ensure a financial sustainable service, the municipality will apply increase of 6.24% on electricity tariffs.

- **Miscellaneous tariffs**

Miscellaneous tariffs have been adjusted to be cost reflective and have been attached in the tariff of charges section of the budget.

1.8 BUDGET SUMMARY (OPERATIONAL EXPENDITURE) FOR 2021/22

Table 77: Budget Summary

BUDGET SUMMARY:		
Operational Expenditure:		
Salaries and allowances (Excl Provision)	130 202 497	38%

Councillor allowances	4 509 145	1%
Purchase of electricity	108 932 080	32%
External Audit fees	3 800 520	1%
Transport cost	7 048 684	2%
Security	11 113 399	3%
Conditional grant spending	13 752 551	4%
Depreciation (Excl Asset impairment)	14 352 050	4%
Other expenditure	27 803 635	8%
Repairs and Maintenance	11 409 166	3%
Provisions:	2 540 140	1%
Post retirement expenses		
Bad debt reserve	7 463 668	2%
	1.10.1	7 535
		100.00%

1.9 OVERVIEW OF BUDGET RELATED POLICIES OVERVIEW AND AMENDMENTS

The Municipality's budget is guided and governed by relevant legislation and budget related policies.

The main purpose of budget related policies is to guide the budget process and inform the projections of the medium-term budget. The following budget related policies, which have been approved by Council or currently under review, are currently in force to ensure an informed smooth budgetary process and financial management of the municipality in line with the Municipal Finance Management Act, other relevant legislation and accounting Standards.

Assessment Rates Policy

Section 3(1) of the Local Government Municipal Rates Act, 6 of 2004, and sections 62(1) of the MFMA determines that a municipality must adopt and implement a rates policy on the levying of rates on rateable properties.

Other Budget related policies

Other budget related policies have been reviewed and the amendments to Council adopted policies.

LEGISLATION COMPLIANCE STATUS

The Municipal Finance Management Act, No. 56 of 2003 came into effect on 1 July 2004. The following main processes amongst others mentioned below, have been implemented in terms of the Municipal Finance Management Act:

- The budget processes.
- Supply Chain Management.
- GRAP Financial Statements. Financial in-year reporting.
- Adjustment budgeting Annual reporting.
- Compilation and implementation of various policies.

The budget and Treasury Office has been established in accordance with the requirements of Service Delivery and Budget Implementation plans are applied as monitoring tools

- Audit Committee has been established ALIGNMENT OF BUDGET WITH IDP
- The budget is aligned to the IDP, which is prepared for approval by end of June 2020. In terms of the IDP priorities, capital and maintenance of roads, electricity provision, cemeteries and community facilities are incorporated in the budget.
- In the financial field financial sustainability has been addressed.

Some of the more important matters that we continue to seek innovative measures in addressing are the following:

- Re - Obtaining the "Clean" audit report, which was previously achieved in 2015/16 financial year;
- Improving the revenue management processes and procedures eliminating the theft of electricity / meter tampering;
- Revenue collection and enhancement strategies;
- Intensification of cost containment measures, in keeping with national guidelines; and
- Ensuring value for money through procurement process.

TABLE 78: 2021/22 SOCIAL DEVELOPMENT PROGRAMMES

Operating Programmes	Proposed Budget 2021/22
Women and Children Fund	R 150 000.00
Ward Allocation (Ward Assist)	R 350 000.00
Civic Presentations	R 150 000.00
ARTS AND CULTURE	R 300 000.00
Sport, Youth Development	R 550 000.00
Rural Horse-Riding Event	R 500 000.00
Disabled People	R 110 000.00
Social Development HIV AIDS	R 120 000.00
Disaster Fund	R 320 000.00
BURSARIES	R 450 000.00
Communications Strategic	R 200 000.00
Public Participation Programmes	R 380 000.00

SECTION G: ANNUAL OPERATION PLAN (SDBIP)

1. SERVICE DELIVERY AND BUDGET IMPLEMENTATION PLAN

The 2021/2022 Service Delivery and Budget Implementation Plan will be approved within 28 days after the adoption of the 2021/22 Budget, as required in terms of Municipal Financial Management Act. The Service Delivery and Budget Implementation Plan will be prepared in line with the National Treasury circular identifying key components as follows:

- Monthly projections of revenue to be collected for each source;
- Monthly projections of expenditure (Operating and Capital) and revenue for each vote;
- Quarterly projections of service delivery targets and performance indicators for each vote;
- Ward information for expenditure and service delivery; and
- Detailed capital works plan broken down by ward over three years.

The documents which will form part of the 2021/2022 Service Delivery and Budget Implementation Plan will be as follows:

- Organisational Service Delivery and Budget Implementation Plan; and
- Departmental Service Delivery and Budget Implementation Plan.

SECTION H: ORGANISATIONAL AND INDIVIDUAL PERFORMANCE MANAGEMENT SYSTEM

1. ORGANISATIONAL PERFORMANCE MANAGEMENT SYSTEM

Performance Management is a strategic approach to management, which equip leaders, managers, employees and stakeholders at different levels with a set of tools and techniques to regularly plan, continuously monitor, periodically measure and review performance of the organisation in terms of indicators and targets for efficiency, effectiveness and impact.

Chapter 6: of the Municipal Systems Act (No 32 of 2000) requires municipalities to:

A municipality must:

- (a) Establish a performance management system that is:
 - Commensurate with its resources;
 - Best suited to its circumstances; and
 - In line with the priorities, objectives, indicators and targets contained in its Integrated Development Plan.
- (b) Promote a culture of performance management among its political structures, political office bearers, and councilors in its administration; and
- (c) Administer its affairs in an economical, effective, efficient, and accountable manner.

2001: Municipal Planning and Performance Regulations states that:

- Performance Management System must entail a Framework that describes and represent how the municipality's cycle and process of performance management, including measurement, review, reporting and improvement, will be conducted; and ;
- Performance Management System must inter alia comply with the requirements of the Systems Act, relates to the municipality's employee performance management processes and be linked to the municipality's IDP.

For the 2021/22 IDP Review, the municipality has prepared a functional and effective Organisational Performance Management System which will address performance needs of the organization.

In terms of measuring the performance of the municipality in implementing the 2020/21 IDP Review, the municipality has an effective Performance Management System in place, and has the following documents in place which guide the review, implementation, monitoring and reporting on performance management system:

- Organisational Scorecards and
- Performance Management Framework.

2. INDIVIDUAL PERFORMANCE MANAGEMENT SYSTEM

Subsequent to the adoption of the 2021/22 IDP Review and Budget , the municipality will then prepare the Service Delivery and Budget Implementation Plan within 28 days after the adoption of the Budget which will serve as a monitoring tool for the implementation of the IDP, and then prepare the performance agreements for the Section 54 and 56 Managers as required by the 2006 Performance Regulations and 2014 regulations on appointment and conditions of employment for Senior Managers which will have to be concluded before the end of July 2021.

The municipality will also undertake the quarterly reviews during 2021/2022 financial year to monitor performance as per the following quarters:

First quarter	:	July – September 2021
Second quarter	:	October – December 2021
Third quarter	:	January – March 2022
Fourth quarter	:	April – June 2022

The performance agreements which be concluded will consist of the following documents:

- Annexure A: Performance Plan
- Annexure B: Personal Development Plan
- Annexure C: Financial Disclosure Form
- Annexure D: Code of Conduct
